Apr 7/8 DARC VHF QRP Contest
Apr 7/8 SP DX Contest
Apr 7/8 EA RTTY Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-109, R9K, Obskaya Gulf group: A group of Russian HAMs (teamlead Igor,
UA9KDF, with Valery,RG8K, Artyom,UA9KAM) is working as RT9K/p from
Zhuravlinyy Island until April 5. Depending on the weather they plan
to reach the island with three snowmobiles. Their radio equipment
includes a TS-590, FT-857, BiggIR, ACOM-1010 and more.
QSLs will be sent via bureau automatically. Direct QSLs via RX9KM.

EU-001, SV5, Dodecanese: Giorgio,IZ4AKS, is going to spend his holidays on
Rhodos Island from April 9-16. If time permits he wants to work as
SV5/IZ4AKS on the HF bands every day using a K3, Yaesu FT897 and wires.
QSL via IZ4AKS (direct).

EU-008, GM/MM, Inner Hebrides: The South Cheshire ARS and Stockport ARS
members Mark,M0UTD, Ray,M1REK, and Tom,M0DCG, plan to activate three
islands of the Inner Hebrides as GM6TW and GM6TW/p from April 7-13.
Their main location is Jura Island (IOSA NH21, Loc IO75AT, WLOTA 3078).
They plan more trips to Islay Island (IOSA NH22, Loc IO65TS,WLOTA 1826)
on Apr 9 and also to Colonsay Island (IOSA NH19, Loc IO65WU,WLOTA 1574)
on Apr 11. QSLs via M0UTD (bureau/direct/LoTW).

EU-012, GM/MM, Shetland and Fair Isle: The special event station GB2WG will
be activated from Scalloway (Shetland) on Apr 8-20 to commemorate the
Titanic tragedy 100 years ago and the special role of Walter Gray
(hometown: Scalloway). Walter was the radio operator at Cape Race on
Newfoundland who passed along the messages of the sinking Titanic to
New York. QSL via MM5PSL (bureau/direct).

EU-042, DL, Schleswig-Holstein State North West group: Klaus,DL7UXG/p, will
be QRV from Foehr Island (GIA N-17, WLOTA 4067) from Apr 10&#65533;12.
QSL via homecall (bureau/direct).

Thomas,DJ6OI/p, is active from Sylt until April 8. QSL via homecall.

NA-138&#65533; W4, Florida State North East: Sherry,KD4STW, and Randy,AJ4RW, are
going to visit Little Talbot Island (USi FL116S) on Apr 6 and will show
up from there as AJ4RW in SSB on 20m and 15m. If possible they will
also try to make some RTTY and PSK31-QSO's. QSL only direct via AJ4RW.

NA-143, W5, Texas State East: On Apr 5&#65533;8, Joe,K5KUA/5, will be QRV again
from Galveston Island (USi TX001S, Galveston County) mainly in SSB on
80m-10m and maybe also some CW. QSL via homecall (bureau/direct/LoTW).

Planning your activities:
> Activity week WLOTA during the 1st weekend of July
> IOTA Contest on July 28/29
> ILLW Activity Week from August 1-8
> ARLHS Weekend during the 3rd weekend of Augusts

Mystic Aquarium Presents Titanic Week:

Posted: 02 Apr 2012 05:04 PM PDT
http://www.eham.net/articles/28023

MYSTIC, CT - Sea Research Foundation's Mystic Aquarium presents "Titanic Week" Thursday, April 12 through Wednesday, April 18. Opening on April 12, guests will be among the first people to experience "Titanic - 12,450 Feet Below," the Northeast's largest, most captivating, permanent exhibit marking the centenary of Titanic. Located in Mystic Aquarium's Ocean Exploration Center and presented by United Technologies Corp., "Titanic - 12,450 Feet Below" is a long-planned, multimillion-dollar exhibit that takes guests on a journey to new depths of discovery through the eyes of the team that found Titanic. It represents a creative collaboration between famed ocean explorer and Sea Research's Institute for Exploration President Dr. Robert Ballard, who first located the legendary shipwreck in 1985, and Tim Delaney, former 30-year Walt Disney "Imagineer" and current owner of Tim J. Delaney Design.

//
Billy Burdette, K4NJS (SK):

Posted: 02 Apr 2012 05:04 PM PDT
http://www.eham.net/articles/28022

SPARTANBURG, SC-- Billy Heller Burdette, 81, formerly of 764 N. Church Street, passed away Sunday, March 25, 2012. Mr. Burdette was born December 13, 1931, in Seneca, SC to Paul E. and Inez Smith Burdette. He lived most of his life in his home on North Church Street in Spartanburg where he ran a radio and TV repair shop and then later the "Browse Barn." He attended church at the Spartanburg First Wesleyan Church. Mr. Burdette was a past member of the Spartanburg Amateur Radio Club and he was a current member of the Old Friends Amateur Radio Group. He was a dedicated amateur radio operator having the call letters K4NJS. Billy was a colorful figure attending dozens of "Hamfests" over the years. He will be missed by his family and those in the "Ham Radio" community.

//
Charles Lee McAtee, KF4YZA (SK):

Posted: 02 Apr 2012 05:04 PM PDT
http://www.eham.net/articles/28021

BROOKSVILLE -- Charles Lee McAtee, 78, of Brooksville, died Sunday, April 1, 2012, at his residence. He leaves behind his wife, Mrs. Bobbi Jane McAtee. Mr. McAtee was born Nov. 10, 1933, in Bracken County to his parents, the late Raymond and Irene McClanahan McAtee. He was retired from Verizon as a telephone company technician. He was a member of the Greater Mason County Amateur Ham Radio Association. He was a member of the Brooksville Baptist Church, a former member of the Brooksville Jaycees, and a U.S. Army veteran.

//
James White, RIC Emeritus Professor, W1PHW (SK):

Posted: 02 Apr 2012 05:03 PM PDT
http://www.eham.net/articles/28020

James E. White, Rhode Island College professor emeritus of English, died on March 26 in Orange City, Fla. He was 86. He taught modern poetry and drama and American literature and Irish studies at RIC for 32 years, beginning in 1956. He served as department chair from 1966-69 and made major contributions to the governance of the college during his three decade of service. He also published numerous articles and reviews and presented papers. In honor of his dedication to the people of Rhode Island and its college, April 27, 1988 was proclaimed Professor James E. White Recognition Day by the Governor of Rhode Island. Upon his retirement in 1988, he was appointed to the rank of professor emeritus. James "Jim" White earned a BA from Wesleyan University in 1951, an MA from the University of Connecticut in 1953 and a PhD from Boston University in 1964, all in English. He also attended and taught at the University of Kansas (1952-54, 55-56) and at the University of Tübingen in Germany (1954-55). A native of Meriden, Conn., he enlisted in the Army Air Force in 1944 and served in Aleutian Islands as a radio operator.

Mount Blanc Expedition - HF station at 4.000mt over the Sea

Posted: 03 Apr 2012 02:41 PM PDT
http://forums.qrz.com/showthread.php?340836-Mount-Blanc-Expedition-HF-station-at-4-000mt-over-the-Sea&goto=newpost

Hi everybody, here a "trailer" of our high-altitude expedition (31st March) on the Mount Blanc glacier, around 4.000mt over sea. Really a great experience, both for the human aspects and the technical ones, as well.

For any question, waiting for the final video, please don't hesitate to contact me.

Regards, Elio - IZ2RLJ

MMMonVHF Newsletter No.1 / WEEK 14 2012
2012-04-04 at 20.00 UTC

** MMMonVHF Newsletter / No.01 - WEEK 14/2012 **

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-04-04
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** Meteors in April **

After the long wintertime minimum, meteor activity starts growing in
April. Most significant shower in this period is medium-rate Lyrids,
peaking April 22nd, 05:30 UT. Sporadic Meteors annual minimum is over,
and SPO rates have started increasing towards their seasonal maximum
in late summer. Moreover, some daytime minor showers are also able to
increase overall meteor activity. Have a look to shower predictions
for April 2012 at our MS-Propagationpage.

** MS sprintcontest 2011 awards **

The E-awards for the participants of the MMMonVHF and DUBUS MS Sprint
Contest have been send to their known E-mail adresses. If any of the
participants did not receive his E-award as PDF please contact the award-
manager Erwin, DK5EW.
For sure two stations (ON6NL and ON5GS) will not receive their award as
they received their award in person from Frank, PA4EME, who attended a clubevening
of the radioclub both are members from. A picture of that can be
found on the website of the UBA, section NOL:
http://nol.uba.be/images/stories/fotos_voorpagina/artikel_6nl_5gs.jpg

Full results can be found here: http://mmmonvhf.de/ctest.php

** VHF-day in the Netherlands

Call: PA5KM
Email: pa5km@zeelandnet.nl

Info:
Saturday April 14, 2012 VERON " VHF day "

location :
Cafe zaal de Wielerbaan
Maarheerzerweg 9-11
6021 CN Budel
the Netherlands

Latitude: 51.279095 Longitude: 5.581312
Locator: JO21SG96SX

lectures :

70 MHz by Rob, PE1ITR
LFA yagi design by Justin, G0KSC

radiomuseum nearby is open for visit, has special exhibition old VHF-UHF equipment, during lunch break time for : noisefigure measurement, vector-network analysis, frequency calibration, etc.

SOURCE: Coen, PA5KM ; chairman VERON VHF-UHF committee

NOTE MMMonVHF: Frank, PA4EME, and Peter, PA3BIY, from the MMMonVHF team will visit this day.
If you are living near the meeting place, it will be your chance to meet some wellknown Dutch DX-ers on VHF.

** New beacons for TEP in Namibia **

Please spread out this information, thank you !

Thanks to the cooperation from Italian and Hungarian OM and the helpfulness of Pieter V51PJ, we have now 2 new beacons on air from Namibia for TEP observations.
They are 24h a day qrv from JG82IE

Callsign V51VHF

70.005 CW - 35 Watt - 6el DK7ZB beam N
144.430 CW - ? Watt - 10el. DK7ZB beam N

We all hope to receive them soon.

Best 73's Alex IV3KKW

** ARI EME Marathon 2011 **

The results of the ARI EME marathon 2011 are known.

The results are published here:
http://www.ari.it/images/stories/vhf-2011/WWEME2011.pdf

MMMonVHF is congratulating the winners of each section and invites everybody
to join the 2012 Marathon by making as much EME contacts as possible on
several bands.

** XXI Italian EME Meeting Associazione Radioamatori Italiani **

Tuscany Regional Committee

Hotel Joseph Marina di Pietrasanta - Versilia 21th-22th, April 2012

Saturday, April 21th - afternoon
Welcome to participants, afternoon and evening discussions and EME
sector projects, or free evening in Versilia.

Sunday, April 22 th. h. 09.00
Greetings from the Tuscany Regional Committee.
Papers on the space communications
Award to a distinguished amateur for the activity by the EME
Tuscany Regional Committee in memory of I5TDJ Piero Moroni.

ARI Italian EME Contest CW & New Mode 2011 Prizes
ARI - W.W. EME Marathon Award Prizes 2011

Lunch and Greetings

During the conference will be on a market exchange between amateur and
or work experience.

The Hotel Joseph's 100 meters from the sea, swimming above the
restaurant overlooking the Versilia available.
For lunch reservations and / or night, call James I5JUX at the Hotel
Joseph, specify that you book for the EME Meeting.

The Meeting is open to all and free of charge.

** Swedish EME-meeting 2012, May 11-13, ï¿½rebro. **

In 5 weeks time the swedish EME-meeting will take place. This meeting is organized by Lars, SM4IVE and it's main purpose is socializing with other 432 MHz and up active EME-ers. But also technical lectures and measurements. Also a lecture from the well known M&M team from Germany bout their EME expedition to LY.

Conferencedetails can be found here:
http://www.sm4ive.com/ememeetingmay.htm

SOURCE: Lars, SM4IVE

** Nordic VUSHF Meeting, Eckerï¿½, ï¿½land. **

Radio Amateur Technology Society in Finland (RATS) is organizing the Nordic VUSHF meeting in 2012. The meeting will take place between Thursday, 24 May 2012 and Sunday, 27 May 2012 at Kï¿½ringsund Resort & Conference in Eckerï¿½, ï¿½land. The meeting opens on Thursday, and the official program (presentations and other activities) will start on Friday.

Our last visit to Kï¿½ringsundsby was a blast,
so weï¿½re looking forward to an excellent meeting!

Reservations to Nordic VUSHF 2012 are now open! All reservations and accommodation bookings for the meeting venue are done through the VUSHF meeting organizer team.

More information: http://vushf.rats.fi/

SOURCE: RATS

** DXCC: ZP; 2M EME **

Greetings from Paraguay! Sadly today's operation trying for VE, VK, ZP, and JA only gave us a few broken sequences that could be decoded.

My next dates both look good for EU and maybe for the U.S.

April 6 2130z (my moonrise) again for a long session.

I would prefer not to take skeds for these two dates. I will try to work whoever has the best decode. The frequency will be 144.141 and I will transmit first.

The weekend of April 7th and 8th is not possible for me. I hope the 3rd and 6th will produce a lot of QSOs and a new country for many of you!

73 and hope to work you, de Steve ZP9EH
SOURCE: MOON-NET

** World's largest EME-antenna destroyed. **

Alexander, RN6BN, has lost his 64 array 144 MHz antenna. High winds from about 110 km/hr damaged the roof of a house that was build nearby.

The used metal plates for the roof were blown into his antenna with
great damage. A fgew pictures can be seen on VHFDX.ru:
http://forum.vhfdx.ru/yagi/eme144-rn6bn-nakrylas/

We hope that Alexander is able to repair his antenna and can be QRV
again soon.

FG4KH back again QRV 144 MHz EME

LATEST NEWS from Phil, F1DUZ, dated 2012-03-17:

Operation details :
Call sign : FG4KH
Rig: FT897D, LNA, SSPA 500w, 2x10Xpol DK7ZB
QRG: 144,116 MHz , if any changes due to birdies I?ll advise you
FG4KH TX always 1ST Period
If necessary, I repeat sequences 3 times but not more. If I do not
receive confirmation after 3 times, I jump to another station so you
will have to call me again.
Usaually I do not send 73
No restriction, you can call any time
Don?t forget to spread out between ï¿½ 600Hz.
In this second activity I will try to satisfy all but in first those
who are not in the first log.
It is an holiday style activity,you will find infos on MMMonVHF about
schedule, events and quick log. All others infos and complete log
will be in the expedition web site (see the link below).
See you soon from French West Indies

E2E EME-DXpedition in Thailand around April 2012
Karsten will try to setup a MMMonVHF DXBlog to spread his latest News.

LATEST NEWS from Swen, HS0ZFZ, dated 2011-12-24:

The Radio Amateur Society of Thailand Under the Patronage of His
Majesty the King - HS1A - The clubstation of RAST ? HS0AC ? was
submerged by 2m of waters during the previous century flood ? which
was in the media worldwide - I believe ? some pictures of the club
station after the water tide was gone ? www.qsl.net/RAST or RAST

forum.com RAST and HS0AC lost equipment worth around 200,000 USD
(150.000 Euro) incl. our mainstation rig FT-1000 MK Mark V ? which
is believed will not be able to be repaired. RAST settle up an
account for donations to help the clubstation getting back on air
soon. Donations could be done directly to the club or via paypal
to donate@rast.or.th (wrong in the Newsletter!).
There is also a EME activation ?E2E? planned
during April to help to raise some funds for HS0AC

** DXCC: EA8; square IL38BQ ; start 2012-04-18

Dave, G4RGK, will be QRV again from EA8 with 400W and 9 el Y.
He doesn't know yet how much time can be spent on radio but
tries to be on the N0UK-chat when he has internet. Skeds possible
via E-mail.

SOURCE: G4RGK, direct to MMMonVHF

** DXCC: EY; square MM48; start 2012-04-27

>From April 27 untill April 29, Frank, DL8YHR, and Rene, PE1L, will be
active from Tadzjikistan via EME. The callsign is EY8ZF the locator is
MM48jn near the city of Dushanbe and Dushanbe airport.
Frequencies: 144.134 and 432.090, EY will TX always first.
They will be on N0UK logger. They are only 2.5 moonpasses QRV so do not
miss them. Check the logger for last minute changes in frequency.
More info on:
http://www.emelogger.com/ey/default.asp?page=eme

SOURCE: Frank, DL8YHR and Rene, PE1L, direct to MMMonVHF

** DXCC: 5X; square: KJ60; start 2012-05-25

After some very successfull DXpeditions to the Gambia past year (C56EME
with
361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz), Bonaire
(PJ4X)
and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make
Moonbounce QSO's
from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in
Kenya
(5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is
requested.
If all ok we will have a small 70cm setup with us.

>From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near

Kampala on
the equator.

The plan is to leave May 21st and build up the station before the
weekend. It's
just the two of us but we know what we are doing.
It's a hard job to get the license there. Callsign is still a bit
insecure but
we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a
update
via MoonNet, MMMonVHF and our mailinglist.

If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood. We
have to
come back as often as possible. We can't resist....

73 Rene PE1L and Eltje PA3CEE

** DXCC: ZK2; square AH51; 2012-07-09

6m (&2m) EME DXpedition to ZK2 September 7-21, 2012

Hello! Well, I wanted to provide as much advance time as I could so you could
mark your calendars and/or get everything in your 6m station optimized by the
end of August As those of you know who completed JT65A mode contacts with
me on 6m EME when I was in E51, 3D2 and 5W, I will do my best to set up and be
active during our common moon windows - especially during the optimum days of
the month for 6m EME. The callsign is not in hand yet (but assured by email),
and the QTH has not been finalized, but all the plane tickets have been purchased
(as usual, any contributions are VERY welcome), and the equipment (a KX3 portable
transceiver with compatible 6m amplifier) is in the works. As soon as the license
is in hand, the information will also be available under the callsign on QRZ.com.
In the meantime, preliminary information about the DXpedition is here:

http://www.bigskyspaces.com/w7gj/Niue2012.htm

I don't know if it will be possible to find a QTH that provides my usual preference
for a takeoff shot over water on moonrise. However, that is not necessary to work
NA stations during their moonsets (I will be elevating), so we will get the ground
gain on YOUR end for that And if a QTH with a good moonrise shot (for EU moonset)
cannot be found, it is quite likely that we will instead wind up with a good moonset
over the water for the EU moonrise.
Currently, ZL1RS is planning to activate ZK2 on 2m EME during the same time period,
as we did together from E51 and 3D2; Bob's call will probably be his old callsign of ZK2RS.
More details will be posted on the above website as the departure time at the end of August
gets closer.
I am very much looking forward to giving you a new one on the Magic Band! GL and DX! VY 73,
Lance

SOURCE: tnx to Lance, W7GJ, direct to MMMonVHF

** DXCC: LA; square KQ50; start 2012-08-11

Only 3 Squares remaining on a visit of the OH8K Team in the northern area -
KQ50 will be one and will be tried to activate in August 2012

The plan from Jussi, OH6ZZ and Sami, OH9GDT will be to be qrv from KQ50
during 11-16. August 2012 as LA/OH6ZZ on 2m FSK/EME. QRG and more details
will be spread later...

Once again on 18th April our community will mark the World Amateur Radio Day, honouring the anniversary of the founding of the International Amateur Radio Union on that date in 1925. This year´s theme for the World Amateur Radio Day is: "Amateur Radio Satellites: Celebrating 50 Years in Space" in remembrance the launching of OSCAR 1 on December 12, 1961 and the launch of OSCAR 2 on June 2, 1962.

//
Dahl Gene Kitchen, K8WLJ (SK):

Posted: 03 Apr 2012 05:51 PM PDT
http://www.eham.net/articles/28028

Dahl Gene Kitchen, 76, of Scott Depot, passed away Monday evening March 26, 2012, at Arbors Nursing Home in Gallipolis, Ohio. He was born and raised in Londale, in Putnam County, a son to the late Edward Kitchen and Orbra Hill Kitchen. He graduated from Man High School and worked in the coal mining industry throughout his career in southern West Virginia. He became a mining electrician and equipment maintenance superintendent, earning multiple industry certifications and recognitions for outstanding achievement and safety. He later retired from Addington Coal Company of Kentucky. He was active in his communities where he raised his family, donating countless hours of expertise from his passion as an Amateur Ham Radio operator within his radio clubs, to labor and professional services for his churches, and his immense commitment for years as a leader in teaching his three sons and other boys as a Scout Master in the Boy Scouts of America, where he was recognized with several leadership awards.

Ham Radio Today:

Posted: 03 Apr 2012 05:51 PM PDT
http://www.eham.net/articles/28027

I'm just back from ESC/DESIGN West, which was last week in San Jose. The conference held a very low-key meet-and-greet with students in engineering programs. I had the chance to talk to a couple of Juniors from San Jose State. The meeting was too loosely organized, but I'm told they will tune

the format for the next show in Boston in September. One of the gateway drugs into electronics has traditionally been ham radio. In the past I've commented on its decline. But things have changed. The ARRL (www.arrl.org) reports that as of late last year there are now 700,000 licensed hams in the United States, an all-time high. That's up from 285,000 in 1971. How much of the increase can be attributed to the relaxed licensing requirements? Morse code is no longer needed. The test questions come from pools that are on-line, making it easier to master the material than of yore.

If It Matters To You It Matters To Us!

Email nationalnews@wia.org.au

http://www.wia.org.au (click news in member area) Submit your audio news

TWITTER http://twitter.com/VK1WIA

Please... If you are only submitting text and not audio, write your story as
you would expect to hear it being read back and NEVER send just links &
url's.

THE FOLLOWING STORIES IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR
WEEK COMMENCING APRIL 8 2012.

Now we seldom report on virus's or Trojans, believing that the emails about
such things can be almost more intrusive than the 'bug themselves' and let's
face it if you are not running an auto updating virus scanning program you
deserve what may happen! Hihi.

BUT

Is your computer infected with DNSChanger?

ACMA put out a note about DNSChanger which is malicious software (malware)
that may have been installed on your computer without your knowledge.

Approximately 10,000 Australian internet users are currently infected with
this malware.

If your computer is infected you need to remove it.

If you don't remove it by 9 July 2012, you won't be able to connect to the
internet.

The Australian Communications and Media Authority, CERTAustralia (the
federal government's computer emergency response team) and the Department of

Broadband, Communications and the Digital Economy have collaborated to develop a diagnostic website that, in most cases, shows you whether or not you are infected with DNSChanger.

This website is dns-ok.gov.au

If you are infected, dns-ok.gov.au provides links to tools and detailed documentation that may help you remove the infection.

(ACMA)

MyMP

Improved reception of the commercial radio service 3MP in northern and western Melbourne as the Australian Communications and Media Authority allows an increase to the maximum transmitting power of Melbourne commercial radio broadcasting service 3MP-from 1225 volts to 2140 volts (equivalent to 5 kilowatts to 8.2 kilowatts) and change the direction of its radiation pattern.

This will allow expanded coverage of northern and western Melbourne.

3MP has been previously known by the on-air identities, 3MTR and MTR1377.

This follows public consultation on the proposal, released in November 2011, to vary the Licence Area Plan - Melbourne Radio - June 2000 (the Melbourne LAP).

TARC AND TASSIE do WIA National Field Day

The WIA National Field Day will be happening next Saturday and Sunday April 14th and 15th theTARCinc will be running displays about the different aspects of Amateur Radio at the front door of Jaycar Electronics Townsville store in Ingham Road West End Saturday April 14th from 7-30am.

Hams need to help with this activity to publicise the worthwhile hobby of Amateur Radio to the wider community.

Get along to wave the flag and have some fun as well !

Those listening in VK7 REAST will hold a display again this year as part of the WIA National Field Day. It's on NEXT weekend April 14th and 15th.

Have you got some equipment such as an outdoor marquee or gazebo to help set up a display?

It's a few DAYS away but please give it some thought as to how you can help make this event a success for the club and the hobby in general.

WIA CONFERENCE

I'm Bob, VK6POP, reminding you that the Wireless Institute's Annual Conference is coming up fast. It's now next month instead of sometime in the future.

The Conference dates are Friday 25th to Sunday 27th May.

The weekend program is centred around the Mildura Grand Hotel. The weekend will commence on Friday evening at the historic Settlers Club with a buffet dinner.

On Saturday morning the WIA Annual General Meeting will be followed by the Open Forum. I can assure you that the AGM will be brief and to the point, and should serve as a model for club agms.

The open forum gives Amateur an opportunity to ask Questions of the Board, or to raise issues of interest and concern. Lunch is provided for all registered attendees.

On Saturday afternoon there is a technical symposium at which several items of interest will be presented.

On Saturday evening the Annual Dinner will be held in the Grand Ballroom at the Mildura Grand Hotel.

Sunday will feature a cruise and lunch on the famous Paddleboat Mundoo. For those remaining in Mildura on Sunday night, a casual BBQ has been arranged at the home of Noel Ferguson VK3FI, Fergus Park, Nichols Point.

Accommodation is available at the Mildura Grand Hotel, as well as in several other hotels and caravan parks.

So how about it? Still thinking about going? Or maybe you never gave it any thought until now? Well give it a go. These annual conferences are great weekends, where you get to catch up with old friends and make new ones.

Information about the weekend and an online booking form are on the WIA website, www.wia.org.au

VK4 SILENT KEYS @ 2011 - 2012 QAC YEAR

VK4MUJ Jean Bowden passed away 2nd January 2012 advised by VK4ZZ
VK4BAY Roy Mahoney January 2012 advised by VK4BSH
VK4AFW Frank Alloway 15th January 2012 advised by VK4FABR
VK4KEL Geoff Sanders 4th April 2012 advised by VK4OD

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking.

When computers first entered the consumer electronics market, software soon became available for the original "digital" mode, Morse Code. Soon followed RTTY, Slow Scan TV and Fax. Derivatives of other modes such as TOR, Teletype over Radio and Packet came along.

Today there is a plethora of software especially written for the amateur operator. Nobel prize winner, Joe Taylor, has put his skills to work in developing programs optimised for the weak signal operator. There is so much more work being done in this part of the hobby.

In an attempt to utilise the features of the internet to provide greater diversity of contact types, our sister society, the JARL, sponsored the development of the D-Star modes. For the translation between digital and analogue voice, a firmware codec was chosen. The catch is that the codec is a commercial product which attracts a licence fee for each device in which it is used.

The challenge for the amateur programmers is to successfully develop a freeware alternative. This would allow many of the digital commercial radios coming out service to join the amateur ranks as their analogue antecedents have done.

I'm Geoff Emery and that's what I think....how about you?

CLUBBING

Submitting news items

If you would like to submit news items for inclusion in the
QNEWS broadcasts, please email your item in text to qnews@wia.org.au

Submit audio, read "how to submit items" on the weekly WIA news page.
http://www.wia.org.au/members/broadcast/upload/

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of QNEWS.

BARC
http://www.qsl.net/vk4ba
or, by E-mail to vk4ba@qsl.net

This is Stuart, VK4MSL with news from the Brisbane Amateur Radio Club.

BARCfest will take place *two weeks later* than usual, at 9:30AMSaturday, 26th May 2012, at the usual venue, 1600 Logan Road, Upper Mt.Gravatt.

There will be the usual displays of equipment and parts for sale, techtalks, and of course, an opportunity to catch up with old friends at Cafe-de-BARC. Admission is $7.00.

For further information, see the BARC website:

http://www.qsl.net/vk4ba/

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe & Districts Radio club.

The year just seems to be getting busier and busier. After a successful Moyle, and more about that later, the activities for the club this month are:-

9th April General Business Meeting. Please note Roger, VK4ZLQ will not be present for the meeting and has requested you bring your copy of the minutes to ensure that the they are correct.

>From the 11th till the 16th April, the Wednesday group will be involved in assembling the portable station and equipment for the Titanic anniversary, setting up the station at Maritime Museum, Stanley Street, South Bank, Brisbane, participating in the activity and finally packing up and returning all equipment to the club.

16th April Technical Talk with evening Kevin VK4UG - Meteor Scatter Propagation, and to end the month:-

23rd April Fox Hunt

Well the Moyle has come and gone for another year. This year we had the rain. It was the first time in some 5 years that the club had to stop transmitting for a period of about of 6 hours as it was just too dangerous to the equipment to continue. 2 stalwarts of the club and of the Moyle were Andy, VK4KY and Glenn, Vk4FZ who were back again this year. Antennas were set up on the afternoon of Friday in fine conditions and by 3.30 pm on the Saturday, RAIN. Heavy "Brisbane type" rain for the next 6 hours. Too dangerous to operate in and with the possible damage to the equipment and nothing else to do but to enjoy a few cordials and resume when conditions improve.

Despite all this the field day was a success, many contacts made. Many thanks to the stream of helpers who were there to set up, bringing food and other supplies and for the clean-up who had the site totally cleared by 2 pm on Sunday afternoon.

WIA Queensland Centenary. Kevin VK4UH advised that this year is the centenary celebration of the WIA in Queensland. The club has decided to participate and will apply for the use of the special call sign.

Grace Lutheran College. Kevin VK4UH advised the club that he had approached Grace Lutheran College enquiring about access to the large steerable dish that they have on their grounds. The dish is currently used by senior physics classes and is operational. The College was most receptive to interacting with the club and Kevin believes that the dish could be used for EME activities on 2 metres and higher frequencies.

Just a reminder that James, VK4TJF, conducts CW courses at the club on Thursday evenings from 7.00pm until 9.00pm and about the regular trivia contest conducted on the 70 cm repeater each Wednesday night starting about 7.30 pm. If we don't use the frequency allocation we will lose it!

Well this is about all at the moment and so it's 73 until next time from Ray, VK4CF, from the Redcliffe club.

News from Townsville

As local VK listeners heard in QNEWS last weekend there is to be a 2012 WIA-QAC Presidents Lunch and 100th Anniversary of organized Amateur Radio in Queensland. We now have the venue, Presidents Lunch, hosted by Hervey Bay Amateur Radio Club will be at the Hervey Bay RSL Club starting at 10am on Saturday 21st July. That's at the lower, or Eastern end of the Bay.

WIA President Michael VK3KI will be special guest speaker and attendees will include WIA Directors and members of the WIA-QAC along with committee and members of various QLD Amateur Radio Clubs.

The Centenary Celebration BBQ will also be hosted by the Hervey Bay Amateur Radio Club on Sunday 22nd July.

What use is an f-call?
(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

Recently I was sitting on a plane talking to a person whom I had just met. We were discussing our interests and experience and the subject of Amateur Radio came up.

There was the obligatory CB radio comment and some discussion about marine radio, but the discussion boiled down to this:
"What's the point?"
I eased into
the subject by observing that as a hobby I found it to be technically challenging without it having a direct relationship to my day-job in IT. We discussed the ideas that embody the hobby, non-commercial use, experimentation, discovery, camaraderie. We talked about the natural disasters like Hurricane Katrina, the Boxing Day Tsunami, the Earthquake and Tsunami in Japan and the subsequent issues with their nuclear power plant. I explained about making contacts and exchanging information, call-signs, signal reports, dealing with electricity and backup batteries and the like.

The conversation went for about an hour, we talked about the SES, about HF long distance contacts, the solar cycle, the ionosphere, experiments and the development of technologies like the mobile phone.

The thing that struck me during this conversation, looking at the topics we discussed, some in passing, some in-depth (well, to the depth of my eclectic knowledge at least), that Amateur Radio touches a lot of aspects of society.

I used to think that IT was the only field that impacted the world every where in every which way. Now I'm not so sure. Amateur Radio to me appears to have dibs on a large chunk. I supposes I'm saying that Amateur Radio has a public relations issue, people don't know it exists, yet it affects their lives in ways that most never even notice.

Perhaps all this just relates to
my better understanding of the Radio Frequency spectrum and my personal part in the puzzle, but I think society would benefit from at least a smidgen of the understanding that comes with having an Amateur License.

If you have thoughts on the matter, I'd love to hear from you.

I'm Onno VK6FLAB

SILENT KEY

Geoffrey Allan Sanders VK4KEL has gone silent key following a VERY long battle with various forms of cancer. He was but 62 , born in September of 49 in Horsham VK3.

Geoff was a past President of the Sunshine Coast Amateur Radio Club, Past President of the Wireless Institute of Australia Queensland Division, a former VK4 Federal Councillor and Alternate Federal Councillor of the Wireless Institute of Australia.

MORE IMPORTANTLY - Geoff VK4KEL will be remembered for his support for we VietNam Vets. Geoff, 217459 served with 104 Signal Sqn Vietnam IN 1969.

Geoff was given just 2 hours as he lay in the Prince Charles Hospital Sunday yet fought on until he passed 4th April being kept comfortable during his last days with Jen and his children by his side.

His loss will leave a huge hole in our lives as he has been a friend of ours since commencing QNEWS back i 94-5.

Geoff was President and Secretary of the old WIAQ and when we first started QNEWS on packet radio was the first WIA Official who started to tell it's members "what was what".. thanks to Geoff the walls of WIA secrecy started to be broken...

It wasn't again and not since the late Chris Jones that we knew week to week what our society was doing for us.

I know Geoff will be sadly missed by many others who knew by QSO, WIA work, and his work with the Vet community, knew him well.

More in local QNEWS bulletins as it comes to hand.

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

JOE WALSH, WB6ACU, IS AN ANALOG MAN

Grammy Award-winning rock-and-roll legend Joe Walsh, WB6ACU, returns with Analogue Man, set to be released June 5.

This is Walsh's first solo album since 1992's Songs for a Dying Planet.

Walsh -- best known for his powerful guitar licks -- joined the Eagles in 1976 and is credited for bringing a harder rock sound to the band with the acclaimed Hotel California, The Long Run and Eagles Live.

No stranger to the analogue way of life, Walsh -- an ARRL Life Member -- enjoys operating on 80 metres AM.

Check out Analogue Man -- the title track of Walsh's new album and details of his South African tour starting on 4 April in Cape Town

(SARL)

World Amateur Radio Day

On April 18, 2012 we will celebrate the World Amateur Radio Day on the 87th Anniversary of the founding of the International Amateur Radio Union.

This year's theme for the World Amateur Radio Day is "Amateur Radio Satellites: Celebrating 50 Years in Space" and we will have much more on this world event shortly in our special interest group segment.

50 watts for Foundation holders in Belgium

The UBA reports on plans to allow Belgian Foundation licence holders to run 50 watts on HF instead of the previous 10 watts.

Belgian Foundation holders are currently permitted 50 watts on 144 and 430MHz and 10 watts in the bands from 3.5 to 52 MHz The new proposal means they would be able to run 50 watts on the HF and 6m bands.

The website of the national radio society the UBA says that taking into account the 3dB rule this would permit the use of a standard 100W transceiver.

See the proposals in Google English at
http://tinyurl.com/Belgium50wFoundation

Lightning strike survivor feels lucky to be alive

K.A.K.E. News reports that radio amateur Bill Isles KD 0 IIF is recovering after he survived a lightning strike and used his ham radio to call for help.

Seems the volunteer storm spotter was standing in his backyard and thought the lightning was far away!

"In the distance, I would hear thunder and see lightning. I didn't think anything was quite that close," said Bill. "And it came as quite a shock."

That shock knocked Bill to the ground. The only thing nearby was his amateur radio. When Bill called for help through the ham radio, Mike KD 0 IJO, heard his call and phoned 911.

JAPAN TO LAUNCH AMATEUR RADIO SATELLITES

Big news on the ham radio space scene. This with word that the Japan Aerospace Exploration Agency has announced the upcoming launch of five amateur radio satellites. This, on two launches taking

place this spring and summer. Amateur Radio Newsline's Stephen Kinford, N8WB, is here with more:

The first launch is the H2A that takes place on May 17th. It will carry the amateur radio satellite HORYU-2.

This will be followed on July 21st when the HTV3 mission. It will deliver the JEM-Small Satellite Orbital Deployer or J-SSOD to the International Space Station. That unit will enable small satellites to be deployed from the ISS using the Japanese Experiment Module robot arm.

The Japanese amateur radio satellites WE-WISH and FITSAT-1, along with San Jose State University's TechEdSat and Vietnam's F-1 will also be delivered to the I-S-S on this mission. Plans are for them to be deployed to orbit on September 20th.

For the Amateur Radio Newsline, I'm Stephen Kinford, N8WB, in Wadsworth, Ohio.

ARRL SPONSORING WEBINAR TO HELP YOU PUBLICIZE FIELD DAY

The ARRL Public Relations Committee will be holding a free Webinar on Thursday evening April 12 for Public Information Officers, radio club officers and anyone else wanting to join in. This, to teach the easiest and most effective way to write a press release for Field Day and actually get it noticed by the mass media in your home region.

The webinar will begin at 9 pm Eastern Daylight Time and will run for about 90 minutes. Several experts in mass media communications will be on hand to teach the tricks of the trade in dealing with radio, television and print publications.

Pre-registration is required. To reserve a spot simply take your web browser to tinyurl.com/arrl-field-day-webinar or directly at https://www3.gotomeeting.com/register/278619454.

Space is limited so if you want to take part you need to sign up today.

ESPN EMPLOYEES CREATE THE WORLDWIDE AMATEUR RADIO CLUB

Current and former employees of the Entertainment and Sports Network, better known to the public as ESPN, have formed the Worldwide Amateur Radio Club. Located on the grounds of the ESPN facility in Bristol, Connecticut, the group has now been granted the club call WE1SPN .

At present the club has about 40 members. Inaugural operations were to take place on 7.177 MHz at 21:00 UTC on March 29th.

This opening gala was to include trying to contact as may radio clubs at Disney theme parks as possible.

The Worldwide Amateur Radio Club is the latest bin a long series of broadcast industry based employee recreation entities. It joins similar employee groups at the CBS, NBC, ABC and Fox networks as well as at a number of broadcast stations nationwide and world-wide.

More about WE1SPN can be found by checking the listing page for their callsign on QRZ.com

ANDY SENNITT TO RETIRE FROM RNW END OF APRIL

Andy Sennitt who edited the now closed Radio Netherlands Media Network weblog says that he will be retiring from that international broadcaster at the end of April. Sennitt says that during his last weeks at Radio Netherlands that he will be writing a series of articles reflecting on the changes in international broadcasting since he started appearing on the Media Network radio show in 1981 as well as looking ahead to the coming decade.

This perspective will be published on the Radio Netherlands English language website. Sennitt asks that if you have any memories of Radio Netherlands or any other international broadcasters that you would like to share, please e-mail them to him. He can be reached at MediaNetwork (at) rnw (dot) nl. Sennitt adds that he will try to include them in the articles as is possible.

NASA ANNOUNCES ISSLIVE! APP

NASA has announced the release of the ISSLive! app for iPhone, iPad and Android devices. Amateur Radio Newsline's David Black, KB4KCH, has the details:

The ISS Live! app delivers live streaming data from the International Space Station. Users can take a virtual 3-D tour of the Mission Control Centre and the space station, and view mission control console displays with real-time data. Interactive educational lessons using the data, as well as crew and science timelines with individual crew member, social media and

international science experiment details are also available via the app.

The space agency calls ISSLive! an innovative, interactive application that provides a novel way to learn about the International Space Station while on the go. To learn more and find links to download the ISSLive! app, visit spacestationlive.jsc.nasa.gov. That's where you will find the icons for the iPhone App Store and the Android Market.

I'm David Black, KB4KCH, from the South-East bureau in Birmingham, Alabama.

NASA CONSIDERING LAGRANGE POINT OUTPOST

NASA is pressing forward on assessing the value of a human-tended outpost near the far side of the moon. One that would embrace international partnerships as well as commercial and academic participation,

According to SPACE.com, William Gerstenmaier is NASA's Associate Administrator for Human Exploration and operations. And in a February 3rd memo Gerstenmaier says that a team is being formed to develop a cohesive plan for exploring a spot in space known as the Earth-moon Lagrange point.

Lagrange points sometimes called liberation points, are places in space where the combined gravitational pull of two large masses roughly balance each other out. This would allow a spacecraft or other object to essentially park in that spot without being pulled toward either one of the masses.

A pre-memo NASA appraisal of Lagrange Point EML-2, which is near the lunar far side, has spotlighted this destination as the leading option for a near-term space study. EML-2 could serve as a gateway for exploration of multiple destinations including near-lunar space, our own moon, asteroids, the moons of Mars and ultimately, the red planet itself.

==========

WEIRD AND WONDERFUL

Around the World 28 MHz Balloon

A long duration balloon mission that is using 6 Party Balloons to carry a 50 gram amateur radio 28.223 MHz CW beacon, is hoping to go around the world.

The balloon was released from Annapolis in Maryland and started its journey heading SE at 6 knots finally reaching 96 km/h.

It has no APRS, just the 28.223 MHz CW telemetry system and it is hoped to locate it by signal strength and beam headings only.

The mission is to give an insight into constant-pressure balloons and especially the use of common mylar party balloons as a fixed volume envelope. Unfortunately, these balloons have a high mass and so the theoretical maximum altitude no matter how many balloons are used is only about 26,000 feet and that is with no payload other than the fixed balloon mass.

The payload weighs about 50 grams. The team are targeting 6 party balloons 3' in diameter which should give a float altitude around 16,000 feet. The Telemetry will be in CW on 28.223 MHz (USB DIAL) and will contain Battery voltage, inside and outside temperatures, and surface luminosity of the ocean/clouds. It has no GPS. The team will rely entirely on DF bearings and signal reports.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

DXCC Country/Entity Report

According to the Amateur Radio Cluster Network for the week of Sunday, 25th-March, through Sunday, 1st-April there were 235 countries active.

ZD8, Ascension Island

The ZD8, Ascension Island bureau has closed. A full list of countries that do not have a bureau is available on the http://www.irts.ie/cgi/qsl.cgi

"DX Code of Conduct"
Audio by John VK2JJW

I will listen, and listen, and then listen again before calling.

I will only call if I can copy the DX station properly.

I will not trust the DX cluster and will be sure of the DX station's call sign before calling.

I will not interfere with the DX station nor anyone calling and will never tune up on the DX frequency or in the QSX slot.

I will wait for the DX station to end a contact before I call.

I will always send my full call sign.

I will call and then listen for a reasonable interval. I will not call continuously.

I will not transmit when the DX operator calls another call sign, not mine.

I will not transmit when the DX operator queries a call sign not like mine.

I will not transmit when the DX station requests geographic areas other than mine.

When the DX operator calls me, I will not repeat my call sign unless I think he has copied it incorrectly.

I will be thankful if and when I do make a contact.

I will respect my fellow radio amateurs and conduct myself so as to earn their respect.

AWARDS

RSGB Commonwealth Century Club Jubilee Award 2012

Of course this year is the Queen's Diamond Jubilee and mindful that the Queen is the head of the Commonwealth of Nations we remind you of that new operating award

To qualify for this attractive certificate all you need to do is to work as many different countries and call areas on the Commonwealth Century Club list during 2012.

Certificates will be awarded for working 60 and 100 different call areas.

Use any mode or bands you like and QSL cards are not required.

Score sheets and full details can be downloaded from www.beru.org.uk/CCCaward/CCCindex.html

MicroThrust Motor for Nanosats

Imagine reaching the Moon using just a tenth of a litre of fuel.

With their ionic motor, MicroThrust, EPFL scientists and their European partners are making this a reality, ushering in a new era of low-cost space exploration.

The goal is to provide efficient propulsion systems for nanosatellites (1-100 kg), which are currently stuck in whatever orbit they were initially placed: the plan is to free them to allow nanosatellites to perform orbital manoeuvring, and missions to the Moon, to Near Earth Objects, or even to Mars.

World Amateur Radio Day - April 18

On April 18, 2012, radio amateurs will be celebrating World Amateur Radio Day on the 87th Anniversary of the founding of the International Amateur Radio Union, IARU.

This year's theme for the World Amateur Radio Day is "Amateur Radio Satellites: Celebrating 50 Years in Space" in remembrance the launching of OSCAR 1 on December 12, 1961 and the launch of OSCAR 2 on June 2, 1962.

For this reason there will be several special event stations from IARU's Member Societies active on different dates during April:

6H6IARU by the Federaci�n Mexicana de Radio Experimentadores who has commissioned this operation to Grupo DXXE. This station will be active from 13 to 18 April in all modes and bands. QSL via LoTW and N7RO, direct or bureau. Daily logs uploads will be available in ClubLog.

3G87IARU by the Radio Club de Chile. This station will be active throughout the month of April. QSL via CE3AA.

LZ1WARD by the Bulgarian Federation of Radio Amateurs also will be active throughout the month of April. QSL via bureau.

EL2RL by the Liberia Radio Amateur Association will be active on April 18 on 10, 15, 17 and 20 meters. Direct QSL to EL2BA.

HB9WARD by Union Schweizerischer Kurzwellen-Amateure to be active also on April 18. This first time callsign will be on the air by HB9JOE and a group of radio amateurs from Bern. QSL via HB9JOE.

HF87WARD by members of the SP-CFF (SP0CFF). This station will be active from April, 17 to 30. QSL via eQSL.cc and WFF LogSerach.

For those who want to send card direct, please send SASE to:
Polish Club Flora & Fauna, Suchacz, Wielmozy 5b, 82-340 Tolkmicko, Poland.
They will even have an award for this operation.

LUXEMBOURG ISSUES STAMP TO CELEBRATE 75 YEARS OF AMATEUR RADIO

Founded in 1937, the R&#65533;seau Luxembourgeois des Amateurs d'Ondes Courtes (RL <http://www.rlx.lu/index.html>) -- that country's IARU Member-Society -- is celebrating its 75th anniversary. In honour of this milestone, Luxembourg's Entreprise des Postes et T&#65533;l&#65533;communications (P&TLuxembourg) has issued a .60 &#65533; postage stamp <http://www.pt.lu/portal/lang/en/Philatelie/stamps/pid/4292> (about 80 cents in US currency); P&TLuxembourg is that country's government owned corporation for mail and telecommunications. This is one of three commemorative stamps issued by Luxembourg in 2012 .

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a range of fascinating and memorable activities.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

RAC Bulletin 2012-021E - Update on 60 Metres
2012-04-04

RAC has been pursuing channelized access to 60M since early 2010. Our request was for an allocation identical to the US allocation, with one additional unique Canadian channel, and with fewer restrictions (the US allocations were restricted to USB voice only, with power and antenna restrictions). Amateurs will recall that one of the rationales for RAC requesting a 60M allocation was to enhance emergency communications including cross-border interoperability. IC responded by indicating that they were prepared to support access in synch with US amateur allocation and regulations. In late 2011, in response to an ARRL petition for change, the FCC issued a final Report and Order that, once it has been published in the Federal Register, will result in a change to the frequency of one of the channels and will enable the use of CW and data modes in addition to USB voice. These features had already been in the original RAC request. The FCC Report and Order has cleared the way for Canada to move ahead with finalizing its allocation to match the new US allocations, including the ability to use CW and data modes. This allocation, which will be on a secondary basis, requires a public consultation through the Canada Gazette, which RAC anticipates will occur in the second quarter of 2012.

It is important that Canadian Amateurs comment on the draft once released. RAC will continue to keep our members aware of the status of this important initiative.

An important offer has been made by IC with regards to 60M. Industry Canada is prepared to licence operators in channelized 60M operation pending the results of the consultation process. The licencing process will be managed out of ICs regional offices and is open to any Canadian amateur. The process requires a formal licence application, payment of a licence fee, and the use of a special call sign instead of the licensee's amateur call sign. RAC regards this as an important interim step allowing amateurs to get on the air in the 60M band as soon as possible and thanks IC for this initiative. RAC`s objective, however, is to ensure that Canadian amateurs have the 60M allocation available to all amateurs as part of their amateur radio certification, i.e. without licence applications, licence fees or special call signs. RAC is cautiously optimistic that this will come about in the summer of 2012.

If you wish to obtain a temporary, paid license to operate on 60M,
please contact your local Industry Canada Regional Office to complete
the application form.The total fee depends upon the date of your
application but in any case is less than $100.

^^

Surely you don't expect non RSGB members to have access to Board minutes?
M own club does not share its minutes with the wider public (ie non
members) so why should RSGB?

==> + ON THE AIR: FCC SEEKS PUBLIC COMMENTS ON EMERGENCY COMMUNICATIONS
BY AMATEUR RADIO AND IMPEDIMENTS TO AMATEUR RADIO COMMUNICATIONS

In response to the Congressional directive to prepare a study to
assess Amateur Radio's role in emergency and disaster communications
and the impact of private land use regulations on the Amateur
community's ability to provide such communications, the FCC issued DA
```

12-523 soliciting comments from the public. The period for public comment runs until May 17, 2012.

"As part of the study contained in Public Law No. 112-96, the Commission has opened a 45 day period for comments to be filed on the issue," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "Because of the short deadline for the study to be completed and presented to Congress -- before the end of August -- the ARRL and the amateur community must quickly mobilize their response." Read more here <http://www.arrl.org/news/fcc-seeks-public-comments-on-emergency-communications-by-amateur-radio-and-impediments-to-amateur-ra>.

==> ON THE AIR: ARRL SEEKS COMMENTS ON PROPOSED 33 CM BAND PLAN

A few months ago, the ARRL UHF/Microwave Band Plan Committee asked the Amateur Radio community about current, planned and projected uses of the amateur bands between 902 MHz-3.5 GHz. The response was beyond our expectations, with hundreds of comments and suggestions received. After reading the feedback, the Committee began working on the band plans, and the draft plan for 33 cm (902-928 MHz) is now ready for review. Read more here <http://www.arrl.org/news/arrl-seeks-comments-on-proposed-33-cm-band-plan>.

==> + ARRL FIELD DAY: BE READY FOR FIELD DAY IN OFFICIAL FIELD DAY GEAR FROM THE ARRL

You've spent all year preparing for ARRL Field Day <http://www.arrl.org/fieldday>, but there are still a few things you're missing: The official 2012 Field Day shirt, hat, pin and logbook! ARRL Field Day -- Amateur Radio's largest on-the-air operating event -- is just a little more than two months away, so be sure to get your gear before supplies run out. This year's ARRL Field Day shirt is a khaki T-shirt that sports the 2012 Field Day logo atop a pocket, with the ARRL diamond logo and "Ham Radio" on the back. Shirts are available in sizes Small-4XL. The hat -- which has "Field Day" emblazoned on its front -- is Texas Orange and is color-coordinated with this year's logo. New for 2012 is the ARRL Field Day Logbook. This nifty logbook is set up in the Field Day reporting format and includes dupe sheets and other forms that you need to have to ensure a successful Field Day. Clubs, order early! Collect orders from members and place a single order -- pay only $12.50 shipping for orders over $50 (while supplies last). ARRL Field Day is June 23-24, 2012. Fulfill all your Field Day apparel needs at the Field Day Supplies section of the ARRL website <http://www.arrl.org/shop/Field-Day-Supplies/>.

==> + ARRL FIELD DAY: ARRL PR COMMITTEE TO HOST FIELD DAY WEBINAR

The ARRL Public Relations Committee will be holding a free webinar entitled Field Day Press Release <https://www3.gotomeeting.com/register/278619454> on Thursday, April 12 at 9 PM (EDT). This webinar is geared for those who want to learn the easiest -- and most effective -- ways to write up a media release for

Field Day and actually get it noticed by the media in your home region. Learn the "tricks of the trade" from the people who actually work in radio, television and print media. ARRL Public Relations Committee Chairman Steven Polunsky, W5SMP, will host the event; Polunsky is also the Public Information Coordinator for the ARRL's South Texas Section. Joining Polunsky are Bill Husted, KQ4YA (print), Mark Kraham, W8CMK (TV) and Don Carlson, KQ6FM (radio). Space is limited -- reserve your spot today <https://www3.gotomeeting.com/register/278619454>.

==> + GOOGLE DECLARES "MORSE CODE IS PERFECT" WITH NEW GMAIL TAP MAIL PROGRAM

On April 1 (yes, April Fools' Day), Google announced that it has unveiled a new way to use its popular Gmail e-mail system. Called Gmail Tap, it uses dots and dashes to form letters, a system of communicating that should be very familiar to radio amateurs. "Morse code is perfect," said Gmail Tap Engineer Mitch Fedenko. "It's just a dot and a dash. What's simpler than that?" Read more here <http://www.arrl.org/news/google-declares-morse-code-is-perfect-with-new-em-gmail-tap-em-mail-program>.

==> + STEPHEN KLINEFELTER TAKES OVER AS NEW ARMY MARS CHIEF

On April 2, US Army Colonel (retired) Stephen G. Klinefelter -- a senior staff officer who oversees Army MARS operations for the US Army Network Enterprise Technology Command -- announced that he was assuming the post of Chief of Army MARS, effective immediately. Klinefelter, 61, took the leading role last December in untangling a Pentagon decision to "phase out" the Army MARS Winlink 2000 messaging system, used by numerous state and municipal emergency management organizations; an investigation showed it lacked required certification for safety from hostile incursions. He successfully argued that the resources of Amateur Radio -- not just MARS or Winlink -- far outweighed any risk from enemy hackers. Lieutenant General Susan Lawrence, the Army's Chief Information Officer, ordered an exemption from this policy for Army MARS, which officials said would extend to the Air Force and Navy-Marine Corps MARS programs, too. Read more here <http://www.arrl.org/news/stephen-klinefelter-takes-over-as-new-army-mars-chief>.

==> + SILENT KEY: FRED MAIA, W5YI (SK)

The holder of one of the best-known US Amateur Radio call signs, Frederick "Fred" Maia, W5YI, of Arlington, Texas, died of cancer on March 28. He was 76. Maia was a leading Amateur Radio journalist for nearly 35 years and a pioneer of the Volunteer Examiner program adopted by the FCC in 1984, and was the first Volunteer Examiner Coordinator (VEC) appointed by the FCC. Maia subsequently founded The W5YI Group in 1986 to develop, publish and sell amateur and commercial radio license study materials. In the realm of FCC commercial radio licensing, Fred formed National Radio Examiners to provide examination services. Read more here <http://www.arrl.org/news/fred-maia-w5yi-sk>.

==> + ON THE AIR: W1AW CLAIMS 5BDXCC

Nearly four decades after the introduction of the Five Band DXCC Award (5BDXCC <http://www.arrl.org/dxcc-award-information>), W1AW <http://www.arrl.org/w1aw>, the Hiram Percy Maxim Memorial Station has achieved this milestone. "As with most stations, we found that 80 meters was our stumbling block," W1AW Station Manager Joe Carcia, NJ1Q, explained. "One by one, we picked off the needed entities, and W1AW now holds 5BDXCC #7307. W1AW's 5BDXCC plaque will hang in a place of honor at the station."

Prior to achieving 5BDXCC, W1AW held DXCC <http://www.arrl.org/dxcc-award-information> on 40-10 meters for many years, but was always searching for the last few remaining entities on 80 meters. Carcia said that at least 90 percent of the confirmations were made via Logbook of The World, (LoTW <http://www.arrl.org/logbook-of-the-world>), but the last contacts #99 and #100 on 80 meters were confirmed via traditional QSL cards.

W1AW currently holds Five Band Worked All Continents Award (5BWAC <http://www.arrl.org/wac>), Five Band Worked All States Award (5BWAS <http://www.arrl.org/was>), Worked All Continents Award (WAC) on CW, RTTY and Phone, Mixed DXCC (with 250 entities confirmed) and DXCC for Digital, CW and Phone.

"Now that W1AW has 5BDXCC, we are gunning for DXCC Honor Roll <http://www.arrl.org/system/dxcc/view/DXCC-HR-20120402-A4.pdf>," Carcia said. "Like with 5BDXCC, there are just a few more entities to go before W1AW can claim this award."

==> ON THE AIR: ARRL ROOKIE ROUNDUP'S THIRD YEAR INCLUDES NEW CATEGORIES

With the Rookie Roundup beginning its third year of competition, 2012 brings some new changes in the event -- including new entry categories. The first Rookie Roundup of 2012 will use SSB (phone) and will be held on Sunday, April 15 from 1800-2359 UTC. All amateurs are welcome to participate, especially those in DX locations.

The focus of the RR remains those who are newly licensed -- hams who received their very first license during the current year or the two previous calendar years (2012, 2011 or 2010). Those licensed before 2010 are encouraged to get on and work the Rookies. Or consider acting as an Elmer and coaching Rookies in their contest efforts without actually making QSOs -- or performing logging or any other station functions. Read more here <http://www.arrl.org/news/arrl-rookie-roundup-s-third-year-includes-new-categories>.

==> TWO NEW BOOKS AND DIGITAL SOFTWARE LIBRARY -- NOW SHIPPING!

The ARRL has just released two new books and a digital software library that you are going to want to have in your shack: Hints & Kinks for the Radio Amateur (18th edition) and Short Antennas for 160 Meter Radio by

Grant Bingeman, KM5KG. The newest version of Software Library for Hams is also available as an immediate download or on CD-ROM. Read more here <http://www.arrl.org/news/two-new-books-and-digital-software-library-now-shipping>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of March -- takes a look at upcoming ARRL member benefits, new privileges for radio amateurs on 60 meters, forthcoming ARRL publications, happenings at W1AW, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-44>.

==> ARRL HQ: TWO POSITIONS OPEN AT ARRL HQ

The League is currently looking to fill two open positions at ARRL Headquarters in Newington. One position is in the Membership and Volunteer Programs Department <http://www.arrl.org/files/file/About%20ARRL/Employment/Awards%20and%20Programs%20Assistant%20%282%29.pdf>
and the other is in the Education Services Department <http://www.arrl.org/files/file/About%20ARRL/Employment/FT%20Ed%20Svcs%20Instruction%20and%20Resource%20Coordinator-announce%20Mar12%20%282%29.pdf>.
To apply, please send your cover letter and resume via e-mail <mlevesque@arrl.org>, or complete the application <http://www.arrl.org/files/media/News/Revised_Employment_Application.pdf>, print it out and mail it with your resume and cover letter to Monique Levesque, ARRL, 225 Main St, Newington, CT 06111. You can also fax your application, cover letter and resume to 860-594-0298. Please include your salary history and salary requirements. The ARRL is an equal opportunity employer. Read more here <http://www.arrl.org/news/two-positions-open-at-arrl-hq>.

==> SOLAR UPDATE

Tad "I remember April when the Sun was in the sky <http://www.youtube.com/watch?v=igs54heetSI>" Cook, K7RA, reports: Over the past week, the average daily sunspot number and solar flux values rose slightly, even though as the week progressed, each day had a lower number than the day before. The daily sunspot number began the week at a high of 100, but ended at 60. Likewise, the daily solar flux started at 111.5, ending with 102.1. The mild geomagnetic conditions made for a quiet week, with the only unsettled conditions on April 1-2 in very high latitude regions, with Alaska's College A index at 11 and 17. From the April 4 USAF forecast, they see solar flux for April 5 at 105, April 6-7 at 110, 115 on April 8-10, followed by 110 on April 11, and then 100 on April 12-22. The next predicted short-term peak for solar flux is 130 on May 2-5. Look for more information on the ARRL website on Thursday, April 5. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation

page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by David Cassidy's Daydreamer <http://en.wikipedia.org/wiki/Daydreamer_%28David_Cassidy_song%29>.

==> + ARRL TO CLOSE IN OBSERVANCE OF GOOD FRIDAY

ARRL Headquarters will be closed in observance of Good Friday on Friday, April 6. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Monday, April 9 at 8 AM Eastern Daylight Time. We wish everyone a safe and enjoyable holiday weekend.

==> + ARRL RECOGNIZES: ERIC P. NICHOLS, KL7AJ, WINS MARCH QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for March is Eric P. Nichols, KL7AJ, for his article "Three Wrong Assumptions about the Ionosphere." Congratulations Eric! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the April issue today.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- How many times have you attended the Dayton Hamvention®?
- Have you used your new 60 meter CW or digital privileges?
- Do you use software to control your transceiver?
- When was the last time you inspected your antenna feed lines?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the July 2012 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK IN RADIOSPORT

This week:

- April 6 -- NCCC RTTY Sprint
- April 7 -- LZ Open 40 Meter Sprint Contest; PODXS 070 Club PSK 31 Flavors Contest (local time)
- April 7-8 -- QRP ARCI Spring QSO Party; SP DX Contest
- April 11 -- NAQCC Straight Key/Bug Sprint
- April 11-12 -- CWops Mini-CWT Test

Next week:

- April 13 -- NCCC Sprint Ladder 0230Z-0300Z, Apr 13
- April 14 -- EU Spring Sprint (CW)
- April 14-15 -- Georgia QSO Party; Montana QSO Party; New Mexico QSO Party; QCWA Spring QSO Party; JIDX CW Contest; Yuri Gagarin International DX Contest
- April 15 -- ARRL Rookie Roundup (SSB) <http://www.arrl.org/rookie-roundup>; International Vintage Contest HF Contest; Hungarian Straight Key Contest
- April 17 -- 222 MHz Spring Sprint (local time)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- April 7 -- ARRL North Carolina State Convention <http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest-1>, Raleigh, North Carolina
- April 14 -- ARRL Delta Division Convention <http://www.arrl.org/hamfests/delta-division-convention-3>, Bartlett, Tennessee
- April 14-15 -- Communications Academy 2012 <http://www.arrl.org/hamfests/communications-academy-2012>, Seattle, Washington
- April 20-22 -- ARRL Idaho State Convention <http://www.arrl.org/hamfests/idaho-state-convention-2>, Boise, Idaho; 63rd International DX Convention <http://www.arrl.org/hamfests/63rd-international-dx-convention>, Visalia, California
- April 21 -- ARRL Delaware State Convention <http://www.arrl.org/hamfests/delaware-state-convention-delmarva-amateur-radio-electronics-expo-1>, Georgetown, Delaware; ARRL Louisiana Section Convention <http://www.arrl.org/hamfests/louisiana-section-convention-1>, Monroe, Louisiana
- May 4-6 -- EMCOMMWEST <http://www.arrl.org/hamfests/emcommwest-convention-1>, Reno, Nevada
- May 18-20 -- Dayton Hamvention <http://www.arrl.org/hamfests/dayton-hamvention-3>, Dayton, Ohio
- June 1-3 -- ARRL Northwestern Division Convention <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-3>, Seaside, Oregon
- June 2 -- ARRL Georgia Section Convention <http://www.arrl.org/hamfests/georgia-section-convention-atlanta-hamfest-1>,

Marietta, Georgia
- June 8-9 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-ham-com-1>,
Plano, Texas
- June 9 -- ARRL Arkansas State Convention
<http://www.arrl.org/hamfests/arkansas-state-convention>, Rogers,
Arkansas; ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-2>, Knoxville,
Tennessee

To find a convention or hamfest near you, click here

Amateur Radio Newsline(tm) Report 1808 - April 6 2012

Amateur Radio Newsline report number 1808 with a release date of April 6th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC issues a Notice of Inquiry on ham radios role in emergency communications and the way land use restrictions may be impeding this vital public service while the ARRL asks you to assist it in responding to the FCC on this matter. Also, Canada issues its first 60 meter developmental license; a Kansas ham survives a lightning strike and friends pay homage to the ham who loved Morse but is credited with bringing code free licensing to the United States. All this and more on Amateur Radio Newsline(tm) report number 1808 coming your way right now.

(Billboard Cart Here)

RADIO LAW: FCC ISSUES INQUIRY ON THE FUTURE OF HAM RADIO EMERGENCY COMMUNICATIONS

The FCC is taking a look at amateur radios role in emergency communications. It also wants to know about obstacles to ham radio operations such as Conditions, Covenants and Restrictions better known as C C and R's that keep radio amateurs from being able to fulfill their public service duties. It's done this in a Public Notice given the identifier of G N Docket 12-91 also known as DA 12-523. Amateur Radio Newsline's David Black, KB4KCH, is here with the details.

--

Just how important is amateur radio during emergencies? What is ham radio's value to the community when disasters strike? The FCC wants to hear from you about these questions, because the Commission has a lot of homework to do for Congress. Most hams know that helping serve the community is one of the primary reasons the amateur radio service was founded.

Hams have a long history of helping during emergencies. They maintain close relationships with the National Weather Service and other public safety groups. When tornadoes raked Arkansas and Alabama in January, radio amateurs provided important communications support. They were active, as well, when a severe winter storm knocked out power and communications to villages along the Bering Sea in November, 2011.

The Commission is required to study amateur radio as part of a Public Law known as the Middle Class Tax Relief and Job Creation Act of 2012. The FCC is to analyze ham radio's uses and capabilities during emergencies, and to submit its findings to House and Senate Committees.

The law also requires the Commission to analyze ham radio's importance as it relates to protecting lives and property. The Commission is to provide recommendations on how to enhance voluntary deployment of ham radio operators when needed. The law compels FCC to evaluate how best to integrate amateur radio into furthering various federal government initiatives that might require communications support.

If there are impediments along the way, the law requires that the Commission find ways to remove them. For example, the law questions whether antenna restrictions or unnecessary private land use restrictions wind up causing more problems than they solve.

In doing its study, FCC is directed to reach out to various entities including amateur radio, as well as various disaster and emergency response organizations.

The Commission has been given a list of specific questions to ask. If you want to comment, you can answer those questions, but you can also submit other comments, too, as long as they relate to the study.

The questions seek examples on various scenarios where amateur radio played a key role relating to emergency response and disaster relief.

Specific benefits ham radio provided are to be named.

Another question asks for examples of when ham radio is an advantage over other forms of communications during emergencies, and when does it complement those other systems.

Other questions cover a wide range of subjects, all involving amateur radio's role, how it can best be utilized, communications training, activities, planning and much more. One topic raised is whether existing rules governing the amateur radio service might need modifying to better facilitate emergency communications. The changes could be of an operational nature...or perhaps some technical limitations need to be addressed. The study asks whether rules changes would be a good idea to encourage development of innovative new technologies, whether voice, data or perhaps video.

In the past, some amateur radio emergency groups have expressed the desire to be able to interconnect directly with public safety and health care communications systems during emergencies. The Commission is to look into whether this should be considered, and if doing so, would enable hams to better serve the public, or whether would pose problems.

The possibility of national certification standards is mentioned as another subject to investigate.

If there are any current Commission rules that serve as impediments to what hams try to accomplish during emergencies, the FCC is told to name them and assess whether they should be changed or lifted to make it easier on hams trying to help during disasters.

If you want to submit comments, you have until May 17th to do so. You can file your comments electronically or by mail. To submit comments electronically, go to apps.fcc.gov/ecfs. Paper filings must include an original and one copy for each filing. Those must be mailed to the Commission's Secretary. The address is: Office of the Secretary, Federal Communications Commission, 445 12th St SW, Washington, DC, 20554.

For the Amateur Radio Newsline I'm David Black, KB4KCH, from Birmingham, AL.

--

The FCC says that stakeholder entities and organizations, including the amateur radio, emergency response, and disaster communications communities, are particularly encouraged to submit comments. However the FCC says that those who do provide filings should not view this Public Notice as an opportunity to seek Commission rulings regarding specific situations. This is an overview inquiry only. And be certain to mention Docket 12-91 when you do submit your comments. The complete text of this FCC release can be downloaded in .PDF format at tinyurl.com/fcc-emcomm-study (FCC)

RADIO LAW: ARRL SAYS IT NEEDS CCR RESTRICTION INFORMATION ASAP

In a related story, if you live in a CC&R restricted community, have deed restrictions or homeowners association covenants that have prevented you from erecting amateur radio antennas then the ARRL wants to hear from you.

The League says that it is looking for input in two specific areas. These are recent amateur radio involvement in actual emergency communications and disaster relief and specific details about how CC&R's and other private land use restrictions have impaired licensed amateurs to participate fully in these disaster relief communications.

If your ability to participate in ARES, RACES, SKYWARN, CERT, or other emergency and disaster relief communications has been limited because the inability to have adequate antennas due to such land use or owners association restrictions, you are asked to provide that information to the ARRL. Also to provide it as a narrative of your exact situation, giving as much detail as practical. Some areas for you to consider in writing your story might be:

Were there alternative properties without CC&Rs in the area you wished to reside?

The exact wording of what exactly does your CC&R's prohibit or allow.

Have you applied for a waiver of the CC&R with the Home Owner's Association Architectural Review Committee but were denied? If so, what was the reason?

Whether you are an ARRL member or not, your information and situation are important to helping the League make the case for all amateurs. Please provide your documentation to the ARRL as soon as possible but definitely before Wednesday April 25th. It can either be uploaded to the ARRL website at www.arrl.org/ccr-study-information or they can be sent as an e-mail attachment to an email sent to CCRinfo (at) arrl (dot) org. (ARRL)

RADIO RULES: CANADA BEGINS ISSUING 60 METER EXPERIMENTAL LICENSES

Canada has begun issuing experimental licenses for the 60 meter band. Regulator Industry Canada issued the first such developmental license on April 2nd to Russ Hemphill, VE3FI, to use the call sign VX9GHD at 5 MHz.

Canadian radio amateurs have been waiting three years for an opportunity to join the USA, Britain and other nations in making use of the 60 meter spectrum. When a true Canadian amateur radio allocation on 5 MHz meters might be approved is at this time unknown. (VE3FI)

RESCUE RADIO: SEVERE WEATHER SPOTTER SURVIVES NEARBY LIGHTNING STRIKE

A ham radio severe weather spotter has survived a near-by lightning strike. According to news reports Bill Isles, KD0IIF, of Wichita, Kansas, is recovering after he survived a lightning strike and used his ham radio gear to call for help.

At 9:30pm Thursday, March 29, KD0IIF, who is a volunteer storm spotter was standing in his backyard. According to Isles, he could hear thunder and see lightning off in the distance, but did not think anything was quite that close to him. Suddenly he felt a shock from a nearby strike and was knocked to the ground. The only thing close was his amateur transceiver.

In a statement to a local Wichita station, Isles said that his whole body was twitching. Also that his radio had flown a little further ahead of him. He managed to grab it and put out a call for assistance.

Isles call was answered by Mike Mathia KD0IJO. Mathia and two other amateur radio operators called 911. Sedgwick County EMS soon arrived on the scene. The checked Isles condition and then transported him to a local hospital for further observation.

According to several reports, the odds of being hit by lightning are one in 835,000.

**

CRYPTIC NEWS RELEASE: RSGB SAYS IT IS PREPARED TO DEFEND MORSE

Is there some group somewhere wanting to rid ham radio of Morse Code? This, at a time when its popularity is growing at a rate almost as fast as it did when wireless was first introduced?

One might get that impression from a rather cryptic two paragraph news release issued by the Radio Society of Great Britain. The statement, published in the latest RSGB news is presented here by news reader Jeremy Boot, G4NJH:

--

"Some say that CW has been made obsolete by modern digitmodes, which work well in conditions far too poor for the older mode.

"Now that Morse is no longer used in commercial radio traffic, the RSGB confirms that it would fight any moves to prohibit CW on amateur bands. The Society recognizes that Morse gives much pleasure to thousands of operators, and will continue to support its use."

--

Very interesting and also begs this question back to the Radio Society of Great Britain: If there is some honest to goodness organized threat to the use of Morse by radio amateurs, how about directly identifying those involved? After all, if you are doing news and have that specific information, it is your duty to the worlds ham radio public to tell all of us what's going on and who is behind any such anti-Morse movement. (RSGB/GB2RS)

**

INTRUDER WATCH: FM ON 50.079 NEAR ROCKFORD, ILLINOIS

Intruders have come to the 6 meter band in the mid-West. Jay Morehouse, W9RM, near Rockford, Illinois, reports via the VHF Reflector that he has been monitoring stations running FM on 50.079.

According to W9RM, he first noticed them on Thursday, March 29th. All were running FM Push to Talk and speaking Spanish. Signal strength was S3 to 5 with some QSB monitoring with 7 element yagi at 80 feet.

Jay notes that there was no sign of any skywave propagation at the time he heard them.

W9RM asks anyone within a hundred or so miles of Rockford who has the time to keep an ear on 50.079 and if you hear the signal, try to get a bearing on it. He hopes that with enough stations on board that an exact fix on the location can be had fairly quickly.

You can contact Jay in care of RF Specialists Inc., PO Box 849, Hampshire Illinois, 60140 or by e-mail to w9rm (at) ARRL (dot) net.

(VHF Reflector)

**

ENFORCEMENT: TENNESSEE UNLICENSED BROADCASTER HIT WITH $10000 NAL

The FCC has issued a Notice of Apparent Liability in the amount of $22,000 to Arthur Lee Young of Cosby, Tennessee. This for his alleged operation of an unlicensed radio transmitter on the frequency 87.9 MHz and refusing to allow an inspection of that radio station. Amateur Radio Newsline's Cheryl Lasik, K9BIK, has more:

--

In a March 27th release, The FCC's said that back on April 14, 2011, agents from the Enforcement Bureau's Atlanta Office used direction-finding techniques to locate the source of radio frequency transmissions on 87.9 MHz to Arthur Lee Young's residence. During that first visit, Young permitted an inspection of the radio station. He also admitted that he owned the radio equipment and voluntarily relinquished it to the agents. Case closed you would think? Well not so fast.

Only a few weeks ago on February 29th an agent from the Atlanta Office again used direction-finding techniques to locate the source of radio frequency transmissions on the frequency 87.9 MHz. Once again he T-hunted it to Young's residence. This time Young and his wife met with the agent outside of the residence, but Young refused to speak to with him. Young's wife, however, acknowledged that her husband was operating an unlicensed radio station from their home. The agent asked to inspect the station, but Mr. Young refused the request and walked away. That's when the agent informed Young that refusing to allow an inspection is a separate violation of the applicable law.

Now its' all come home to roost. In issuing the Notice of Apparent Liability the FCC says that Arthur Lee Young apparently willfully and repeatedly violated Section 301 of the Communications Act by operating an unlicensed radio transmitter. Also, that he violated Section 303 N of the Act by refusing the Commissions' agent access to inspect the station. Added the two violations together, and noting that the violation of Section 301 was repeated more than once, the FCC says that Young is apparently liable for forfeiture in the amount of $22,000.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

As is always the case, Young was given the customary 30 days from the date of publication of the finding to pay or to file an appeal. (FCC)

HAMVENTION 2012 NEWS: AFFILIATED EVENT PLANNERS NEED TO NOTIFY HAMVENTION WEBMASTER ASAP

The Dayton Hamvention website administrator is asking planners of affiliated events to advise him as to when and where these events will be taking place and to do so as soon as possible.

Hamvention Webmaster Richard Rieben, KE4WLE, says in a post to the Hamvention blog that as of now, listings are sparse. This is mainly because planners of these events have thus far not notified either himself or the Dayton Amateur Radio Association as to who is sponsoring this years ancillary events and where they are being held.

Reiben says that if your group is hosting or organizing an event and would like that event publicized in the Hamvention program and on the web site to please send the required information in a word document. This must include what it is, where and when its being held. Also you must include whom to contact, a daytime phone number, your e-mail and any website URL if you have one.

Please send this information by e-mail to program (at) Hamvention (dot) org. KE4WLE adds that the cut-off date for submissions is May 1st, but the soon you can get this material to him the better. Again the e-mail address where to send this information is program (at) Hamvention (dot) org. (KE4WLE, Hamvention remailer))

NAMES IN THE NEWS: LEO LAPORTE, W6TWT, LIVE FROM NAB

Leo Laporte, W6TWT, will be bringing his popular netcast network, TWiT, This Week in Tech, to the upcoming National Association of Broadcasters Convention in Las Vegas the third week in April. This according to TWIT Live Events Producer Lynn Fu who says that for the second year in a row that TWIT will be the official streaming partner at giant NAB gathering.

Leo along with his team of high tech guru's will broadcast live from the TWiT stage inside the South Lower Hall from April 16th to the 19th. According to Fu, the plan is to take a look at the latest broadcasting products, content creation and distribution technologies, professional audio and video equipment and much more. Fu says the TWIT video crew will tour exhibition booths and interview vendors, using a variety of hosts to keep people entertained as they tune in. Unfortunately the workshops will not be streamed.

TWiT first aired in 2005, originally under the title "The Revenge of The Screen Savers." These days the TWiT Network gets around 5 million downloads a month. TWiT also produces such netcasts as Home Theater Geeks and of course Ham Nation which is hosted by Bob Heil, K9EID, and

Gordon West, WB6NOA. You can tune in the live coverage of NAB at live.twit.tv or access the coverage later via the TWIT TV website's on-demand feature. To get more information on TWiT, go to twit.tv. (Source: TWIT-TV; RW)

NAMES IN THE NEWS: HEIL SOUND TO AGAIN HOST HAB HAM RADIO RECEPTION

And speaking about Bob Heil, K9EID, he and his wife Sarah will again be co-hosting this years National Association of Broadcasters Convention Ham Radio Reception. This 2012 gathering takes place in Ballroom B at the Las Vegas Hilton Hotel on Wednesday, April 18th from 6:00 to 8:00 p.m. Pacific time.

According to K9EID, this event is open to all Amateur Radio operators attending the NAB convention. He notes that last year over 800 attendees enjoyed the free drinks, food and $16,000.00 worth of prizes that were given away.

Bob also tells Newsline Leo Laporte, W6TWT will live stream the entire two hours of the reception on his TWIT Internet television network at live.twit.tv. Also in attendance will be Bob's Ham Nation co-hosts Gordon West, WB6NOA and George Thomas, W5JDX. (K9EID) .

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: FRED MAIA, W5YI, - S.K.

The ham radio operator whose work in eliminating mandatory Morse testing and in turn appears to have escalated that mode to new heights of popularity has become a Silent Key. Amateur Radio Newsline's Mark Abramowicz, NT3V, reports on the life and passing of Fred Maia, W5YI:

--

We could probably safely say tens of thousands in the amateur radio community had some kind of contact with Fred Maia, W5YI, over the last 35 years.

Some may have been early readers of his W5YI Report.

Others may have been regular consumers of his "Ticket Talk" and, later, the monthly column, "Washington Readout," published in CQ magazine.

Still others may have had an even more intimate relationship with Fred and his work thanks to using his license study guides to get their ham tickets.

Maybe they even went to a W5YI-sponsored VE testing session and took their license exams under supervision of people who were trained by Fred Maia.

Still others who had a closer relationship with him and numbered among his friends say he was probably one of the most passionate promoters of the amateur radio service and ham radio licensing of his time.

His good friend and partner, Gordon West, WB6NOA, recalls the controversy W5YI generated when he led the campaign some years ago to eliminate the Morse Code from amateur radio license requirements. And, West says, this from a guy who loved CW and was really good at it.

"In the military, he was great at copying CW at 30, 40 and 50 wpm," West recalls Maia telling him.

"So, it was a bit by surprise that he would author rulemaking legislation that would ultimately lead to a code-free - he called it, Communicator Class license.

"That's right, he wanted to do away with what he felt was a barrier for new hams - the CW - knowing all too well that once the new ham got on the air they would begin to learn and love CW."

Rich Moseson, W2VU, editor of CQ magazine, says few may remember that it was Fred Maia who pressed the FCC on the volunteer examination program for ham radio licensing.

"One of the leading people behind the implementation of the volunteer examining program and when that came to fruitition, he was one of the first people who applied to be a volunteer examiner coordinator and, in fact, was the first person or organization named as a VEC," Moseson recalls.

Moseson says he had lots of interaction with W5YI about his popular "Washington Readout," column for CQ. Moseson says it was one of the most popular and well read parts of CQ every month.

Moseson says it's difficult to quantify the impact Maia had on so many who are hams today.

"His devotion to the amateur radio service was unparalleled and he was responsible for helping untold thousands of people become hams or get their licenses upgraded or get the call signs that they wanted both through his column in CQ and through his W5YI-VEC organization," Moseson says.

Moseson says Maia actually retired from the W5YI-VEC group back in 2000 and turned the management of it over to Larry Pollock, NB5X, but still had an extensive hand in its operations. Moseson says it will continue as it has for the past 12 years.

As far as the column in CQ goes, Moseson says he is looking for a successor, perhaps not someone who writes in the same style as W5YI, but someone who can offer readers similar material.

Fred Maia, W5YI, died on March 28 after a bout with cancer. He was 76.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Fred Maia, W5YI, is survived by his wife, Doris, and two daughters. A memorial service was held on Saturday March 31st in Arlington, Texas. (ARNewsline(tm), CQ, WB6NOA, W2VU)

HAM RADIO IN SPACE: ARISS MENTOR INTRODUCTION AT DAYTON 2012

AMSAT and ARRL are teaming up during the 2012 Dayton Hamvention to recruit new Amateur Radio on the International Space Station or ARISS mentors. At 4 p.m. Eastern Daylight Time On May 18th and 19th the ARRL stage area will be used by AMSAT to explain the need for additional ARISS mentors. It will also outline the requirements and responsibilities needed to help provide a reliable conversation between astronauts and selected schools or groups. All amateurs attending Hamvention 2012 are invited to attend. (ARISS)

**

WORLDBEAT: RADIO NETHERLANDS TO DROP DUTCH SHORTWAVE LANGUAGE BROADCASTS IN MAY

Radio Netherlands is in the news again with word that the international broadcaster will terminate Dutch language transmissions world-wide on May 11th. And to say farewell to Dutch speaking listeners around the world the station plans to hold a 24-hour marathon broadcast from 2000 UTC on May 10th until 2000 UTC on May 11th. Frequencies and a listing of program content should be posted soon to the Radio Netherlands Dutch language website.

**

HAM HAPPENINGS: DX UNIVERSITY APRIL 20 - LAST CALL TO REGISTER

The annual 'DX University' will take place in Visalia, California, on Friday, April 20th. On the program are several of the world's most renowned DXers who will share their knowledge. You will also hear some vital tips on making DXCC and on achieving Honor Roll status.

So far over 120 hams have already reserved their place at this session. There are still a few seats left. Go to www.dxuniversity.com to register. (DX University)

**

DX

In DX, PA7JWC and PD7DB operating stroke PJ2 will be on the air from Curacao through the 9th April. They will operate SSB, CW, RTTY and PSK on 80 through 10 meters. QSLs via Logbook of The World is preferred otherwise send paper QSL's to their home callsigns, either direct and via the bureau.

JA1XGI will be active as A35XG from Tonga through the 9th of April on 30, 17 and 12 metes using CW, SSB and digital modes. QSL him also via his home callsign, direct or via the bureau.

ON4AEO and several other operators will be active as 3DA0FC from Swaziland from April 6th to the 10th. They plan to operate SSB, RTTY and PSK on 80 through 10 meters. QSL via ON4CJK, direct or via the bureau.

Lastly, GM6TW will be operating from the Inner Hebrides from April 7th to 13th. His main operating location will be the Isle of Jura, but he also- hopes to activate from Islay and Colonsay as well. No frequencies or modes were given. QSL via M0UTD.

(Above from various DX news sources)

**

THAT FINAL ITEM: ELECTRONIC HERITAGE - SCHNECTADY MUSEUM GETS ALL GE VIDEO

And finally this week a story about the work of a museum doing all it can to preserve some of electronics past. Here's Jeff Clark, K8JAC:

--

The Schenectady Museum is using the YouTube dot com website to rebroadcast more than 1,000 of its General Electric films, which date back to 1915. According to the museum curator Chris Hunter, the archive was previously available only on 16 millimeter film and was viewed infrequently because of its physical condition and the cumbersome process to watch the films using an optical projector.

Hunter said that the museum had long wanted to digitize the collection in order to preserve it but until recently it had been cost prohibitive to do so. Now, thanks to grants from the Institute for Museum and Library Services and the Institute of Electrical and Electronic Engineers Life Members' Foundation, the museum was able to purchase a high-definition film transfer unit and hire and operator for it.

Among the film artifacts now existing in the digital domain are advertisements, raw footage of equipment tests, company picnics and promotional clips. Also transferred is the famed early television series titled the General Electric Theater. It was hosted by former President Ronald Reagan.

The museum hopes to finish uploading all of its film transferred videos to YouTube in the next year. It will then begin digitizing its 1,200 video tape based archives. A direct link to what has already been uploaded and available for viewing is at tinyurl.com/ge-on-youtube

--

Again that U-R-L to screen all of those historic General Electric films is tinyurl.com/ge-on-youtube (Schnetady Daily Gazette, ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

A reminder that the nominating period for the 2012 Amateur Radio Newsline Young Ham of the Year Award is now open. Full details and a downloadable nominating form are on our website at arnewsline.org/yhoty.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, saying 73 and we thank you for listening.

Amateur Radio Newsline Report 1808 April 6 2012

Posted: 05 Apr 2012 08:03 PM PDT
http://forums.qrz.com/showthread.php?341118-Amateur-Radio-Newsline-Report-1808--April-6-2012&goto=newpost

Amateur Radio Newsline☐ Report 1808 ☐ April 6 2012

Amateur Radio Newsline report number 1808 with a release date of April 6th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC issues a Notice of Inquiry on ham radios role in emergency communications and the way land use restrictions may be impeding this vital public service while the ARRL asks you to assist it in responding to the FCC on this matter. Also, Canada issues its first 60 meter developmental license; a Kansas ham survives a lightning strike and friends pay homage to the ham who loved Morse but is credited with bringing code free licensing to the United States. All this and more on Amateur Radio Newsline☐ report number 1808 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: FCC ISSUES INQUIRY ON THE FUTURE OF HAM RADIO EMERGENCY COMMUNICATIONS

The FCC is taking a look at amateur radios role in emergency communications. It also wants to know about obstacles to ham radio operations such as Conditions, Covenants and Restrictions better known as C C and R☐s that keep radio amateurs from being able to fulfill their public service duties. It☐s done this in a Public Notice given the identifier of G N Docket 12☐91 also known as DA 12-523. Amateur Radio Newsline☐s David Black, KB4KCH, is here with the details.

GI100MGY and GI2012MGY

Posted: 05 Apr 2012 11:17 AM PDT
http://forums.qrz.com/showthread.php?341045-GI100MGY-and-GI2012MGY&goto=newpost

Two special specials will be active from Belfast for the 100th

anniversary of the sinking of the RMS Titanic. GI100MGY will be active

from The City Hall, Belfast 7-10th of April as part of the councils

Titanic 2012 festival. We'll actually be setting up station in the

council chambers, point your browser here:

http://preview.tinyurl.com/ccecos4

and have a look at page 27 in the festival programme where we get a

mention, this programme was distributed free to every home in the

Belfast area - quite a coup for amateur radio.

GI2012MGY will then run from 12-18th from onboard the SS Nomadic, the

last surviving link to the Titanic and the White Star line:

http://www.nomadicpreservationsociety.co.uk/index.asp

We'll be operating mere yards from where the Titanic and indeed the

Nomadic where built AND where MTV will be staging their Titanic Sounds

concert on the 13th, again quite a coup.

The two callsigns are "firsts" for the UK being the first time a

regional designator has been allowed to be used as a special event

callsign, we expect interest to be huge. GI100MGY will of necessity be a

100w station while GI2010MGY will run the legal limit. We'll be QRV on

all bands 80 - 10m using CW and SSB, it is unlikely we'll do any digital

modes as operating time is short and we want to give as many as possible

a chance to work us.

We will be delighted (more than delighted!!) to welcome any locals who want to come and help at these multiclub stations, arguably the most important to ever operate from the province and a wonderful opportunity to showcase amateur radio to the public which is what it's really all about.

2012-04-06 at 16:00 UTC

** MMMonVHF Newsletter / No.03 - WEEK 14/2012 **

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-04-04
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER MMMonVHF The VHF-DX-Portal
****

** MMMonVHF webpages down **

Regular users will have noticed that our webpages have been down
for several hours.

Main reason was a security issue at the hosting sever. Not all details
are known but the problem was solved by our webmaster DG2KBC.

As the issue occured while sending an extra edition of the newsletter,
we will send this edition again. At least 40% of the NL did not arrive.

We appologize for the inconvenience.

Happy Eastern!

Frank, PA4EME, on behalf of MMMonVHF

Extra edition for subscribers of the MMMonVHF newsletter.

In yesterdays newsletter we have send a announcement for the Dutch
VHF-day. This message is repeated at the bottom of this edition.

The organizers (non-commercial) are inviting subscribers of the MMMonVHF
newsletter or any other active VHF stations to attend or visit the meeting.

On April 14th, the annual VHF conference is held in Budel. (20 km from
Eindhoven, 100 km Brussels, 90 km Kï¿½ln)

We invite you with two very interesting presentations:
1. 70 MHz, by PE1ITR
2. Low Noise Antenna design (LFA) by G0KSC.

Moreover, some test equipment will be available if you want to check, or
adjust, your LNA, filters, or measure the VSWR small signal PA or mixer.
The VHF conference commences at 10:00, and will end around 16:00 hrs.

If you apply (free!) before April 12th, you are entitled for a FREE LUNCH.

Please send application to PA5KM@VERON.NL (also for Dutch hams!).

Hope to see you on April 14th!

Peter, PA3BIY

Our Newsletter is compiled from the input of the USER of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and news **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/contact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

73 de Frank, PA4EME, and Lins, PA3CMC,
on behalf of the MMMonVHF-Team

Special Event station VX9MRC
2012-04-06

To commemorate the 100th anniversary of the Titanic disaster, the
Marconi Radio Club of Newfoundland will be transmitting a special
bulletin near 500 kHz, the distress frequency used by the radio
officers of the Titanic to send their CQD call to Cape, Race
Newfoundland. Please listen on 507.77 kHz CW for VX9MRC between 0001
and 0400 UTC on 15 April 2012. Please note this corresponds to
Saturday night, 14 April, for listeners in the western hemisphere. For
further information, please see the MRCN web page by searching for
VO1MRC on the internet.

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

http://forums.qrz.com/showthread.php?341197-Titanic-Event-in-Pigeon-Forge-TN-Apr-14-15-2012-callsign-W4S&goto=newpost

W4S on the air for the 100th anniversary of the sinking of the Titanic -
April 14 & 15 2012

The Amateur Radio Operators will be setting up on the 13th ,of April,
under the call of W4S, special event station, the time frame is from 8:00
am on the 14th to 5:00 pm on the 15th,Saturday and Sunday, on these two
days, for the 100th anniversary of the sinking of the Titanic, this will be
a international event to contact amateur radio stations all over the
world..TenTec will be furnishing us the new TenTec Eagle 599 to use for
this great event that will be the second time held here in the Great Smoky
Mountains of Tennessee. We will have a web-cam setup along with TV and
Radio coverage of this event, QST will also cover the event. We will be

setup at the rear of the attraction on Hwy 441 in Pigeon Forge TN, we are looking for amateurs who would like to operate and hope that everyone will attend and join in on the event. Frequencies to be used...3.950 & , 7.220 &, 14.265, 28.3500,21.350, and 24.940 of course do to other traffic that may be using the frequency may vary +/- some... If you are interested in operating the Titanic event 2011 April 14th & 15th please send a e mail to me at the e mail below.....vendors can also contact me at this e mail. titanic2012event@gmail.com More info please contact.. Rick Sr at the E Mail above.... Check out the link below to view this wonderful attraction.. http://www.titanicpigeonforge.com/ti...rge-webcam.php Sponsored locally by the Sevier County Emergency Radio Service ARES & RACES, TenTec Manufacturing, The 470 ARG and several more. We will be working ,Phone,CW and Digital Modes... All are welcome again, if you wish to bring equipment please let me know....we will have 5 tables, so will have room for more radio's, please contact me again if you intend to bring a radio or equipment for the event... I hope that we will see you there even if not operating, it still will be a lot of fun.. Ham operators pay tribute to the brave men who used a Marconi radio to signal for help when the mighty Titanic went down at sea on April 14th, 1912. Live demonstration from the Titanic Museum.

QSL Information & QSL Manager: Please send your QSL Card SASE to, N4JTQ, W4S Event, at 2005 Spence Mountain Loop, Sevierville,TN 37876 , 100% on all QSL's with a SASE, Please use a #10 envelope for your SASE....Certificate offered for 3.00 with a SASE 8x10 envelope..Any donations are welcome with your SASE for the support of this great event...Looking forward to working you. !!

Newsgroup: rec.radio.amateur.misc
Date: 2012-04-07 16:36:46 UTC
From: website@sarl.org.za
Message-ID: <BFEB4B11696547F7BABEB6E52B98CF34@ZAJNBTCSARL01>
Source record: 3263
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 8 APRIL 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY: SARL ANNUAL AWARDS DINNER NOT TO BE MISSED 3DA0FC SWAZILAND DX-PEDITION REGISTRATION FOR THE SA AMSAT SPACE SYMPOSIUM OPEN MONDAY

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SARL ANNUAL AWARDS DINNER NOT TO BE MISSED

The guest speaker at this year's SARL awards dinner is Dr Andrew Collier, Manager: Waves and Space Plasma Group at SANSA Space Sciences at the Hermanus Magnetic Observatory and senior lecturer at the University of KwaZulu-Natal. He will talk about South Africa's involvement in doing science in Antarctica. The presentation will be well illustrated with some breathtaking photographs and will be of interest to all. As Dr Collier said when accepting the invitation to speak at the dinner, "it will be light on science but heavy on pictures". Every person attending the dinner will take part in the lucky draw for a large number of prizes which include a dual band mobile transceiver, the Yaesu FTM-10R, sponsored by Verstay. The FTM-10R is compact and has a detachable waterproof and dustproof front operation panel, which supports all-weather outdoor activity in a manner never before possible. The detachable front panel may be separated from the main chassis and attached to a flat metal surface with the magnetic mounting bracket. The microphone and PTT button are built into the front panel. The SARL annual awards dinner is the culmination of the SARL National Convention. It all happens in Pinetown from 20 - 22 April. Register for the convention and dinner by visiting www.sarl.org.za and follow the link from the home page or call Mariska

at 011 675 2393.

3DA0FC SWAZILAND DX-PEDITION

Pierre, ZS6A, will be active as 3DA0FC at Hawane in KG53MS untill Monday evening 9 April 2012. He will monitor the ON4KST cluster for activity and to arrange skeds. Look for Pierre on 50,200 MHz in the mornings for meteor scatter or tropo QSOs, but from midday onwards he will be concentrating on TEP/F2 openings to Europe and elsewhere. He will operate on SSB, CW and WSJT modes.

NEW 50 MHz EME DIGITAL SARL DX RECORD

On 4 April 2012 Derek Gravette, ZS5Y, established a new 50 MHz EME record with Mike Staal, K6MYC, on the JT65a digital mode. JT65, developed and released in late 2003, is intended for extremely weak but slowly-varying signals, such as those found on tropo-scatter or earth-moon-earth paths. It can decode signals many decibels below the noise floor and can often allow amateurs to successfully exchange contact information without signals being audible to the human ear. JT65A is a "sub-mode" adapted for terrestrial HF communications. Congratulations to Derek and Mike

REGISTRATION FOR THE SA AMSAT SPACE SYMPOSIUM OPEN MONDAY

Details of the SA AMSAT space symposium, which will be held at the University of KwaZulu-Natal on Saturday 12 May, are now available on www.amsatsa.org.za. The theme of the symposium is 50 years of amateur satellites celebrating the launch of OSCAR 1 fifty years ago. The programme features presentations covering a wide range of subjects including several presentations on KLETSkous, SA AMSAT's CubeSat covering the construction of the space frame, transponder and on board control and telemetry systems. Other presentations include satellite tracking and antenna control systems, lessons learned from SumbandilaSat and the CubeSat programme at CPUT of which the first satellite incorporating a 20 metre beacon which be launched soon, space activities at DUT and a presentation of how the SKA site is becoming a RF free zone and yet offering radio and TV services to people living in the area. Register now to benefit from the early bird registration fee. All the details are on www.amsatsa.org.za.

NO SQUARE KILOMETRE ARRAY (SKA) SITE DECISION

South Africans will have to wait till at least mid May before there it may be decided whether South Africa or Australia will be the country to host the SKA. Members of the SKA Organisation met in Amsterdam on 4 April for their first general meeting. They noted the SKA site selection advisory committee's report and associated commentary that had been passed to them by the SKA Organisation's board, which met last month in the UK. The members wished to move ahead with the site selection process and recognised that it is desirable to maintain an inclusive approach to the SKA. They noted that it is important to maximise the value from the investment made by both candidate regions.

A small scientific working group was set up to explore possible implementation options that would achieve this. The working group will report back in mid-May. At a recent media briefing the Minister of Science and Technology, Naledi Pandor, said sharing the SKA between Australia and South Africa was not an option. She said South Africa is ready to host the SKA. Commenting on the decision by the general meeting of the SKA organisation the minister said "I am disappointed at the delay. I hope that the SKA organisation will make a decision in the first half of 2012 and that the decision will reflect the best scientific outcome."

AMATEUR RADIO BOOKS AT THE SARL NATIONAL CONVENTION

A range of amateur radio books will be on sale at the SARL National Convention, including the hardcover version of the 2012 ARRL Handbook and the hardcover version of the ARRL Antenna Book. You can order books now and pay online and take delivery at the national convention. Details of books available are on www.amateurradio.org.za. At the national convention payment will be by cash only, as no other facilities will be available.

DEATH OF ERNEST WILKINSON

We are sad to report that Ernest J. Wilkinson, inventor of the Wilkinson Combiner, died on March 10. His device, consisting of two 1/4 wave stubs and a resistor, has the ability to to combine two RF signals into one that has twice the power and when turned around it becomes a splitter dividing a signal into two equal parts. If you think about it, there is no other name that is used as often in the microwave industry. Read any microwave journal or go to any microwave conference and you will quickly lose track of how many times you hear Wilkinson's name.

CLUB NEWS

Kempton Park Amateur Radio Technical Society (K.A.R.T.S), ZS6KTS, held its annual general meeting on 10 March 2012 at the Impala Voortrekker Hall, Rooibos Avenue, Allen Grove, Kempton Park. At this meeting the following office bearers were elected: Chairman: Nico van Rensburg - ZS6QL Vice Chairman: Renier Burger - ZS6HOT Secretary: Corrie De Beer - ZS6CDB Treasurer: Barry Els - ZS6OY Ordinary Members: Celeste Searle - ZS6CNS

Clive Reeks - ZS6BT

Vivian Dold - ZS6VD (Technical Officer)

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels. Currently only small, stable sunspots are facing the earth. If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 54. All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings

with 10 m not far behind. Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

9 April - Registration for the SA AMSAT space symposium opens. 6-9 April - Western Cape Antique Wireless Association Ekspo near Stanford, contact John, ZS1WJ, on 082 673 5337 for more information. 20 - 22 April SARL Convention in Pinetown. 12 May - SA AMSAT space symposium, visit www.amsatsa.org.za for details and registration.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Fritz, ZS6SF.

Thank you for listening, 73. /EX

Radio Group Establishes Traffic Assistance Centers:

Posted: 06 Apr 2012 05:03 PM PDT
http://www.eham.net/articles/28057

CITY OF SAN FERNANDO - The Society of Communicators' and Networkers (Scan) Pampanga chapter established traffic assistance centers in different entry and exit points in the province, to help both private and public motorists who are returning for a week-long vacation. Scan is an amateur ham radio group that aims to provide alternative source of information through two radios handled by its members nationwide, particularly in Pampanga.

New York City's Mayor Is A Geek At Heart:

Posted: 06 Apr 2012 05:01 PM PDT
http://www.eham.net/articles/28056

Did you know Mayor Michael Bloomberg has an engineering degree and built a ham radio as a child? The mayor talks about his passion for science and how it shapes the way he thinks. He also discusses plans for an applied sciences campus in New York and potential spin-offs from the project. FLATOW: I heard somewhere that you build a ham radio as a child. BLOOMBERG: I was a ham radio operator, yeah. FLATOW: What was your call letters, do you remember? BLOOMBERG: I don't remember, just don't remember. My Morse code, I was OK with the code, but I can't spell and for Morse code that's a big problem.

//
Ham Radio Now -- Episode 8:

Posted: 05 Apr 2012 05:00 PM PDT
http://www.eham.net/articles/28055

PRB-1 provides substantial, if not complete, relief from unreasonable restrictions on ham radio antennas... from the government, but not from your friendly, neighborhood homeowner's association. Their rules, often called CC&R's (Codes, Covenants and Restrictions) are a private contract between them and you, and PRB-1 doesn't cover them. If you don't like it, don't buy the house. Your wife doesn't want to live 60 miles out of town just so you can find a house where you can put up an antenna? Tough beans.

//
Houston County to Launch Online Emergency Operations Center:

Posted: 05 Apr 2012 05:12 PM PDT
http://www.eham.net/articles/28053

A day after the tornadoes in Texas, Houston County Emergency Management leaders said they're about to be more prepared than ever before for disasters. On July 1st, they will launch a web-based emergency operations center, or Web EOC, with a goal of helping people faster. Outside the EMA center on Wednesday, Clyde Mathe and his club of amateur radio operators said practice makes perfect. He said, "We're testing here today." They were tinkering with technology that helps emergency management during disasters. Radio operator Gene Willis said, "If we have a problem somewhere this trailer can go up anywhere." They spot storms and report information to the 911 center, which has managed response the old-fashioned way.

Wales Remembers Radio Amateur Who Monitored, Reported Titanic Distress Call

Posted: 05 Apr 2012 05:09 PM PDT
http://www.eham.net/articles/28052

LONDON -- As the Titanic was sinking in the North Atlantic, its more than 2,000 passengers and crew scrambling in the dark for lifeboats, a young man far away in Wales heard the ship's distress calls on his homemade radio. Arthur "Artie" Moore, one of the few people on Earth following the developing disaster, could do nothing to help, and encountered disbelief when he reported the news to his local police station. .Although some people believed that Moore had heard the signals, "the fact that the Titanic had sunk, no one would believe that because the Titanic was unsinkable," said Stuart Instone, a member of a local radio club based in the old mill where Moore monitored radio traffic as the ship sank on the night of April 14-15, 1912.

Hams Moving Up in Communications World?

Posted: 05 Apr 2012 05:06 PM PDT
http://www.eham.net/articles/28050

It appears hams are finally going to get some respect. The FCC is considering formally including the amateur radio service in its emergency communications planning. Amateur radio operators have a history of helping those in need when other forms of communications are down. Two recent examples, according to the American Radio Relay League, are hams providing storm observations and damage reports to the National Weather Service when

tornados moved through Arkansas and Alabama in January and providing communications to Alaskan villages along the Bering Sea when a November 2011 severe winter storm knocked out power lines and communications.

Stephen Klinefelter Takes Over as New Army MARS Chief:

Posted: 05 Apr 2012 04:56 PM PDT
http://www.eham.net/articles/28042

On April 2, US Army Colonel (retired) Stephen G. Klinefelter -- a senior staff officer who oversees Army MARS operations for the US Army Network Enterprise Technology Command -- announced that he was assuming the post of Chief of Army MARS, effective immediately. Klinefelter, 61, took the leading role last December in untangling a Pentagon decision to "phase out" the Army MARS Winlink 2000 messaging system, used by numerous state and municipal emergency management organizations; an investigation showed it lacked required certification for safety from hostile incursions. He successfully argued that the resources of Amateur Radio -- not just MARS or Winlink -- far outweighed any risk from enemy hackers.

City proclaims Space Week

The City of Jurupa Valley will declare the week of April 15-21 'Space Week'
at their April 19, 2012 regular city council meeting.

Students at Flabob Airport's aviation school will be conducting an ARISS
ham radio conversation with an astronaut aboard the International Space
Station that week.

"I am so excited to participate in the radio communications with the Space
Station," declared mayor Laura Roughton. "I would like to have the students
who are participating in the event come to the council meeting and be
recognized, as well as Flabob's Kathy Rohm."

The city proclamation acknowledges that space technology is used in the
solution and resolution of problems of regional, national, and global
significance and the applications of space research are used for economic,
social, and cultural development - and also specifically cites the efforts
of the students at The Tom Wathen Center's Flabob Airport Preparatory
Academy, who have spent months learning about space exploration while
preparing for their amateur radio contact with the ISS.

More information on the Flabob project may be found on their Web site at -
http://www.iss-flabob.com

This city council meeting will be held at 7PM on April 19, 2012, at the
Jurupa Unified School District Board Chambers located at 4850 Pedley Road,
Jurupa Valley, CA 92509. The city's Web site is -

When you least expect it--Your radio CAN help!

Posted: 07 Apr 2012 01:06 AM PDT
http://forums.qrz.com/showthread.php?341276-When-you-least-expect-it-Your-radio-CAN-help!&goto=newpost

Dateline Baja 03:15 UTC ..Okay, I just always wanted to say that!

What follows is not much of a story□it was simply HAMs helping fellow HAMs□and reminds me why I keep the radio turned on.

It's Friday night and I□m working at my computer in the motor home here in Playas de Tijuana, Baja California, Mexico□the grandkids are here raiding my potato chips and M&M stash (I need a better hiding place)□even with all that QRM in the background I am able to hear a scratchy call on the PARC repeater (147.730) across the border in San Diego County.

It went something like this: This is KJ6KPR..... I need someone to make a call to my propane company as we are up here at Mount Laguna and are out of gas for heating, and it□s freezing up here.

There were a couple of come backs one from N6KI a PARC member who was mobile at the time and a couple of others tried to copy the message to be relayed a couple of times□in any case, I chimed in as well□said I had copied all but wanted a verification on his location which was at: □ the Shriners□ camp --approximately 6000 feet up, near Mount Laguna.

I called the propane company on my VOIP line from here in the Baja and got a night-time answering service; Tracy was at the other end of the line; I explained to him Steve's (KJ6KPR□s) predicament and that I was relaying this message to him via HAM radio. He responded with the usual surprise "Really??" Yes, we are still around and doing what HAMs have always done□helping out when help is needed. Tracy, the night phone OP, said he would have the company call me within 30 min....and I relayed that back to Steve (KJ6KPR).

Of course, by now you are asking yourself WHY he didn□t just call on the phone, himself, RIGHT? Up there at the camp there is no public phone and no land line available at that time of the evening, and his cell phone had no signal up there either. But□he DID have his HT that did, with a marginal signal, get in to the Palomar Amateur Radio Club repeater.

How cold was it, you might be wondering as you sit in your warm home?

@ 03:15 UTC 44.0 °F 42.0 °F -1.0 °F -100.00in ENE 4.0mph 7.0mph 15%

I get a call back from Kamps Propane. Rick was on the phone; he wanted to know if Steve (KJ6KPR) had an account and the usual info. He said he would call me back after he consulted his files. A short time later the VOIP line rang again and Rick, the propane guy, was unable to locate Steve's (KJ6KPR) account. So another relay or two or three from me on the phone with Rick and on two meters with Steve ensued. Finally Rick said he would head up the hill to replenish Steve□s propane gas.

AT 5:03 UTC Steve (KJ6KPR) calls me (his signal still marginal on the repeater) and reports happily that Rick, the propane guy, arrived and was in the process of filling his tank. He thanked me and all those on the repeater who tried to help out.

Tom KI6IET□a PARC member, also made contact with the night service, but got cut off.

Thanks to Steve□s (KJ6KPR□s) new HAM radio license and radio, he was able to help himself and his family late on a cold evening□one that would shortly turn into a truly frigid night.

73,

RT Systems Radio Programming Software now Worldwide Repeater Directory Enabled!

Posted: 06 Apr 2012 01:21 PM PDT
http://forums.qrz.com/showthread.php?341216-RT-Systems-Radio-Programming-Software-now-Worldwide-Repeater-Directory-Enabled!&goto=newpost

Friday, April 6, 2012

Press Release

RT Systems, Inc.

RFinder □ The Worldwide Repeater Directory

RFinder, the World Wide Repeater Directory, and RT Systems are pleased to announce the integration of RT Systems□ suite of programs with the World Wide Repeater Directory!

This monumental event signifies a breakthrough in programmability for Amateur radios that cover VHF and above. RT Systems□ programs now have an easy user interface to query RFinder□s World Wide Repeater Directory without the tedious process of manually entering the repeater data.

Users do not need to know the latitude and longitude - simply query a place, such as □Eiffel Tower□, □Sydney Opera House□ or choose other worldwide locations from the exotic to just around the corner. Within

seconds the system returns repeaters within the specified radius (up to 90 miles). Then, with just two mouse clicks, the data is transformed by the RT Systems program into a file ready for your specific radio. (Software for your specific radio is required).

InterfaceBlank.jpg

RT Systems is very excited about the release of this new feature: ☐The ability to get repeater data from the Worldwide Repeater Directory has a great impact on the Amateur community. You have all this data right at your fingertips - anytime, anywhere. Whether you☐re just visiting or on a DX-pedition, as long as you have internet access you☐ve got fresh and accurate data.☐

The World Wide Repeater Directory is constantly updated by the Amateur community, making it the most complete and accurate repeater directory in the world.

The RT Systems and RFinder teams are both very thrilled to bring this capability to the Amateur community! An annual subscription to the World Wide Repeater Directory is only $9.99 a fraction of the annual cost of competitive data sources.

For more information about the radio programing software with the new RFinder Web Service feature visit, www.RTSystemsInc.com.

You can also access the world repeater directory from http://www.rfinder.net, Smart phones and tablets. RFinder can be found in the Android Market (Google Play) and shortly in the Apple App Store for running on iPhones, iPads and iPods. It is also currently under development for Windows Phone and Symbian Smartphones.

EPISODE 8: FCC 'Impediments' Inquiry

(Relief from CC&R's?)

The FCC has issued a Public Notice, asking hams and our served agencies about the stuff that keeps us from doing our job in emergency communications... especially CC&R's. They want to hear from you! The ARRL's Dave Sumner K1ZZ helps Gary figure it out.

GB8MD International Marconi Day April 21th 2012

Posted: 07 Apr 2012 10:38 AM PDT
http://forums.qrz.com/showthread.php?341326-GB8MD-International-Marconi-Day-April-21th-2012&goto=newpost

Telford & District Amateur Radio Society will be running three stations for
the 25th International Marconi Day on April 21st 2012.

Our aim is to beat last year's record of 470 contacts in 34 different
countries in ssb and cw.

Qsl is via buro or direct.

Please visit qrz.com http://www.qrz.com/callsign/GB8MD for more information
including a 20 minute video of last year's event.

Cheers

Paul

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 8th April 2012

IRTS 80th Anniversary AGM & Rally

Time is ticking fast for the imminent 80th Anniversary IRTS AGM and Rally. Less than two weeks remain from now. As you can appreciate this is a very special anniversary and you are asked to make all reasonable efforts to attend. Dinner tickets are just 32, a reduction on previous years and represents great value for this very special dinner. B&B is 55 for single and a double is 65. The Venue is Fairways Hotel Dundalk, telephone 042-9321500. The radio rally and exhibition will be held in the large conference hall with lots of space to move about and to peruse at your leisure. It all happens over the weekend of April 21st & 22nd.

Dinner tickets should be bought now by contacting Thos EI2JD on 087-2953256 or email thoscaffrey /at/ hotmail.com or by contacting any IRTS committee member. A very warm welcome awaits you.

Counties Contest

A brief reminder that the 2 metres counties contest takes place tomorrow, Easter Monday. It runs from 2.00 pm to 4.00 pm local time and uses both FM and SSB; the same station may be worked on both modes. The multipliers are the 32 EI and GI counties.

Note that there is a special QSY rule in this contest. After any QSO in which you are called by another station, you must QSY to another channel (FM), or by at least 3 kHz (SSB), before soliciting another QSO, so the station calling CQ or QRZ must QSY once a contact has been made, while the station answering the CQ or QRZ has the frequency for one more contact.

Please support this contest, either from home or from the hills. It's a good opportunity to work rare counties and touch base with old friends!

North Cork Radio Group

The North Cork Radio Group will be activating Mizen Head Visitors Centre again this year for Marconi weekend. The callsign, EI0IMD, will be on the air from 20th April - 22nd April inclusive. As you may know, Marconi Day is on 21st April this year and we will be operating over the full 24 hour period on this day in order that collectors of the Marconi Award will have the opportunity to add us to their list. Mizen Head is a beautiful location and well worth a visit.

The North Cork Radio Group are also pleased to announce confirmation of their annual rally, to be held on Sunday, 9th September 2012 at the Roebuck Room, Commons Inn, Blackpool, Cork. Doors open at 11am and admission is 5 per person (children are free, as per usual). Raffle tickets will also be available at the door. The usual traders will be present, and anyone wishing to reserve a table, or would be interested in setting up a stall, should contact Edwin Van Mierlo (EI2HEB) on 086 3885741 or via email at ei2heb/at/ei1nc.com. More details will be available in the coming months.

Based on the success of our previous rallies, we wish to confirm that all our future rallies will be held each year in September for the foreseeable years. This date will usually be on the Sunday between the GAA All Ireland Hurling and Football finals. All details concerning venue, times etc will be confirmed closer to these dates."

Gi2012MGY

A special event station located in Belfast from onboard the SS Nomadic - Titanics 'Little Sister'.

To mark the Centenery of the sinking of the Titanic, City of Belfast Radio Amateur Society (CoBRAS) will be QRV on most HF bands, CW and SSB, from onboard 'the Nomadic' from 12th - 18th April. The SS Nomadic is the only remaining historic link to the Titanic left afloat, and she is also the last surviving White Star Line vessel in the world. Like Titanic herself she was built at the shipyards of Harland and Wolff in Belfast,and served as a tender to the Olympic and Titanic. She is curently undergoing restoration work in the docks where she was built, adjacent to the new Titanic Belfast visitor attraction.

International interest in all things 'MGY' is reaching extraordinary levels - and the extremely rare Gi2012 prefix is sure to add extra interest from WPX hunters. CoBRAS members look forward to working many EI stations during the week of activity from onboard this unique ship.

Further information and QSL details can be found under Gi2012MGY at QRZ.com

---

Worked All Ireland Squares Afloat on Easter Monday, 9 April

Lough Erne Amateur Radio Club will be voyaging afloat on Easter Monday evening and hopes to activate Worked All Ireland Squares -H32, H33 and

H23.

All are in County Fermanagh and include the waters of Upper Lough Erne near the SHARE Centre.

Using the Full (Club) License call sign Gi0LEC - Lough Erne Club - the station will be on SHARE's waterbus, the Inishcruiser, and active from about 5.00 pm (after the 2m counties contest) until 7.00 pm or after on the 40m WAI Frequency 7.170 MHz.

Many thanks from Lough Erne Amateur Radio Club to the 300 involved in last Sunday's Rally at SHARE -visitors, club members helping, folk there to trade or display, and friends.

South Eastern Amateur Radio Group

South Eastern Amateur Radio Group will operate as EI2WRC for the IRTS 2 metres Counties Contest on the bank holiday Monday (9 April) from Devils Bit. Members wishing to get involved should contact the club at; info/at/searg.com.

Dundalk Amateur Radio Society

The AGM of Dundalk Amateur Radio Society was held Wednesday 4th April 2012. The following officers have been appointed.

President-Tom, EI9CJ Chairman- Thos, EI2JD Secretary-Aidan, EI7JC Treasurer- Jim, EI2HJB PRO-Anthony, EI2KC

V51VHF

Thanks to the cooperation from Italian and Hungarian OM and the helpfulness of Pieter V51PJ, we have now 2 new beacons on air from Namibia for TEP observations. They are 24h a day qrv from JG82IE

Callsign V51VHF

70.005 CW - 35 Watt - 6el DK7ZB beam N 71.430 CW - ? Watt - 10el. DK7ZB beam N

Lighthouse Weekend

PA3CNI and PA3AAF will participate the lighthouse weekend, 18 and 19 august 2012, from the former lighthouse Old Kraggenburg (NL0010) in the Netherlands. This lighthouse was in use till the Zuidersea became a polder (1942), now it is a coaching center (http://www.debron.nu) Activities will be on HF in CW/SSB. Qsl via buro.

Comoros DXpedition

A few more details on the upcoming D64K DXpedition were released this past week by Frabrizio, IW3SQY. A team of Europeon operators will be active as D64K from Comoros Islands (IOTA AF-007) in August 2012.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Relayed this week from Murfreesboro, TN

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, KH2AR/W4, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, KH6BZF, N7UN, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F5PHW, F6AJA & Les Nouvelles DX, G3TXF, GI8SKN, I1JQJ/IK1ADH & 425 DX News, JS6RRR, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PY2YP, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal, and VE1AL for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1st-April, through Sunday, 8th-April there were 27 countries active. Countries available: 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/n, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VK9N, VP2V, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1ST CANADIAN LICENSE FOR 60M. Industry Canada issued its first license on the new 60 meter developmental band, VX9GHD to VE3FI Russ Hemphill on April 4th. Canadians have been waiting for 3 years for this new

opportunity to join the USA and Britain. This band is badly needed for Emergency Communications when conditions on 40 and 80 are not suitable for transmitting or receiving traffic. This license is for one year then it will be open to all Canadian amateurs using their own callsign.

9M0, SPRATLY (Reminder). Members of the Malaysian Amateur Radio Transmitter Society (MARTS) and the 9M4SDX Team will be active this week as 9M0L from Pulau Layang Layang Island (Swallow Reefs - AS-051) near Sabah, East Malaysia, between April 10-24th. The current team consists of Tex-san/9M2TO (Project Coordinator), Neoh/9M2CLN (Team Leader Malaysia), Tack-san/JE1CKA (Team Leader Japan), Hajime/7K4QOK, Takuto/9M2/JE1SCJ, David/9M2PX, Yasuma/9M8YY, Nigel/G3TXF, Joe/JA1LZR, Miyama/JE1KUC, Naoyuki/JK1FNL, Hiroyuki/JP1TRJ and Yutaka/JQ2GYU. Activity will be on 160-6 meters using CW, SSB and RTTY. They will try to have as many RTTY QSOs with NA/SA as much as possible. The team will have 4 stations using Spider Beams and a Layang Special. Suggested frequencies are:
CW - 1811, 3511, 7011, 10121, 14011, 18071, 21011, 24891 and 28011 kHz
SSB - 3791, 7081, 14160, 18130, 21275, 24940 and 28405 kHz
RTTY - 3521, 7031, 10141, 14081, 18101, 21081, 24921 and 28081 kHz
6m - 50101/CW and 50110/SSB
Special Notes:
1. All frequencies are 9M0L transmitting frequency. They will announce listening Frequency when QRV.
2. 80m RTTY: They will listen 3590 and up for EU.
3. 40m SSB: They will announce listen up 7100 for US.

QSL direct to 9M2TO: 9M0L TEAM PENANG, PO BOX 125 GPO 10710, Penang Island, MALAYSIA or by the Bureau to Malaysian Amateur Radio Transmitter's Society (MARTS). A Web page is up an running at: http://9m0l.legendchew.com

E5, SOUTH COOK ISLANDS (Reminder). By the time you read this, operators Graeme/VK4FI and Alan/VK4WR will be active as E51GMH and E51BKM, respectively from the South Cook Islands between April 8-27th. Graeme informs OPDX that they will activate Rarotonga Island (OC-013) and Aitutaki Island (OC-083). Their main band of interest is 6 meters, and for the HF bands, 40/20/17/15/12/10 meters. They will use an IC-706 and an FT-450 into a 5 element Yagi for 6m and a OCF Dipole. Modes will be CW and SSB only, no amplifiers - 100 watts only. QSLs go to VK4FI (see QRZ.com info - 2 USDs for postage).

E51, SOUTH COOK ISLANDS (Reminder). The E51M DXpedition team, which will be going QRT - probably as you are read this, will be active as E51EWP from Rarotonga, South Cook Islands, again between April 11-14th. Activity will be on all bands including 60m, using CW, SSB, but with an emphasis on RTTY because there is a high demand for RTTY. QSL via DJ8NK, direct or by the Bureau. Online QSL Requests Service (OQRS) for the Bureau and direct cards can be made after April 20th. For more details, see the E51M Web page at: http://www.manihiki2012.de

GI2012, NORTHERN IRELAND. Look for special event station GI2012MGY to be active between April 12-18th. Operations will be in Belfast from onboard

the SS Nomadic - Titanic's 'Little Sister'. To mark the Centenery of the sinking of the Titanic, the City of Belfast Radio Amateur Society will be active on most HF bands using CW and SSB. The SS Nomadic is the only remaining historic link to the Titanic left afloat, and she is also the last surviving White Star Line vessel in the world. Like Titanic herself, she was built at the shipyards of Harland and Wolff in Belfast, Northern Ireland,and served as a tender to the Olympic and Titanic. Please see GI2012MGY on QRZ.com for QSL details and further info.

GJ, JERSEY. Members of the Jersey Contest Group will be active as GJ2A from Jersey Island (EU-013) during the RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. QSL via LoTW, or direct to GJ3DVC.

HH8, HAITI. Amadeo, EA3OW, is now active as HH8/EA3OW, from Jacmel in Southern Haiti until May 12th. Activity will be limited and during his free time because of his work. Operations will be on 40-10 meters using SSB, RTTY and other Digital modes. His equipment is a Kenwood TS-480sat and dipole antenna. QSL via his home callsign, by the Bureau or direct. Visit his Web page at: http://ea3ow.wordpress.com

IOTA NEWS.............
AS-079. Operators Takeshi "TAKE"/JS6RRR and Fusao "FUSA"/JA5DUR/JS6 will be active from Miyako Island (Okinawa) between 0900z, April 26th and 0000a, May 7th. Activity will be on 160-6 meters (including 30/17/12m) using CW, SSB, FM, RTTY and PSK31. In case of heavy rain or other conditions, the operation may vary. QSL JA5DUR/JS6 via JA5DUR and JS6RRR via JS6RRR. The Bureau is the best. Please check QRZ.com for detail.

AS-109. (CANCELLED) It was announced that the RT9K/P DXpedition was cancelled because the temperature in Nadym was over 0 deg C and the snow is melting. The next few week's forecast also predicts higher temperatures which will weaken the ice for the snowmobile and tricky for a boat to navigate. The team has returned home to find a different method of transportation.

HK0NA QSL UPDATE. It was announced on April 5th [edited]: "The HK0NA QSLs have been designed and the order has gone to the printer. We estimate that the HK0NA QSL card processing should start sometime in May-June, 2012. We are currently busy opening mail, and pre-processing the log for future label printing. PLEASE understand that this will be an enormous enterprise and will take time to process. QSL cards will not be mailed all at one time. We are pre-processing direct OQRS request first. Direct mail will be next." Updates will be posted on the SJDXA's Web page at: http://www.sjdxa.org/hk0na.htm

QSL MANAGER CHANGE. Phil, F5PHW, reports that QSLs for FO8RZ and FO8RZ/P can now be sent to F5PHW direct, by the Bureau or LoTW. If you have already sent a QSL to F8BPN, don't send it again, you will receive your QSL soon. Phil sends a big thanks to Mauricette, F8BPN, for the very good QSL managing job she did. F5PHW's address is on QRZ.com or send it to: Phil BERGER, 14 rue du 4 eme bataillon FFI, 56690 NOSTANG, FRANCE. All info about FO8RZ is on: http://f5phw.hamlogs.net/?lng=en

QSL STATUS VP6T, ETC... Nigel, G3TXF, reports that during the past two weeks some 3,000 direct QSL requests have been replied to for VP6T (and ZD7XF). As of April 2nd, they are completely up-to-date. Take a look at: http://www.g3txf.com/dxtrip/VP6T-QSLing/VP6T-QSL.html

ST. PETER & ST. PAUL ROCKS LOGS (Update). Cesar, PY2YP, continues to obtain logs for St. Peter & St. Paul Rocks DXpeditions from the operators and uploads them into LoTW. He mentions this week that thanks to Joaquim, PS7JN (now PS8JN), he was able to receive the following logs:
ZY0SAT - Mar. 31st-Apr. 14th, 2001 ZW0S - Dec. 3-18th, 2003
ZY0SAT - Feb. 24th-Mar. 11th, 2002 PS0S/PS7JN - Nov. 25th-Dec. 10th, 2004
ZW0S - Apr. 6-18th, 2003 PS0S/PS7JN - Sep. 7-22nd, 2005
ZW0S - Sep. 2-17th, 2003 PS0S/PS7JN - Jan. 20th-Feb. 2nd, 2004

The logs are in spreadsheet and will take some time to convert them to ADIF format. He hopes to upload the logs to the LoTW later this week. In addition, he also received paper logs from 1982 and 1991 operations. The logs are large and will take a lot of time to type. Watch the following Web page for updates: http://www.py2yp.com
LAST MINUTE UPDATE: Cesar reported on April 5th, "The ZY0SAT, ZW0S and PY0S/PS7JN logs are now in the LoTW. Log search is available at <www.py2yp.com/spsprocks>. The satellite QSOs from ZY0SAT log are still pending for upload. This completes the 'on the rocks project' first step: gathering and uploading logs. Now I will work on the paper logs as is in the web page and keep trying to have 2 more logs: 1978 and 1987 operations."

QSL RECEIVED VIA LoTW: 3D2YA, 3XY1D, 5B4AJC, 5V7CC, 7Z7AA, 8P5A, A25JR, A25KW, CO2WF, CQ9T, CR3A, CT1ETX, CT3/DJ0IR, CW5W, EA1PO, EA3IN, ED3X, EE7T, FM5CD, HB9CVQ, HK3R, HR5/W9GL, II9T, IU9T, IR2C, JA0FVU, JA6LCJ, LA6YEA, OE3K, OJ0X, OM3M, OM5M, OQ5M, OZ1TMK, P33W, P40W, P49Y, PJ4/W9NJY, PR5B, PY3VK, PY0S/PS7JN, PZ5P, R3LA, RA3PCI, RA/KE5JA, RX0AE, SM5ELV, SP3SLO, UR3FID, US1IW, V21ZG, VA7ST, VK0BP, TI5W, TO3J, XW3DT, YW5T, YZ7EM, ZF2AG/ZF8, ZF2LC, ZM4T, ZS6EZ and ZY0SAT

QSLS RECEIVED VIA MAIL: 3B9/OE4AAC, 3D2T, 4K0CW, 4W0VB, 4W0VB/p, CO2WL, DL1QQ, ET3AA, F4GBU, HC2/KF6ZWD, J38A, J7Y, KG2A/VP9, NP4A, PJ4C, T2T, T2V, TL0CW, TN2T, TO4M, TX6T, TX6T/P, VK0TH, VP6T, VR2XLN, VU2DSI, XF1AA and ZD7XF

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!!

S7, SEYCHELLES. Heye, DJ9RR, will be active as S79RR from Mahe Island between May 15-23rd. Activity will be holiday style on 40-10 meters using CW and RTTY. QSL via his home callsign, by the Bureau or direct or LoTW.

TJ, CAMEROON. Ivan, 5N7M/OM3CGN, is now active as TJ6RM until April 16th. Activity is on 40-10 meters using CW and SSB. QSL via OM3CGN.

VP2M, MONTSERRAT (Reminder). By the time you read this, the "Buddies in the Caribbean", a mini-DXpedition group to Montserrat (VP2M), should be active now and until April 16th, with a new group of operators who have never experienced the "other side of a pileup"! Because of severe baggage limits on the flight from Antigua to Montserrat (one bag under 50 lbs!), they will be limited to 100 watt or less low power radios and the Buddipole portable antenna systems. They will have two of the new Elecraft KX3's with them and believe this will be the first DX-pedition using the new KX3 radio (Ser#23 and #24). Yet their goal is to demonstrate "ultralite" DXpeditioning into magnificent "vista" locations, operating a field portable battery-only radio with backpackable, light-weight antennas and most of all "having fun" on the "volcano isle". The eight operators are: Budd/W3FF (VP2MFF), Guy/N7UN (VP2MUN), Paul/KB9AVO (VP2MVO), Larry/W7DGP (VP2MLR), Russ/N7QR (VP2MQR), Tom/K2GSJ (VP2MTM) and Chris/N2YYZ (VP2MYZ). There will be several villa stations in operation on 160-10 meters using CW, SSB, and RTTY or PSK. At the same time, several

teams will be battery-only, field portable either from Montserrat beaches or scenic mountain tops. QSL via LoTW, eQSL, or mail to the operator's home callsign (SASE required).

WH0, MARIANA ISLANDS. Masahiko, JH4VUC, will once again be active from Saipan (OC-086, USI NI002S, WLOTA 1333) using the callsign WH0VU between April 18-21st. Activity will be on all HF bands and modes. QSL direct to his home callsign.

XV2, VIETNAM. Larry, W6NWS, is back in Cai Be district, Vietnam, for a family visit until June 12th. Look for him to be active as XV2W during limited time on 80-10 meters (no 60M) using CW and RTTY, as well as SSB if noise in the house permits. His sunset is about 1120z and his sunrise is about 2300z. Larry states, "I am usually on .022 or .028 for CW and .085 for RTTY if they are not already busy. On 80m, I am usually on 3.512 MHz listening up 1. I am limited to 10.1 to 10.11 on 30m." QSL via his home callsign, by the Bureau or direct. Logs are posted to LoTW and eQSL usually within a day.

ZD9, TRISTAN DA CUNHA. Operators Martin/G3ZAY and Robert/M0VFC are planning (not yet confirmed) to be active as ZD9UW from Tristan da Cunha possibly in September. More details are forthcoming, watch:

Sun City Residents Keep a Weather Eye:

Posted: 07 Apr 2012 05:10 PM PDT
http://www.eham.net/articles/28065

"Everybody talks about the weather but nobody does anything about it." Members of the Sun City Amateur Radio Club may not be able to change the weather, but many of them -- along with neighbors -- join the National Weather Service in helping to make the predictions both more accurate and informational. The "hams" will host a SKYWARN training at 7 p.m. Thursday in Pinckney Hall. It's not possible to change the way the winds blow, the rain falls or the snow flurries, but it is important to know what to do when severe weather strikes. That is the goal of the NWS forecasters who predict the weather. Knowing what the weather is doing where the people are helps verify what the forecasters are seeing on their radars. "We train people to observe weather things like funnel clouds, or tornadoes which would be the precursors to the bad weather," said forecaster Ron Morales from the Charleston NWS office. "Mostly what we end up getting is reports of the damage, trees down, cars overturned." Many SKYWARN observers are amateur radio operators, because when the power goes and a storm knocks out communications towers, they crank up reserve power generators to provide emergency communications.

//
Ham Radio Operators Travel Globe Over Airwaves:

Posted: 07 Apr 2012 05:08 PM PDT
http://www.eham.net/articles/28064

DECATUR, AL (WAFF) - The weather in Baton Rouge, Louisiana may not be that different from Decatur, Alabama's, but men still like to talk about it, especially if the men are two ham radio operators. Joseph Lester Christophe and his wife are Katrina evacuees, and he knows how busy a disaster can be for ham radio operators. Often during disasters, ham radio operators are the only source of communications for a community. "Maybe they're trying to get a hold of law enforcement, ambulance or something like that, so we go into all the phases of communicating. As far as disasters are concerned, whatever it takes to get people back on their feet," says Christophe. They moved from Louisiana to Decatur where he fell in with a local group. He is president of the Decatur Amateur Radio Club, and he can enjoy the gift of gab with others. "One of our main purposes in ham radio is public service, and we have an annual event each June. It's

called 'field day,'" said Christophe. He said this is done without standard electricity. Instead, they use generators. Christophe said the furthest away he's talked with anyone is Sydney Australia, Africa and other places.

//
Robert F. Fanto, WA3HJY (SK):

Posted: 07 Apr 2012 05:06 PM PDT
http://www.eham.net/articles/28063

Korean War veteran was also a ham radio operator and actor: Robert F. Fanto, a retired longtime Baltimore County public schools guidance counselor, died of cancer Wednesday at his Timonium home. He was 80. The son of a Baltimore and Ohio Railroad machinist and a homemaker, Mr. Fanto was born in Cumberland and raised in Piedmont, W.Va., and Keyser, W.Va. Mr. Fanto was a ham radio operator and a member of the Baltimore Amateur Radio Club. He enjoyed playing the piano, reading and teaching literature.

//
Erwin Schmidt, WB0LSG (SK):

Posted: 07 Apr 2012 05:04 PM PDT
http://www.eham.net/articles/28062

Erwin Schmidt, 90, of Wichita, Kan., formerly of Austin, Minn., died Tuesday, April 3, 2012, at his daughter and son-in-law's home in Wichita. Erwin SchmidtErwin was born Sept. 18, 1921, in Brownsdale, Minn. to John and Hattie (Ohm) Schmidt. He married Hilda Polnau on June 26, 1943, at the Trinity Lutheran Church in Waltham, Minn. He worked for 43 years for Hormel Foods, retiring in 1983. Erwin was an active member of St John's Lutheran Church, until moving to Wichita in November 2011, and was involved with the Sunday morning radio broadcast where he took over the duties in 1978 as chief engineer. He was a licensed amateur radio operator, belonged to the Austin Amateur Radio Club and was a Skywarn Spotter for Mower County Civil Defense. He was active with the Red Cross and worked many parades in Austin. He previously enjoyed working on his acerage east of Austin, fishing, photography, going on many trips, playing 500 and spending time with his family. He was named Mower County Fair's Outstanding Senior Citizen of the year in 2007.

//
Emergency Radio Installed At State Park:

Posted: 07 Apr 2012 05:03 PM PDT
http://www.eham.net/articles/28061

CORBIN, Ky. (AP) - A special radio that will help emergency communications is being installed at Cumberland Falls State Park this summer. The Military Auxiliary Radio System repeater station will be placed atop the park's water tower, which should assure that it gets good signal and links to the state Emergency Management headquarters in Frankfort. Park official Pam Gibson told The Times-Tribune of Corbin that a test of the MARS repeater

found that radio operators could receive the signal as far south as Knoxville, Tenn. She says the repeater can link to ham radio operators, and it can be used for weather spotting and to alert the park in the event of emergencies. Plus it will work if the power goes out during an emergency.

GB2RS NEWS

Sunday 8th April 2012

The news headlines:

Training and Education Committee

The 145.500 MHz FM Calling channel

Free exhibition to commemorate Titanic and Marconi

The RSGB Board has decided to create a Training and Education Committee, which will take over many of the roles of the former Amateur Radio Development Committee. Amongst its duties, the new committee will work with the RCF on the training structure and how it might be improved as well as investigate, with the RCF, different ways for training to be provided, including possible extension of distance learning and internet based technologies. Following a process of inviting applications and interviews, the Board has determined that, with immediate effect, Steve Hartley, G0FUW will be appointed as Chairman of the Training and Education Committee. Steve brings a vast background of experience and knowledge in the training and education field to this new role.

The Society has received a number of complaints that relate to an error in the 2m part of the RSGB Band Plan. This error was mentioned in the VHF Manager's Annual Report in the April RadCom, page 53. It concerns the incorrect designation of the 145.500MHz simplex channel as Mobile Calling and its dual FM/ Digital Voice usage. Whilst these arrangements were put in place shortly after the 2008 IARU Region 1 General Conference, there have not been many problems reported. Increased uptake of Digital Voice, coupled with its use on 145.500MHz in some parts of the country, has highlighted an incompatibility. FM users monitoring the calling channel get disturbing noise bursts when a Digital Voice transmission occurs, making background channel-monitoring unacceptable. The Society will raise this issue within IARU Region 1 at the next opportunity, meanwhile UK amateurs using Digital Voice are asked not to use 145.500MHz, and are reminded that their Digital Voice calling channel is 144.6125MHz. In the interests of cooperation, both FM and Digital Voice users are asked to listen before transmitting on the other simplex channels to ensure that they are clear before use.

>From 14 April until 8 July, a free exhibition will take place at Chelmsford Museum commemorating the centenary of the Titanic disaster and of Marconi's New Street factory. The Chelmsford Museum is at Oaklands Park, Moulsham Street, Chelmsford CM2 9AQ.

The RSGB AGM will take place on 21 April at the Swan Hotel, Bedford. Full details are in the April RadCom. The hotel would like some indication of the numbers who will be having lunch on the day of the AGM. Lunch will be soup and a sandwich and will cost ?8. To register your intent, please visit www.rsgb.org/agmlunch and submit your name and callsign.

The Japan Aerospace Exploration Agency has announced the launch of five amateur radio satellites on two launches taking place in May and July. The first H-IIA launch takes place on 17 May between 1639 and 1642UTC and will carry the amateur radio satellite HORYU-2. The second launch on 21 July at 0218UTC of the HTV3 will deliver the JEM-Small Satellite Orbital Deployer to the International Space Station.

And now for the details of rallies and events for the coming week

On 15 April the 50th NARSA Blackpool rally will take place the Norbreck Castle Exhibition Centre, Blackpool FY2 9AA. There will be trade stands, a Bring & Buy as well as special interest groups and a RSGB book stand. Doors open at 10.30am and more details can be obtained from Dave, M0OBW on 01270 761 608.

Also on 15 April the Cambridge Repeater Groups Rally will be held at Foxton Village Hall, Hardman Road, Foxton. Doors open at 10am and admissions is ?2. There will be trade stands and a Bring & Buy. Details from Lawrence, M0CLM on 01223 711 840.

The RSGB Board Proceedings for February 2012 are now available to Members online. Among topics discussed are the Examination Software and interviews for the General Manager vacancy that has existed for the past 14 months. The Minutes are at www.rsgb.org/membersonly/information/minutes/minutes-2012/feb-2012.pdf.

Now for the news of special events

The centenary of the loss of RMS Titanic in 1912 will be commemorated with many activities taking place around the world, a list of the stations we have heard about is on the RSGB website at www.rsgb.org/titaniclist.

GB100MGY will be on the air until 26 April from Fort Perch Rock Marine Radio Museum, New Brighton, Wirral. They also have special permission to use this callsign on the 501 to 504kHz band and plan to transmit and receive on 502kHz. For those without a 500kHz band NoV they will work crossband to 3566kHz or 7066kHz.

GR100MGY will be on the air from the grounds of Charterhouse school in Godalming, the birthplace of Titanic's Marconi Radio Officer, Jack Phillips. Operated by Wey Valley Amateur Radio Group, members of the public are invited to visit on 14 and 15 April from noon until 4pm. Visitors should come to the school on Hurtmore Road, GU7 2DX, during these opening hours and simply follow the parking signs.

Itchen Valley ARC will be operating GB100WSL for White Star Line from 10 to 15 April. The station will operate from berth 42, Ocean Dock, Southampton. A commemorative flotilla will set sail from berth 43 at noon on 10 April as part of the city's commemorations. Brian, G0UKB, club chairman, is the great-grandson of Thomas King, the Master at Arms of RMS Titanic, who perished in the disaster. During the evenings when the dock is closed the club hopes to run GB0WSL from Bartley in the New Forest. This location is close to the home of the last survivor of the disaster, Millvina Dean.

GI2012MGY, will be located in Belfast onboard the SS Nomadic. It will be on the air on most HF bands, using CW and SSB, from 12 to 18 April. The SS Nomadic is the only remaining historic link to the Titanic left afloat, and she is also the last surviving White Star Line vessel in the world.

The Wigtownshire Amateur Radio Club and Dumfries and Galloway RAYNET will be using GB100MUC for a Special Event Station at Dalbeattie Museum for the weekend of 14 and 15 April to commemorate the Titanic disaster 100 years ago. MUC was the callsign of the Titanic before she sailed. When she sailed, the callsign changed to MGY. All contacts will be confirmed with a full colour QSL card.

Bob Leask, G3XNG will be using the callsign M0RSE for the weekend of 1 and 15 April. Bob will use CW on all bands from 10 to 80m with as much activity as he can muster.

During the weekend of the 14 and 15 April, Poldhu Amateur Radio Club will be operating from the Marconi Centre at Poldhu using the callsign G3MPD. MPD was the callsign of the Marconi station at the time of the Titanic disaster. They hope to be operational on as many of the HF bands as possible.

The Scunthorpe Steel ARC will be running GB4MGY during the weekend 14 and 15 April. They will be active on 10m through to 80m and, hopefully, on 2m.

The Apeldoorn DX and Contest Crew will be operating PC100T on 14 April. They will be active on 10, 15 20, 40 and 80m CW and SSB.

On Sunday 15 April, amateurs from the Lichfield area will be running GB0TI from 9am until 7pm to commemorate the 100th anniversary of the loss of the RMS Titanic and its skipper, Captain E J Smith. The venue is a brand new Discovery Hub building in Beacon Park, Lichfield. As well as the calls to be put out on 80, 40 and 20 metres, there will be other activities in the Hub such as involving the public in trying their hand at sending distress calls with Morse practice units and keys.

And now the DX news compiled from 425 DX News and other sources

Macclesfield & District Radio Society is off on its 2012 DXpedition to Colonsay off the west coast of Scotland, IOTA reference EU-123, from 16 to 21 April. The callsign will be GS4MWS/P. QSL cards will be available via the RSGB Bureau, or direct to QSL Manager Adie Dodd, M0PAI. Please

include a SSAE if QSLing direct.

Jonas, SA0AAZ and Carin, SA0BAC will be active as V63AAZ and V63BAC from Weno, Chuuk Islands, IOTA OC-011, until 10 April. They will operate holiday style HF on SSB and CW. QSLs via SA0AAZ.

Giorgio, IZ4AKS, is on Rhodos Island from 9 to 16 April. If holiday time permits he wants to work as SV5/IZ4AKS on the HF bands every day using a K3, Yaesu FT-897 and wires. QSL direct to IZ4AKS.

DL7UXG/P will be QRV from Foehr Island from 10 to 12 April. QSL via his home callsign, bureau or direct.

Francois, ON4LO, will be active as 5P4LO from Romo Island between 15 and 20 April. Activity will be on 10 to 80 meters using SSB, RTTY and PSK. QSL via ON4LO, direct or via the Bureau.

Now the contest news

The first leg of the SP DX Contest ends at 1500UTC today, 8 April. Using both CW and SSB on the 1.8 to 28m bands, SP stations send a signal report plus a single character province code, while non-SP stations send a signal report and a serial number.

The 432MHz UK Activity Contest takes place between 1900 and 2130UTC on 10 April. Using all modes the exchange is signal report, serial number and locator.

On 11 April the SSB leg of the 80m Club Championships takes place between 1900 and 2030UTC. Using SSB, the exchange is signal report and serial number.

The First 50MHz contest takes place between 0900 and 1200UTC on 15 April. Using all modes on the 6m band the exchange is signal report, serial number, locator and postcode.

The 4-hour Europe-wide EU Sprint takes place on 14 April from 1600 to 2000. Using CW on the 3.5 to 14MHz bands, the contest exchange is both callsigns, serial number and name or nickname. Note no signal report is exchanged.

And now the solar factual data for the period from Friday the 30th of March to Wednesday the 4th of April, compiled by Neil Clarke, G0CAS on Thursday the 5th of April.

Several small and magnetically simple sunspot groups were visible every day. Solar activity was very low on three days and low on the other three days when isolated C1 class solar flares took place. Solar flux levels declined from 111 units on the 30th to 102 by the 4th. The average was 107 units. The 90 day solar flux average on the 4th was 117 units. That's two units down on last week. X-ray flux levels averaged B2.1 units for the period. Geomagnetic activity was quiet every day except for the 2nd when activity increased to slightly unsettled levels with an Ap index of 10 units. This was in response to a small coronal

hole. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 310 kilometres per second on the 30th to 450 by the 2nd. Particle densities were low every day. Bz varied between minus 4 and plus 2 nanoTeslas on the quiet days and between minus 6 and plus 4 nanoTeslas during the 2nd. MUFs reached forecast values most days. Paths to South America and South Africa were in particularly good shape.

And finally the solar forecast. This week solar activity is expected to be low as the quiet side of the Sun rotates into view. However, there is an `active region' that should rotate into view later in the week that could increase activity once in view. Solar flux levels should be around or slightly above the 100 mark. Geomagnetic activity should be quiet at fires but from around midweek activity is expected to increase due to a recurring coronal hole. MUFs during daylight hours at equal latitudes should be around 27MHz for the south and 24MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 32MHz. The optimum working frequency with a 90 per cent success rate will be about 27MHz. The best time to try this path will be between 1200 and 1800 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with advance notice that Chesterfield and North Derbyshire amateur radio club will be running a foundation course at Staveley, commencing on Saturday 14 April. The course fee is ?43. For more information email exams@m0oct.com.

On Monday 9 April Friskney & East Lincolnshire Communications Club is holding a club net on 144.165MHz USB, vertical polarisation, from 7pm. Contact the FELCC Information Line on 07554 362 020.

On Monday 9 April Gloucester Amateur Radio & Electronics Society is operating at Crickley Hill. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 9 April South Birmingham Radio Society is closed. Contact Don, on 01214 581 603.

On Monday 9 April Stratford Upon Avon District Radio Society is having an informal meeting. Contact G0CHO, on 01608 664 488.

On Monday 9 April Wythall Radio Club's Easter Contest ends at 2200. Details from Chris, G0EYO, on 07710 412 819.

On Tuesday 10 April Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 10 April Eagle Radio Group is having a quiz night with Neville, G3VDV. Contact John, M6JMS, on 01754 873 926.

On Tuesday 10 April Lincoln Short-Wave Club is taking part in the 432MHz UK AC. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 10 April Loughborough & District Amateur Radio Club is having a talk on PCB manufacture by Andrew, G7SEG. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 10 April Worcester Radio Amateurs Association is holding its AGM. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Tuesday 10 April Wythall Radio Club is holding a committee meeting. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 11 April Friskney & East Lincolnshire Communications Club is holding a M3 and M6 club net on GB3FR from 7.30pm. Contact the FELCC Information Line on 07554 362 020.

On Wednesday 11 April Lincoln Short-Wave Club is taking part in the 80m CC SSB form the shack and having a video night at the BSA Club. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 11 April Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 11 April Telford & District Amateur Radio Society is having a talk on the age of the telegraph by Tony, M0TAW. Contact Mike, G3JKX, on 01952 299 677.

On Wednesday 11 April Welland Valley Amateur Radio Society is taking part in the 80m CC SSB contest. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Thursday 12 April Lincoln Short-Wave Club is running a simplex club net on 145.375MHz from 20.00. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Thursday 12 April Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk.

On Thursday 12 April South Birmingham Radio Society is holding training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 13 April Coventry Amateur Radio Society is having a surplus equipment sale and committee forum. Contact John, G8SEQ, on 07958 777 363.

On Friday 13 April Friskney & East Lincolnshire Communications Club is holding a club net on GB3FR from 8pm. Contact the FELCC Information Line on 07554 362 020.

On Friday 13 April South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Saturday 14 April Lincoln Short-Wave Club is holding its surgery in the shack from 09.00. For more information contact Pam Rose, G4STO, on 01427 788 356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 9 April Angel of the North Amateur Radio Club is closed. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 9 April Sheffield Amateur Radio Club is closed. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday 10 April Chester & District Radio Society is holding a committee meeting. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 10 April Halifax & District Amateur Radio Society continues its Foundation training course and is on the air. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday 10 April Morecambe Bay Amateur Radio Society is discussing the Blackpool rally and having a cupboard sort-out. Contact Sheila, on 07867 516 836.

On Wednesday 11 April Denby Dale Radio Club is on the air on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 11 April Durham and District Amateur Radio Society is operating PSK. Details from David, M0BPM, on 01913 888 113.

On Wednesday 11 April Hornsea Amateur Radio Club is having a talk on data modes by M0GVZ. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 11 April Sheffield Amateur Radio Club is taking part in the 80m Contest SSB. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Wednesday 11 April Wirral & District Amateur Radio Club is having a quiz against Chester & District Radio Society for the G3PYU Trophy. Details from Simon, G6XHF, on 01516 013 269.

On Thursday 12 April South Manchester Radio and Computer Club is holding a PC clinic with Dave, G4UGM. Details from Ron, G3SVW, on 01619 693 999.

On Friday 13 April East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 13 April Tynemouth Amateur Radio Club is having a talk on radio blogs and Wordpress by 2E0MLY. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Sunday 15 April Wirral & District Amateur Radio Club is at the Blackpool Radio Rally. Contact Simon, G6XHF, on 01516 013 269.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 10 April Livingston & District Amateur Radio Society is holding an EGM. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 11 April Glenrothes & District Radio Club is looking at aerials and equipment for forthcoming club events. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Lothians Radio Society is having a talk on activating East Africa in the 1960s and 70s by Andre Saunders, GM3VTB. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 12 April Aberdeen Amateur Radio Society is maintaining the club antenna & checking the Mills on the Air equipment. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Thursday 12 April Paisley Amateur Radio Club is having a hints and kinks session with GM0PYM. Contact Bill Anderson, 2M0BZZ, on 01505 613 633.

On Friday 13 April Borders Amateur Radio Society is having a talk on signal strengths by Ian, GM8IIO. Details from MM0YLG on 07944 912 751.

On Saturday 14 April Wigtownshire Amateur Radio Club commences its Titanic Special Event Station weekend event operating from Dalbeattie Museum. Details from Ellis Gaston, GM0HPK, on 07979 692 580.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Monday 9 April Bedford and District Amateur Radio Club is running a club net on GB3BF from 20.30. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Monday 9 April Coulsdon Amateur Transmitting Society is closed. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 9 April East Kent Radio Society is closed. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 9 April Norfolk Amateur Radio Club is running a net on GB3NB from 19.30. Details from Chris Danby, G0DWV, on 01603 898 678.

On Tuesday 10 April Bedford and District Amateur Radio Club is having a useful radio aids evening. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Tuesday 10 April Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 10 April Chelmsford Amateur Radio Society is running a club net from 8.30. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 10 April Harwell Amateur Radio Society is having a talk on the development of the G4TPH Magloops by Tom, G4TPH. Contact Malcolm, G8NRP, on 01235 524 844.

On Tuesday 10 April South Essex Amateur Radio Society is having a talk by Mike, M6KEB on aircraft servicing. Details from Dave, G4UVJ. 01268 697 978.

On Wednesday 11 April Chelmsford Amateur Radio Society is holding a committee meeting. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 11 April Chesham & District Amateur Radio Society is looking at satellite communications with Paul Jay. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 11 April Darenth Valley Radio Society is holding its AGM. Contact Bob, M0RAW, on 01322 663 804.

On Wednesday 11 April Harwich Amateur Radio Interest Group is discussing J6/G0DVJ. Details from Kevan, 2E0WMG, on 07766 543 784.

On Wednesday 11 April Havering & District Amateur Radio Club is having an informal evening. More information from John, M0UKD, on 07890 222 111.

On Wednesday 11 April Norfolk Amateur Radio Club is running a club net on GB3NB from 19.30. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 11 April Southgate Amateur Radio Club is having a talk on gliding by Mike Hodgson, M0NOE. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Thursday 12 April Bedford and District Amateur Radio Club is running a club net on GB3BF from 20:30. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Thursday 12 April Echelford Amateur Radio Society is holding its AGM. Contact John, G4GSC, on 01784 451 898.

On Thursday 12 April Hilderstone Radio and Electronics Club is having a talk by Dave Townsend, G0WBA on sailing around the world in more than 80 days. Details from Chrissie Turner, hilderstoneclub@gmail.com

On Thursday 12 April Reading & District Amateur Radio Club is holding its spring junk sale. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 12 April Shefford & District Amateur Radio Society is having a natter night. Details from John Burnett, M6JBU, on 07860 804 793.

On Friday 13 April Crystal Palace Radio and Electronics Club is having a talk on 3D TV by Mike Cox. Please note the changed date, for this meeting only. Contact Bob, G3OOU, on 01737 552 170.

On Friday 13 April Itchen Valley Amateur Radio Club is having a talk on radio and astronomy by Bert, G4XPZ. Details from Liz, M0ACL, on 02380 254 599.

On Friday 13 April Mid-Sussex Amateur Radio Society is having a radio night. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday 13 April Radio Society of Harrow is having a talk on RAYNET by Cathy Clark. More information from Linda, G7RJL, on 02083 868 586.

On Friday 13 April Wimbledon & District Amateur Radio Society is having a surplus equipment sale. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Saturday 14 April Chelmsford Amateur Radio Society commences its weekend event operating GB100MWT from Oaklands Museum, Chelmsford, to commemorate RMS Titanic. Contact Martyn, G1EFL, on 01245 469 008.

On Saturday 14 April Radio Society of Harrow will be running GX3EFX at the 40s family experience weekend event at the Lincolnsfield Centre, WD23 2ES. More information from Linda, G7RJL, on 02083 868 586.

On Saturday 14 April Shefford & District Amateur Radio Society is having its club dinner at Stratton House Hotel. Details from John Burnett, M6JBU, on 07860 804 793.

NEWS FOR THE SOUTH WEST

On Monday 9 April Exeter Amateur Radio Society is closed. Contact Nick, 2E0NRJ, on 01363 775 756.

On Tuesday 10 April Blackmoor Vale Amateur Radio Society is holding its AGM. Details from Keith on 01747 851 260.

On Tuesday 10 April Mid Somerset Amateur Radio Club is having a talk on radio training, QRP construction and Buildathons by Steve Hartley G0FUW . Contact Nick, M6NJB, on 01749 346 320.

On Tuesday 10 April Plymouth RC is on the air and having a natter night. Details from Rob James, 2E0ONO, via email to Robert-james@virginmedia.com.

On Wednesday 11 April Thornbury & South Gloucestershire Amateur Radio Club is having a rally de-brief with Stan, G0RYM. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 12 April South Bristol Amateur Radio Club is having a VHF NFD familiarisation evening. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 12 April Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Friday 13 April Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Thursday 12 April Aberystwyth & District Amateur Radio Society is hosting the North Dyfed RAYNET AGM. Details from Ray, GW7AGG, on 01970 611 853.

On Friday 13 April Newport Amateur Radio Society is having a natter night and is on the air. More information from Ross Clare, GW3NWS, on 01633 880 146.

510. Weekly Highlights of Solar and Geomagnetic Activity, 02 - 08 April 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-04-09 15:30:05 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20120409153001.6AE5E33C94@panix2.panix.com>

```
:Product: Weekly Highlights and Forecasts
:Issued: 2012 Apr 09 1221 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
02 - 08 April 2012

Solar activity was at very low to low levels. Region 1450 (N16,
L=324, class/area Esi/180 on 06 April) produced 4 C-class flares
including a C1/Sf at 2110 UTC on 05 April with associated Type II
(360 km/s) and Type IV radio sweeps along with a partial halo
coronal mass ejection (CME) first seen in SOHO/LASCO C2 imagery at
05/2125 UTC. Region 1450 also produced several C-class flares from
04 to 05 April; the largest, a C3/1f at 1624 UTC on 05 April. Region
1452 (N18, L=285, class/area Dsi/040 on 04 April) was also
responsible for a C2 flare that occurred at 1708 UTC on 07 April.
Two filament eruptions were observed. The first was a filament
eruption near N26E14 first observed in SOHO/LASCO C2 imagery
beginning at 0224 UTC on 02 April. The CME was partially
Earth-directed; however the majority of the ejecta were northerly.
The second filament eruption occurred between 1825 - 1900 UTC on 07
April in the northwest quadrant near Region 1451 (N17, L=306,
class/area Cro/020 on 30 March). The associated CME had an
approximate plane of sky speed of 690 km/s with the majority of the
ejecta directed southwest of the Earth.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit ranged
between normal and moderate levels.

Geomagnetic field activity was quiet to unsettled during the period,
with the sole exception of a single active period between 09-12 UTC
on 05 April as the result of sustained southward Bz.

Forecast of Solar and Geomagnetic Activity
09 April - 05 May 2012

Solar activity is expected to be at very low to low levels
throughout the period.
```

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels from 09-13 April. Flux values are forecast to increase to high levels from 14-18 April, due to CH high speed stream effects. Values should decrease to normal/moderate levels again for 19 April through 05 May.

Geomagnetic field activity is expected to begin the period at quiet to unsettled levels, and remain so from 09 April through 15 April, due to the combination of two anticipated CME arrivals from filament eruptions as well as anticipated CH effects. Conditions are expected to recover to mostly quiet levels from 16-22 April, before increasing to unsettled levels on 23-24 April. This increase is forecast as the result of an expected recurrent negative polarity coronal hole. Mostly quiet levels are anticipated from 25 April through the end of the period on 05 May.

Titanic's SOS Relayed by Newfoundland Wireless Station:

Posted: 08 Apr 2012 05:35 PM PDT
http://www.eham.net/articles/28068

CAPE RACE, N.L. -- In a remote Marconi wireless station on the southeast tip of Newfoundland, the bland stream of "Wish you were here" messages from passengers aboard RMS Titanic ended with the inconceivable. "My God, Mr. Gray, the Titanic has struck an iceberg and is calling CQD," head operator Walter Gray would later recall being told by his subordinate, J.C.R. Godwin, at 10:25 p.m. EST on April 14, 1912. CQD was the early Morse code distress call used by Marconi installations. Titanic's head operator Jack Phillips, a good friend of Gray's from Marconi training, also sent out the more novel SOS. It was just before midnight, ship's time. The luxury liner was under water less than three hours later. Cape Race was the closest land base to the stricken ship, which met its fate about 600 kilometres southeast in the North Atlantic's freezing Iceberg Alley. For the first hour or so after that first distress call, "there was no thought of the ship sinking," Gray wrote in his memoir The Life Story of an Old Shetlander. After all, the White Star Line ship had been labelled unsinkable. "It was only when Phillips announced . . . 'We are now sinking slowly by the head. Putting women and children off in boats. Weather remains clear and calm,' that the horror gripped," Gray wrote.

//
Michael A. Merchant, KB3QIH (SK):

Posted: 08 Apr 2012 05:35 PM PDT
http://www.eham.net/articles/28067

Amateur radio operator KB3-QIH Michael Anthony Merchant, 22, of Millsboro signed off his final radio call Thursday, April 5, 2012 after succumbing to injuries sustained in an automobile accident. Born in Dover, Aug. 11, 1989, he was the son of Wilson Merchant and Jody Ray Howell. He was an animated, vibrant young man with a heart of gold and a golden smile. He was active in amateur radio and emergency communications. He was dedicated to his family, called his grandmother every single day, was always there for his family. He loved video games, fishing, and vacationing in Wildwood, N.J.

AMSAT NEWS SERVICE

ANS-099

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

Volunteers are needed to help at the AMSAT booth at Dayton. Gould Smith, WA4SXM, is looking for volunteers to help man the AMSAT booth during the 2012 Hamvention. People are needed all 3 days for 2 hour shifts. Please send the days and times you are available to help as well as how many shifts you are willing to work via e-mail to wa4sxm at amsat.org. Monitor the AMSAT at Dayton web pages for the latest news and developments.

In this edition:

* Fox-1 Project Educational Goals Align With NASA ELaNa Requirements

* AMSAT-NA Board of Directors Nominations

* EPFL Announces Nanosat Ion Drive - To The Moon on 100 mL of Fuel

* European ATV-3 Edoardo Amaldi Arrives at ISS & Performs Reboost

* California Students Contact ISS Astronaut

* Satellite Shorts From All Over

Fox-1 Project Educational Goals Align With NASA ELaNa Requirements

Project ELaNa, NASA's "Educational Launch of NanoSat" managed by the Launch Services Program at the Kennedy Space Center, announced on February 10 that the AMSAT Fox-1 cubesat has been selected to join the program. AMSAT will work with NASA in a collaborative agreement where NASA will cover the integration and launch costs of satellites deemed to have merit in support of their strategic and educational goals.

In an article published in the AMSAT Journal, AMSAT Vice-President of Engineering, Tony Monteiro, AA2TX noted that meeting NASA's educational goals for Science, Technology, Engineering, and Math (STEM) was the cornerstone in the successful acceptance of Fox-1 into the ELaNa project.

Fox-1 continues AMSAT's long record of success as an all-volunteer organization providing access to space communications for students in a curriculum setting as well the private citizen.

The Fox-1 communication package provides a learning and technological stepping-stone using commonly available amateur radio equipment. Students gain first-hand experience in setting up and operating equipment, orbital prediction, communication to distant places, and growth in overall space literacy. In the classroom, Fox-1 will allow schools, teachers, and students to actively participate in space technology with a unique experimental hands-on learning approach that includes communicating through a satellite in orbit.

All of the Fox-1 experiment and telemetry data will be collected and stored on our internet server and made publicly available for use in the classroom and shared with the CubeSat community.

In addition to mentoring university student cubesat mission teams, AMSAT satellites have also hosted university experiments aboard our spacecraft. In addition to the communications package, Fox-1 will host an experimental payload developed as a capstone project at Penn State University. The Penn State project will have impact on future CubeSat systems as the students design, construct, and orbit an attitude experiment based on a 3-axis micro-electro-mechanical gyroscope.

Fox-1 Project Reviews

The Fox-1 Team participated in a Merit Review and Feasibility Review with a panel including education and industry experts at the Doctorate level, a developer of 29 satellites, and directors of research.

The results of the Fox-1 Merit Review found:

AMSAT "nailed" the NASA education requirements of the NASA Education Strategic Coordination Framework and the NASA Education Implementation Framework. In fact, AMSAT has a history of space education that pre-dates most university programs.
The Fox-1 program will be accessible to an entire classroom or school with only the teacher or outside volunteer requiring an amateur radio license. The archive of telemetry data collected during actual space flight will prove valuable in future educational projects that have yet to be imagined.

The results of the Fox-1 Feasibility Review found:

While AMSAT relies on an all-volunteer development team the tremendous depth and experience of the Fox-1 team far exceeds the capability of a typical CubeSat team. AMSAT has developed its satellites this way for 40 years and has never missed a launch.
AMSAT does not rely on critical technology for flight and leverages our experience from prior successful missions:

Fox-1 is designed to operate in sunlight without batteries once the battery system fails. This applies lessons learned from AO-51 and ARISSat-1 operations.
In case of IHU failure Fox-1 will continue to operate its FM repeater in a basic, 'zombie sat' mode, so that the repeater remains on-the-air.
Fox-1 is designed as the immediate replacement for AO-51. Its U/V (Mode B) transponder will make it even easier to work with modest equipment.
From the ground user's perspective, the same FM amateur radio equipment used for AO-51 may be used for Fox-1.

AMSAT's Fox-1 project timeline is based on targeting a launch in the second half of 2013. NASA will determine on which flight each of the Project ELaNa CubeSats fly. Read NASA's CubeSat Launch Initiative web page including AMSAT's participation here.

[ANS thanks the Fox-1 Team for the above information]

AMSAT-NA Board of Directors Nominations

It is time to submit nominations for the upcoming open seats on the AMSAT-NA Board of Directors. A valid nomination requires either one current Member Society, or five current individual members in good standing, to nominate an AMSAT-NA member for the position.

Three directors and two alternate directors have terms expiring this year. The director seats open for election are held by Tom Clark, K3IO; Lou McFadin, W5DID; and Gould Smith, WA4SXM. The alternate director seats open for election are held by Mark Hammond, N8MH and Patrick Stoddard, WD9EWK.

The three nominees receiving the highest number of votes will be seated as regular board members with two year terms. The two nominees receiving the next highest number of votes will be seated as alternate directors for one year.

Written nominations, consisting of names, calls and individual signatures, should be mailed to: AMSAT-NA, 850 Sligo Ave #600, Silver Spring, MD,

20910. They must be received no later than June 15th. No other action is required.

Nominations may also be made by electronic means including e-mail, FAX, or electronic image of a petition. Electronic petitions should be sent to MARTHA@AMSAT.ORG or faxed to 301-608-3410, and also must be received by June 15th. If using any electronic submission, there is a second, verifying step:

ELECTRONIC SUBMISSIONS WITHOUT THIS SECOND, WRITTEN VERIFICATION ARE NOT VALID UNDER THE EXISTING AMSAT-NA BYLAWS. A verifying traditional written petition MUST be received at the AMSAT-NA office at the above address within 7 days following the close of nominations.

[ANS Thanks AMSAT Secretary Alan Biddle, WA4SCA for the above information]

EPFL Announces Nanosat Ion Drive - To The Moon on 100 mL of Fuel

An article posted on space-travel.com reported the EPFL University in Switzerland announced the first prototype of a new, ultra-compact motor that will allow small satellites to journey beyond Earth's orbit.

EPFL said the MicroThrust ion motor will be capable of reaching the Moon using just a tenth of a liter of fuel. The complete thruster weighs just a few hundred grams and is specifically designed to propel small (1-100 kg) satellites, which it enables to change orbit around the Earth and even voyage to more distant destinations - functions typically possible only for large, expensive spacecraft.

Instead of a combustible fuel, the new mini motor runs on an "ionic" liquid, in this case the chemical compound EMI-BF4, which is used as a solvent and an electrolyte. It is composed of electrically charged molecules (like ordinary table salt) called ions, except that this compound is liquid at room temperature. The ions are extracted from the liquid and then ejected by means of an electric field to generate thrust. This is the principle behind the ionic motor: fuel is not burned, it is expelled.

After six months of acceleration, the microsatellite's speed increases from 24,000 km/h, its launch speed, to 42,000 km/h. The acceleration is only about a tenth of a millimeter per square second, which translates into 0-100 km/h in 77 hours. But in space, where there is no friction to impede motion, gentle but steady acceleration is the way to go.

"We calculated that in order to reach lunar orbit, a 1-kg nanosatellite with our motor would travel for about six months and consume 100 milliliters of fuel," explains Muriel Richard, a scientist in EPFL's Swiss Space Center.

A video about the MicroThrust has been posted at:

http://www.youtube.com/watch?feature...&v=YJlSI_l5g4M

[ANS thanks Space-Travel.com for the above information]

European ATV-3 Edoardo Amaldi Arrives at ISS & Performs Reboost

After a successful launch on March 23, the heaviest cargo ship ever has arrived and docked to the International Space Station. The 20-ton European ATV-3 cargo ship, named "Edoardo Amaldi" after the Italian physicist and spaceflight pioneer, made a "smooth and gentle" docking on March 28. It delivered 7 tons of food, drinking water, clothing, oxygen, spare parts and fuel for the 6-member ISS crew.

A video of the docking with ISS can be viewed at:

http://www.youtube.com/watch?feature...&v=PorM-1F4jdo

On Saturday, March 31 the ATV reboosted the space station's orbit to 389.8 km. The ATV's thrusters ran for 351 seconds, increasing ISS velocity by 1.0 m/s and boosting average altitude by 1.73 km. This is a standard test performed as soon as possible after docking.

The successful test burn means that ATV is ready for a series of larger planned reboosts (the first expected on 5 April) and to conduct debris avoidance manoeuvres when necessary.

http://tinyurl.com/ISS-ATVBoost1 (space-travel.com)

http://tinyurl.com/ISS-ATVBoost2 (space-travel.com)

An article posted on spaceflightnow.com on April 2 reports that the huge cargo freighters, weighing more than 20 tons fully loaded, will stop flying in 2014 when the fifth resupply craft delivers equipment to the International Space Station. ESA member states decided to discontinue the program after briefly considering redesigning the throwaway cargo craft to return hardware in a hardened re-entry capsule.

The ESA published a new video on their youtube channel showing ESA astronaut André Kuipers and cosmonaut Oleg Kononenko opening the hatch to the ATV and begin unloading the cargo.

[ANS thanks Space-Travel.com and SpaceFlightNow.com for the above information]

California Students Contact ISS Astronaut

The amateur radio club at California Polytechnic State University, San Luis Obispo, California arranged for an Amateur Radio on the International Space Station (ARISS) contact for elementary school students, 4H-club members and Scouts on Tuesday, March 27. The connection was made by telebridge station AH6NM in Hawaii.

Approximately 150 students were in attendance. Local news station KSBY and the Cal Poly newspaper Mustang Daily covered the event; NASA-TV replayed the contact audio on March 28. The ARISS event complemented the science fair held to get students interested in Science, Technology, Engineering and Mathematics (STEM). To view

the article, see: http://mustangdaily.net/radio-club-m...space-station/

and the news clip: http://www.ksby.com/videos/cal-poly-...h-outer-space/

[ANS thanks Carol, KB3LKI, for the above information]

Satellite Shorts From All Over

Education and Technology Program Director Mark Spencer, WA8SME will try to activate W1AW on AO-27 on April 10 for the 1830Z pass. Fastest QSL is via his callbook address.
The 50 MHz and Up Group has issued the first call for papers for the 2012 Microwave Update Conference to be held October 18-21 in Santa Clara, California. For more information on submitting papers as well as all other aspects of the conference please go to: http://www.microwaveupdate.org
The International Space Station Benefits for Humanity brochure is a collection of in-depth descriptions about benefits from research on the space station. The benefits outlined serve as examples of the space station's potential as a ground breaking scientific research facility. This collection was developed collaboratively by the members of the Canadian Space Agency, European Space Agency, Japan Aerospace Exploration Agency, NASA and the Russian Federal Space Agency. To view the brochure, visit http://tinyurl.com/NASA-Brochure (nasa.gov)
A NASA Educator's Guide about Rockets is available on-line at: http://tinyurl.com/NASAForEducators (nasa.gov)
Bob, WB4APR noted a need for an Australian Amateur Astronomer and HAM operator in Canberra on 4-6 June 2012. Assistance is needed to support a science team of students from the USA to observe the last transit of Venus this century in Canberra. We want a local Australian Ham to be there to see if we can use ham radio and the speed of light to share observations with our sister team in Japan (and any other observation sites). Interested individuals for this historic event, contact WB4APR@amsat.org
Tom Medlin, W5KUB, known for his live webcasts from the Dayton Hamvention and Huntsville Hamfest will also broadcast from the Memphis FreeFest on Saturday, April 14 between 0900-1500 CDT (UTC-5). Tom says, "This is a small hamfest but we will have a few prize drawings during the broadcast. All you need to enter the drawing is to be in our chatroom when the drawings are announced." The internet video feed and the chatroom can be found at: http://w5kub.com. This page streams previously recorded video from Dayton when live broadcasts are not airing.
The next Hudson Valley Satcom net date is Thursday, April 12 at 8:00 PM EDT (UTC -4) on the 146.970 MHz repeater, and also on the N2EYH-L Echolink node. More info: http://www.hvsatcom.org/ (via Stu, WA2BSS)

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

73,

This week's ANS Editor,

Lee McLamb, KU4OS

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

8Q, MALDIVES, AS-013
Alex,UT5UY, will work in holiday style from Thulhagiri Island (AS-013)
in CW and SSB on 80-10m from Apr 12-21. QSL via homecall.

CE, CHILE
The "Radio Club de Chile" activates the special callsign 3G87IARU until
Apr 30 to celebrate the 87th anniversary of the "International Amateur
Radio Union" (IARU) and the "World Amateur Radio Day" on Apr 18.
QSL via CE3AA.

FG, GUADELOUPE, NA-102
FG4KH will be QRV from Guadeloupe (IOTA NA-102, Loc FK96hf) working in
JT65B on 144 MHz via EME from Apr 12-26. QSL via F1DUZ.
See also: http://fgdxpeditionf1duz.monsite-orange.fr

FJ, ST BARTHELEMY, NA-146
Wim,ON4CIT, and Paul,ON4BEC, are going to visit St Barthelemy (NA-146,
WLOTA 0377) from Apr 16-30. Listen for TO3X mainly in SSB/RTTY with
some CW on 40m-6m. The frequenvies for 6m are 50.120 MHz (USB),
50.090 MHz (CW) and 50.200 MHz (RTTY). QSL via ON4CIT, LoTW.
See also: http://www.dxpedition.be/TO3X.html

G, ENGLAND, EU-005
The special event station GB0TI will be activated in CW on HF on Apr 15
from 0900-1700 UTC to remember the 100th anniversary of the sinking of
the Titanic.

The "Dover Amateur Radio Club" also announced to activate the special
call GB2ICE in CW on HF on Apr 15. They want to remember Jack Phillips,
Titanic's radio officer, who died onboard the ship. QSL via G0KOK.

The special event station GB100MUC will be active on Apr 14/15. MUC was
the callsign of the Titanic before the ship left Southampton. The call

was changed to MGY after leaving the port. QSL via bureau.

The "Southampton Amateur Radio Club" (G3SOU and G8FAB) will use the
special call GB1HMGY from Mayflower Park in Southampton on Apr 13-15.
See also: http://www.southampton-arc.org.uk/Titanic100.html

GI, NORTHERN IRELAND, EU-115
Another special event station will be aired from Northern Ireland. The
"City of Belfast Radio Amateur Society" will sign GI2012MGY onboard the
SS Nomadic in Belfast in CW and SSB on most HF bands from Apr 12-18.
The SS Nomadic is the last remaining ship of the "White Star Line", it
served as a tender for the Titanic and Olympic. QSL via GI4GOS, LoTW.
See also: http://www.nomadicbelfast.com

GW, WALES, EU-005
The "Blackwood & District Amateur Radio Society" (GW6GW) and the
"Candle Workshops" from Gelligroes Mill remember the Titanic tragedy
by putting the special event call GB100GGM on the air with two stations
in CW/SSB on all bands on Apr 14/15. Artie Moore from Gelligroes Mill
was the first one who has received the SOS call of the Titanic on the
mainland. QSL via MW0LAO.

The "Barry Amateur Radio Society" is using the special callsign GB1OOC
in April for the same reason. QSL via MW0DHF.
See also: http://bars.btck.co.uk

HH, HAITI, NA-096
Amadeo,HH8/EA3OW, is working from Jacmel in the south of Haiti (NA-096,
WLOTA 0343) until May 12. He is working with Kenwood TS-480SAT and
dipoles in SSB, RTTY and digital modes on 40-10m during his spare time.
QSL via homecall. See also: http://ea3ow.wordpress.com

HL, SOUTH KOREA
The special event station DT12AWC will be active in CW/SSB/RTTY/PSK31
on 80m-2m during the Asian Weightlifting Championships in Pyeongchang
from Apr 14-30. QSL via DS2GOO.

I, ITALY
The special event station IR8ACN from Naples is working in SSB, CW and
RTTY on 10m, 15m, 20m and 40m from Apr 7-15 on the occasion of the
"America's Cup World Series". QSL via IK8PXZ.

ON, BELGIUM
The UBA section in Maldegem (ON4EKO) hits the airwaves in all modes
on HF/VHF using the special call ON100TT from Apr 14 until Dec 31 to
remember the sinking of the Titanic 100 years ago. QSL via ON4WDL.
See also: http://www.on4eko.be

SP, POLAND
Some members of the SP-CFF (SP0CFF) will be on the air as HF87WARD from
Apr 17-30. A special award will be issued as well. QSL via eQSL,
direct QSLs should be sent with SASE to: Polish Club Flora & Fauna,

Suchacz, Wielmozy 5b, 82-340 Tolkmicko, Poland.
See also: http://www.suchacz.eu/news.php

TJ, CAMEROON
Ivan,5N7M/OM3CGN, is active as TJ6RM in CW/SSB on 40m-10m until Apr 16.
QSL via OM3CGN.

VE, CANADA
Cape Race was the first Marconi station in Newfoundland and thus plays
an important role in the history of the Titanic tragedy. The events are
reproduced on Apr 14/15: A ship (VE0MGY/mm, QSL via VO1VCE) shall
contact VO1MCE from the location where the Titanic sank. See: QRZ.com,
http://www.edgeofavalon.ca and http://www.receivingtitanic.com

W, USA, NA-066
Martin,G3ZAY, and Hugo,M0HSW, plan to hand out some IOTA points from
Santa Catalina (NA-066) signing NU2L/6 and W6/M0HSW from Apr 13-15.
QSLs via homecalls.

XE, MEXICO
Some members of the Grupo DXXE will use the special call 6H6IARU on
160m-6m and via satellite from different locator fields from Apr 13-18.
This station marks the founding of the International Amateur Radio
Union (IARU) 87 years ago and the "World Amateur Radio Day" on Apr 18.
This year's World Amateur Radio Day has the motto "Celebrating 50 Years
in Space" with the first launches of amateur radio satellites OSCAR 1
on Dec 12, 1961, and OSCAR 2 on Jun 2, 1962. QSOs with 6H6IARU count
for the IARU Region 2 award, several FMRE awards and the DXXE award.
QSL via N7RO, LoTW. See also: http://www.dxxe.org

DXCC Fees (update)
The ARRL has updated the information on their homepage:
http://www.arrl.org/news/arrl-announces-new-dxcc-fee-structure

OPs wanted
The upcoming DXpedition to Campbell Island (ZL9HR, Nov 17-30) is still
looking for some experienced operators. If you are interested please
contact Tommy (vk2ir@vk2ir.com). See also: http://www.zl9hr.com

New TEP beacons
Thanks to the cooperation of Italian and Hungarian OMs and with the
help of Peter,V51PJ, there are two new beacons active as V51VHF from
Namibia (Loc JG82ie) ready for TEP observations:
70.005 MHz, CW, 35 Watt, 6el DK7ZB Beam N
144.430 MHz, CW, ? Watt, 10el DK7ZB Beam N

Titanic documentation
The "Documentary Archives Radio Communications" in Vienna has collected
information about the Titanic disaster on their website:
http://dokufunk.org/amateur_radio/contributions/index.php?CID 13

LINKS: Current SOTA activities (mountain summits) are announced at:

WAEDC CW results online
The official results of the 57th WAE DX Contest 2011 in CW are online.
Congratulations to all winners and a big thank you to the WAEDC Contest
team DL8WPX, DL6MHW, DL6OCK and DL7VOA. The results of the WAEDC SSB
will be published soon. See: http://www.waedc.de

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-109, R9K, Obskaya Gulf group: Update of the IOTA DXpedition of RT9K/p:
RX9KM states that transport with snowmobiles was not possible due to
warm weather and thus the DXpedition was cancelled.

EU-103, EI/EJ, Saltee Islands: Members of the Papa Lima DX Group will sign
EJ0PL from the Saltee Islands on Apr 14/15. Depending on the local
conditions they want to activate two or three stations in CW, SSB and
digital modes on 80m-6m. QSL via EI5JQ.

EU-008, GM/MM, Inner Hebrides: A team of the Macclesfield & District Radio
Society conducts an IOTA DXpedition to Colonsay (IOSA NH19, WLOTA 1574,
SCOTIA DI05) signing GS4MWS/p from Apr 15&#65533;21. QSL via M0PAI.

EU-125, OZ, Jylland West group: Francois,ON4LO, will sign 5P4LO in SSB, RTTY
and PSK on 80-10m from Romo (DIA NS-001, ARLHS DEN-074) from Apr 15&#65533;
20.
QSL via ON4LO (bureau/direct).

OC-001, VK, Australia: The special event station VI4MGY will be QRV from
South Bank (near the Queensland Maritime Museum) from Apr 15&#65533;22 on t
he
occasion of the anniversary of the Titanic disaster. QSL via QRZ.com.

SA-018, CE7, Los Lagos Region South group: Roberto,CE3CT, Pedro,CE3FZ, and
Luc,LU1FAM will sign 3G7C from Chiloe Island (DICE ICE-701, WLOTA 0750)
from Apr 15&#65533;18. They will work with two stations in CW, SSB and RTTY
emphasizing 30m and the lowbands. QSL only direct via CE3FZ.
More information is available at: http://3g7c.blogspot.es

NASA Spacecraft Spot Something New On the Sun:

Posted: 09 Apr 2012 05:05 PM PDT
http://www.eham.net/articles/28069

ScienceDaily (Apr. 9, 2012) -- One day in the fall of 2011, Neil Sheeley, a solar scientist at the Naval Research Laboratory in Washington, D.C., did what he always does -- look through the daily images of the sun from NASA's Solar Dynamics Observatory (SDO). But on this day he saw something he'd never noticed before: a pattern of cells with bright centers and dark boundaries occurring in the sun's atmosphere, the corona. These cells looked somewhat like a cell pattern that occurs on the sun's surface -- similar to the bubbles that rise to the top of boiling water -- but it was a surprise to find this pattern higher up in the corona, which is normally dominated by bright loops and dark coronal holes.

520. The ARRL Contest Update for April 11, 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-04-11 05:34:10 UTC

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

April 11, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Between 6 and 2 - the 222 MHz Spring Sprint
- MT, NM, MI, SD, VE3 QSO Parties
- AD1C Selected for CQ Hall of Fame
- Windy Web Site
- The Recumbenator Strikes!
- Poisson d'Avril - Zut Alors!
- Remote Island Remote
- GRAFEX Propagation Prediction Tool
- On Your Marks

NEW HF OPERATORS - THINGS TO DO

Definitely make a hole in your schedule to give the ARRL Rookie
Roundup's <http://www.arrl.org/rookie-roundup> SSB edition a try - it's
a contest specifically for new hams. If you want to give DXing a try,
tune for the Japan International DX or YU DX Contest and listen for
these stations calling CQ.

BULLETINS

The ARRL Frequency Measuring Test
<http://www.arrl.org/frequency-measuring-test> (next Thursday evening
in North America, April 19th) will use an 80 meter frequency near 3575
kHz (not 3569 kHz as in the text of the QST article - the schedule
table is correct). The ending announcement of the 40 meter segment will
include the approximate frequency on 80 meters.

The MT QSO Party is on Apr 14/15, not Apr 7/8, and has shortened the
log deadline significantly to 7 days.

BUSTED QSOS

The NEQP was the first of the large regional QSO parties to sustain a
presence on the bands, first running in 2002, followed by the 7QP in
2006. (Thanks, Tom K1KI)
```

John KS6M reminds your editor that it was the Ditto machine - not a mimeograph - that required the use of solvent to transfer the usually-purple wax to our tests and handouts. Relive those days of yesteryear via the Wikipedia entry on spirit duplicators <http://en.wikipedia.org/wiki/Spirit_duplicator>.

And of course, in the table of SS results, there were five entries, not three. Three remains not equal to five, even for very large values of three.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

April 14-15

- NAQCC Monthly QRP Sprint--CW (Apr 11)
- CWops Monthly Mini-CWT Test (Apr 11)
- ARRL Rookie Roundup--Phone
- EU Spring Sprints--CW
- Montana QSO Party
- Japan International DX Contest--CW
- New Mexico Centennial QSO Party
- EU Spring Sprints--Phone
- QCWA Spring QSO Party
- Georgia QSO Party
- Yuri Gagarin DX Contest--CW
- Run For the Bacon--CW
- International Vintage Contest
- VHF Spring Sprints (Apr 17)

April 21-22

- Holyland DX Contest (Apr 20)
- TARA Skirmish Dig Prefix Contest
- ES Open HF Championship
- CQMM Contest--CW
- Michigan QSO Party
- EA QRP Contest--CW
- South Dakota QSO Party
- Ontario QSO Party
- Feld-Hell New Member Sprint
- YU DX Contest--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Congratulations to Jim Reisert AD1C <http://www.ad1c.us/> on his election to the CQ Contest Hall of Fame <http://www.cqww.com/hof_history.php>! Jim was nominated by the Southeastern DX Club <http://sedxc.org/> for this most prestigious honor. Jim is best known for his long and careful maintenance of the CTY files used by nearly every contest logging program. Jim will be inducted at the Dayton Contest Dinner during the Hamvention. (Thanks, Bill N4NX)

The ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup> takes to the airwaves on April 15th - with this running come the new categories of multioperator entries and Rookie team competition. Implemented after requests from all of you out there in radiosport land, both are great ways to get new operators on HF, especially clubs. The April edition of Rookie Roundup takes place using SSB (Aug is RTTY and Dec is CW) so limber up those PTT switches. You can use a standalone logging program (N1MM supports RR, for example) or use the new In The Log <http://www.inthelog.com/> online logger.

All of those big QSO parties (NEQP, 7QP, INQP) on the first weekend of May can accept combined logs and will sift out "their" QSOs for you. N1MM software can handle the multiple QSO parties by choosing QSOPARTY under Log Type, then pick the IN7QPNE under "State for log type". CQ/X <http://www.no5w.com/> also supports several other combinations of QSO parties and will split the log into individual contest submissions. (Thanks, Tom K1KI, Dick K7XU, Steve N2IC, and Chuck NO5W)

WRTC 2014, Inc., host of the 2014 World Radiosport Team Championship competition, is pleased to announce that the tribander antennas to be used for the competition will be the Cycle 24 Antenna Products Company <http://www.cycle-24.com/antennas.htm> TX38. The antenna has 8 full-sized elements (2 elements each on 20 and 15 meters and 4 elements on 10 meters) on a 14.5 foot (4.4 meter) boom and weighs only 30 pounds. It will be commercially available in July. (Thanks, WRTC 2014 Co-chair, Randy K5ZD)

The revised rules for the 2012 IOTA Contest <http://www.rsgbcc.org/hf/rules/2012/riota.shtml> now appear on the RSGB Contest Committee website. The World Multi-Operator category has been discontinued, Island Multi-Operator stations must observe a "6 band mode/band changes per hour" rule and must identify Run and Multiplier stations in their log. The score for non-island to non-island QSOs is reduced from 3 points to 2 points and Low Power island expedition stations can now choose any antenna that they want. (Thanks, IOTA Contest Manager, Don G3XTT)

A video presentation on digital-mode contesting by ARRL Publications Manager, Steve WB8IMY was recorded and has been posted to the Potomac Valley Radio Club's website <http://www.pvrc.org/>. It is accessible via the Recorded Webinars link. (Thanks, PVRC President, Ken K4ZW)

A recent EE Times "Ham Radio Today <http://www.eetimes.com/electronics-blogs/other/4370279/Ham-radio-today?cid=NL_MicrowaveRF&Ecosystem=microwave-rf-design>" column details one route into the engineering field - ham radio - as taken by Jack N3ALO who also writes the "Break Points <http://www.eetimes.com/electronics-blogs/21/Break-Points>" column for Embedded System Design. (Thanks, Dave KU4B)

Here are some guidelines for RTTY contesting by Ed W0YK. They are aimed at CW/SSB contesters to help them learn the "ways and means" of digital contests.

1. Although strange to CW/SSB Sprinters, it is common practice in all RTTY contesting to end CQ messages with 'CQ', and only 'CQ' after your call sign(s).

2. Just send your call sign once or twice depending on the specific situation. No need to send it twice if once will get through. You just need to balance brevity (speed) vs. reliable communication.

3. Generally send unique exchange elements twice. This definitely applies to the serial number in RTTY contests but use judgment for the NAME and QTH.

RTTY serial numbers really do need to be sent twice because a small noise spike could transform one number and you'd never know it by ear like you do on CW and SSB.

Web Site of the Week - Here's another interactive map - this one shows "live" wind predictions <http://hint.fm/wind> across the US. Click on the map to zoom in and click the "Unzoom" button at left to restore the original view. This map does put a load on the web browser software so it might bog down with an older PC. (Thanks, Bob N6TV)

WORD TO THE WISE

Self-spotting - the practice of posting your own call sign and frequency on the spotting networks (or asking someone else to do it for you) is specifically not allowed in nearly all contests - even for Assisted, Unlimited, and multi-operator entries. Why? Because it's a form of CQing that takes place outside the amateur bands. This includes websites like Facebook, Twitter feeds, chat rooms, instant messaging and other Internet gadgets. Don't do it!

==> SIGHTS AND SOUNDS

Rem K6BBQ produced a YouTube video <http://www.youtube.com/watch?v=Q1molUU62uc&feature=colike> of his recumbent bicycle mobile QRP operation in last year's Salmon Run, a.k.a. the Washington State QSO Party. He logged some miles alongside San Francisco Bay, ate carnitas, and contacted several stations in Washington - all on the go!

The K5QE team has been making a lot of noise and working hard in recent VHF+ contests. Here's a video <http://www.youtube.com/watch?v=_OT80LMUVBY> all about this big and growing station. (Thanks, Dick N6AA)

If you're getting ready for the Dayton Hamvention <http://www.hamvention.org> in May here's a video about the early years <http://www.youtube.com/watch?v=0mwimZ6xt6c> of this super-sized ham radio convention and hamfest. (Thanks, Tim K3LR)

April 1st isn't so far gone that a chuckle's not still in order. Take a look at this Wouff Hong garden <http://rettysnitch.org/>.

Got several thousand diskettes full of logs and don't have time to transfer them? Try this handy diskette reading robot <http://www.fark.com/vidplayer/7029870>! (Thanks, Sean KX9X)

==> RESULTS AND RECORDS

The world has returned to normal with the publication of the Poisson d'Avril Contest results <http://poissondavril.webs.com/2012results.htm>. I believe sponsor, log checker, and prize manager Doug K1DG is already hard at work on next year's results, too!

Results from the 2011 New England QSO Party <http://www.neqp.org/> have been posted. Certificates will be mailed out during the next week and plaques shortly afterwards. (Thanks, Tom K1KI)

The CWJF Group has released results of the 2011 CQMM DX Contest <http://www.cqmmdx.com/>. (Thanks, Luc PY8AZT)

The results of the 2011 JIDX CW <http://jidx.org/> contest have been posted. The JIDX committee is processing the 2011 SSB logs and expects to have them online before long. (Thanks, Tack JE1CKA)

Online databases of contest results are yours for the browsing. Steve N2IC recommends Pileup <http://pileup.ru/> and Bob N6TV the DXwatch 3830 report finder <http://www.dxwatch.com/ct_scores>.

OPERATING TIP

How do you hear through static crashes? The Topband reflector <http://lists.contesting.com/mailman/listinfo/topband> tackled that topic in March and you can follow the discussion via the online archives <http://lists.contesting.com/pipermail/topband/>. Search for "static" in the thread view and you'll find the messages.

==> TECHNICAL TOPICS AND INFORMATION

Radio Arcala <http://www.radioarcala.com/> team member Toni OH2UA was at the controls of CQ8X for a serious contest operation in the Azores for WPX SSB. That's not unusual. What was unusual is that the 4543 contacts were made over a remote link across the Internet - 4500 kilometers from the actual station! Remote operation is becoming more and more common. Big scores like CQ8X's 15 million points show that remoting can work well!

Magazine Roundup

- QEX <http://www.arrl.org/qst-qex-ncj> for March and April contains a terrific article by Rudy N6LF on elevated radials and the many factors that affect their performance. (Rudy also added a great deal of material on radials and the effects of ground to the 22nd edition of the ARRL Antenna Book.)
- Electronic Design's Louis Frenzel (also known as W5LEF) covers digital modulation with a nice survey of techniques and performance <http://electronicdesign.com/article/communications/Understanding-Modern-Digital-Modulatio

n-Techniques-64598>
in the February 9, 2012 issue and the "Ideas for Design" section
includes a useful passive circuit for audio tone control
<http://electronicdesign.com/article/analog-and-mixed-signal/simple-circuit-offers-single-adjustment-tone-control>.
- Gary K9AG's new magazine RF Technology International includes a
tutorial or introduction every month. February's tutorial was titled
"The Characteristics and Causes of Phase Noise
<http://rfti.com/wp-content/uploads/2012/03/RFTI0212_PhNoise.pdf>". The
issue also included a forward-looking article on energy-efficient
transmitters
<http://rfti.com/wp-content/uploads/2012/03/RFTI0212_McCune.pdf> by
Earl McClune.
- Popular Mechanics <http://www.popularmechanics.com/> for April
includes a way to make good use of that old barbeque cart - as a
rolling workbench - in "The Recycler". In the same issue, the NES
ThreadMate <http://angloamericantools.com/> gets a nod as an effective
universal thread cutter to repair damaged bolts - a handy thing to have
in the tower-top tool bucket!

The Instructables website
<http://www.instructables.com/id/Soldering-Assistant/> features a nice
application of 3D printing with a combination printed-circuit board
holder and parts drawer. If you have access to one of these handy
devices - I think I need one! - you can soon have yourself a new
workbench gadget.

Ken W0LSD offers an inexpensive method of improving your rotator's grip
on the antenna mast. "Go to your local tire shop and get an old inner
tube. Cut a piece that will fit in the area between the rotor clamp and
the mast. When you tighten the clamps it is almost impossible for the
mast to turn. It also seems to act as somewhat of a cushion for
vibration and I have not had nuts loosen on the U bolts." Dan N5AR
observes that baler belting is another similar material and widely
available in hay country.

Pat AA6EG discovered a source of HV air-dielectric capacitors. His
local Goodwill store has large numbers of air cleaners, each of which
includes a low-current HV supply, for a few dollars. The capacitor
consists of a stack of well-insulated interlaced metal plates with 1/8
to &#65533;-inch spacing through which the fan pulls incoming air to trap the
dust.

To minimize noise conducted from a tower attached to a building, John
NA6L recommends some form of sound insulation between the tower and the
house brackets or between the brackets and the structure. He added some
1/4" thick by 2" wide strips of neoprene between the tower legs and the
house bracket and that got rid of about 70% of the noise. Perhaps this
is another use of that baler belt mentioned previously!

Jim VE7RF points out that a safety choke at the output of an
amplifier's pi network may not work when the amplifier is in receive
mode. To function in both receive and transmit, the choke should be

connected directly to the center conductor of output coax connector. This point is in-circuit at all times.

A cheap heat gun (~$20) can make quick work of desoldering a PCB, says MAKE <http://makezine.com/> author Steve Hobley. Place the PCB upside down over a bucket, heat the board with a stream of hot air, and listen to the parts drop off.

Tim K3LR reports clearing an audio distortion problem on an IC-7700 by resetting the radio's firmware. Some configuration setting had been changed - no one remembers which or why - causing problems with the output audio. Now added to the Pre-Contest K3LR Checklist - resetting all of the radio firmware to the factory defaults so that changes made (and forgotten) in the heat of the contest are not carried forward unwittingly to cause problems in the next contest. That returns all filters back to "normal", clears VFO settings, all examples of the innumerable small details that you never think of when sitting down to the radio with the pre-contest adrenaline pumping.

Technical Web Site of the Week - After the story about the Q-Up Now <http://www.q-upnow.com/> NVIS propagation prediction tool in ARRL Propagation Bulletin ARLP014 <http://arrl.org/w1aw-bulletins-archive-propagation>, Marv N5AW also recommended the GRAFEX <http://www.ips.gov.au/HF_Systems/7/1/4> prediction tool from IPS to get a prediction for conditions over any path, over the current day. (Not all browsers will recognize the applet and may require an upgrade of the Java package.) Just click on any two points of interest on the map, watch the green arc indicating the path, then click on the "Do Prediction" button. The result is a very basic rendering using plain ASCII characters. The OWF figure represents "Optimum Working Frequency." (Thanks, Tad K7RA)

==> CONVERSATION

On Your Marks!

There is nothing better than a good sprint contest...except maybe a good ramble through a large hardware emporium on a construction safari, designing as you go. Inspired by the adaptation of a breaker-box ground lug above, I thought, "Why not combine the two? We've all seen the videos of "Junkyard Wars" - how about "Hardware Wars"?

Around the ARRL Lab, Zack W1VT is well-known for his "Le Mans Start" to Field Day - beginning with a pile of parts and assembling a QRP rig beginning at 1800Z on Saturday. And you thought putting up the antennas was hard!

So here's the idea and let's run with it, so to speak. On the appointed day, contestants, spectators, and judges gather in the parking lot of your favorite hardware emporium. (It might be a good idea to let the management know what you're up to...) The requirements are kept secret in sealed envelopes until the teams are allowed to open them. Only then do they learn what it is that they must build -

antenna, transmitter, tuner, or ???

And they're off! Baskets and carts in hand, they scour the shelves looking for adaptable and re-purpose-able parts that can be cobbled together into something approximately the desired result. Are they going to find proper electronic parts? Not likely! And that's most of the fun - seeing how creative minds can see the potential in a pile of plumbing parts.

Assembly - maybe that has to take place in the parking lot, too...with a strictly limited number of re-entries for additional material. Bring your own tools and work out of the back of the truck - just like real field engineers do! Each project should entail a mix of soldering, cutting, sawing, gluing, and all those things that make homebrewing so much fun.

Points for presentation? Oh, most definitely! The pattern of ventilation holes that make a happy face or bending the supports struts into the classic radio rhombic - extra points for sure! It does still have to actually, you know, work - but what would a classic Stratocaster be without its whammy bar and the 1959 Cadillac without its tail fins?

Devices that collapse, fly apart, melt, or let out the magic smoke - well, that's all part of the game and should be applauded for audacity. Just think of it as the homebrewing equivalent of skittles chess - no time for too much of the furrowed brow. Haul out the pliers and get 'er done!

Of course, what competition is complete without a post-finish trip to a local eatery or park for celebratory consumption? Awards, prizes, photos - all served up with a smile. It might be one of the best contests your club ever had and it's all within reach on the shelves and in the bins. Grab your shopping bags - ready, set, build!

73, Ward N0AX

==> CONTESTS

11 April through 24 April

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

CQ CQ Southwest Buddipole Users and anyone intrested!

Posted: 10 Apr 2012 09:01 AM PDT
http://forums.qrz.com/showthread.php?341745-CQ-CQ-Southwest-Buddipole-Users-and-anyone-interested!&goto=newpost

New Yahoo Group For Arizona: Southwest Buddipole Users Group (SWBUG)
Antenna For Portable Operations.

A bunch of Arizona hams have launched a Yahoo Group regarding the
Buddipole/Buddistick owners and users of the BP antenna system for our
unique SW environmental conditions here in Arizona and surrounding states.
Heat, aridity, dust, sandstorms, wind, desert and mountain topography,
upcoming hamfests, SOTAs (Summits On The Air) and get- togethers are
potential topics.

This is not a commercial group. We all are hams who are just happy and
satisfied to use the lightweight Buddipole system for portable
(backpackable, quick set-up for DX, NVIS, highly configurable for HF, VHF,
and UHF) including ARES/RACES operations and have found considerable
success. And we regional BP users will be pleased to travel to assist new
owners with set-up and tuning. See http://groups.yahoo.com/group/swbug/ .

A New Book from amateur radio operator N9ABC, Steve Handler.

Posted: 10 Apr 2012 05:35 AM PDT
http://forums.qrz.com/showthread.php?341718-A-New-Book-from-amateur-radio-operator-N9ABC-Steve-Handler&goto=newpost

April, 2012

A New Book from amateur radio operator N9ABC, Steve Handler. I am pleased
to announce that my new book, "JUST THE FAX! A Shortwave Radio Listener's
Guide to Weather Facsimile Reception," was published in March and is now
available.

Called by many names including radio facsimile, WEFAX, and radio fax this
method of transmission is used by weather forecasting agencies around the
world to broadcast their weather maps, weather charts, satellite photos and
forecasts to many users around the globe simultaneously.

With a amateur transceiver that provides general coverage of the HF bands
(2-30 MHz), and a computer (PC or MAC) using the proper software you can

receive these entertaining broadcasts.

This book provides a step by step description of the author's experiences receiving these broadcasts. Beside the technical discussion and the examples of maps, charts and satellite photos, there are two sections filled with extensive data. The first section lists stations by frequency and the second section lists them in time order.

Additional information or questions may be directed to Steve Handler at n9abc@arrl.net

Concursar - Castellano

Posted: 10 Apr 2012 03:38 PM PDT
http://forums.qrz.com/showthread.php?341790-Concursar-Castellano&goto=newpost

CONCURSAR - Concurseros Argentinos - Argentine Contesters

http://ar.groups.yahoo.com/group/concursar/

Se trata de un equipo de Radioaficionados de habla Castellana con larga experiencia técnica y operativa en competencias internacionales reunidos

con el objeto de compartir sus conocimientos y experiencias, para enseñar, entrenar y promocionar todo aquello relacionado con la tecnología y las acciones operativas de los concursos de radioaficionados sin distinción de modos operativos.

Para concretarlo se ha creado un foro a través de Internet con carácter publico, gratuito y sin moderación ni censura, al que podrán integrarse todos los radioaficionados, radioescuchas y personas interesadas que esten dispuestos a contribuir con los objetivos basicos y que así lo deseen, con el único compromiso de respetar el espíritu y letra de su creación en el marco de los reglamentos, los códigos éticos y operativos de los radioaficionados.

Con el objeto de integrarse solo es necesario hacer su solicitud con su identidad real a traves de su señal distintiva o para el caso que aun no la posea, puede hacerlo con su nombre y apellido.

La base del exito del equipo esta fundamentada en el disenso sin polemica, el respeto sin ofensa, la discusion instructiva y por sobretodas las cosas la intencion de enseñar y de aprender en este marco sin distinciones de categorias o nivel de conocimientos.

:)CONCURSAR es la sintesis del respeto, sin moderadores ni presidentes, solo integrantes con la libertad de aprender y enseñar, donde todas las decisiones administrativas son adoptadas por el consenso de sus creadores, conocimiento y participácion de todos los integrantes.

La presentacion de una solicitud significa la aceptacion de los terminos expresados, la que debera ser aprobada pero solo con el objeto de evitar el ingreso de spam no deseado que pueda molestar al resto de los suscriptores.

Todos los mensajes seran de caracter publico y podran ser accedidos desde un navegador sin restriciones.

USS Hornet ARC Special Ops for Doolittle Raid - April 14, 2012

Posted: 10 Apr 2012 10:18 AM PDT
http://forums.qrz.com/showthread.php?341757-USS-Hornet-ARC-Special-Ops-for-Doolittle-Raid-April-14-2012&goto=newpost

Hello All,

USS Hornet Amateur Radio Club and NB6GC will operate an event on

April 14 to remember the Doolittle operations from USS Hornet, CV-8

in April of 1942. Although this operation was conducted from the

earlier USS Hornet and not from USS Hornet, CV-12, the sixteen B-25

bombers were loaded on CV-8 here at Alameda Naval Air Station on

April 1, 1942 and after a voyage across the Pacific, they were

launched on April 18 while 650 miles from Japan. You can

read about the operations at:

http://en.wikipedia.org/wiki/Doolittle_Raid

HARC will combine our monthly club meeting with radio operations for

the event. We will look for QSOs on HF bands from 0930 till 1700 PDT.

QSOs will be mainly on SSB and PSK-31, but also CW if an operator is
available.

Most Navy communications in 1942 were carried out in CW. Additionally, if
possible,

we will transmit a Morse Code practice broadcast using text about the
Doolittle Raid.

Certificates and QSL cards will be offered for the event.

Look for NB6GC on 7.2150 MHz, 14.3150 MHz, and 21.3150 MHz on SSB.

PSK will be on the usual PSK frequency on each band. CW Practice broadcasts

will be around 7.1150 MHz at various speeds.

So if you plan to come to USS Hornet on April 14 for the HARC

meeting, try to come earlier and stay later to get on the air. Help

is also needed to design a QSL card for the event.

Thanks and 73 de KO6NO.

Historical Society Showing Ham Radios Used By Kilby:

Posted: 10 Apr 2012 05:32 PM PDT
http://www.eham.net/articles/28075

Years before Jack Kilby invented the integrated circuit, the future Nobel Prize winner was learning about electronics at a Radio Shack at 12th and Monroe in Great Bend. Now the Barton County Historical Village and Museum is displaying some of the objects that sparked young Kilby's interest in science. "The Inspiration -- How a Ham Radio Sparked the Internet Age," offers visitors a rare opportunity to view first-hand objects never displayed to the public, said Beverly Komarek, executive director of the Barton County Historical Society. Included in the exhibit are two ham radios that belonged to the J. Roy Evans family, who ran the store. "They were the first two ham radios that Jack Kilby ever laid his fingers and eyes on," Komarek said. "They were his first taste of 'electronics,' and that was in the 1930s." Dr. Donald Walters of the Post Graduate Naval Academy in Monterey, Calif., is the grandson of Roy Evans and has loaned the radios to the Barton County Historical Society. Evans will visit the museum the morning of Saturday, April 28. Doors will open at 9:30 a.m., and at 10 a.m. he will talk about how a family friendship encouraged young Jack Kilby to pursue his passion for science and technology. Included in the morning's events will be a hands-on demonstration of an original calculator and a discussion of the 1933 and 1938 Sky Champion ham radios to be displayed at the museum. In a letter to Walters several years ago, Kilby mentioned that he himself had purchased a Sky Champion after he got his amateur radio license.

Radio Operators Prep for Blizzard of the Century:

Posted: 10 Apr 2012 05:30 PM PDT
http://www.eham.net/articles/28074

ASHLAND -- Licensed amateur radio users in Ashland, Richland and Huron counties are preparing for nearly three feet of snow this Saturday. They're expecting power outages, cars stranded along highways and communications to be down. A lot of people may find the scenario familiar. "Basically, we are simulating the Blizzard of '78," said Mark Rafeld, director of the Ashland County Office of Homeland Security and Emergency Management. Rafeld initiated the tri-county effort. "We're testing our capabilities via radio," said Robert Palm, secretary for the Ashland Amateur Radio

Club. "There are circumstances when cellphones might not be available, so we would need to rely on radio."

Amateur Radio on the Front Line During Titanic Disaster:

Posted: 10 Apr 2012 05:28 PM PDT
http://www.eham.net/articles/28073

anniversary of the sinking of the Titanic this week, a museum in Wales is presenting an exhibit focused on amateur radio operator Artie Moore, the man who first transmitted messages about the sinking of the Titanic to local residents. At the time, his messages were met with disbelief since he was thousands of miles away from the Titanic. The exhibit, "The Titanic, the Mill and the Signal: Artie Moore and Titanic's SOS," will also explore "life at the turn of the century in Wales, as well as the local area's links to Titanic in this 100th anniversary year of her sinking."

//
Indian Designer Develops Morse-Based Texting for Deaf Phone Users:

Posted: 10 Apr 2012 05:27 PM PDT
http://www.eham.net/articles/28072

An Indian graduate student has development a mobile phone application that enables people with sight and hearing impairments to send and receive text messages. The PocketSMS application was developed for Android smartphones, which are generally cheaper than Apple's iPhones. The application converts text into Morse code vibrations so that users can "feel" the message. Regular mobile phones already use vibrations to alert users to incoming calls or messages. Anmol Anand, a graduate student at the Guru Gobind Singh Indraprastha University in Delhi, realised that the same vibrations could also convey text message content. He used the open source Google App Inventor to write a new application to covert each letter in a text message into Morse code : in which each letter corresponds to a set of a short and long tones -- and then used the phone's hardware to vibrate for each letter. An accompanying application, MorseTrainer, has been designed to teach deaf-blind users Morse code, and to use it without having to rely on smartphone keyboards, which can be difficult to see.

WIANEWS WEEK COMMENCING APRIL 15 2012.

MAYDAY WONNANGATTA

PROJECT HORUS FLYS SUNDAY

WIA NATIONAL FIELD DAY THIS WEEKEND

SKA RESULT UP IN AIR

5 YEAR OLD PASSES LICENCE EXAMINATION

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING APRIL 15 2012.

At around 0930hrs 9 April 2012 a mayday call was made on 7090khz by VK3MAC
who was in the Wonnangatta Valley region in the highlands of Victoria.

A person in the camping party had some seizures and was in a bad way
medically. VK3MAC with the operator, Adam, made its way up to a hill in a
4WD with HF fitted and put the call out.

Jack, VK3AJK was the first to respond and took control of the frequency and
the situation. He ascertained the location, situation etc. and contacted
emergency services.

VK3AJK then became the relay person between the emergency services and the camping party as the precise GPS coordinates were given out as was the specific medical condition. The decision was made that a medivac would occur via a rescue chopper.

Both parties were being received by Tony Lathouras, VK7VKT 5-9.

VK3MAC then indicated that he was going to return to the valley floor where the rest of the camping party, and the patient was with the final instruction from Jack, VK3AJK, that the rescue chopper asked that all vehicles in the camping party form a 50 metre circle in a clearing with hazard lights flashing.

The weather had started to close in by this time.

Upon reaching the valley floor VK3MAC put a call out which had dropped to 5-7 but perfectly readable into VK7 and VK3AJK had a perfect copy on him still.

Several calls were made to establish that contact was still available between the two and indicating that the patient was stable. Vk3MAC then indicated that all vehicles were in position.

Shortly after, he called back to say that the helicopter with a medical team had landed, and thanked Jack for his assistance.

It was asked several times with the same reply, that there was no mobile phone service in that area.

Hoping that patient has a speedy recovery and full points to Jack and Adam who worked calmly during this event.

(TONEMAN Tony Lathouras, VK7VKT)

Oceania DX Group activates Vanuatu

Do you need Vanuatu YJ0 for your DX Award?

The Oceania DX Group will be active on all HF bands from Vanuatu from 21st April until the 5th May.

A group of six VK operators will be operating three stations with special focus on the WARC bands as well as 80 and 160 metres. Operation on the lower bands will depend on conditions, but the team expects to have 160 metres operating through their local sunrise and sunset as a minimum.

The team will also make a special effort to keep one station active on digital modes. So listen out for YJ0VK

For more information visit yj0vk.odxg.org

(73 and good DX Chris VK3QB)

Closer to home Friday 20 April four Victorian amateurs will head toward the most southern point on mainland Australia. South Point is a rocky outcrop located at the southern end of the Wilsons Promontory National Park and is accessible only on foot. Peter VK3ZPF, Wayne VK3WAM, Kevin VK3KAB and

Trevor VK3ATB will be running QRP from 0000z on Saturday 21 April on 80, 40, 20, 15 and 10m using both CW and SSB.

Contacts from South Point, or with the team on their return trip, can be used toward the Keith Roget Memorial National Parks Award sponsored by Amateur Radio Victoria.

Project Horus High Altitude Balloon Launch

The Project Horus high altitude balloon group, based in Adelaide, is planning a balloon launch this Sunday 15th April, shortly after the WIA Broadcast (planning to be in the air around 10-11am ACST).

This will be an amateur radio oriented balloon launch, with three payloads of interest to amateurs, intended to coincide with the WIA field days. The launch designation is Horus 23.

The group is planning on flying the FM voice repeater again. The repeater will operate with a 70cm uplink and a 2m downlink.

New frequencies will be used and they are;

Uplink: 438.900 MHz FM with a CTCSS Tone of 123Hz

Downlink: 144.650 MHz FM (in the 2m experimental segment) with a CTCSS tone of 123Hz.

Based on previous flights, it should be possible to access the repeater from up to 800km away at apogee, with about 30-50W. A beam will help overcome the inevitable FM capture effect problems. The downlink is easily audible on any reasonable Omni directional antenna, although if you are under the balloon's flight path you may see over 20dB fades. The tracking and recovery teams use cross dipoles on the roofs of the chase vehicles to help with the link budget and fading.

The Amateur Radio Experimenter's Group will be running net control on the voice repeater as VK5ARG from launch control in the Adelaide Hills.

APRS will fly on this flight on 145.175 MHz The expected callsign is VK5ARG-11. We will be also able to look at the new http://aprs.fi/ horizon ring prediction service on this flight. Telemetry format packets are now also broadcast on APRS.

The ever reliable primary 300 baud RTTY telemetry beacon will also fly - at this stage it will be on 434.075 MHz (note update) (+/- 5kHz thermal drift). This signal is used as part of the group's "distributed listener" telemetry network where any amateur receiving the data can upload what they are hearing over the internet.

The data, which is sent to the http://spacenear.us/tracker website, contributes to the landing zone predictions used by the chase teams. The chase-tracker teams have 3G Internet in their vehicles and are actively looking at that data, so it is one way amateurs can have a behind the scenes involvement in the flight's success. NOTE: this beacon only runs 25mW, however we have had people from the horizon and at times beyond still be

able to decode and contribute, so why not give it a go!

If you would like more information about the software setup required to participate in telemetry recovery take a look at our tracking page: http://projecthorus.org/?page_id=336

Confirmation that the flight is a go can only be given ultimately on the morning of the 15th. We are very much subject to the weather and have various constraints on where we are permitted to fly, so the potential for the mission to be scrubbed exists up until the last minute. We will endeavour to update the forum once we get closer, and will post notices on the DX Cluster once it is in the air. Flight time should be around 2 & 3/4 Hrs.

If you would like to find out more about Project Horus, please visit our website www.projecthorus.org/

or for some short films of our past activities, the Vimeo channel at http://www.vimeo.com/channels/projecthorus/

TARC Does the WIA National Field Day this Weekend

The WIA National Field Day will be happening this Saturday and Sunday April 14th and 15th and theTARCinc ran displays about the different aspects of Amateur Radio at the front door of Jaycar Electronics Townsville store in Ingham Road West End Saturday from around 7-30am.

Checking the WIA website at the time this dispatch was released -

just the following people or groups had registered to participate this year.

Oxley Region Amateur Radio Club, Port Macquarie Town Green.

Southern Peninsula Amateur Radio Club Shire Office Reserve Rosebud VIC.

Waverley Amateur Radio Society Outside Bondi Beach Pavilion.

Midland Amateur Radio Club Prince of Wales Showgrounds Bendigo.

Eastern & Mountain District Radio Club Jaycar Electronics Springvale.

WICEN (Vic) Mornington Peninsula region JAYCAR Electronics Frankston West.

Orana Region Amateur Radio Club Elston Park, Dubbo Dubbo NSW.

Alice Springs Amateur Radio Club Flynn Church Lawns, Alice Springs NT.

Radio and Electronics Assoc of Sth Tas (REAST) Jaycar Derwent Park.

WIA - Promoting Our Hobby

Greetings Everyone.

The first time you may be hearing this broadcast is while you are participating in the WIA National Field Day. This event is aimed at promoting our hobby and the diversity of interests Amateur Radio encompasses.

Everyone who has been involved in promotional events of any kind will have retained a mental record of how successful or unsuccessful the activity has been and the reasons for the outcome. The promotion of Amateur Radio is no different and from your or your Club's experience you will know what has been most successful in your community.

The Easter period is past and many Radio Amateurs will have visited friends and families or travelled to a holiday destination where there was an opportunity to operate our station in a portable role. Reflect on how we operated and how it would be viewed by a passer-by.

Was our operation covert or overt? That is, did we project a 'Go away! Don't disturb me!" aura or one which conveyed 'I'm enjoying this and I'm happy to welcome you and answer your questions.'

Unfortunately it is all too easy for us to project the former and loose the opportunity to foster interest in our hobby by those intrigued by what we are doing and enjoying but apprehensive about asking. By changing our attitude to be more overt and engaging about our hobby we can carry the message of the WIA National Field Day throughout the year to those non-amateurs who did not have the opportunity to pass or visit a WIA National Field Day station.

Thank you to all those individuals, groups and clubs participating in the WIA National Field Day activities.

This has been Ewan VK4ERM for the WIA Board asking 'Who have you introduced to Amateur Radio to-day?'

HAMS ACROSS AUSTRALIA.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Hopefully the weather has been kind to the participants in the WIA National Field Day. As a recruiting and advertising method, the first 2 National Field Days certainly got the message out via the mass media. Here's hoping number 3 is as successful.

Just to keep the momentum going is the fast approaching ANZAC Day. Not only is this a day of solemn remembrance but also an opportunity to celebrate all

those whose service life depended on radio. As we have heard, there are groups of amateurs who will be running CW and AM, the main modes of the Second World War. Spark was the primary mode of the First World War but was banned by the time of the Great Depression.

Here is an opportunity for all amateurs to participate. For the F-calls, remember that many of the radios used during WWII operated at QRP levels so taking part on Anzac Day is following a 70 year old tradition. Check the net frequencies in "Amateur Radio" or the web.

I'm Geoff Emery and that's what I think....how about you?

I'm Ray, VK4CF with news from Redcliffe & Districts Radio club.

This weekend members of the Redcliffe Radio Club will be operating the special event station, VI4MGY, from the docks of the Queensland Maritime Museum, Southbank in Brisbane from 1000 hrs. Sunday until 1000 hrs. Monday.

At the end of today's news, or just before we end, in REWIND I'll pop back with much more detail on this TITANIC event, stay tuned!

The Wednesday group had some 40 members at the club house last Wednesday packing equipment for the weekend activity. One welcomed visitor was Ray, VK4UG and his XYL. Club President David, VK4DC, said that the car parking at the club was a nightmare but it was fantastic to see the club full of members all enjoying the Morning.

Next Monday night is the Technical talk By Kevin, VK4UH, it is a good one on meteor scatter.

Well this is about all at the moment and so it's 73 until next time from Ray, VK4CF, from the Redcliffe club.

DISCUSSION POINT

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

Recently I heard an f-call ask on-air about the performance of their HF antenna. It reminded me that in order for any learning to occur, there needs to be two elements that come together. While it's simple to ask questions among your friends, it takes a leap of faith to ask a stranger.

So, one of the elements you need is a Leap of Faith, "I have a problem and I wonder if anyone might be able to help."

For this leap of faith to pay off, you also need to gain access to the knowledge required to solve your problem. It can come in many guises, from "read the manual", through "I have done that and I solved it like this." to "Let me come over and give you a hand."

The second element that is needed is Generosity.

The interesting part for me
is how the discussion opens up many possibilities when experienced people enter the conversation. It's one thing to acknowledge the original Leap but two inexperienced people talking to each other about a problem when neither of them have more than rudimentary understanding is less than satisfying, both for the two people and for any listeners on frequency.

I'm glad to say that in this particular case some personal skill and knowledge was added to the discussion by some experienced hams, but I've also heard discussions where the blind were leading the blind.
While it is
possible that a question is asked by a novice f-call and answered by an experienced advanced-call, that is not always the case. In fact to me it seems, more often than not, the level of license bears little relation to a person's level of experience.

Amateur Radio is like an aural history, made of story tellers and listeners. If you don't tell your stories pretty soon you'll run out of listeners and the history dies.

So, no matter your place, taking a Leap of Faith, or
providing Generosity, remember that in order for the hobby to endure we need to keep talking.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

5 year-old passes Foundation exam

The Humber Fortress DX Amateur Radio Club in the UK is proud to announce and congratulate its youngest new member Kayleigh Huntley on passing her Foundation exam at age 5 years.

While Kayleigh may well be the youngest to have passed her foundation test in the UK (Samuel Lewis KB9RYP and Sarah Bruno KB9SEG were just 4 years old when they got their amateur radio licenses in 1998), even though she holds a license to operate alone, this will not happen.

Kayleigh's only access to radio is via her Granddad Andy G7LRR, or at the Radio Club under supervision and very closely monitored.

Kayleigh has been involved in radio for over 3 years now, having been allowed to say hello on her granddad's radio to radio friends all over the world.

No Square Kilometre Array (SKA) site decision

We will have to wait till at least mid-May before it may be decided whether South Africa or Australia will be the country to host the SKA.

Members of the SKA Organisation met in Amsterdam on 4 April for their first general meeting. They noted the SKA site selection advisory committee's report and associated commentary that had been passed to them by the

SKA Organisation's board, which met last month in the UK.

The members wished to move ahead with the site selection process and recognised that it is desirable to maintain an inclusive approach to the SKA. They noted that it is important to maximise the value from the investment made by both candidate regions. A small scientific working group was set up to explore possible implementation options that would achieve this.

The working group will report back in mid-May.

NEWS FROM ARNEWSLINE USA

ELECTRONIC HERITAGE - SCHNECTADY MUSEUM GETS ALL GE VIDEO

And finally this week a story about the work of a museum doing all it can to preserve some of electronics past. Here's Jeff Clark, K8JAC:

The Schenectady Museum is using the YouTube dot com website to rebroadcast more than 1,000 of its General Electric films, which date back to 1915. According to the museum curator Chris Hunter, the archive was previously available only on 16 millimetre film and was viewed infrequently because of its physical condition and the cumbersome process to watch the films using an optical projector.

Hunter said that the museum had long wanted to digitize the collection in order to preserve it but until recently it had been cost prohibitive to do so. Now, thanks to grants from the Institute for Museum and Library Services and the Institute of Electrical and Electronic Engineers Life Members' Foundation, the museum was able to purchase a high-definition film transfer unit and hire and operator for it.

Among the film artefacts now existing in the digital domain are advertisements, raw footage of equipment tests, company picnics and promotional clips. Also transferred is the famed early television series titled the General Electric Theatre. It was hosted by former President Ronald Reagan.

The museum hopes to finish uploading all of its film transferred videos to YouTube in the next year. It will then begin digitizing its 1,200 video tape based archives. A direct link to what has already been uploaded and available for viewing is at tinyurl.com/ge-on-youtube

Again that U-R-L to screen all of those historic General Electric films is tinyurl.com/ge-on-youtube

CANADA BEGINS ISSUING 60 METER EXPERIMENTAL LICENSES

Canada has begun issuing experimental licenses
for the 60 meter band. Regulator Industry Canada
issued the first such developmental license on
April 2nd to Russ Hemphill, VE3FI, to use the call sign VX9GHD at 5 MHz

Canadian radio amateurs have been waiting three
years for an opportunity to join the USA, Britain
and other nations in making use of the 60 meter
spectrum. When a true Canadian amateur radio
allocation on 5 MHz meters might be approved is at this time unknown.

RADIO NETHERLANDS TO DROP DUTCH SHORTWAVE LANGUAGE BROADCASTS IN MAY

Radio Netherlands is in the news again with word
that the international broadcaster will terminate
Dutch language transmissions world-wide on May
11th. And to say farewell to Dutch speaking
listeners around the world the station plans to
hold a 24-hour marathon broadcast from 2000 UTC
on May 10th until 2000 UTC on May
11th. Frequencies and a listing of program
content should be posted soon to the Radio Netherlands Dutch
language website.

Gi2012MGY

A special event station located in Belfast from on board the SS Nomadic,
Titanic's 'Little Sister'.

To mark the Centenary of the sinking of the Titanic, City of Belfast
Radio Amateur Society (CoBRAS) will be QRV on most HF bands, CW and SSB,
from on board 'the Nomadic' from 12th - 18th April.

The SS Nomadic is the only remaining historic link to the Titanic left
afloat, and she is also the last surviving White Star Line vessel in the
world. Like Titanic herself she was built at the shipyards of Harland and
Wolff in Belfast, and served as a tender to the Olympic and Titanic.

She is currently undergoing restoration work in the docks where she was built,
adjacent to the new Titanic Belfast visitor attraction.

International interest in all things 'MGY' is reaching extraordinary levels
and the extremely rare Gi2012 prefix is sure to add extra interest from
WPX hunters. CoBRAS members look forward to working many EI stations during
the week of activity from on board this unique ship.

Further information and QSL details can be found under Gi2012MGY at QRZ.com

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

W1AW CLAIMS 5BDXCC

Nearly four decades after the introduction of the Five Band DXCC Award W1AW, the Hiram Percy Maxim Memorial Station has achieved this milestone.

"As with most stations, we found that 80 meters was our stumbling block," W1AW Station Manager Joe Carcia, NJ1Q, explained.

W1AW's 5BDXCC plaque will hang in a place of honour at the station.

Prior to achieving 5BDXCC, W1AW held DXCC on 40 thru 10 meters for many years, but was always searching for the last few remaining entities on 80.

"Now that W1AW has 5BDXCC, we are gunning for DXCC Honour Roll," Carcia said. "Like with 5BDXCC, there are just a few more entities to go before W1AW can claim that award."

(sourced to arrl letter)

To commemorate the 100th anniversary of the Titanic disaster, the Marconi Radio Club of Newfoundland will be transmitting a special bulletin near 500 kHz, the distress frequency used by the radio officers of the Titanic to send their CQD call to Cape, Race Newfoundland. Please listen on 507.77 kHz CW for VX9MRC between 0001 and 0400 UTC on 15 April 2012. Please note this corresponds to Saturday night, 14 April, for listeners in the western hemisphere. For further information, please see the MRCN web page by searching for VO1MRC on the internet.

(Charles Marsh, VO1VZ NL Section manager - Radio Amateurs of Canada.)

North Cork Radio Group on the air for Marconi weekend

The North Cork Radio Group will be activating Mizen Head Visitors Centre for Marconi weekend.

The callsign, EI 0 IMD, will be on the air from 20th April - 22nd April inclusive.

Marconi Day is on 21st April this year.

This is Julian Sortland, currently MW/VK2YJS in North-West Wales.

The other day I went to Caernarfon, where Marconi had a number of transmission stations in the early 1900s, including the experimental

station used to send the first official radio message from Britain to Australia, back in 1918.

It was sent on behalf of Australian Prime Minister Billy Hughes, who was in Britain at the time, and who had just visited the troops in France. That message was received by Ernest Fisk, at his home in Wahroonga, in the north of Sydney.

This link allows the Hornsby and Districts Amateur Radio Club can participate in International Marconi Day, in which stations around the world celebrate Marconi's birthday, which falls on 25th April. As the event is on the nearest Saturday, this year it will be the 21st, and being an international event, this is the UTC day. Therefore, VK2IMD will be operating next Saturday from 10:00am Sydney time, through to 10:00am on Sunday, on various HF bands, and possibly 160m - mostly using SSB, depending on the operators.

It is also the 25th year for the global event, so the lead station, GB4IMD has a licence variation to use GB 25 IMD. Further information about the event search for "GB4IMD".

HF WebSDR in Sweden

An online Software Defined Radio (SDR) located in Sweden for the amateur radio 3, 5, 7 and 14 MHz bands is now available.

Located in Mora, Sweden, it is operated by SM4JLX e-mail sm4jlx@ssa.se and comprises 3 x Soft66lite receivers and band-pass filter.

You need both Java and JavaScript enabled for the WebSDR to work properly. If you don't hear anything, probably Java is disabled or its version is too old (i.e., pre-1.4.2).. .

Radio Canada International announces end of its shortwave broadcasting

Spending cuts announced in Canada's latest federal budget have reached Radio Canada International.

Speaking to employees at RCI's headquarters in Montreal, RCI director Helene Parent declared that two out of three RCI employees---about 40 people, will lose their jobs by the end of July.

RCI's Russian and Portuguese sections will be closed along with the English and French-language newsrooms. All shortwave broadcasts will cease as well.

RCI will continue to exist solely on the Internet in five languages

English, French, Arabic, Spanish and Mandarin.

AS-109. CANCELLED

The RT9K/P DXpedition was cancelled because the temperature in Nadym was
climbing to over 0 deg C and the snow is melting.

The next few week's forecast also predicts higher temperatures which will
weaken the ice for the snowmobile and tricky for a boat to navigate.

The team has returned home to find a different method of transportation.

REWIND

Hereford Times - Titanic Messages

Richard Langford G4FAD has been helping to recreate the chilling messages sent from the Titanic just hours before it sank in the Atlantic with the loss of 1,517 lives.

Richard, a member of the Hereford Amateur Radio Society, was one of three radio enthusiasts invited to Liverpool to record the exact Morse code SOS calls sent from the doomed ship on April 14, 1912.

Read the Hereford Times newspaper story at
http://www.herefordtimes.com/news/9340562.Wellington_farmer_
helps_recreate_chilling_messages_from_the_Titanic

I'm Ray, VK4CF with more TITANIC news from Redcliffe & Districts Radio club.

This weekend members of the Redcliffe Radio Club will be operating the special event station, VI4MGY, from the docks of the Queensland Maritime Museum, Southbank in Brisbane from 1000 hrs. Sunday until 1000 hrs. Monday.

Bevan, VK4BCM, who is coordinating the Brisbane activities, said that currently there are some 39 stations participating worldwide.

Associated with the Titanic Day, is a worldwide contest CW contest to celebrate the two wireless operators who let the world know of the tragedy. One operator was rescued and the other lost his life whilst transmitting when the ship went down. The surviving operator after his rescue started to send out lists of survivors from the rescue ship until he reached the United States.

The contest is therefore a CW contest only.

In the contest, QSO with a dedicated Titanic station merits 10 points.
A "FISTS HQ" Station 5 points
FISTS Affiliated station 3 points
FISTS member station 2 points and
1 for non-members.

Logs should include date/call/ name/qth/time/fist number or non member points. Logs can be emailed to m0bpt@yahoo.co.uk or posted to R.D.Walker, FISTS, P.O.Box 6743, Tipton, DY4 4AU England.

The Redcliffe Club with association with the FISTS group have designed a beautiful QSL card and there is only one way to get one and that is to give the local guys a call either on 20, 40, and 80 metres in the CW segment of the band. If you want further information use the following computer link,

http://www.m0bpt.org.uk/Titanic%20SES/titanic.htm

ABC local radio 612, interviewed Bevan on Friday Afternoon Drive program and there is also a cross by Macca on his Sunday radio Program also on the local ABC radio.

Well this is about all at the moment and so it's 73 until you hear from me in QNEWS in the Queensland Zone. I'm Ray, VK4CF, from the Redcliffe club.

The sinking of the Titanic

Posted: 10 Apr 2012 05:51 PM PDT
http://forums.qrz.com/showthread.php?341809-The-sinking-of-the-Titanic&goto=newpost

A very interesting version of the wireless narrative of the sinking of the Titanic is offered by the BBC World Service. BBC producers used computer generated voices of actual telegraphic exchanges to simulate the frantic network traffic.

I expect this is of deep meaning to all amateur radio operators. The very foundations of our service are clearly laid in this narrative. You'll hear urgency, courage and disbelief from the wireless operators. You'll hear our on-air jargon even as it is used today. You'll recognise network message frustrations. You will be amazed when you hear echoes of our amateur radio service as it is today--especially in times of disaster and recovery. Please have a listen.

http://www.bbc.co.uk/programmes/p00q89fy

The valent efforts of the wireless officer John George "Jack" Phillips as his ship sank are beyond description.

The sinking of the Titanic is of profound Canadian historical significance. Please listen for Canadian special events station:

CG1T (VE1CDD) 2012-04-01 to 2012-04-30; 100th Anniversary of the Titanic sinking.

Project WhiteStar GI100MGY

Posted: 10 Apr 2012 01:38 PM PDT
http://forums.qrz.com/showthread.php?341777-Project-WhiteStar-GI100MGY&goto=newpost

GI100MGY will be on the air from Belfast lough During the weekend 14th. / 15th. of April - MGY was the Callsign of the Ill-fated ship RMS Titanic, which had been launched in Belfast in May 1911. The GI100 is a very special prefix, kindly allocated to the "Project WhiteStar" special event team by Ofcom, the UK regulator. We plan to be active all modes, 80m - 10m, with a 2 minute station silence at 01:47am on 15th April, the exact time when the vessel sank, in memory of all those who lost their lives that night. On the evening of 14th/15th, most operation will be on CW.

The final wireless message sent from the Titanic:

"SOS SOS CQD CQD MGY. We are sinking fast. Passengers are being put into boats. MGY."

This was the first time ever that the new international distress signal SOS had been used, alongside the old CQD.

Project White Star is a collaboration between various Amateur Radio Clubs in Greater Belfast and further afield in Northern Ireland

//
EI100T Titanic Commeration Station

Posted: 10 Apr 2012 01:16 PM PDT
http://forums.qrz.com/showthread.php?341775-EI100T-Titanic-Commeration-Station&goto=newpost

EI100T has been issued as a once off special event call to commerate the 100th anniversary of the Titanic sinking. Throughout 2012 EI100T is operating regularly from Cobh (Queenstown), Lower Cork Harbour (IO51UU) by members of the Cork Radio Club & East Cork Radio Group. Cork Harbour was the last port of call of the Titanic on her maiden and final voyage.

EI100T will be operated as a special event station during the weekend of April 14th & 15th 2012. Details on all the Titanic special event calls, EI100T (Cobh/Queenstown), EI4CDN (Connemara), GI100MGY (Belfast), GB1HMGY (Southampton), GB0TI (Lichfield, UK), VO1MCE (Cape Race, Canada) and VE0MGY/MM (Titanic wreck site) are available by following the

==> + PUBLIC SERVICE: NORTH TEXAS HAMS RESPOND WHEN TORNADOS STRIKE
```

On April 3, 2012, perfect conditions conducive to tornado activity converged on North Texas. A slow moving front, combined with abnormally warm temperatures and moist air coming in from the south, produced large hail, numerous funnel clouds and tornados. As the weather worsened, hams in North Texas activated ARES® and RACES nets. Spotters reported their observations to their local Emergency Operations Center, which acted on that information in a timely manner to inform the public of the approaching storms, giving them time to get to safety. A total of 21 confirmed tornados -- including one EF3 and two EF2 twisters -- swept through the Dallas-Fort Worth metroplex during the seven hour

storm.

According to ARRL North Texas Section Public Information Coordinator Jim Pope, N5JCP, the region suffered extensive damage, but thanks to the assistance of radio amateurs and trained weather spotters who tracked the storm's path and passed the information on to local officials who in turn passed the information to the public, there were no fatalities and very few injuries.

"In Rowlett -- a city of about 56,000 people in the northwest corner of Dallas County -- hams at the Rowlett Fire and Police dispatch unit received information on an approaching tornado from weather spotters," Pope told the ARRL. "Because of this advance warning, Rowlett officials activated the sirens, warning its citizens of the imminent storm nine minutes before the National Weather Service issued a tornado warning for the area." Read more here <http://www.arrl.org/news/north-texas-hams-respond-when-tornados-strike>.

==> + ON THE AIR: 2012 CONTINUES TO SHOW GROWTH IN AMATEUR RADIO LICENSING

<http://www.arrl.org/images/view/News/New_FCC_Licenses_2006-March2012.jpg>
The first quarter of 2012 (January-March) saw a high level of Amateur Radio license exam sessions, producing an elevated influx of applications for new licensees. According to ARRL VEC Manager Maria Somma, AB1FM, these numbers outpaced the 2011 first quarter results by 30 percent. This uptick does not only apply to new applications; there was a 6 percent increase in the number of upgrades, too. "Statistics over the last 13 years reveal that these are some of the highest numbers that we've seen since the early 1990s for the total number of US amateurs," Somma said. "Now there are more than 704,000 radio amateurs in the US." Read more here <http://www.arrl.org/news/2012-continues-to-show-growth-in-amateur-radio-licensing>.

==> + ON THE AIR: FCC SEEKS PUBLIC COMMENTS ON EMERGENCY COMMUNICATIONS BY AMATEUR RADIO AND IMPEDIMENTS TO AMATEUR RADIO COMMUNICATIONS

In response to the Congressional directive to prepare a study to assess Amateur Radio's role in emergency and disaster communications and the impact of private land use regulations on the amateur community's ability to provide such communications, the FCC issued DA 12-523 soliciting comments from the public. The period for public comment runs until May 17, 2012.

"As part of the study contained in Public Law No. 112-96, the Commission has opened a 45 day period for comments to be filed on the issue," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "Because of the short deadline for the study to be completed and presented to Congress -- before the end of August -- the ARRL and the amateur community must quickly mobilize their response." Read more here <http://www.arrl.org/news/fcc-seeks-public-comments-on-emergency-communicatio

ns-by-amateur-radio-and-impediments-to-amateur-ra>.

==> + DIGITAL QST: COMING SOON TO A COMPUTER NEAR YOU!

The new digital edition of QST will debut toward the end of May. If you are an ARRL member and you haven't yet signed up to be notified automatically when the digital edition becomes available, you can do so easily. Just click on the "Edit your profile" link on the ARRL website <http://www.arrl.org/>. Once you are in your profile, click "Edit e-mail subscriptions" and then check the box next to "Notification of monthly digital edition of QST." That's all there is to it. A new FAQ <http://www.arrl.org/digital-qst-faq> about the digital edition has the answers to the questions ARRL members have been asking (it can also be accessed from the QST page on the ARRL website <http://www.arrl.org/qst>). We hope you enjoy the new digital edition of QST.

==> ON THE AIR: AMATEURS MUST PROTECT NEW RADARS IN 23 CM BAND

The Federal Aviation Administration (FAA <http://www.faa.gov/>) is deploying a new generation of Common Air Route Surveillance Radar (CARSR) that has some implications for the use of the 1240-1300 MHz (23 cm) band by amateurs. The Amateur Service allocation in this band is on a secondary basis, with aeronautical radionavigation and several other services primary in the United States Table of Frequency Allocations. The FCC rules require that amateur stations operating in the 23 cm band may not cause harmful interference to stations in the radionavigation-satellite service, the aeronautical radionavigation service, the Earth exploration-satellite service (active) or the space research service (active). One case of harmful interference in Southern California has been reported.

CARSRs are being installed in several dozen locations throughout the country and will use various frequencies in the 1240-1350 MHz range with an occupied bandwidth of about 3 MHz. In the vicinity of the radars, amateur operation may be precluded in a portion of the 23 cm band. The ARRL is in contact with FAA engineers. We anticipate that the constraints on amateur use of the band will be limited to those necessary to protect aviation safety, which of course cannot be compromised.

==> ON THE AIR: ARRL SEEKS COMMENTS ON PROPOSED 33 CM BAND PLAN

A few months ago, the ARRL UHF/Microwave Band Plan Committee asked the Amateur Radio community about current, planned and projected uses of the amateur bands between 902 MHz-3.5 GHz. The response was beyond our expectations, with hundreds of comments and suggestions received. After reading the feedback, the Committee began working on the band plans, and the draft plan for 33 cm (902-928 MHz) is now ready for review. Read more here <http://www.arrl.org/news/arrl-seeks-comments-on-proposed-33-cm-band-plan>.

==> + IARU NEWS: APRIL 18 IS WORLD AMATEUR RADIO DAY

The year 2012 marks the 87th anniversary of the founding of the International Amateur Radio Union (IARU). To mark this occasion, the IARU and its more than 160 Member-Societies will celebrate World Amateur Radio Day on April 18. For many years, the IARU has declared a theme for each World Amateur Radio Day. The theme for 2012 is Amateur Radio Satellites: Celebrating 50 Years in Space in remembrance of the launch of OSCAR 1 on December 12, 1961 and the launch of OSCAR 2 on June 2, 1962. Read more here <http://www.arrl.org/news/april-18-is-world-amateur-radio-day>.

==> + CHECK YOUR MAILBOX FOR THE MAY ISSUE OF QST

This May issue of QST focuses on digital operating. From RTTY to PACTOR III to PSK31 to D-STAR to JT65, there's a digital mode to satisfy just about every ham appetite. And with new privileges on 60 meters, there's a whole new band for digital operators to explore. So set aside a couple of hours, grab a snack and get ready to explore the May issue of QST.

A recurring gag on the late-1960's comedy Get Smart involved telephones. Not only did Maxwell Smart (Agent 86) have a shoe phone, phones on the show were hidden in more than 50 everyday objects, including a necktie, comb, watch, clock, handkerchief, magazine and a garden hose. You, too, can "get smart" when you turn your Android smart phone into a digital communications terminal. Find out how in "An AFSK Interface for Android Smartphones" by Martin Huyett, K0BXB.

If you've ever wanted to try D-STAR, but you don't have access to a D-STAR radio, you won't want to miss "From Analog to D-STAR" by Gary Pearce, KN4AQ. In his article, Pearce explores how D-STAR works, how to program a D-STAR radio and even how to get on the air with D-STAR using your existing equipment. QST Editor Steve Ford, WB8IMY, is a digital radio guru. His article "Who's on JT65?" takes a look at this mode developed by Nobel Prize laureate Joe Taylor, K1JT, and explores its strong growth as a digital mode on the HF bands.

The 2012 World Radiocommunication Conference ended two months ago, and delegates are now working on implementing the decisions in their home countries while preparing for the next WRC, scheduled for 2015. ARRL Chief Executive Officer David Sumner, K1ZZ, attended WRC-12 as a member of the IARU delegation. In his article ""WRC-12 Results in New Amateur MF Allocation," Sumner takes a look at how more than 3000 participants from 165 countries reached consensus on 30 different issues related to the allocation and sharing of the radio spectrum -- including Amateur Radio -- and the efficient use of satellite orbits for telecommunications and scientific research.

QST Contributing Editor Gary Pearce, KN4AQ, takes a look at the Kenwood TM-281A 2 meter FM transceiver in this month's Product Review. He says the rig is a "solidly built, good performing 2 meter FM mobile with a nice selection of features for the price." QST Technical Editor Joel Hallas, W1ZR, checked out the Tokyo Hy-Power Labs HL350VDX 2 meter linear amplifier, calling it "a very flexible and compact 2 meter

medium power amplifier that can follow many types of equipment. It is easy to set up and run and operates in all modes very well. It is truly a linear amplifier such that it produces SSB intermodulation products that would be appropriate for an HF linear." W1AW Station Manager Joe Carcia, NJ1Q, looked at the Network Sciences/AC0C roofing filter for the Yaesu FT-2000. "This filter made a noticeable improvement in W1AW's FT-2000 transceiver's close-in strong signal handling performance," he said. "Installation requires the proper tools and a steady hand."

Of course, there are the usual columns you know and expect in the May QST: Happenings, Hints & Kinks, The Doctor Is In, Short Takes, Technical Correspondence, How's DX and more. Look for your May issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + PUBLIC SERVICE: MALAYSIA TO HOST EIGHTH GLOBAL AMATEUR RADIO EMERGENCY COMMUNICATIONS CONFERENCE

The Eighth Global Amateur Radio Emergency Communications Conference (GAREC) -- called MyGAREC 2012 <http://www.mygarec2012.com/garec/> -- will be held November 12-14 in the Malaysian state of Negeri Sembilan at the Thistle Port Dickson Resort <http://www.thistle.com/en/hotels/malaysia/port_dickson/thistle_port_dickson> .

GAREC began in 2005 in Tampere, Finland. The conference attracts radio amateurs who have an interest in providing emergency communications in response to disasters or during training exercises. MyGAREC 2012 has been timed to immediately follow the IARU Region 3 Conference in Vietnam (scheduled for November 5-9) with its theme of disaster relief communications.

General information for MyGAREC 2012 -- including information on the venue, registration fees, the tentative agenda <http://www.mygarec2012.com/garec/index.php/info-mygarec-2012/mygarec-2012-schedule> and registration forms -- has been posted on the MyGAREC website. According to organizers, the website will be updated weekly with the latest news and program changes. Among the topics to be discussed include the HF emergency operating procedure and the future of GAREC, as well as presentations from the three IARU regions. Presentations from various IARU Member-Societies regarding recent disaster relief communications operations will also be scheduled.

Previous GARECs have been held in Finland (2005 and 2006), the USA (2007), Germany (2008), Japan (2009), Cura&#65533;ao (2010) and South Africa (2011).

==> SOLAR UPDATE

Tad "How do you rate the morning Sun?
<http://www.youtube.com/watch?v=9SkXA19g0OY>" Cook, K7RA, reports:
Solar activity took a serious nosedive this week, with the average
daily sunspot numbers dropping to a value less than half the previous
week's average -- down nearly 43 points to 32.6. The solar flux values
were also off, down nearly 12 points to 95.9. The current prediction
shows solar flux at 90 on April 12-18, then suddenly jumping to 105 on
April 19-21, 110 on April 22-25, then back to 105 on April 26-28, 100
on April 29-30, and then 95 on May 1-9. The predicted planetary A index
is an unsettled 12 on April 12-14, 10 and 8 on April 15-16, 5 on April
17-23, 10 and 8 on April 24-25, 5 on April 26-29, 8 on April 30, and 5
on May 1-7. One good way to view the decline since last fall is with a
solar plotting utility by Scott Craig, WA4TTK, which can be downloaded
free <http://www.craigcentral.com/sol.asp>. He currently has an updated
data file that goes through April 4, 2012. Look for more information on
the ARRL website on Friday, April 13. For more information concerning
radio propagation, visit the ARRL Technical Information Service
Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This
week's "Tad Cookism" is brought to you by Robbie Williams' Morning Sun
<http://en.wikipedia.org/wiki/Morning_Sun_%28song%29>.

==> FCC ENFORCEMENT ACTIONS FOR JANUARY-MARCH 2012

Here's a summary of FCC enforcement actions during the past quarter
(January-March 2012): Repeater-related cases: 1. General infractions
(including unauthorized operation): 10. Power-line cases: 0. Click here
<http://transition.fcc.gov/eb/AmateurActions/Welcome.html> for details.

==> THIS WEEK IN RADIOSPORT

This week:

- April 13 -- NCCC Sprint Ladder
- April 14 -- EU Spring Sprint (CW)
- April 14-15 -- Georgia QSO Party; Montana QSO Party; New Mexico QSO
Party; QCWA Spring QSO Party; JIDX CW Contest; Yuri Gagarin
International DX Contest
- April 15 -- ARRL Rookie Roundup (SSB)
<http://www.arrl.org/rookie-roundup>; International Vintage Contest HF
Contest; Hungarian Straight Key Contest
- April 17 -- 222 MHz Spring Sprint (local time)

Next week:

- April 20-21 -- Holyland DX Contest
- April 21 -- Feld Hell Sprint; EU Spring Sprint (SSB); TARA Skirmish
Digital Prefix Contest; ES Open HF Championship
- April 21-22 -- Michigan QSO Party; South Dakota QSO Party; Ontario
QSO Party; CQ Manchester Mineira DX Contest; EA-QRP CW Contest; YU DX
Contest
- April 25 -- 432 MHz Spring Sprint (local time)
- April 25-26 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- April 14 -- ARRL Delta Division Convention <http://www.arrl.org/hamfests/delta-division-convention-3>, Bartlett, Tennessee
- April 14-15 -- Communications Academy 2012 <http://www.arrl.org/hamfests/communications-academy-2012>, Seattle, Washington
- April 20-22 -- ARRL Idaho State Convention <http://www.arrl.org/hamfests/idaho-state-convention-2>, Boise, Idaho; 63rd International DX Convention <http://www.arrl.org/hamfests/63rd-international-dx-convention>, Visalia, California
- April 21 -- ARRL Delaware State Convention <http://www.arrl.org/hamfests/delaware-state-convention-delmarva-amateur-radio-electronics-expo-1>, Georgetown, Delaware; ARRL Louisiana Section Convention <http://www.arrl.org/hamfests/louisiana-section-convention-1>, Monroe, Louisiana
- May 4-6 -- EMCOMMWEST <http://www.arrl.org/hamfests/emcommwest-convention-1>, Reno, Nevada
- May 18-20 -- Dayton Hamvention <http://www.arrl.org/hamfests/dayton-hamvention-3>, Dayton, Ohio
- June 1-3 -- ARRL Northwestern Division Convention <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-3>, Seaside, Oregon
- June 2 -- ARRL Georgia Section Convention <http://www.arrl.org/hamfests/georgia-section-convention-atlanta-hamfest-1>, Marietta, Georgia
- June 8-9 -- ARRL West Gulf Division Convention <http://www.arrl.org/hamfests/west-gulf-division-convention-ham-com-1>, Plano, Texas
- June 9 -- ARRL Arkansas State Convention <http://www.arrl.org/hamfests/arkansas-state-convention>, Rogers, Arkansas; ARRL Tennessee State Convention <http://www.arrl.org/hamfests/tennessee-state-convention-2>, Knoxville, Tennessee

To find a convention or hamfest near you, click here <http://www.arrl.org/hamfests>.

NZART Headquarters Infoline Issue 249

13 April 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ – attachment

· Invitation to Host HST World Championships 2013 –
attached

· World Amateur Radio Day

· Inter Branch Fox Hunt, Auckland

· FMTAG Notes

· IARU Liaison Officer’s Report

Debby says…There have been some ommisions from Break In and HQ
Info-line, my sincere apologies for any inconvenience. Attached to this
issue are:

Electorate Areas that should have gone with remit one.

The IARU Liaison Officers annual report.

All members should all now have received the March/April Break In, I
would like to draw your attention to the extensive information on
included on pages 28 & 29 regarding the Nelson Conference in June.

If you have any further queries, please contact the organising committee
in Nelson directly, either by contacting the Branch President Paul
Moffatt ZL2PO, or mail to the address listed on the registration form.

Talk soon…Debby ZL2DL

Dear colleagues,
Oliver Tabakovski, Z32TO, the Region 1 HST WG Chairman has asked me to
send
the attached Invitation to host the 2013 HSTWC to Region 2 and 3 for
distribution to your Member Societies through IARU Region 1 Secretary.

73 de Ken Yamamoto/JA1CJP
Secretary, IARU Region 3

WORLD AMATEUR RADIO DAY 2012 – Wednesday the 18th of April, 2012

On Wednesday, the 18th of April, 2012, Radio Amateurs will celebrate the World Amateur Radio Day, on the 87th Anniversary of the founding of the International Amateur Radio Union (IARU).

This year's theme for the World Amateur Radio Day is:

"Amateur Radio Satellites: Celebrating 50 years in space" in remembrance of the launching of OSCAR 1 on the 12th of December 1961, and OSCAR 2 on the 2nd of June 1962.

Note: OSCAR stands for Orbiting Satellite Carrying Amateur Radio.

Branch 74, The Wellington VHF Group Inc., has been granted use of the special callsign ZL2WARD for World Amateur Radio Day.

ZL2WARD will be active on the National System, and other frequencies. A commemorative QSL card is available.

Inter-Branch ARDF 2m Fox Hunt competition

24 Dingle Road, St Heliers, Auckland (at sea level); phone 575-6383 if you get lost.

Saturday, 21st April 2012

BBQ at noon followed by a briefing at 1 pm.

What to expect:

a.. In Dingle Dell Reserve there will be 5 foxes hiding (hi hi). However they will be easier to find than at last year's event. The paths are gravelled and the streams are bridged; so it is not muddy underfoot.

a.. Print the map of Dingle Dell's 16 acres of bush and streams. Get familiar with the map's orienteering legend, and/or visit the area beforehand. Bring a compass, clipboard, felt tip pen and $5.00 entry fee.

a.. Bring your own 2m hand-held rig and optionally look up construction details of a yagi antenna previously put on our web page at: www.qsl.net/zl1aa >Newsletter>2011>March>page6. Alternatively, hold your hand-held close to your body to shield VHF being received from behind - the null is the direction to the transmitting fox.

a.. Competitors start individually at 5 minute intervals. Their start time is written (in unique ink) onto their "clip card" – used to record each fox's unique code.

a.. Each fox broadcasts its identity in slow Morse code on 144.700 MHz: MOE, MOI, MOS,MOH, and MO5 for one minute each in rotation. That is, each fox is silent for four minutes until its turn to transmit again.

a.. Each fox appears at eye level, as an orange and white prism-shaped flag on which is a written a unique code. As you find each fox, record this code, thus scoring 20 points for each.

a.. Time allowed: 1hour. One point will be deducted for each minute late in returning. As you finish we shall record your elapsed time, check the codes and compute your score.

FMTAG - NZART COUNCIL REVISES ITS LICENCE FEE POLICY

As mentioned in “From the President” (page 3 March/April Break-In), NZART Council has revised its Beacon, Link and Repeater Licence Fee Policy. Here are more details.

Council resolved to encourage the transfer of Repeater, Beacon and Link Licences from NZART to the equipment-owning Branches, and to impose a surcharge of $5.11 per licence, to offset NZART HQ costs, on those licences that remain with NZART.

The MED's Annual Administration Fee, for an Amateur Beacon, Link, or Repeater Licence, is $46.00, if paid by credit card via the MED's SMART website, or $51.11, if paid by cheque to the MED's Business Service Centre. The $5.11 surcharge recognises the cost to the MED of processing a manual payment.

Previously, NZART HQ requested payment of $46.00 from Branches and forwarded the full amount to the MED.

The NZART HQ cost of processing a manual payment are similar to those of the MED and, therefore, NZART Council decided to introduce the same $5.11 surcharge per licence for all Licence Fee payments made via NZART HQ.

Branches wishing to avoid paying the $5.11 surcharge for each licence need to arrange transfer of their licences from NZART to the Branch. To start the licence transfer process, please send an email to FMTAG:

fmtag@nzart.org.nz

NZART Council has confirmed that the revised policy does not apply to National System or International Beacon Licences.

FROM THE VHF-UHF-SHF CONTEST MANAGER

CONTEST TOMORROW AND SUNDAY

The Low Band Contest, 50 MHz to 440 MHz, is this weekend: Saturday the 14th and Sunday the 15th of April 2012. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

THE NEXT CONTESTS

The next contest is the Hibernation Contest, all bands 50 MHz and up, on Saturday the 9th and Sunday the 10th of April 2012. This is the weekend after Queen's Birthday weekend. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The contest after that is the Brass Monkey Contest, all bands 50 MHz and up, on Saturday the 4th and Sunday the 5th of August 2012. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The Contest Rules are available at:
www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:
zl2wa@clear.net.nz

with Contest Log in the subject line, or by post to:

Contest Manager

Wellington VHF Group

P.O. Box 12-259

Thorndon

Wellington

Please include your email address if you wish to receive the results as soon as they are available.

IARU Liaison Officer’s Report

Activities within IARU and IARU Region 3 have been directed towards WRC-12 to be held in Geneva, Switzerland from 23 January to 17 February 2012.

The committee recommended to Council that Don Wallace ZL2TLL should be NZART’s representative on the New Zealand Administration’s delegation to this very important conference. Council ratified this recommendation and also approved a budget of $16200 to cover the costs of Don’s attendance.

I would like to sincerely thank Peter Lake ZL2AZ for all his efforts in relation to past buildups and WRC conferences.

We all look forward to learning what decisions will be made at WRC-12 especially in the 472 to 479 kHz and also in the 5mhz band.

The 15th IARU Region 3 Triennial conference will be held in Ho Chi Minh City in Vietnam , from 5th to 9th November 2012. The Committee has recommended a delegation of 3 to represent NZART at this important event.

The committee is actively pursuing the preparation of papers for NZART to present to this conference.

With the approach of the NZART AGM it is timely to review the make-up of the IARU Committee and look for expressions of interest from NZART members from throughout the four districts. While the committee recognizes the value of having a representative in the Wellington area who can easily communicate with our Administration, this is by no means essential.

I would like to thank all of the committee for your support over the last 12 months and I hope this support will continue as we move closer to the 15th IARU Region Conference in November 2012

John Lochhead ZL4QS

NZART IARU Liaison Officer

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the May/June 2012 issue of Break-In-closes on 10 May 2012.
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Amateur Radio Newsline(tm) Report 1809 - April 13 2012

Amateur Radio Newsline report number 1809 with a release date of April 13th, 2012 to follow in 5-4-3-2-1.

The following is a QSTT. Carole Perry, WB2MGP, celebrates a quarter of a century leading educators and youth forums at the Dayton Hamvention, an FCC enforcement in California action may not be what it seems, entry level hams in Belgium to get a power increase on the High Frequency bands and a United States broadcaster pays homage to its oldest and longest listener. Find out who she is on Amateur Radio Newsline(tm) report number 1809 coming your way right now.

**

RADIO CELEBRATION: CAROLE PERRY, WB2MGP TO CELEBRATE 25 YEARS OF SERVING YOUTH AT HAMVENTION 2012

A true milestone for educator Carole Perry, WB2MGP. This as she celebrates her 25th consecutive year moderating both the Youth Forum and Instructors' Forum at the Dayton Hamvention. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the rest of the story:

--

It all started back in 1987. That's when Carole Perry, WB2MGP, was at the Dayton Hamvention to accept the Radio Amateur of the Year Award. Hamvention planners offered her the opportunity to moderate a forum on "Using Ham Radio in the Classroom." And as Carole tells us, it all grew from there:

--

WB2MGP: "Its impossible for me to speak about anything with amateur radio without talking about the fun and the educational validity of including it as a part of a school program.

"And so we did a forum and then we thought it would be a good idea to teach other people who were interested and who were ham radio operators to include it in the curriculum at their schools or to start it as a club, or if they were lucky enough to do it the way I did it where it became part of the schools regular course and curriculum."

--

Prior to WB2MGP bringing ham radio into the classroom and educating teachers on how to work with the hobby, there was little in the way of direction or leadership for young hams. In only a few short years, WB2MGP managed to make the concept of youth in amateur radio a modern day cornerstone in the hobby. This she says is all thanks to the support that emerged over the past quarter century that has as its core the two yearly forums at Hamvention:

--

WB2MGP: "It (Ed. youth in amateur radio) really started taking on a life of its own where people got ideas and the sharing of ideas among other educators and people who ran youth groups to incorporate this and expose young people to it.

"As you know, we've had them as young as 8 years old coming in and just blowing the audience away with their stories of participation in amateur radio."

--

2012 is that quarter century point and according to WB2MGP, she intends to mark the occasion in a very special way. And she has a very special invitation for each of you:

--

WB2MGP: "If you have never been to the Youth Forum or the Instructors Forum please make it a point to stop by. And I guarantee that if you sit there long enough you are going to be smiling. And knowing who I have speaking this time and this year, it``s going to be really fabulous."

--

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK in Zion, Illinois.

--

Carole Perry's Instructors Forum takes place on Friday, May 18th from 10:30 to 12 noon and her Youth in Amateur Radio Forum is on Saturday May 19th from 9:15 a.m to 12:15 p.m. -both Eastern Daylight Time. Even if you can't stay for an entire session please take a moment to drop by and congratulate Carole Perry, WB2MGP, on this quarter century milestone in service to ham radio and her opening the new world of amateur radio to those who will be its next generation and many generations to follow. (ARNewsline(tm))

**

ENFORCEMENT: FCC ISSUES NOTICE OF VIOLATION TO ATV REPEATER OPERATOR

The FCC has issued a Notice of Violation to a California ham for interfering with FAA radiolocation operations. It also claims he was broadcasting television signals in the 23 centimeter band. But it now

appears as if these charges are not what the regulatory agency might want us to believe. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in the newsroom with more:

--

Gary Dent, AF6HP, has operated 1 point 2 GHz fast scan amateur television repeaters and beacons for about the past 10 years. One of these was located at the Sunset Ridge radio site 40 miles North East of the city of Los Angeles, California.

Dent tells Newsline that in February he received a phone call from a person identifying himself as an agent of the FCC's Cerritos California office. The agent told Dent that his AF6HP system on Sunset Ridge was interfering with some newly installed radar system. Dent tells Newsline that he immediately functioned the system off the air and told the agent he would remove the hardware from the hill as soon as road access made it accessible.

According to Dent a few weeks later he received another call from the same agent informing him that he was again transmitting from the Sunset Ridge location and was to cease these transmissions immediately.

Dent says that he can only assume that one of the power failures that took place during a severe weather outbreak reset the controller putting the system back on the air in beacon mode. Beacon operation is legal under Section 97.203 of the Amateur Part 97 Rules.

Wanting to comply with the FCC's request he immediately verified the situation; again remotely turned off the system and has since removed the gear from the site.

Case closed you would assume? Well if you do you are wrong.

On March 30th the FCC's District Director of the Los Angeles Office Western Region Enforcement Bureau issued a two prong Notice of Violation to AF6HP. It charges that on February 29, March 2nd, and March 22nd that, in response to an interference complaint from Federal Aviation Administration, an agent of the Enforcement Bureau's Los Angeles Office used direction finding and other investigative techniques to identify transmissions in the 23 cm band. He found them coming from Station AF6HP.

The Notice of Violation says that the agent observed violations of 97.303(b) which is the interference issue. He also charged Dent with broadcasting under Section 97.113(b). The latter is curious in that AF6HP says that when the system came back on that it was in its default beacon mode. As already noted, beacon operation is legally authorized under FCC Rule 97.203(b). However Section F of the same rule states that a beacon must cease transmissions upon notification by a District Director that the station is operating improperly or causing undue interference to other operations. The beacon may not resume transmitting without prior approval of the District Director. But

nowhere in Section 97.203 is the term broadcasting applied to beacon operation.

Where this matter goes in relation to AF6HP is now up to the FCC. The offending equipment was removed and Dent tells Newsline that it will eventually be re-installed at another site that hopefully will not interfere with FAA or any other radio systems serving the Los Angeles or Riverside areas.

For the Amateur radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

We will definitely keep you posted on this one. (FCC, ARNewsline(tm))

**

RESTRUCTURING: BELGIUM ENTRY LEVEL HAMS MAY GET POWER INCREASE

The UBA which is Belgium's national society reports on plans to allow Belgian Foundation license holders to run 50 watts on the High Frequency bands instead of the cureent 10 watts.

Belgian Foundation holders are currently permitted 50 watts only on 144 and 430 MHz. On bands between 3.5 to 52 MHz the limit is currently 10. The new proposal means these entries level hams would be able to run 50 watts on the H-F and 6 meters as well. The U-B-A says via its website that taking into account the so called 3 dB rule this would permit the use of a standard 100 Watt transceiver.

The full proposal in electronically translated English is on line at tinyurl.com/Belgium50wFoundation. (UBA)

(5 sec pause here)

**

ENFORCEMENT: NO JAIL TIME FOR FLORIDA UNLICENSED STATION

The former operator of a Florida-based unlicensed radio station has been spared doing time in whats often called the Grey Bar Hotel. Amateur Radio Newsline's Jim Damron, N8TMW, reports:

--

The operator of an unlicensed radio station in the town of Dunbar in Lee County, Florida has agreed to perform 20 hours of community service

in lieu of jail time.

Florida has what it calls an anti pirate radio law and under it Al Knighten had faced up to five years of jail time. However media reports say that the State Attorney charged with prosecuting the case changed course and decided to drop the radio piracy charges.

Knighten had previously admitted that he had operated "Dunbar Community Radio" illegally out of his Fort Myers home. The FCC accompanied by local police raided Knighten's home last December and took the station off the air.

Earlier on Knighten told the local press that the licensing process had been too expensive. But in a more recent interview Knighten now says that he and his associates will try to license the station legally now that they have more monetary support.

>From Charleston, West Virginia, I'm Jim Damron, N8tMW, reporting.

--

Knighten's obtaining a license for his station might not be as easy as it sounds. This is because the FCC has a policy in place not granting station licenses to anyone who previously ran an unlicensed radio transmitter for broadcast purposes. (RBI)

**

RADIO LAW: TWO SENATORS ASK FCC TO SAVE LIGHTSQUARED

The story that never seems to want to die just took a step toward the weirder. This with word that two well known United States senators are asking the FCC to save Lightsquared from oblivion by moving the proposed broadband network to alternative spectrum in an effort to save the troubled company from going under..

As previously reported, LightSquared has invested billions of dollars in plans for a nationwide 4G network in spectrum directly adjacent to that used by the Global Positioning System or G-P-S. But in February the FCC moved to block the network over concerns that it would interfere with G-P-S devices.

Now in a letter obtained by the on-line blog The Hill, Democratic senator John Kerry and Republican senator Lindsey Graham have stated their view to FCC Chairman Julius Genachowski that they understand his agency's decision to prevent LightSquared from interfering with GPS devices. But the senators said that instead of putting the company out of business, the FCC should allocate a different block wireless spectrum to LightSquared.

The two senators did not suggest which block of spectrum the government should set aside for LightSquared to use. The company had previously stated that its needs can only be fulfilled in bandspace in or close to where its infrastructure is right now. (Various news reports)

**

RESCUE RADIO: NEW MARS STATION TO BE INSTALLED IN CUMBERLAND FALLS KY

A new Military Auxiliary Radio System or MARS radio system designed to help emergency communications is to be installed in Kentucky's Cumberland Falls State Park.

News reports say that the repeater station will be placed atop the park's water tower, to assure a good signal links to the state Emergency Management headquarters in Frankfort. However, on-site testing by local radio amateurs showed that the proposed repeater could likely receive the signal as far south as Knoxville, Tennessee.

In addition to MARS communications Park official Pam Gibson says the repeater can also be used for weather spotting and to alert the park in the event of emergencies. Gibson noted that the new system will be equipped with an emergency power source to keep it in operation in case of failure of the normal power mains.

The system should be in operation by this summer. No band or callsign was given in the news press release. Nor was there any explanation of the sharing agreement by MARS and the rest of the ham radio emergency communications community. More is on-line at tinyurl.com/mars-park-repeater (eHam.net, other reports)

**

RADIO LOCATION: UNITED STATES TV COVERAGE MAPPING FROM NPR LABS

National Public Radio Labs has introduced its new interactive online mapping system that they say can accurately predict digital versus analog service coverage for both radio and television transmissions. NPR says that this software should help engineers and managers of approximately 3,000 public radio and television broadcast stations and translators to get a better idea as to how their predicted analog and digital coverage on automotive, mobile handheld and indoor receivers. The online system is available for viewing at secure.nprlabs.org/radiotvmapping. (NPR)

**

RADIO RULES: NZART CHANGES ITS REPEATER LICENSE FEE METHODS

A decision from the New Zealand Association of Radio Transmitters will have an impact on several of its branches. Those where repeater and beacon licenses currently held in the name of NZART will be handed back to them.

The current system of invoicing and renewals means a heavy administrative workload for society's resources at a time when subscription renewals are also being processed. This will mean that this coming November when the individual licenses are up for renewal, each branch will receive the license renewal invoice direct from the government telecommunications regulatory authority. This in turn means

that branch secretaries will need to be aware of this and ensure that payment is made by the date due. Failure to do so may result in the license being cancelled.

Unlike the United States where individual hams own and hold license to repeaters, in many nations it is the national society that is the repeater and beacon licensee. Those hams involved merely build and maintain repeaters. In fact, in some nations these hams are known as repeater keepers rather than as owner operators of such devices. (NZART, ARNewsline)

**

HAMVENTION 2012: FORUMS LIST POSTED

If you have been waiting to find out who will be holding forums at this years Dayton Hamvention, the wait is over. A complete list of this years sessions along with the day, time and room that each will be held in is now available at hamvention.org/forums.php. It again appears to be a loaded schedule so if you will be headed to Hamvention this May be sure to check this list out well in advance. (KE4WLE)

**

NAMES IN THE NEWS: 6 YEAR OLD BELIEVED TO BE YOUNGEST EVER UK HAM

Some names in the news. First up is Kayleigh Huntley, who at age 6 is believed to be the youngest person ever to hold a United Kingdom amateur radio license.

According to the Humber Fortress DX Amateur Radio, Kayleigh passed her Foundation exam at age 5 years and eleven months. The news release from the Humber Fortress club did not however mention Kayleigh's callsign.

Kayleigh Huntley is the granddaughter of Andy Neilsen G7LRR who is credited with introducing her to the magic world off amateur radio some three years ago. (Southgate)

**

NAMES IN THE NEWS: VE2NHK NAMED NEW QUEBEC SEC

Radio Amateurs of Canada has announced that Normand Pitre VE2NHK has been named the new Section Emergency Coordinator for the Quebec Section effective immediately. Pitre recently earned his Radio Amateurs of Canada Certified Emergency Coordinator designation, and resides in the city of Saint Zotique. (RAC, VA2SGL)

**

NAMES IN THE NEWS: NEW 50 MHz EME DIGITAL SARL DX RECORD

Derek Gravette, ZS5Y, in Scottburgh, South Africa and established a new 50 MHz South Africa Radio League Earth-Moon-Earth record. This, by making contact with Mike Staal, K6MYC, in northern California here in

the United States.

On April 4th, the two completed a QSO on E-M-E using the JT65a digital mode. JT65 was developed by Joe Taylor, K1JT and released in late 2003. It is intended for extremely weak but slowly-varying signals, such as those found on tropo-scatter or of coarse E-M-E paths. (SARL)

**

NAMES IN THE NEWS: N0BYH GIVEN AWARD FOR AIDING HAM RADIO SCOUTING

Here in the United States, Tim Arimond, N0BYH, has awarded the Boy Scouts' District Award of Merit. This for his work in promoting amateur radio with the Boy Scouts in the Minneapolis and St Paul area.

The award recognizes Airmond's extraordinary service to youth that has included instruction to help prepare scouts to take the amateur radio exam as well as his service as a merit badge councilor for Electricity, Electronics, and Radio. It was also noted that he was also one of the adult leaders behind the local K0BSA. (KD0NYS)

WORLDBEAT: FRENCH PREPARE FOR DIGITAL RADIO LAUNCH

Radio in France is going all digital. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

The French audiovisual regulatory authority known as the CSA has announced that it will launch terrestrial digital radio or DAB this year. It will also deliver authorization to the stations that were pre-selected in 2008.

The French CSA had issued a call in 2008 for stations that would like to be on the leading edge of the analog to digital conversion. It then chord 55 radio stations in Paris and Marseille, as well as around 40 in Nice, but the process then stalled. At that time the CSA said that its goal is to reach 50 percent of the French population based on a 2007 law on the modernization of audiovisual broadcasting. But over the years the launch of digital radio in that nation has been constantly postponed due to opposition from larger private broadcasters who complained that the distribution costs were too high.

Now, the CSA is pulling the plug on lobbying from the broadcast giants and proceeding with the conversion process. At the same time, the CSA would like France to adopt the DAB+ broadcast platform as currently used in Germany, saying it would complement the selected but more expensive T-DMB standard to replace analog radio.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, in Berwyck, Pennsylvania.

--

There is one downside to France's digital radio switchover. As happened when that nation made the switch to digital television last November, the analog to digital radio change will again mean that French households will be forced to replace all of their in-home and portable radio receivers. (Media Network)

**

WORLDBEAT: SWEDEN SDR HAM-BAND RECEIVER ON THE WEB

A new online Software Defined Radio located in Sweden and set for reception of the amateur radio 75, 60, 40 and 20 meter bands is now available via the World Wide Web. Located in the city of Mora and is maintained by SM4JLX, the system is made up of three Soft66lite receivers and a band-pass filter. You need both Java and JavaScript enabled for the WebSDR to work properly. You can hear it on-line at tinyurl.com/sweden-sdr. (Southgate)

**

WORLDBEAT: NEW IRISH BROADCASTING CHARGE MAY REPLACE TV LICENSE

Changes appear to be coming to the way televiewers in Ireland get charged for watching T.V. Amateur Radio Newsline's Jeff Clark, K8JAC, has the details:

--

Ireland's Minister for Communications has confirmed that he is considering a new household broadcasting charge to replace the television licensee fee. Pat Rabbitte told the Dail newspaper that this would not be an additional charge, and would not affect anyone who was already paying their television license.

Rabbitte agreed that the current funding model was not sustainable in the long run. This was partly because of technological change which meant fewer people were watching on traditional television sets, and partly because of evasion.

Minister Rabbitte said a working group in his department had concluded that a household broadcasting charge "is a viable model", and those discussions had taken place with the Department of the Environment about accessing a database of households. He said it was mainly younger people who were using devices other than traditional television

receivers to access programming.

I'm Jeff Clark, K8JAC.

--

Just how long it might be before Irelands televiewing public sees this change in the way fees are collected is at this time, unknown. (Media Network)

**

HAM RADIO IN SPACE: ISS CONTACT TO HISTORIC FLABOB AIRPORT

A group of students are preparing to talk to an astronaut aboard the International Space Station, but not from a traditional classroom setting. According to ARISS Technical Support Volunteer Clint Bradford, K6LCS, the 10 minute live question-and-answer session will take place in hangar 16A at the historic Flabob Airport which is the seventh oldest surviving airport in California.

The Flabob Airport to the I-S-S contact opportunity is being coordinated by The Tom Wathen Center's Kathy Rohm with technical support provided by K6LCS. The contact is slated to begin at at 10:03 AM Pacific Daylight time on the morning of April 19th and should last for about the usual 10 minutes.

More is on-line at www.iss-flabob.com (ARISS, K6LCS)

**

RADIO AND SPACE: HAM ASTRONOMER NEEDED DOWN UNDER

According to APRS pioneer Bob Bruninga, WB4APR, there is need for a Amateur Astronomer who is also a radio amateur in Canberra Australian on June 4th to the 6th. His or her assistance is needed to support a science team of students from the United States to observe the last transit of Venus this century. The Australian ham will essentially provide real-time communications to a second team in Japan to share observations of this historic event. Interested individuals for this historic event, contact WB4APR (at) amsat (dot) org.

(Southgate)

**

DX

In DX, EA3OW is now active through May 12th stroke HH8 from Southern Haiti. His operation is limited to only his free time. When he is on listen out for him on 40 through 10 meters using SSB, RTTY and digital modes. QSL via his home callsign, by the Bureau or direct.

OM3CGN is now active from the Cameroon as TJ6RM until mid-April. His operation is on 40 through 10 meters using CW and SSB. QSL via OM3CGN.

Members of the Malaysian Amateur Radio Transmitter Society and the 9M4SDX Team will be active 9M0L from Sabah, East Malaysia through April 24th. QSL direct to 9M2TO: 9M0L TEAM PENANG, PO BOX 125 GPO 10710, Penang Island, Malaysia or via the bureau to Malaysian Amateur Radio Transmitters Society

DJ9RR will be on the air as S79RR from Mahe Island between May 15th and the 23rd. Activity will be holiday style on 40 through 10 meters using CW and RTTY. QSL via his home callsign, direct, via the bureau or using Logbook of the World.

Members of the Jersey Contest Group will be active as GJ2A from the Isle of Jersey during the Radio Society of Great Britaians' Islands on the Air Contest. This event taking place on July 28th and 29th. QSL direct to GJ3DVC or electronically using Logbook of the World.

G3ZAY and M0VFC are planning to be active as ZD9UW from Tristan da Cunha possibly in September but nothing yet is confirmed. More details should soon be forthcoming at www.zd9uw.org.uk.

ON4LO will be active as 5P4LO from Romo Island between April 15th and the 20th. His operation will be on 10 to 80 meters using SSB, RTTY and PSK. QSL via ON4LO, direct or via the bureau.

Lastly, JH4VUC will once again be operational from Saipan using the callsign WH0VU through April 21st. Activity will be on all H-F bands using all modes. QSL direct to his home callsign.

**

THAT FINAL ITEM: KDKA HONORS ITS LONGEST LISTENER

And finally this week, a famed radio station has honored its lifelong listener. Representatives from Pittsburgh's KDKA broadcasting did so when they recently visited 106 year old Lucy Treccase.

Created by the Westinghouse Electric Corporation KDKA AM is often called the first commercial station in the United States. Treccase claims that she remembers hearing KDKA's inaugural broadcast of the presidential election results on November 2nd, 1920 between Warren Harding and James Cox.

At the gathering Ms. Trecasse was interviewed by KDKA radio's Larry Richert and KDKA-TV's Dennis Bowman. Richert and Bowman also presented her with a specially engraved plaque. It reads to: "Lucy Treccase -In Honor of Decades of Listenership; November 2, 1920 to the present."

More on this rather heart-warming story is on-line at tinyurl.com/kdka-oldest-listener. And you have to admit that this is a nice way to end this weeks newscast.

(RW)

NEWSCAST CLOSE

With thanks to AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, TWIT.TV, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

A reminder that the nominating period for the 2012 Amateur Radio Newsline Young Ham of the Year Award is now open. Full details and a downloadable nominating form are on our website at arnewsline.org/yhoty.

Also, please do not forget that Wednesday, April 18th is World Amateur Radio Day 2012. That's when the world of amateur radio will celebrate the 87th anniversary of the founding of the International Amateur Radio Union. The theme this year is Amateur Radio Satellites: Celebrating 50 Years in Space. Specifically noted are the launch of ham radios first satellite, OSCAR 1 on December 12, 1961 and the launch of OSCAR 2 on June 2, 1962.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

Dammu movie will release on April 20th. Director Boyapati srinu was
announced the date. Kartheeka performance is very hot in the film.
This is first film to
kartheeka act with Ntr. Trisha also looking hot. Boyapati srinu is
taking so much of caring about this film. Definitely this movie will
break the collections.
Dammu movie free download here.

Petiton started to void HOA Antenna Restrictions.

Posted: 12 Apr 2012 08:18 AM PDT
http://forums.qrz.com/showthread.php?342026-Petiton-started-to-void-HOA-Antenna-Restrictions&goto=newpost

For 100 years amateur radio has played a vital role in the technological development of the United States and continues to do so today. Thousands of scientists and engineers got started in electronics and communications careers as a result of an early interest in amateur radio. Many of today□s scientists and engineers, as well as others in less technical fields, continue to enjoy amateur radio. Amateur radio is an activity that has a demonstrated history of □paying off□ for society.

Radio amateurs have a proud tradition of making their skills and equipment available for backup and auxiliary emergency communications in times of disaster - at no cost to taxpayers. The Amateur Radio Service provides a layer of redundancy - a most desirable feature of any communications system.

Unreasonable and unnecessary land use restrictions are now near universal in prohibiting the erection of antennas essential for amateur radio communications in most residential developments constructed in recent decades. Homeowner□s and property owner□s associations have usurped the legitimate authority of the Federal Communications Commission in this area of telecommunications. This has had a detrimental effect upon the development of the Amateur Radio Service and, as a consequence, it has had a negative effect upon our ability to provide emergency communications during times of disaster.

We request the Federal Communications Commission to take whatever steps are necessary to immediately void all existing private land use restrictions dealing with antennas used for the transmission or reception of radio signals and to disallow any future creation of such restrictions by private homeowner□s and property owner□s associations. We further request that the Federal Communications Commission consider the establishment of reasonable criteria for permitting the erection of antennas in private residential areas.

To sign the petition, go to

VA3XPR Global 360 Net

>Date: April 14, 2012

Topic: Portable & Mobile HF QRP Operation Made Easy

Guest Speaker: Joe Verdirame, VE3LNU

Overview: Making contacts while operating HF QRP (low power) can be fun and
rewarding experience, especially with the predominance of higher powered
stations on the HF bands these days. Accomplishing this while portable or
mobile can be even more challenging, as antenna constraints become more
pronounced.

Please join in to the VA3XPR Global 360 Net where our guest speaker Joe
Verdirame, VE3LNU, will share with us some tips on how to effectively
operate HF QRP while on the go.

The net details are below:

>Date: April 14, 2012

Time: 14:00 UTC

RF (Toronto Area): 441.950+ PL 100 Hz (VA3XPR)

IRLP Reflector: 9558

EchoLink Conference: *VK3JED* (42840)

For more information, please visit
http://www.va3xpr.net/portable-mobil...ion-made-easy/

Regards,

Don, VA3XFT

Ham Radio Deluxe v5.20 Release Announcement

Posted: 13 Apr 2012 11:47 AM PDT
http://forums.qrz.com/showthread.php?342173-Ham-Radio-Deluxe-v5-20-Release-Announcement&goto=newpost

Tampa FL, St. Paul MN, Pittsburgh PA ☐ April 13, 2012

HRD Software, LLC announces the release of Ham Radio Deluxe 5.20.0.7. This is the 3rd release of software since W4PC, WA9PIE and K0CHB acquired the rights in November of 2011.

Erik Gawtry KC0WWC and Rick Ruhl W4PC have been coding in tandem for the past few weeks and have created this version with more fixes and some new beta features which will be in version 6. This version 5.20 includes the beta for a contesting interface, a Cabrillo export and support for the Ten-Tec Eagle.

Rick Ruhl, W4PC, said, ☐We decided to add the new features to give the users a taste of what we☐re going to do in 6.0. 6.0 will have many new features which will include FSK support, a new DXCC awards interface, label printing, and the super sweeper in Digital Master. Super Sweeper will allow multiple signals to be decoded in the window formerly referred to as Superbrowser☐.

This is the first version compiled with the Visual Studio 2010 compiler. Rick and Erik have been working since version 5.11 to move the program from Visual C++ 6.0.

The HRD group will be at the DX Convention in Visalia, CA on the 20th and 21st and will be in booths 108-109-100 at the Dayton Hamvention.

HRD 5.20 is free, but will include a no charge upgrade to version 6.0 with the purchase of 5.X support for $59.95. The retail version of HRD will be $79.95 when it☐s released at Dayton 2012.

You can purchase and download the product at http://www.ham-radio-deluxe.com.

SARL NEWS - SUNDAY 15 APRIL 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that we have to announce that the key of Christiaan van Zyl, ZS6CVZ, became silent on 26 March 2012 at the age of 82. Christaan previously held the call sign VQ2VZ. Christiaan introduced five generations to the joys of amateur radio. He leaves behind two children and five grandchildren, all with ZS call signs.

Our sincerest condolences to his relatives and friends.

(PAUSE)

IN THE NEWS TODAY:

LAST CHANCE TO REGISTER FOR THE SARL NATIONAL CONVENTION WORLD AMATEUR RADIO DAY SWEDEN SDR AMATEUR BAND RECEIVER ON THE WEB

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

LAST CHANCE TO REGISTER FOR THE SARL NATIONAL CONVENTION

Register before Wednesday if you are planning to attend the SARL National convention in Pinetown from 20 - 22 April 2012. The full details are available on www.sarl.org.za.

The convention starts off with a getting to know you evening at the Highway Amateur Radio Club clubhouse with a finger supper. Also, learn more about how the South African electronics industry started in Pinetown. On Saturday the AGM starts with registration of proxies at 08:00, with the meeting commencing at 09:00. You can follow the AGM

proceedings on 145,750 with ZS6FCS in Pretoria, on 14,250 with Pieter and on 7082 with Quartus, ZS6EE. The audio will also be available on echolink. On Saturday afternoon there are two exciting presentations. Build VHF antennas with Rob Cohen, ZS5LA, and DXing and Log Book of the World with Chris Burger, ZS6EZ. The annual dinner starts at 18:30 with drinks, with the dinner starting at 19:00. The guest speaker is Dr Andrew Collier, Manager: Waves and Space Plasma Group at SANSA Space Sciences at the Hermanus Magnetic Observatory and senior lecturer at the University of KwaZulu-Natal. Every person attending the dinner will take part in the lucky draw for a large number of prizes which include a dual band mobile transceiver, the YAESU FTM-10R sponsored by Verstay, watches sponsored by Natal Jewellery Wholesalers and two J-pole antennas. The convention ends on Sunday Morning with a breakfast at the Japanese Gardens. Register for the convention and dinner by visiting www.sarl.org.za and follow the link from the home page or call Mariska at 011 675 2393. Please do it by 16:00 on Wednesday 18 April. If you cannot attend as a member you can give your proxy to another member who is attending. Full details on www.sarl.org.za.

WORLD AMATEUR RADIO DAY

On 18 April 2012, radio amateurs will be celebrating World Amateur Radio Day, on the 87th anniversary of the founding of the International Amateur Radio Union or IARU. This year's theme is "Amateur Radio Satellites: Celebrating 50 Years in Space" in remembrance of the launching of OSCAR 1 on 12 December 1961 and the launch of OSCAR 2 on 2 June 1962. In 1924, ARRL President Hiram Percy Maxim, W1AW, had scheduled a business trip to Europe. While in Europe, Maxim was asked by the ARRL Board of Directors to represent the ARRL in fostering international relations between amateurs. Following an informal meeting in 1924, representatives from France, Great Britain, Belgium, Switzerland, Italy, Spain, Luxembourg, Canada and the United States formulated a plan to hold an International Amateur Congress in Paris, France, in April 1925, for the purpose of founding the IARU. Representatives from Europe, North America, South America and Asia attended the congress, adopting a constitution for the IARU on April 17. At a closing assembly on the following day, officers were elected and the actions of the congress ratified by representatives from 25 countries. Thus, April 18 became the official "birthday" of the IARU and is now designated World Amateur Radio Day. There will be several special event stations from IARU's Member Societies active on different dates during April: South Africa - ZS6IARU, will be active on 18 April. QSL via ZS4BS. Bulgaria - LZ1WARD, by the Bulgarian Federation of Radio Amateurs, active throughout the month of April. QSL via bureau. Switzerland - HB9WARD by Union Schweizerischer Kurzwellen-Amateure, active on 18 April. QSL via HB9JOE. Poland - HF87WARD, by members of the SP-CFF will be active from 17 to 30 April. There is an award for this operation. QSL via eQSL.cc and WFF LogSearch. Liberia - EL2RL, by the Liberia Radio Amateur Association will be active on 18 April. Direct QSL to EL2BA. Mexico - 6H6IARU by the Federaci&#65533;n Mexicana de

Radio Experimentadores who are active from 13 to 18 April. QSL via LoTW and N7RO. Chile - 3G87IARU by the Radio Club de Chile, active throughout the month of April. QSL via CE3AA.

REGISTER NOW FOR THE SA AMSAT SPACE SYMPOSIUM

Details of the SA AMSAT Space Symposium which will be held at the University of KwaZulu-Natal on Saturday 12 May, are now available on www.amsatsa.org.za. The theme of the symposium is 50 years of amateur satellites, celebrating the launch, 50 years ago, of OSCAR 1. The programme is packed with exciting presentations and demonstrations. Register early to save on the registration fee.

AMATEUR RADIO BOOKS AT THE SARL NATIONAL CONVENTION

A range of amateur radio books will be on sale at the SARL National Convention including the hardcover version of the 2012 ARRL Handbook and the hardcover version of the ARRL Antenna book. If you order books and pay online before Wednesday 18 April, you can take delivery at the National Convention. Details of books available are on www.amateurradio.org.za. At the national convention payment will be by cash or cheque only, as no credit card facilities will be available.

SWEDISH SDR AMATEUR BAND RECEIVER ON THE WEB

A new online software defined radio located in Sweden and set for reception of the amateur radio 75, 60, 40 and 20 metre bands, is now available via the World Wide Web. It is located in the city of Mora and is maintained by SM4JLX. The system is made up of three Soft66lite receivers and a band-pass filter. You need both Java and JavaScript enabled for the Web SDR to work properly. You can hear it on-line at tinyurl.com/sweden-sdr.

CONTEST NEWS

The SARL Hamnet 40 m Simulated Emergency Contest was run on Sunday 4 March. The winners of the categories are as follows: Single operator stationery mobile: Andy Cairns, ZS6ADY. Single operator portable: Christo Kriek, ZR6LJK Multi operator: no entries. Base Station: Francois Reyneke, ZS6FDX. Scores obtained are as follows: Single operator stationery mobile: 1st Andy Cairns, ZS6ADY, 672 points. 2nd John Kramer, ZS5J, with 460 points. 3rd Nico Oelofse, ZS4N, with 405 points. Single operator portable: 1st Christo Kriek, ZR6LJK, with 504 points. 2nd Al Akers, ZS2U, with 468 points. 3rd Keith Liddle, ZS6AGF, with 414 points. Base Stations: 1st Francois Reyneke, ZS6FDX, with 1170 points. 2nd Peet Pretorius, ZS4VP, with 1005 points. 3rd Pieter Jacobs, ZS6XT, with 975 points. The SARL March Madness YL Sprint was held on Saturday 10 March. 1st Colette Rundle, ZS2CR, with 24 points. 2nd Dawn Snyders, ZS5ME, with 15 points. 3rd Theunis Potgieter, ZS2EC, with 9 points. 4th Derek Stuart, ZS2J, 7 points. 5th Peet Pretorius, ZS4VP, with 3 points. The second SARL 80 m Club Contest was run on Wednesday 28 March 2012 and this was a phone contest. 1st West Rand ARC - 146 points from 11 logs. 2nd Bloemfontein RAC - 36 points from 2 logs. 3rd

Port Elizabeth ARS - 10 points from 1 log. All the results are in HF Happenings 499 and 500. Congratulations to all the participants and thank your for your participation.

CLUB NEWS

The .

on Saturday 28 April 2012 at the clubhouse in Kroton Street, Weltevredenpark, Roodepoort. Everyone is very welcome. For more information, contact Phillip, ZS6PVT, at 083 267 3835.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that solar activity remains at low levels. New sunspot 1455 continues to grow and is crackling with low level Class-B flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 29.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 10 m not far behind.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

18 April, World Amateur Radio day. 20 - 22 April, SARL Convention in Pinetown. 28 April - West Rand Amateur Radio Club next flea market at 12:00. 12 May, SA AMSAT space symposium; visit www.amsatsa.org.za for details and registration.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Fritz, ZS6SF.

Thank you for listening, 73. /EX

SARL NEWS - SUNDAY 15 APRIL 2012

(Sorry for a mistake in the earlier edition. The first sentence in the CLUB NEWS item had inadvertently been left out).

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that we have to announce that the key of Christiaan van Zyl, ZS6CVZ, became silent on 26 March 2012 at the age of 82. Christaan previously held the call sign VQ2VZ. Christiaan introduced five generations to the joys of amateur radio. He leaves behind two children and five grandchildren, all with ZS call signs.

Our sincerest condolences to his relatives and friends.

IN THE NEWS TODAY:

LAST CHANCE TO REGISTER FOR THE SARL NATIONAL CONVENTION WORLD AMATEUR RADIO DAY SWEDEN SDR AMATEUR BAND RECEIVER ON THE WEB

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

LAST CHANCE TO REGISTER FOR THE SARL NATIONAL CONVENTION

Register before Wednesday if you are planning to attend the SARL National convention in Pinetown from 20 - 22 April 2012. The full details are available on www.sarl.org.za.

The convention starts off with a getting to know you evening at the Highway Amateur Radio Club clubhouse with a finger supper. Also, learn more about how the South African electronics industry started in

Pinetown. On Saturday the AGM starts with registration of proxies at 08:00, with the meeting commencing at 09:00. You can follow the AGM proceedings on 145,750 with ZS6FCS in Pretoria, on 14,250 with Pieter and on 7082 with Quartus, ZS6EE. The audio will also be available on echolink. On Saturday afternoon there are two exciting presentations. Build VHF antennas with Rob Cohen, ZS5LA, and DXing and Log Book of the World with Chris Burger, ZS6EZ. The annual dinner starts at 18:30 with drinks, with the dinner starting at 19:00. The guest speaker is Dr Andrew Collier, Manager: Waves and Space Plasma Group at SANSA Space Sciences at the Hermanus Magnetic Observatory and senior lecturer at the University of KwaZulu-Natal. Every person attending the dinner will take part in the lucky draw for a large number of prizes which include a dual band mobile transceiver, the YAESU FTM-10R sponsored by Verstay, watches sponsored by Natal Jewellery Wholesalers and two J-pole antennas. The convention ends on Sunday Morning with a breakfast at the Japanese Gardens. Register for the convention and dinner by visiting www.sarl.org.za and follow the link from the home page or call Mariska at 011 675 2393. Please do it by 16:00 on Wednesday 18 April. If you cannot attend as a member you can give your proxy to another member who is attending. Full details on www.sarl.org.za.

WORLD AMATEUR RADIO DAY

On 18 April 2012, radio amateurs will be celebrating World Amateur Radio Day, on the 87th anniversary of the founding of the International Amateur Radio Union or IARU. This year's theme is "Amateur Radio Satellites: Celebrating 50 Years in Space" in remembrance of the launching of OSCAR 1 on 12 December 1961 and the launch of OSCAR 2 on 2 June 1962. In 1924, ARRL President Hiram Percy Maxim, W1AW, had scheduled a business trip to Europe. While in Europe, Maxim was asked by the ARRL Board of Directors to represent the ARRL in fostering international relations between amateurs. Following an informal meeting in 1924, representatives from France, Great Britain, Belgium, Switzerland, Italy, Spain, Luxembourg, Canada and the United States formulated a plan to hold an International Amateur Congress in Paris, France, in April 1925, for the purpose of founding the IARU. Representatives from Europe, North America, South America and Asia attended the congress, adopting a constitution for the IARU on April 17. At a closing assembly on the following day, officers were elected and the actions of the congress ratified by representatives from 25 countries. Thus, April 18 became the official "birthday" of the IARU and is now designated World Amateur Radio Day. There will be several special event stations from IARU's Member Societies active on different dates during April: South Africa - ZS6IARU, will be active on 18 April. QSL via ZS4BS. Bulgaria - LZ1WARD, by the Bulgarian Federation of Radio Amateurs, active throughout the month of April. QSL via bureau. Switzerland - HB9WARD by Union Schweizerischer Kurzwellen-Amateure, active on 18 April. QSL via HB9JOE. Poland - HF87WARD, by members of the SP-CFF will be active from 17 to 30 April. There is an award for this operation. QSL via eQSL.cc and WFF LogSearch. Liberia - EL2RL, by

the Liberia Radio Amateur Association will be active on 18 April. Direct QSL to EL2BA. Mexico - 6H6IARU by the Federaci&#65533;n Mexicana de Radio Experimentadores who are active from 13 to 18 April. QSL via LoTW and N7RO. Chile - 3G87IARU by the Radio Club de Chile, active throughout the month of April. QSL via CE3AA.

REGISTER NOW FOR THE SA AMSAT SPACE SYMPOSIUM

Details of the SA AMSAT Space Symposium which will be held at the University of KwaZulu-Natal on Saturday 12 May, are now available on www.amsatsa.org.za. The theme of the symposium is 50 years of amateur satellites, celebrating the launch, 50 years ago, of OSCAR 1. The programme is packed with exciting presentations and demonstrations. Register early to save on the registration fee.

AMATEUR RADIO BOOKS AT THE SARL NATIONAL CONVENTION

A range of amateur radio books will be on sale at the SARL National Convention including the hardcover version of the 2012 ARRL Handbook and the hardcover version of the ARRL Antenna book. If you order books and pay online before Wednesday 18 April, you can take delivery at the National Convention. Details of books available are on www.amateurradio.org.za. At the national convention payment will be by cash or cheque only, as no credit card facilities will be available.

SWEDISH SDR AMATEUR BAND RECEIVER ON THE WEB

A new online software defined radio located in Sweden and set for reception of the amateur radio 75, 60, 40 and 20 metre bands, is now available via the World Wide Web. It is located in the city of Mora and is maintained by SM4JLX. The system is made up of three Soft66lite receivers and a band-pass filter. You need both Java and JavaScript enabled for the Web SDR to work properly. You can hear it on-line at tinyurl.com/sweden-sdr.

CONTEST NEWS

The SARL Hamnet 40 m Simulated Emergency Contest was run on Sunday 4 March. The winners of the categories are as follows: Single operator stationery mobile: Andy Cairns, ZS6ADY. Single operator portable: Christo Kriek, ZR6LJK Multi operator: no entries. Base Station: Francois Reyneke, ZS6FDX. Scores obtained are as follows: Single operator stationery mobile: 1st Andy Cairns, ZS6ADY, 672 points. 2nd John Kramer, ZS5J, with 460 points. 3rd Nico Oelofse, ZS4N, with 405 points. Single operator portable: 1st Christo Kriek, ZR6LJK, with 504 points. 2nd Al Akers, ZS2U, with 468 points. 3rd Keith Liddle, ZS6AGF, with 414 points. Base Stations: 1st Francois Reyneke, ZS6FDX, with 1170 points. 2nd Peet Pretorius, ZS4VP, with 1005 points. 3rd Pieter Jacobs, ZS6XT, with 975 points. The SARL March Madness YL Sprint was held on Saturday 10 March. 1st Colette Rundle, ZS2CR, with 24 points. 2nd Dawn Snyders, ZS5ME, with 15 points. 3rd Theunis Potgieter, ZS2EC, with 9 points. 4th Derek Stuart, ZS2J, 7 points. 5th Peet Pretorius, ZS4VP, with 3 points. The second SARL 80 m Club Contest was run on Wednesday

28 March 2012 and this was a phone contest. 1st West Rand ARC - 146 points from 11 logs. 2nd Bloemfontein RAC - 36 points from 2 logs. 3rd Port Elizabeth ARS - 10 points from 1 log. All the results are in HF Happenings 499 and 500. Congratulations to all the participants and thank your for your participation.

CLUB NEWS

The West Rand Amateur Radio Club is hosting its next flea market at 12:00 on Saturday 28 April 2012 at the clubhouse in Kroton Street, Weltevredenpark, Roodepoort. Everyone is very welcome. For more information, contact Phillip, ZS6PVT, at 083 267 3835.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that solar activity remains at low levels. New sunspot 1455 continues to grow and is crackling with low level Class-B flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 29.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 10 m not far behind.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

18 April, World Amateur Radio day. 20 - 22 April, SARL Convention in Pinetown. 28 April - West Rand Amateur Radio Club next flea market at 12:00. 12 May, SA AMSAT space symposium; visit www.amsatsa.org.za for details and registration.

Area Amateur Radio Groups Have Common Bond:

Posted: 13 Apr 2012 05:10 PM PDT
http://www.eham.net/articles/28102

In a video made in 2003 for the American Radio Relay League (ARRL), the late journalist Walter Cronkite spoke about the public service done by amateur radio, or "ham radio" operators, during the dark day in our nation's history that was September 11, 2001. Cronkite, an amateur radio operator himself, said in their response, "Their country asked, and they responded without reservation." It's the bond three ham radio operators have in common -- to use amateur radio as a primary source to get the word out to those who can respond in times of crisis, to get more ham operators involved, and to get others to join the network.

//
Ham Radio More Than Just A Hobby:

Posted: 13 Apr 2012 05:08 PM PDT
http://www.eham.net/articles/28101

Did you know that several amateur radio enthusiasts took part in Wednesday disaster drill exercise throughout Eastern Idaho? You probably know them better as ham radio operators, but do you know what's special about the hobby? Ah, the familiar sound of a worldwide, well-loved hobby that dates back ages -- ham radio. It's a unique group you can always count on during an emergency and now we can count more of them. U.S. amateurs now 700,000 strong according to the American Radio Relay League. Hams are usually the first on the front lines of a disaster to establish critical communications. They were there during Hurricane Katrina. They were there in Haiti and Japan after the earthquakes and they are here in Eastern Idaho should we need them. Frank Corey, KE7JHQ, is one of them.

//
When Ham Tided Over Jams:

Posted: 13 Apr 2012 05:05 PM PDT
http://www.eham.net/articles/28100

Amateur radio (HAM) operators swung into action immediately when they heard news about earthquake and tsunami. When all modes of communication, including cellphones got jammed due to hyper activity of the people, HAMs started to contact other operators in various parts of the state to help

them to pass messages to their near and dear ones in the vicinity. Some other operators were busy interacting with operators in the South East Asian countries to know the situation in their country. Mr K. Rajesh (VU3RGK), an amateur radio operator, said that when he heard the news about earthquake and tsunami he logged on to 7050-megahertz in high frequency (HF), which HAMs in India use often to interact. "We tune to regular frequency to communicate in times of emergency and today we had about 25 HAMs across the Southern states operating in 7050 frequency communicating with each other in an attempt to help others," he said. Mr Rajesh pointed out that all HAMs stayed for four hours communicated with each other until the union government withdrew tsunami alert.

//
How the Titanic Disaster Forever Changed Telecommunications:

Posted: 13 Apr 2012 09:53 AM PDT
http://www.eham.net/articles/28097

Without the tireless work of the RMS Titanic's two radio operators, the toll on that night 100 years ago would have been far worse. At the same time, had more effective communication procedures between ships been in force, the tragedy might have been averted. The Titanic's sinking spurred the passage of legislation seeking to improve maritime communication, but as part of a larger bill that was the first to mandate the licensing of radio stations. That started the apportionment of the communications spectrum between different interests that continues to this day. Radio Aspects of the Disaster: The Marconi companies, headed by radio pioneer Guglielmo Marconi, had provided two-way radio systems to send and receive Continental Morse code:and the personnel to operate them:to ocean liners since 1904. By 1912, Marconi held a dominant position in the fledgling wireless communications industry, a cutthroat business in which operators refused to relay messages originating with another company, and were known to actively interfere with each other's transmissions. But even accidental interference was often hard to avoid, as the spark-gap transmitters that Marconi had championed and which were widely adopted by government, commercial, and amateur operators had a bandwidth so wide that they were

eventually outlawed when tunable continuous-wave transmitters with cleaner signals were developed.

North Texas Hams Respond When Tornados Strike:

Posted: 13 Apr 2012 10:05 AM PDT
http://www.eham.net/articles/28094

On April 3, 2012, perfect conditions conducive to tornado activity converged on North Texas. A slow moving front, combined with abnormally warm temperatures and moist air coming in from the south, produced large hail, numerous funnel clouds and tornados. As the weather worsened, hams in North Texas activated ARES and RACES nets. Spotters reported their observations to their local Emergency Operations Center, which acted on that information in a timely manner to inform the public of the approaching storms, giving them time to get to safety. A total of 21 confirmed tornados -- including one EF3 and two EF2 twisters -- swept through the Dallas-Fort Worth metroplex during the seven hour storm.

//
2012 Continues to Show Growth in Amateur Radio Licensing:

Posted: 13 Apr 2012 10:05 AM PDT
http://www.eham.net/articles/28093

The first quarter of 2012 (January-March) saw a high level of Amateur Radio license exam sessions, producing an elevated influx of applications for new licensees. According to ARRL VEC Manager Maria Somma, AB1FM, these numbers outpaced the 2011 first quarter results by 30 percent. This uptick does not only apply to new applications; there was a 6 percent increase in the number of upgrades, too.

//
FCC Seeks Public Comments on Emergency Communications Amateur Radio:

Posted: 13 Apr 2012 10:04 AM PDT
http://www.eham.net/articles/28092

In response to the Congressional directive to prepare a study to assess Amateur Radio's role in emergency and disaster communications and the impact of private land use regulations on the amateur community's ability to provide such communications, the FCC issued DA 12-523 soliciting comments from the public. The period for public comment runs until May 17, 2012.

//
Amateurs Must Protect New Radars in 23 cm Band:

Posted: 13 Apr 2012 10:06 AM PDT
http://www.eham.net/articles/28090

The Federal Aviation Administration is deploying a new generation of Common Air Route Surveillance Radar (CARSR) that has some implications for the use of the 1240-1300 MHz (23 cm) band by amateurs. The Amateur Service allocation in this band is on a secondary basis, with aeronautical radionavigation and several other services primary in the United States Table of Frequency Allocations. The FCC rules require that amateur stations operating in the 23 cm band may not cause harmful interference to stations in the radionavigation-satellite service, the aeronautical radionavigation service, the Earth exploration-satellite service (active) or the space research service (active). One case of harmful interference in Southern California has been reported.

//
ARRL Seeks Comments on Proposed 33 cm Band Plan:

Posted: 13 Apr 2012 09:54 AM PDT
http://www.eham.net/articles/28089

A few months ago, the ARRL UHF/Microwave Band Plan Committee asked the Amateur Radio community about current, planned and projected uses of the amateur bands between 902 MHz-3.5 GHz. The response was beyond our expectations, with hundreds of comments and suggestions received.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th-April, through Sunday, 15th-April there were 222 countries active. Countries available: 1S, 3A, 3B8, 3D2, 3D2/r, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/n, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9N, VK9X, VP2M, VP2V, VP8, VP8/h, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2012 DX TRAVELS/OPERATING TOUR. Jeff, N6GQ, plans to travel to several different locations this year and operate using his Elecraft K3/100. His expected schedule for the year is:

May 23-28th - Dodecanese (EU-001, GIOTA DKS-006, MIA MGD-028, WLOTA 0045); callsign SV5/N6GQ; plans to be in the CQWW WPX CW Contest (May 26-27th) as a SOAB QRP entry. QSL via LoTW or N6GQ.
May 28th-June 17th - Greece; callsign SV8/N6GQ; plans to be active from various IOTAs (EU-049 and EU-052) in SV8. QSL via LoTW or N6GQ.
June 17-29th - Malta (EU-023, MIA MM-001, WLOTA 1113); callsign 9H3ZZ. QSL via LoTW or N6GQ.
October 23-29th - Nicaragua; callsign YN2AA; plans to be in the CQWW DX SSB Contest (October 27-28th) as SOAB HP entry. QSL via LoTW or NN3W. Outside of contest weekend, look for him on 160-6 meters, and he may try 6m JT65 EME.

2012 WARD Award (World Amateur Radio Day Award). The WARD Award is designed to commemorate the World Amateur Radio Day celebrated by IARU on April 18th each year. It is issued by the MK QTC, Polish Radio Amateur's Journal, with the support of PZK, Polish Amateur Radio Union. The WARD will be granted for at least the following numbers of contacts: either 20 QSOs on the HF bands, or 10 QSOs on the VHF bands. All contacts must be made between 0000-2400z on April 18th. Send a standard application form (GCR List - log extract), including the list of QSOs, on or before May 31st to: The Radio Amateur's Journal MK QTC, Suchacz-Zamek - Wielmozy 5b, 82-340 Tolkmicko, Poland. The price of the WARD Award is 7 USDs, 5 IRCs or 5 Euros. The full colored Award size is: 210 x 297 mm. The WARD Award is also available to SWLs for the same numbers of reports. For more info on the WARD, see: http://suchacz.eu/articles.php?article_idB

5B, CYPRUS. Mark, M0DXR, will be active as 5B/M0DXR during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via his home callsign.

5V, TOGO (Update). Wim, ON4CIT, is still reporting that a DXpedition to Togo will take place at the end of 2012 or the beginning of 2013. The callsign mentioned is 5V7TH. The exact dates are still to be determined. Details are forthcoming.

DXCC NEWS (DXCC Card Checking Rule Change). It was announced late last week that a notice of an upcoming change in an administrative procedure contained in the DXCC Rules. The change in the DXCC Rules will permit volunteer Card Checkers who have achieved DXCC on 160 meters to check 160 meter QSLs in the field, and all Card Checkers to check cards for Deleted Entities. Until now there has been a requirement that 160 meter cards be checked by Headquarters staff. The main issue has been that some cards for 18 MHz QSOs can be altered to show 1.8 MHz without the alteration being detected. Therefore, the time of the QSO becomes significant. Some cards for Deleted Entities date back to 1960 and before, and sometimes it is difficult in the field to determine what entity the card ought to count for. Deleted Entities do not count for the DXCC Challenge or for the Honor Roll but do count toward all-time totals.
After discussion during the teleconference the "Programs and Services

Committee" (PSC) unanimously voted to authorize staff to amend the DXCC rules as proposed but with no change in how Card Checkers are appointed. For complete details on the change, please take a look at: http://www.arrl.org/awards-blog

HB, SWITZERLAND (WFF Op). A group from the Switzerland World Flora Fauna, Radio Club Locarno (HB8RL) and the Insubria Radio Club (HB9IRC), will activate the following Swiss Park and Natural Reserves: April 21st - Operators HB9EFJ, HB9FBI, HB9FBJ, HB9FAQ and HB9TZA will be active as HB9WFF/P between 0700-1800z, from Magadino Park (HBFF-101, DCS-TI073, WASL-TI002, WCA-HB00898). Activity will be on 40 and 20 meters using CW and SSB. QSL via HB9FBI, by the Bureau only. For more details on the park see: http://www.bolledimagadino.com April 22nd - Operators HB9TUZ, HB9EFJ, HB9FBI, HB9FBJ and HB9FAQ will be active as HB9IRC/P between 0700-1700z, from Magadino Park (HBFF-101, DRI-HB9004, DCS-TI073, WASL-TI002, WCA-HB00898). Activity will be on 40 and 20 meters using CW and SSB. QSL via HB9OCR, by the Bureau only.

HF87, POLAND (Special Event). Members of the Polish Amateur Radio Club Flora Fauna (SP-CFF, SP0CFF) will be active as HF87WARD between April 17-30th. Activity is to celebrate the World Amateur Radio Day on April 18th, the 87th anniversary of the founding of the International Amateur Radio Union, IARU. QSL via eQSL.cc and WFF LogSerach. For those who want to send a card direct, please send SASE to: Polish Club Flora & Fauna, Suchacz, Wielmozy 5b, 82-340 Tolkmicko, Poland. For more details, see: http://suchacz.eu/articles.php?article_idB

HH, HAITI. Tiho, 9A7GAE, is on a Red Cross mission in L&#65533;og&#65533;ne, and is expected to receive his Haitian license by the time you read this. He will be active as HH2/9A7GAE on 80/40/20/17/10/6 meters using as CP6 antenna. Activity will be limited to his free time (this is not a DX-pedition). He will operate on SSB and later on the Digital modes. His equipment arrived from the USA, but now he has a problem of finding any tower sections, cables, connectors...etc. (there is nothing available in Leogane). QSL card via his home callsign (LoTW later).

IOTA NEWS.....
AS-147. Yuki, JO2ASQ, will be active as JO2ASQ/8 from both Rishiri and Rebun Islands between April 30th and May 3rd. Look for updates on his Twitter page [in Japanese] at: https://twitter.com/#!/JO2ASQ

EU-043. Operators Ric/DL2VFR and Norbert/DL2RNS will be active as SD7V/6 and SD7N/6, respectively, from Orust Island between May 11-14th. Activity will be on the HF bands using CW and SSB, with high power. QSL via their home callsigns, by the Bureau or direct.

EU-047. Operators Friedrich/DL4BBH and Ric/DL2VFR will activate the special callsign DM50IOTA from Borkum Island (GIA N-001,

WLOTA 1022) between July 27-29th. Activity will include an entry in the RSGB IOTA Contest (July 28-29th). Operations will be on all HF bands and modes, propagation permitting. QSL direct or by the Bureau to DM50IOTA.

EU-061. Operators Ric/DL2VFR and Norbert/DL2RNS will be active as LA/homecall from the Hvaler Islands between May 16-21st. Activity will be on the HF bands, using CW and SSB, with high power. QSL via their home callsigns, direct or by the Bureau.

EU-073. Operators Vin/IK7IMO, Piero/IK7VJX and Roby/IK7XIV will be active as IJ7A from Isola San Pietro (IIA TA-002, MIA MI-094) between July 27-31th. Activity will include the RSGB IOTA Contest (July 28-29th) as a Multi-? entry. Operations will be all HF bands and modes. QSL via IK7IMO.

EU-090. Operators Jiri/OK1IEC, Rudolf/OK1HWS, Jan/OK1JK and Vlasta/ OK1UXH will be active as 9A8OK from Palagruza Island (ACIA IC-901, CIA-33, IOCA CI-084, MIA MC-284) and the lighthouse (ARLHS CRO-012, CLH-100, TWLHD WLH 9A-046, WLOTA 0057) between September 29th and October 6th. Activity will be on all HF bands and modes. QSL via OK1HWS, direct or by the Bureau. Visit their Web site at:
http://jan.kepic.cz/view.php?cisloclanku 12020002

SA-029. Operators Marcelo/PY1MT, Moreira/PU1MMZ, Mauricio/PU1SET, Jose/PY1MX and Jair/PY1HS will be active as ZV1M during the RSGB IOTA Contest (July 28-29th) from Itacuruca Island (DIB RJ-08), Rio de Janeiro State, Brazil. QSL via PY1MT, direct only with SASE/SAE + 2 USDs (no IRC). Their Web site is available at: http://www.casadoradioamador.blogspot.com

KH3, JOHNSTON ATOLL (Op Cancelled!). It was reported this past week that Susan, W7KFI, has officially given up on KH3. This will be a big disappointment to many who have been waiting for her to be on the air.

KH6BZF PROPAGATION FORECAST/REPORT (April 9-15th)....
Apr/16th AN Apr/19th AN Apr/21st AN
Apr/17th AN Apr/20th AN Apr/22nd AN
Apr/18th AN

VRY DIS - Very Disturbed Severe Storm K�9 100-400

KP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will be active as KP2MM during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW. For more details, see: http://www.n2tta.info

KP4, PUERTO RICO. Members of the Puerto Rico Field Day Group will once again be active as KP4FD to celebrate the International Amateur Radio Union's 87th anniversary during the "World Amateur Radio Day" on April 18th. This year's theme: Amateur Radio Satellites - Celebrating the 50 years in Space in remembrance of the launch of OSCAR 1 on December 12, 1961, and OSCAR 2 on June 2, 1962. Activity will be on the HF bands and on SSB. An electronic Certificate will be available at request via WP3GW. Confirmations will be via eQSL and LoTW.

P487, ARUBA. In celebration of the International Amateur Radio Union's (IARU) 87th anniversary, look for special event station P487IARU to be active between now and April 30th. This is the first time the prefix P487 has been activated, and actually the first time Aruba has issued a 4 letter suffix. The log will be uploaded to LoTW in due time. QSL via LoTW.

PRESS RELEASE FROM THE DESK OF RADIO ARCALA (By Martti Laine, OH2BH, dated March 14th) [edited]: "Toni, OH2UA at Controls of Remote CQ8X in Azores -- Wow, what a weekend it was! Radio Arcala's engineers allowed a first serious remote contest operation - over the internet - from the CR2X station located 4500 kilometers away from the actual operating position. It was a gas running those endless U.S. pileups from the Azores while gazing at the Northern Lights through the window at home 65 degrees north. It presented a new challenge, following the words of Hamlet - to be or not to be (there)?
With ever increasing antenna restrictions and noisier environments, going remote is the most likely way for serious folks to utilize the current technology for the common good. Radio Arcala is in the forefront of pushing for IP address driven station building blocks, such as radios and amps, while our vision is that each station accessory will soon have its own IP facility.
Running the highest continental number of QSOs (4543) in a first serious effort at remote operation shows the potential of the remote concept. There is still room for improvement and, honestly, it has to be said that the world is not ready - but we are one step closer.
Radio Arcala welcomes the approach taken by CQ Magazine's and ARRL's Contest administration in blessing our future by allowing remote operations in contesting under existing rules.
These QSOs do not count for DXCC but they do count for the true spirit of Amateur Radio, being in the vanguard of state-of-the-art technology and its applications.
Radio Arcala, OH8X, is a team of serious hams dedicating their efforts to interesting and novel areas of amateur radio. They push the issues to extreme, and their contest team, "Arcala Xtremes, is used as their test lab to verify the results. Arcala labs are located at 65 degrees north in the village of Arcala, Finland. <www.radioarcala.com>"

2 USDS NOT ENOUGH FOR DENMARK POSTAGE. Boye, OZ1CTK, informs OPDX that return postage from Denmark is as follows:
To Europe is 12 DKR (Danish Krone) or 1 IRC or 3 USDs
To World is 14 DKR (Danish Krone) or 1 IRC or 3 USDs
He states that he received a lot of 2 USDs which is NOT good.

HK0NA QSL UPDATE. It was announced on April 11th [edited]: "The HK0NA QSL design has been completed, and they are in the process of being printed. We expect delivery by the end of April. Our QSL Manager N2OO is posting QSL processing updates online at <www.sjdxa.org/hk0na.htm>. Watch this link for QSL updates. Please understand that this QSL operation will take time to process. Please be patient. It is anticipated that cards should START to go out in the May-June time frame. Cards will NOT be mailed all at once. They will be going out slowly as they are processed. A sample of the HK0NA QSL card can be seen on our web site <www.hk0na.com>. We wish to thank Stan, SQ8X, for the beautiful design work and Everett, WZ8P, of Franklin Printing for offering printing services. Remember that the fastest and most popular way to get your HK0NA QSL is to the use the Online Qsl Request System (OQRS). The HK0NA team hopes you enjoy the beautiful card. A lot of effort went into its design!"

P4/W1HEO QSL STATUS. "Dee," W1HEO, reports that all direct P4/W1HEO QSL requests have been answered along with all Bureau cards received to date. He will confirm remaining DX contacts via the Bureau. Note that he does not use "Logbook of The World" (LoTW), and reminds state-side operators who want a QSL to send requests with a SASE to W1HEO at 9901 Cypress Circle, Mentor, OH 44060.

QSL RECEIVED AFTER 9 YEARS! Scotty, WK3N, reports receiving QSLs for the ZW0S St. Peter and Paul Archipelago (PY0S) 2003 operation which has been deemed difficult at best. He states that after 7 tries in sending in 9 years, he finally received his QSLs. The return address on the envelope was: PS7JN-JOCA, Rua Goias, 312, Teresina-PI-Brazil.

QSL RECEIVED VIA LoTW: 9A5Y, 9A8A, HL2IFR, HQ2N, IR4M, JG3RPL, KH7Y, KP2/K3CT, LZ9W, TI5N, TM9R, UB5IJG, UU0JM and XE1EE

QSLS RECEIVED VIA MAIL: 3C9B, 3D2T, 9N7BM, 9Q6AL, C91NW, EA9/G3TXF, FK8CP, HU2DX, LA7QIA, PJ4/K4BAI, PS5F, RI1FJA, SV2ASP/A, T2T, TI5/JT1CO, TN2T, VP2EC, VP5OU, VP6T, VK100WIA, ZD8Z and ZD7XF

QSLS RECEIVED VIA THE BUREAU: 3D2DX, 3A2ND, 5R8IC, 6M0W/4, 6M0W/5, 9X0Z, AH2Y, AH0DX, C21AV, D2QMN, D44TBV, CN2A, H40HL, J5V, JD1BIE, JD1BLY, JD1BMH, JD1BMM, JT1GCW, KH2/WX8C, MJ/OP9X/P, RAEM, T8CW, T88RX, XV3RRC, XT2AEF and XX9TKV

SE, SWEDEN (Update/Special Event/Callsign Change). Richard, SM2TOS, and some other operators will be active as SE2EE (not SG2SNF as first announced) from Porjus between June 16-17th. Activity will be from the Lancaster bomber "Easy Elsie", which crashed at Porjus in Sweden on October 29th, 1944. They will be on the shortwave bands around the clock! They mention that they do not have to worry about daylight, as there will be sunlight 24/7!! The sun never goes down during the summer up here in the north part of Sweden. (High above the Arctic circle). For more details, pictures and QSL info, see QRZ.com. They also have a Web site at: http://www.sm2tos.se/easyelsie/eng

SV9, CRETE. Seppo, OH1VR, will be active as SV9/OH1VR from Crete (EU-015, GIOTA KRS-005, MIA MGC-005, WLOTA 1400) between April 21-28th. QSL via his home callsign.

TO3, SAINT BARTHELEMY (Reminder). Operators Wim/ON4CIT and Paul/ON4BEC will be active as TO3X from St. Barthelemy (NA-146) between April 16-30th. Activity will be on 40-6 meters using mostly SSB and RTTY with some CW. They will look for JA stations every day during 2300-0200z on 15/12/10 meters on SSB and RTTY. QSL via ON4CIT, direct or by the Bureau. An online log will be available at ClubLog as well as an OQRS. Log will be uploaded to LoTW later in the year. For more details and suggested frequencies, see the TO3X Web page at: http://www.dxpedition.be/TO3X.html

V2, ANTIGUA. Darrell, AB2E, will once again be active as V26E from Antigua (NA-100) between May 23-30th. Activity will include the CQWW WPX CW Contest (May 26-27th) as Single-Op/All-Band/Low-Power (A) entry -- same as last year which resulted in #2 World and #1 North America for the category. All operations before and after the contests will be either on the 30/17/12 meter bands or the lower bands. Also, for the first time he will attempt RTTY on all bands. QSL direct via AB2E for any and all operations from 1993 to present. Be sure to include an SASE, green stamp, or new IRC, or you won't get a card. Sorry, no Bureau cards at this time, and no eQSL. As of February 28, 2011, all logs from all V26E operations (including 2010) have been uploaded to LoTW as well.

V3, BELIZE. Mike, VE2XB, will once again be active as V31XB from Caye Caulker Island (NA-073) between May 11-31st. Activity will be on all HF bands, as well as 6m, using CW and SSB. He will be using his K3 into a Hexbeam. Mike states that he will be looking especially for JA stations to work this IOTA (as well as everyone else). QSL via VE2XB (see QRZ.com).

VK9X, CHRISTMAS ISLAND. Sadao, JA1PBV, is now active as VK9XS from Christmas Island (OC-002) until April 17th. Activity is on the HF bands, 80-6 meters using CW and RTTY. A log search is available at: http://ito110.com QSL via his home callsign.

VK0, MACQUARIE ISLAND (Update). Trevor, VK0TH, was expected to go QRT on April 14th, but he announced this past week (April 12th), "Good News!! ? Looks like I will be able to continue operating until the 19th so that gives us another 7 days!!" See the schedule on QRZ.com for his operating hours. Trevor states, "I have been been 'squeezing' additional hours in during working days at lunchtime etc when I can." QSL via JE1LET direct ONLY.

VP9, BERMUDA. Operators Seppo/OH1VR and Egbert/OH1ZAA will be active as OH1VR/VP9 and OH1ZAA/VP9, respectively, from Bermuda (NA-005) between May 7-13th. Activity will be on the HF bands and 6 meters, and using CW and SSB. QSL via their home callsign.

XP, GREENLAND. Henning, OU2I/OZ1BII, will be active as XP2I from Kanger-lussuaq during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/ All-Band/Low-Power entry. QSL via OZ1BII (see www.oz1bii.dk/qsl-info.htm).

XU, CAMBODIA. Barry, ZL1DD, is now active as XU7AEL from the XU7AAA Rental Shack in Cambodia until April 21st. Activity is on 80-6 meters using CW and SSB. QSL via his home callsign.

YP1, ROMANIA (Special Event/WFF Op!). A group of Romanian hams will activate the callsign YP1WFF from YOFF-111 <http://wff-yo.blogspot.com> and DYO-08 <http://danube-islands-explorer.blogspot.com> for the WFF programs on April 18th. Activity will be during the daylight to celebrate the "2012 World Amateur Radio Day" as field day operation. QSL via YO3JW.

ZD8, ASCENSION ISLAND. Oliver, W6NV, will once again be active as ZD8W from Ascension Island (AF-003) during the CQWW DX CW Contest (November 24-28th) as a Single-Op entry. Look for activity on the low bands before the contest weekend. QSL via his home callsign.

ZL9, CAMPBELL ISLAND (Update). The Hellenic Amateur Radio of Association of Australia (HARAOA) is organizing a DXpedition to Campbell Island (OC-037) and will be active between November 17-30th. Campbell Island is Number 15 on the current DXCC most wanted list. The HARAOA team was finally issued the callsign ZL9HR on April 13th. The DXpedition team will consist of nine (9) operators: Tommy/VK2IR (Team Leader), John/VK3YP (Team Co-Leader), Les/W2LK, Gene/K5GS, Dave/K3EL, Glenn/KE4KY, Jacques/ ZL3CW, Pista/HA5AO and Don/VE7DS. For updates and details, visit the Web site at: http://www.zl9hr.com

Radio News Bulletin
Sunday 15th April 2012

IRTS 80th Anniversary AGM & Rally

Just one week remaining for the 80th Anniversary IRTS AGM and Rally and you can still purchase your tickets for the special anniversary AGM dinner on Saturday 21st April. However hurry as hotel need final numbers by Thursday next. Dinner tickets are just 32, a reduction on previous years and represents great value for this very special dinner. B&B is 55 for single and a double is 65. The Venue is Fairways Hotel Dundalk, telephone 042-9321500.

Dinner tickets can be bought now by contacting Thos EI2JD on 087-2953256 or email thoscaffrey /at/ hotmail.com or by contacting any IRTS committee member.

The radio rally and exhibition will be held in the large conference hall with lots of space to move about and to peruse at your leisure. It all happens over the weekend of April 21st & 22nd, that's next weekend. A very warm welcome awaits you.

Counties Contest

The 2 metres counties contest on Easter Monday was well supported. We noted in particular that there were quite a few portable stations active, many of these from hilltop locations. Those who braved the hills on a rainy bank holiday Monday included David EI7GEB on Mohercrom, Co. Cavan and Ger EI4GXB on Tountinna in Tipperary, also Joe EI7GY who was on the Slieve Blooms in Co. Laois. We also have reports from the South Eastern Amateur Radio Group, who were operating from Devils Bit, Co. Tipperary and Fergus EI6IB manning the Shannon Basin Radio Club station from Bencroy Co. Leitrim.

As usual, most of the activity in the early part of the contest was on FM, but the SSB portion of the band livened up for the final 30 minutes of the contest.

Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 28th June at 2 p.m. in the ComReg Offices in Dublin. The examination may be held on that day at other centres where warranted by the number of candidates. Full details, including entry procedure and examination fee are available at www.irts.ie/exam.

Places for the examination are limited and will be allocated on a first come first served basis. Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination.

Mayo Radio Experimenters - Titanic Special Event Operation EI 1 MGY

To commemorate the 100th anniversary of the sinking of the Titanic, The Mayo Radio Experimenters will operate EI 1 MGY from the 8th to 21st of April as part of the Addergoole Titanic Society's week-long centenary programme of events which take place in the village of Lahardane, County Mayo, commencing Easter Sunday 8th April through to Sunday 15th April. In April 1912 fourteen men and women from the Parish of Addergoole, in North Mayo, set sail from Queenstown, Cork for a new life in America. Within days, eleven had died in the icy waters of the North Atlantic. Their ship, 'Titanic', sank on her maiden voyage. Rural Ireland resounds with tales of emigration, steeped in the traditions of letting go. Addergoole will never let go of the memory of eleven neighbours and friends who disappeared with that "Ship of Dreams". Please visit: www.mayo-titanic.com where you can download a brochure of the events taking place during the week.

North Cork Radio Group

The North Cork Radio Group are pleased to announce that they will be activating Mizen Head Visitors Centre again this year for Marconi weekend. The callsign, EI0IMD, will be on the air from 20th April - 22nd April inclusive. As you may know, Marconi Day is on 21st April this year and we will be operating over the full 24 hour period on this day in order that collectors of the Marconi Award will have the opportunity to add us to their list. Mizen Head is a beautiful location and well worth a visit.

Old Timers due at IRTS 80th Anniversary Rally

The Radio Amateur Old Timers Association made a very successful appearance at the Lough Erne Rally. Now, the Old Timers plan to be present at the IRTS 80th Anniversary Rally on Sunday 22 April.

This Association has an important role in amateur radio. It seeks to keep alive the pioneer spirit and traditions of the past in today's Amateur Radio by means of personal and radio contact, whilst being mindful of any special needs. The magazine, OT News and other publications are a rich treasure of technical and experimental information amid reminiscence and companionship. There are many in

Ireland who would enjoy playing a part in the Old Timers Association.

Cork Radio Group

Brow Head near Crookhaven in West Cork was the site of Marconi's western-most European wireless station from 1901 to 1914. Given its unique location, telegraphers there were kept busy 24 hours a day passing messages to and from ships arriving from North America.

Using the call sign EI5IMD, the very site of Marconi's station will be activated by members of Cork Radio Club for International Marconi Day on Saturday, 21 April. The event involves stations from around the world, many operating from sites directly connected with Marconi. It is not a contest but rather a celebration of Marconi's birth on 25 April 1874 and his inventions that literally changed the world.

This year is the 25th anniversary of IMD, which is sponsored by the Cornish Radio Amateur Club. The club's newly-designed website, GB4IMD.com, contains much interesting information including station histories, photographs, historic IMD QSL cards, and a list of award stations for the IMD Award.

South Eastern Amateur Radio Group

For those who have expressed interest in participating in Theory Classes leading to the Amateur Radio Licence with South Eastern Amateur Radio Group, there will be an information / planning session at our next general meeting which takes place at 8:30 p.m. on Monday 30 April in the Roanmore Centre, Cleaboy Road, Waterford. All are welcome!

The Geoparks communications weekend this year takes place on Saturday 26 and Sunday 27 May. South Eastern Amateur Radio Group will again operate from Tankardstown on the Copper Coast Geopark in Co. Waterford. The callsign is EI2GEO (pending approval). Activity will mainly be on HF. Anyone wishing to get involved should contact the club on info/ at/searg.com or phone Mark Wall on 087-6302026. For more information about the Geopark, visit www.coppercoastgeopark.com For more information about SEARG visit the clubs web site on www.searg.com

---

DX News

Wim ON4CIT and Paul ON4BEC will be active from the Caribbean island of St Barthelemy from 16 - 30 April. They will use the callsign TO3X and will mainly be on SSB and RTTY with some CW. The IOTA reference for this one is NA-146 and the QSL info is via ON4CIT.

The 2012 Asian Weightlifting Championships will be held later this month in South Korea. To celebrate the event the special callsign DT12AWC will be activated from 14 - 30 April. This will be of interest

to prefix chasers. QSL Manager is DS2GOO.

Another call of interest to prefix chasers is 6H6IARU which will be aired by members of the Grupo DXXE in Mexico until 18 April. This is to celebrate World Amateur Radio Day and the 87th anniversary of the founding of the International Amateur Radio Union.

A multi-national group is operating as 9M0L from the Spratley Islands in the South China Sea. They hope to be QRV until 24 April. This is quite a rare DXCC entity and a high demand for contacts is expected. The IOTA reference number is AS-051.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Amateur Radio Fans Ham It Up in Lewes:

Posted: 14 Apr 2012 05:10 PM PDT
http://www.eham.net/articles/28106

LEWES -- Since 2004, the Lewes Amateur Radio Society has been embracing and promoting short-wave communication in the Lewes community and beyond. What was a five-member group of local amateur radio operators at its inception has expanded to 41. The group meets over the airwaves on a weekly basis when there's no in-person meeting scheduled. Amateur radio operators are licensed by the federal government and are given codes to identify themselves. "It's a very diverse group and they're a hoot to be with," member Mike McClanahan said, adding that the members, while mostly retired, have been involved in numerous industries. McClanahan, or W3RMM, has had his license since the mid-1950s and is still amazed by it. "It's the awe of being able to converse with people around the world without picking up the phone or spending a lot of money," he said. "It's a neat hobby. It's just fun, it really is."

GB2RS NEWS

Sunday 15th April 2012

The news headlines:

* Amateur band restrictions during the Olympic & Paralympics Games

* World Amateur Radio Day

* Volunteer for the Training and Education Committee

The RSGB attended a meeting on 5 April at Ofcom for a briefing on Ofcom's spectrum management proposals for the amateur services for the period 28 June to 23 September 2012. The proposals have yet to receive final drafting revision and approval within Ofcom, before publication on their website. The Society will augment this publicity to help ensure that members are aware of the limitations and the importance of restricting our operating during the Olympic period. Unfortunately, some of the current draft became more widely circulated than was intended during the process of internal consultation. It contains some information that may not be included in the final version. Members are asked to await the formal announcement from Ofcom. The Society will be preparing full coverage of the restrictions that cover 70cm and the two lower microwave bands. This will include the concessions, still being worked upon, for contests during this period.

On 18 April it is World Amateur Radio Day and also the 87th anniversary of the founding of the International Amateur Radio Union. This year's theme for the World Amateur Radio Day is Amateur Radio Satellites: Celebrating 50 Years in Space, in remembrance the launches of OSCAR 1 in December 1961 and OSCAR 2 in June 1962. There will be several special event stations from IARU Member Societies active on different dates during April including 6H6IARU, 3G73IARU and LZ1WARD. The Portuguese national society will have CR6IARU on the air until 19 April, QSL via CT1REP. The Polish national Society is running an award for World Amateur Radio Day, details can be found at http://suchacz.eu/articles.php?article_id=42.

RSGB Members will by now have seen the announcement about the new Training & Education Committee and the appointment of Steve Hartley, G0FUW, as Chair. Steve now needs to recruit a committee to be Chair of and is seeking volunteers. If you feel you have something to offer and are willing to spend some time on moving things forward, please contact Steve with a brief note about yourself, what you feel you can add to the mix and any specific aspect of the new committee you would be

particularly interested in. You can e-mail Steve via hartley_steve@hotmail.com. There are a number of projects on the 'to do' list so please do not be shy in putting your hand up. Without wishing to exclude anyone, Steve would be especially interested to see younger members, female members and those from ethnic groups coming forward to represent the Society as a whole.

Since the start of April, prior to a full allocation, Canadian amateurs have been invited by their regulator to apply for a special interim developmental licence for 5MHz under the VX9 callsign series. The channels and conditions are identical to the current USA 60m allocation. Following discussions, the regulator will publish a consultation document for radio amateurs in the official Canada Gazette. At the successful conclusion of this consultation period the current 60m allocation will be made generally available as part of the requisite Canadian amateur radio licences. In the meantime, the offer of an interim special developmental licence is meant to provide for early access to the 60m channels available. The first to receive one of these licences was Russ Hemphill, VE3FI, who was issued with the call VX9GHD.

Belgium's national society, UBA, reports on plans to allow Belgian Foundation licence holders to run 50W on the HF bands instead of the current 10W. Belgian Foundation holders are currently permitted 50W only on 144 and 430MHz. UBA says via its website that taking into account the so called 3dB rule, which would permit the use of a standard 100 watt transceiver. The full proposal in electronically translated English is online at tinyurl.com/Belgium50wFoundation. The RSGB AGM will take place on 21 April at the Swan Hotel, Bedford. Full details are in the April RadCom. The hotel would like some indication of the numbers who will be having lunch on the day of the AGM. Lunch will be soup and a sandwich and will cost £8. To register your intent, please visit www.rsgb.org/agmlunch and submit your name and callsign.

A new online Software Defined Radio located in Sweden and set for reception of the amateur radio 75, 60, 40 and 20m bands is now available via the internet. Located in the city of Mora and maintained by SM4JLX, the system is made up of three Soft66lite receivers and a bandpass filter. You need both Java and JavaScript enabled for the WebSDR to work properly. You can hear it online at tinyurl.com/sweden-sdr.

And now for the details of rallies and events for the coming week

Today, 15 April, the 50th NARSA Blackpool rally will take place the Norbreck Castle Exhibition Centre, Blackpool FY2 9AA. There will be trade stands, a Bring & Buy as well as special interest groups and a RSGB book stand. Doors open at 10.30am. More details can be obtained from Dave, M0OBW on 01270 761 608.

Also today, 15 April, the Cambridge Repeater Group Rally will be held at Foxton Village Hall, Hardman Road, Foxton. Doors open at 10am and

admission is £2. There will be trade stands and a Bring & Buy. Details from Lawrence, M0CLM on 01223 711 840.

The 28th Yeovil QRP Convention takes place on 22 April in Digby Hall, Hound Street, Sherborne, Dorset DT9 3AA, which adjoins the central shopping car park. Doors open 9.30am and there will trades stands, a Bring & Buy as well as a lecture programme. Contact Derek, M0WOB on 01935 414 452 for more details.

On 22 April the West London Radio & Electronics Show will take place at Kempton Park Racecourse, Staines Road East, Sunbury on Thames, Middlesex TW16 5AQ. There is free car parking and doors open at 10am. There will be trade stands, a Bring & Buy and special interest groups. Details from Paul, M0CJX on 08451 650 351.

The Radio Security Service Reunion will take place at Bletchley Park on 22 April. Starting at 11am, all are welcome to this event commemorating the 1,500+ radio amateurs who monitored German signals in WWII. There will be lectures and a vintage equipment exhibition. The National Radio Centre is also open for visitors until 4pm.

Now for the news of special events

Today, 15 April, is the final day of operation for many stations commemorating the centenary of the loss of RMS Titanic in 1912. A list of the stations we have heard about is on the RSGB website.

On 18 April the Polish National Society will put HF87WARD on the air for World Amateur Radio Day. QSL via eQSL.cc and WFF LogSerach. For those who want to send card direct, please send a SASE to Polish Club Flora & Fauna, Suchacz, Wielmozy 5b, 82-340 Tolkmicko, Poland.

International Marconi Day takes place on 21 April. Details of the many stations taking part can be found at www.gb4ind.com.

North Cork Radio Group will be activating Mizen Head Visitors Centre for Marconi weekend. The callsign, EI0IMD, will be on the air from 20 to 22 April.

Oxford and District Amateur Radio Society will be operating from the Museum of the History of Science in the centre of Oxford with the call sign GB4MHS on 21 April. The museum is the home of the Marconi Collection of his original experimental and production wireless equipment. Other events during the day include a talk by Brian Hawes, G2KQ, on Wireless at the time of the Titanic, sending Morse code and an auction of Marconi memorabilia. For details and times see www.mhs.ox.ac.uk/events. Chelmsford Amateur Radio Society will be at Sandford Mill for International Marconi Day on 21 April from 10am to 5pm.

Ripon and District ARS are organising the first Inns and Pubs on the Air weekend. Using GB2TH they will be operating from the base of the Tan Hill Inn on 21 and 22 April. The location is the highest licensed

premises in Great Britain at 1732 feet ASL. If you have a local licensed meeting place that has a history attached to it and would like to operate for the weekend then please email ipa@waylock.co.uk.

And now the DX news compiled from 425 DX News and other sources

Alan, VK4WR and Graeme, VK4FI will be active as E51BKM and E51GMH respectively from Aitutaki, South Cook Islands until 27 April. They will operate CW and SSB, mainly on 6 to 40m. QSL via their home callsigns, direct only.

Wim, ON4CIT and Paul, ON4BEC will be active as TO3X from St Barthelemy, IOTA reference NA-146, from 16 to 30 April. They will be using 6 to 40m, mainly SSB and RTTY with some CW. QSL via ON4CIT, direct or via the bureau, and Logbook of The World.

Members of the Macclesfield and District Radio Society will be active as GS4MWS/Pp from Colonsay, IOTA reference EU-008, from 15 to 21 April. QSL via M0PAI.

Now the contest news

The First 50MHz contest takes place from 0900 to 1200UTC today, 22 April. Using all modes, the exchange is signal report, serial number, locator and postcode.

On Tuesday 17 April the 1.3GHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

The data leg of the 80m club championships takes place on 19 April from 1900 to 2030UTC. The exchange is signal report and serial number.

The SSB leg of the EU Sprint Contest takes place on Saturday 21 April from 1600 to 2000UTC. Using the 3.5 to 14MHz bands, the exchange is both callsigns, serial number and name. And now the solar factual data for the period from Friday the 6th of April to Thursday the 12th, compiled by Neil Clarke, G0CAS on Friday the 13th of April.

Most days only saw two small visible sunspot groups and with it solar activity was mostly at very low levels. On the 6th, 7th and the 9th activity did just manage to increase to low levels, when a small C class solar flare took place on those days. Solar flux levels declined from 99 units on the 7th to 93 units later in the period. The average was 95 units. The 90 day solar flux average on the 12th was 114 units. That's three units down on last week. It's hard to believe that at the start of the year the level was at 145 units. X-ray flux levels showed little variation day to day and averaged B1.3 units. Geomagnetic activity was quiet every day except for a small disturbance on the 7th this was due to a sustained period of the Bz remaining southward. During the evening of the 12th when a coronal hole disturbance arrived. The Ap index was 14 units on the 7th and 12th and in single figures on the remaining days. The average was Ap 7 units. Solar wind data from

the ACE spacecraft saw solar wind speeds vary between 290 and 380 kilometres per second but during the 12th speeds increased to around 610 kilometres per second, heralding the start of coronal hole disturbance. Particle densities were low every day except for a brief increase to 31 particles per cubic centimetre during the 11th. Bz varied between minus and plus 3 nanoTeslas on the quiet days and between minus 8 and plus 7 nanoTeslas on the 7th. MUFs tended to be a shade down on predicted values on most days. The Lyrids meteor shower will be active from the 16th, peaking shortly after dawn on the 22nd. Normally, the second half of April sees the start of the summer sporadic-E season for the northern hemisphere. Therefore, occasional openings could take place during the coming week.

And finally, the solar forecast. This week, solar activity looks set for another quiet week with solar activity at very low to low levels. There is though a slight chance that activity could increase later in the week. Solar flux levels are expected to be slightly below the 100 mark but could rise towards next weekend. The effects of a coronal hole disturbance should have just passed and for most of the coming week geomagnetic activity is expected to be mostly quiet. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 19MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 23MHz. The optimum working frequency with a 90 per cent success rate will be about 18MHz. The best time to try this path will be between 1100 and 1600 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We are experimenting with a new format for Local News this week. As some clubs have several events per week, their contact details were being read out several times. This week we are listing clubs in alphabetical order, mentioning all their events together, and only reading the contact details once. Please tell the editorial team what you think of this idea by emailing us via GB2RS@rsgb.co.uk, putting the subject as GB2RS FEEDBACK.

Cheltenham ARA is having three short talks on Thursday 19 April. Details from Derek Thom, G3NKS, on 01242 241 099.

Coventry ARS is running the 2nd round of their 2m DF Trophy on Friday 20 April. Contact John, G8SEQ, on 07958 777 363.

Derby & DARS is having a talk on the development of the telegraph from the 1700s to 1900s plus a demonstration of vintage telegraph sounders by Roy, G4WPW on Tuesday 17 April. Email Richard Buckby, via radio@dadars.org.uk.

Friskney& East Lincolnshire Communications Club is holding a SSB club net on 144.165 USB, vertical polarization on Monday 16 April from 7pm, an M3+M6 club net on GB3FR from 7.30pm on Wednesday, and a club net on GB3FR from 8pm on Friday. For more information contact the FELCC information line on 07554 362 020.

Gloucester Amateur Radio and Electronics Society is having a newcomers DF hunt on Monday 16 April. Contact Anne, 2E1GKY, on 01452 548 478, daytime only please.

Lincoln Short-Wave Club is holding a committee meeting on Monday 16 April, taking part in the 1.3GHz UK AC on Tuesday, having a formal meeting and natter night on Wednesday, running a simplex club net on 145.375MHz and taking part in the 80m Club Championships Data leg on Thursday 19 April. They are in the shack on Saturday morning and also running a trip to RSGB AGM in Bedford on Saturday 21 April. Full details from Pam Rose, G4STO, on 01427 788 356.

Loughborough & DARC is holding an open forum on simple circuits on Tuesday 17 April. Contact Chris, G1ETZ, on 01509 504 319.

Melton Mowbray ARS is having a talk and demonstration by Leicestershire Fire Brigade on their search and rescue dog team on Friday 20 April. More information from Geoff, G3STG, on 01664 480 733.

Midland ARS is having a laptop computer evening and training classes on Wednesday 18 April. Norman, G8BHE, has the details on 07808 078 003.

Salop ARS is on the air on Thursday 19 April. Details are online at www.salop-ars.org.uk.

South Birmingham RS is holding a committee meeting Monday 16 April, has training classes with Dave Murphy, G8OWL on Thursday, is having a construction evening on Friday and visiting to Kempton Park Radio rally on Sunday 22 April. Details from Don, on 0121 458 1603.

South Kesteven Amateur Radio Society is having an informal evening on Wednesday 18 April. Contact Nigel, M0CVO, on 01476 402 550.

Telford & DARS is having a training session on the club 2m DF equipment on Wednesday 18 April. Mike, G3JKX, has the details on 01952 299 677.
Welland Valley ARS is holding its AGM on Monday 16 April and taking part in the 80m CC DATA contest on Thursday. Contact Peter D Rivers, G4XEX, on 01858 432 105.

Wythall Radio Club is having a talk on CW contesting without knowing much CW by Lee, G0MTN on Tuesday 17 April, and a club trip to Kempton Park Radio Rally on Sunday 22 April. Details from Chris, G0EYO, on 07710 412 819.

NEWS FOR THE NORTH OF ENGLAND We are experimenting with a new format for Local News this week. As some clubs have several events per week, their contact details were being read out several times. This week we are listing clubs in alphabetical order, mentioning all their events together, and only reading the contact details once. Please tell the editorial team what you think of this idea by emailing us via GB2RS@rsgb.co.uk, putting the subject as GB2RS FEEDBACK.

Leicester Repeater Group has announced that 6m repeater GB3UM was switched off on 4 April due to the failure of the aerial in the winds the previous day. As the aerial had broken off and was blowing around in the wind the repeater was switched off to prevent damage to the power amplifier and to avoid any possible problems with the receiving side of any of the other co-sited repeaters including GB3CF. Repairs will be carried out as soon as possible and GB3UM will be back on the air at the earliest opportunity.

Angel of the North ARC is on the air on Monday 16 April. Details from Nancy Bone, G7UUR, on 0191 477 0036.

Bolton Wireless Club is looking at Gerry's 13cm transverter with Bob, G8DTF on Monday 16 April. Email boltonwireless@gmail.com for more information.

Chester & DRS is having a talk by G4JMF & M3SHK on power supplies on Tuesday 17 April. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

Denby Dale RC is having part 2 of the introduction to CW by Richard, M0RBG on Wednesday 18 April. Details from Richard, M0RBG, on 07976 220 126.

Durham and District Amateur Radio Society is on the air on Wednesday 18 April. Contact David, M0BPM, on 0191 388 8113.

East Cleveland ARC is holding a technical forum on Friday 20 April. More information from Alistair, G4OLK, on 01642 475 671.

Halifax & DARS is having a presentation by Gerald, G3SDY on a practical approach to traps and trapped dipoles on Tuesday 17 April. Contact Martin, M0GQB, on 01422 341 317.

Hornsea ARC is having a talk on amateur TV by G0AZQ on Wednesday 18 April and is taking part in the 80m CC Data on Thursday. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Morecambe Bay ARS is holding a construction competition on Tuesday 17 April. Details from Sheila, on 07867 516 836.

Ripon and District ARS is preparing for Inns and Pubs on the Air on Thursday 19 April and running GB2TH for that event from Tan Hill on Saturday and Sunday. Details from Rob Hall, M0RBY, on 07876 085 631.

Sheffield ARC is having a talk on Flex Radio by David, M0EQD on Monday 16 April and is participating in the RSGB 80m Club Championships data leg on Thursday. Contact Peter Day, G3PHO, vy email to

sarc@g3pho.org.uk.

South Manchester R&CC is having a talk on the features of a modern transceiver by Ron, G3SVW on Thursday 19 April. Details from Ron, G3SVW, on 01619 693 999. Stockport RS is having a session on dipole construction and tuning with Tom, M0DCG on Tuesday 17 April. Contact Nigel Roscoe, on 07973 312 699.

Tynemouth Amateur Radio Club is holding Morse Tuition putting G0NWM on the air on Friday 20 April. More information from Bob, M6KLO, by email to mail@g0nwm.com.

Wirral & DARC is at the NARSA Blackpool Radio Rally on Sunday 15 April, having a drink & waffle at the Egremont Ferry Hotel, Wallasey on Wednesday and taking part in the North Wales DF on Sunday 22 April. Contact Simon, G6XHF, on 01516 013 269.

NEWS FOR NORTHERN IRELAND Mid-Ulster Amateur Radio Club will be running a Foundation license course on Friday 11 and Saturday 12 May. Information on fees and how to apply is on the club website, www.muarc.com, or from Bertie, 2I0RGD, via email to robert.gilliland@btopenworld.com. The deadline for applications and payments is Friday 27 April.

NEWS FOR SCOTLAND We are experimenting with a new format for Local News this week. As some clubs in some regions have several events per week, their contact details were being read out several times. This week we are listing clubs in alphabetical order, mentioning all their events together, and only reading the contact details once. Please tell the editorial team what you think of this idea by emailing us via GB2RS@rsgb.co.uk, putting the subject as GB2RS FEEDBACK.

Aberdeen ARS is having a guest speaker on Thursday 19 April. Details from Fred Gordon, MM0ODL, on 01975 651 365.

Cockenzie & Port Seton ARC is visiting Marine Protection Vessel JURA at Leith Docks on Friday 20 April. Contact Bob, GM4UYZ, on 01875 811 723.

Glenrothes & DRC is reviewing the club equipment inventory and holding Morse practice on Wednesday 18 April. More information from Laurie, MM0LJA via email to mm0ljasecgc@btinternet.com.

Livingston & DARS is holding Morse code practice on Tuesday 17 April. Contact Norman, GM1CNH, on 07740 946 192.

Wigtownshire ARC is having a talk on test equipment by Clive, GM4FZH on Thursday 19 April. Details from Ellis Gaston, GM0HPK, on 07979 692 580.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We are experimenting with a new format for Local News this week. As some clubs have several events per week, their contact details were being read out several times. This week we are listing clubs in alphabetical order, mentioning all their events together, and only reading the contact details once. Please tell the editorial team what you think of this idea by emailing us via

GB2RS@rsgb.co.uk, putting the subject as GB2RS FEEDBACK.

We start with advance notice that Chelmsford ARS will be holding an Advanced amateur radio exam for external candidates on Thursday 31 May. In order to sit the Advanced you must have first passed the Intermediate exam. Note there is no Advanced course, those taking the exam will need to have studied at home or have taken a Distance Learning course. It can be difficult to find an Advanced exam session in the South-East of England so the extra CARS exam session is likely to prove popular. Early booking is essential. Further details and booking information are available from the CARS training organiser Clive, G1EUC on 01245 224 577 or on the web at www.g0mwt.org.uk/training. Bedford and District Amateur Radio Club is holding a club net on GB3BF from 8.30pm on Monday 16 and Thursday 19 April, and chatting with the radio club in twin town Ortsverband Bamberg on 7.127MHz QRM on Tuesday 17 April. Contact Bob Leask, G3XNG, by email to g4ceo@talk21.com.

Braintree & DARS is holding a construction contest on Monday 16 April. Details from John, M5AJB, on 01787 460 947.

Bromley & DARS is having a talk on MPS Historical Comms by Richard, G8ITB on Tuesday 17 April. More information from Andy, G4WGZ, on 01689 878 089.

Burnham Beeches RC is having an antenna workshop with G0SKA and G8XCK on Monday 16 April. Contact Dave, G4XDU, on 01628 625 720.

Chelmsford ARS is holding a club net from 8.30 on Tuesday 17 April and operating GB100MWT from 10-5pm at Sandford Mill on Saturday 21 April. Details from Martyn, G1EFL, on 01245 469 008.

Chesham & DARS invites members to bring along their radio equipment for a Members Forum on Wednesday 18 April. Contact Terry, G0VFW, on 01442 831 491.

Colchester Radio Amateurs is having a talk on WSPR by Matt, 2E0XIS on Thursday 19 April. More information from Kevan, 2E0WMG, on 07766 543 784.

Cray Valley RS is holding its AGM on Thursday 19 April. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

EARS-GB is delighted to announce that its first club meeting is to take place at 7pm at Elstree Aerodrome on Thursday 19 April. All those interested in amateur radio are invited to attend. Experienced and friendly club organisers will be on hand to talk about the wonders of world wide communications. It will be a hands on evening and refreshments will be provided. For more information contact Chris, G0WTZ, by email to G0WTZ@ears-gb.com.

East Kent RS is at Kempton Park Rally on Sunday 22 April. Contact Karl Davies, M1DFM, on 01227 710 120.

Fort Purbrook ARC is having its first field-day style event over the weekend of 21 and 22 April. The club station M0GZN will be activated at its home QTH of Fort Purbrook, on the grass area next to main parade ground. The event is strictly for club members and invited guest operators only. The aim is to have a fun weekend and gather experience for a similar activation in May when the club will be supporting CASHOTA for the first of their award weekends. Further information will be published on the club website, www.fparc.org.uk and on QRZ.com.

Hastings E&RC s holding its spring auction of used & surplus equipment at Holy Redeemer Church Hall, Upper Church Road on Saturday 21 April. Doors open at 9am for the auction at 10.15. Details from Gordon, on 01424 431 909.

Havering & DARC is having an overview of RAYNET by Paul Harrison, G8MJH and Phil Williams, G6AQP on Wednesday 18 April. Contact John, M0UKD, on 07890 222 111.

Horndean & DARC is having a talk by Laurence Barker entitled `If in doubt measure' on Thursday 19 April. More information from Stuart, G0FYX, on 02392 472 846.

Loughton & Epping Forest ARS is holding its AGM on Friday 20 April. Contact Marc Litchman, G0TOC, on 02085 021 645.

Mid-Sussex ARS is having a talk on the Sussex Auxiliary Unit by Stewart Angell on Friday 20 April. Contact Rob, 2E0RJA, on 01444 232 129.

Norfolk ARC is running a club net from 7.30pm on GB3NB on Monday 16 April, having a demo of software defined radio by Chris, G0DWV on Wednesday, taking part in the RSGB 80m Club Championship data leg on Thursday, and participating in the 25th International Marconi Day on Saturday with Steve Nichols, G0KYA. Details from Chris Danby, G0DWV, on 01603 898 678. Reading & DARC commences its Intermediate course on Tuesday 17 April, which will continue until 12 June. Contact Pete, G8FRC, on 01189 695 697.

Shefford & DARS is holding its spring junk sale on Thursday 19 April. Details from John Burnett, M6JBU, on 07860 804 793.

Surrey Radio Contact Club is having a fix-it, move-it-on, advice clinic and informal chat on Monday 16 April. More information from John, G3MCX, on 02086 883 322.

Swindon & DARC is having a talk on the Chairman's Challenge by James, M1DST on Thursday 19 April. Contact Den, M0ACM, on 07810 317 750.

Trowbridge & DARC is having a natter night and committee meeting on Wednesday 18 April. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends only please.

Verulam ARC is having a talk by G3SEW on the open source electronics prototyping platform Arduino on Tuesday 17 April. Contact Ralph, G1BSZ, on 01923 265 572.

West Kent ARS is holding its AGM on Monday 16 April. More information from Keith, G4JED, by email to westkentars@googlemail.com.

Wey Valley ARG is having a radio photo quiz by Adrian Boyd, G4LRP on Friday 20 April. Details are online at www.weyvalleyarg.org.uk.

NEWS FOR THE SOUTH WEST We are experimenting with a new format for Local News this week. As some clubs in some regions have several events per week, their contact details were being read out several times. This week we are listing clubs in alphabetical order, mentioning all their events together, and only reading the contact details once. Please tell the editorial team what you think of this idea by emailing us via GB2RS@rsgb.co.uk, putting the subject as GB2RS FEEDBACK.

Appledore & DARC is having a talk on talkthroughs, repeaters and filters by Steve, G6SQX on Monday 16 April. Contact Brian Jewell, M0BRB, on 01237 473 251.

South Bristol ARC is holding a Family Quiz Night on Thursday 19 April. Details from Andrew Jenner, G7KNA, on 07838 695 471.

Thornbury & South Gloucestershire ARC is having a video night on Wednesday 18 April. More information from Tony, G0WMB, on 01454 417 048.

Torbay ARS is having an operating night on Friday 20 April. Details from Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES Carmarthan ARS is holding an open night on Tuesday 17 April. Contact Lloyd, 2W0LLT, on 01239 711 297, for more information.

558. World Amateur Radio Day -- April 18

Newsgroup: rec.radio.amateur.misc
Date: 2012-04-16 13:50:54 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20120416123825.BFAF6203AC@bmail.arrl.org>
Source record: 3225
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

Here is a note from Allen Pits, W1AGP, Meida and PR Manager for the ARRL.

Newington, CT, USA. -- There are over 700,000 “ham radio” licensees in the USA and about 2 ½ million worldwide. This international community of wireless communications devotees will celebrate World Amateur Radio Day on April 18th as they recall the advances their Amateur Radio Service has made for modern man. The International Amateur Radio Union (IARU) and its member societies representing more than 160 countries around the world celebrate World Amateur Radio Day each year on April 18, the anniversary of the founding of the IARU. This is the 87th anniversary of the foundation.

Their theme for 2012 is Amateur Radio Satellites: Celebrating 50 Years in Space in remembrance of the launch of the first Amateur Radio satellites OSCAR 1 on December 12, 1961 and the launch of OSCAR 2 on June 2, 1962. Since then, radio amateurs have had several more satellites as they find new ways to communicate world wide without relying on commercial systems. Their ranks have included people like "Steve" Wozniak and John Sculley of Apple, Dr. Karl William Edmark who invented the heart defibrillator, Scott Durchslag, the Chief Operating Officer at Skype, and Dr. John Grunsfeld of NASA and the Hubble Space Telescope.

Today’s hams continue to explore new frontiers. Radio amateurs are finding ways to use frequencies at the fringes of the radio spectrum while developing marriages of radio and the internet and experimenting with new forms of digital communications. Ham radio operators are “amateurs” only because they are unpaid volunteers, but their skills and contributions to the world are of the highest order.

For more information, please see www.IARU.org

#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
09 - 15 April 2012

Solar activity was at very low to low levels. Low levels were
observed on 09 April and 15 April. Region 1450 (N16, L=324,
class/area Esi/180 on 06 April) produced a C2 flare at 09/0122 UTC
while Region 1451 (N17, L=306, class/area Cro/020 on 30 March)
produced a C3 flare at 09/1244 UTC. Associated with the C3 flare was
a Type II Radio Sweep (478 km/s) and a CME first observed in
SOHO/LASCO C2 imagery at 09/1325 UTC off the west limb with an
estimated plane of sky speed of 767 km/s. Solar activity was at very
low levels until 15 April when two low level C-class flares were
observed just around the north east limb at 15/0140 UTC and 15/0234
UTC respectively. A faint partial halo CME was also observed
beginning at 15/1000 UTC in SOHO/LASCO C2 imagery with the majority
of the ejecta directed off the northeast limb. The CME was
associated with a B9/Sf flare that occurred at 15/0908 UTC from
Region 1459 (S16, L=96, class/area Dai/80 on 15 April). None of the
CMEs are expected to be geoeffective.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels on 12 April. Moderate levels were reached on 09, 10
&amp;amp; 11 April and again on 13 April. High levels were reached on 14
&amp;amp; 15 April.

Geomagnetic field activity was at quiet to minor storm conditions
with a period of major storming observed at high latitudes. The
summary period started with mostly quiet conditions until 12 April.
At approximately 12/0300 UTC, solar wind speed began to show a slow
rise while the total field (Bt) component of the interplanetary
magnetic field (IMF) increased to around 10 nT as a coronal hole
high speed stream was moving into a geoeffective position. Solar
wind speeds gradually increased to approximately 655 km/s by 13/0848
UTC. The geomagnetic field responded with quiet to active periods on
```

12 April and active to minor storm periods with an isolated major storm period through mid-day 13 April. By noon on 13 April, solar wind speeds were elevated still around 616 km/s, however the total field had decreased to around 3 nT. Solar wind speed slowly decreased to around 430 km/s by the end of the period. The geomagnetic field was at mostly quiet levels with isolated unsettled to active periods from late on 13 April through the end of the summary period.

Forecast of Solar and Geomagnetic Activity
16 April - 12 May 2012

Solar activity is expected to be very low to low levels with the slight chance for M-class flares during the period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to begin the period at high levels, and remain so through 18 April. Conditions are forecast to decrease to normal to moderate levels through 10 May, before increasing to high levels again on 11 and 12 May.

Geomagnetic field activity is expected to begin the period at mostly quiet levels and remain so through 19 April. Quiet to unsettled conditions are forecast due to a solar sector boundary crossing (SSBC) anticipated on 20 April, before returning to mostly quiet conditions on 21 and 22 April. Unsettled to active levels are forecast on 23 and 24 April from an expected recurrent coronal hole (CH). Mostly quiet levels are expected to return 25 April through 01 May. Should see unsettled to active conditions on 02, 03, & 04 May as the ambient background solar winds speeds should increase along with more possible southward Bz. Quiet conditions should return 5-8 May, before the return of high speed solar wind from a large negative polarity CH on 9, 10, 11 May, which is forecast to produce unsettled to active conditions and a possible isolated minor storm in the night sector. 12 May should see a return to mostly quiet levels to round out the period.

AMSAT NEWS SERVICE

ANS-106

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

Volunteers are needed to help at the AMSAT booth at Dayton. Gould, WA4SXM, is looking for volunteers to help man the AMSAT booth during the 2012 Hamvention. People are needed all 3 days for 2 hour shifts. Please send the days and times you are available to help as well as how many shifts you are willing to work via e-mail to wa4sxm at amsat.org. Monitor the Dayton News Page for the latest AMSAT at Dayton news and developments.

In this edition:

* New Features at the AMSAT Booth at Dayton 2012

* Silent Key: Dee Interdonato, NB2F

* April 19 California Flabob Airport ARISS Contact

* UT1FG/MM and K8YSE Enjoy Eyeball QSO Aboard Ship

* NASA-TV Plans Coverage of April 17 Washington DC Shuttle Fly Over

* Mexico Satellite Activation for IARU Celebrating 50 Years in Space

* Satellite Beacon Mission Suggested for Asteroid Apophis

* Russia to Build Nuclear Space Engine by 2017

* India's Atharva Satellite Ground-Station Inauguration

* CubeSat TURKSAT-3USAT in the Press

* Cuba Satellite Group (GROS) Hosts Country-wide Events

* Satellite Shorts From All Over

To All RADIO AMATEURS

BID: $ANS-106.01

New Features at the AMSAT Booth at Dayton 2012

The 2012 Dayton Hamvention, sponsored by the Dayton Amateur Radio Association will be held this year on May 18-20, 2012. AMSAT will occupy the same booths (444-449) in Ball Arena, right across from the ARRL area and just inside the door from the Satellite Demonstration area. Plan to visit all of the AMSAT activities!

The AMSAT booth will feature AMSAT Engineering, new publications, new apparel, amateur satellite hardware and software. The AMSAT Forum will be on Saturday May 19.

All of the latest AMSAT at Dayton information is posted on-line.

Engineering

We will have an engineering model of the 1U Cubesat Fox, the operational ARISSat prototype, Fox telemetry display and the Penn State student experiment for Fox.

New Publications

2012 Getting Started with Amateur Satellites2012 Laminated Frequency Card

New Apparel

White golf shirt with AMSAT Fox logoWhite baseball cap with AMSAT Fox logoTee shirt with Fox satellite design and Fox logo

Hardware

ELK Antennas and optional coversLVB Tracker boxes

Software

Latest version of SatPC32

If you renew your AMSAT membership at the AMSAT booth you will receive an AMSAT insulated stainless steel coffee mug.

AMSAT Hotel

The cutoff date to book a room with the AMSAT group is April 20. The hotel is the Country Inn and the cost of the room (with 2 Queen Beds) is $99. If you are interested in staying with the AMSAT at Dayton, please call Martha at the AMSAT Office at 301-589-6062.

AMSAT/TAPR Friday Night Banquet

AMSAT/TAPR Banquet on Friday night, May 18 is one of the main AMSAT activities during the 2012 Hamvention at Dayton.

AMSAT is pleased to announce that Howard Long, G6LVB will be the featured speaker for the evening event. Howard will be talking about his FUNcube Dongle, the 64 - 1700 MHz Software Defined Receiver. This innovative USB device is the size of a thumbdrive and has an SMA antenna socket. Multiple SDR control and display software programs can be used with the FUNcube Dongle.

Banquet tickets will not be sold at the AMSAT booth during the Hamvention so reservations must be made through the AMSAT Store. Tickets are $30 apiece.

ARISS Mentor Introduction at Dayton 2012

AMSAT and ARRL are teaming up during the 2012 Hamvention to recruit new ARISS (Amateur Radio on the International Space Station) Technical Mentors and Ground Station Operators.

Friday and Saturday (May 18 & 19) at 4pm in the ARRL stage area AMSAT Vice President for Educational Relations Mark Hammond N8MH will explain the need for additional ARISS Technical Mentors and Ground Station Operators and the requirements and responsibilities needed to help provide a reliable conversation between astronauts and selected schools or groups.

Technical Mentors serve as an advising and coordinating liaison between NASA, the school or group making the ARISS contact, and the Ground Station Operators, who set up the satellite station at the contact location. We encourage anyone interested in helping make future school contacts with the ISS successful to please attend.

AMSAT to Facilitate Student Satellite Contacts

AMSAT is encouraging all students attending the 2012 Dayton Hamvention to come by the Satellite Demonstration Area just outside of the Ball Area entrance and make a contact using the amateur satellites. There will be AMSAT volunteers there to explain how to make the contacts and during actual satellite passes will try to get as many students as possible to complete actual contacts. There are lists of satellite pass times in the satellite demonstration area and at the AMSAT booth.

[ANS thanks Gould Smith, WA4SXM for the above information]

Silent Key: Dee Interdonato, NB2F

AMSAT has received the sad news of the passing of Dee Interdonato, NB2F on April 8, 2012. Dee was one of the editors of the AMSAT News Service and an AMSAT New Jersey Area Coordinator. He was the main point of contact for many amateurs as he covered most of the New Jersey hamfests on behalf of AMSAT. Dee was one of the mainstay volunteers for AMSAT at the Dayton Hamvention for years. He also gave satellite presentations for the clubs in New Jersey. Dee helped where ever he could, often behind the scenes. He worked on QSL duties for SAREX, ARISS, and ARISSat-1 missions so many of you have likely received a card from him.

Dee was a well known and respected mentor for amateur satellite opertors, helping them understand the technical details and make successful radio contacts via satellites.

Dee's other amateur radio activities in Northern New Jersey included the Bergen Amateur Radio Association, Bergen County CERT, AMSAT, and he was the treasurer of the Bergen County FM Association. Dee, and his wife Ginny, N2EYN always participated in the Dayton Hamvention and AMSAT Symposiums.

Dee was the principal trumpet player for the Rutherford Community Band and a member of the Waldwick and Westwood Community Bands. He was also an avid hunter and a member of the Association of New Jersey Rifle and Pistol Clubs.

Before retiring he was the supervisor of the Radio Shop of the Port Authority of NY/NJ.

The funeral was held on Friday, April 13 in his hometown of Lodi, New Jersey. In lieu of flowers memorial contributions may be made to the Vietnam Veterans of America, 8719 Colesville Rd., Suite 100, Silver Spring, Maryland 20910 or AMSAT, 850 Sligo Road, Suite 600, Silver Spring, MD 20910.

Read the obituary forDee Interdonato, NB2F obituary here.

[ANS thanks the AMSAT Office for the above information]

April 19 California Flabob Airport ARISS Contact

ARISS technical support volunteer, Clint Bradford, K6LCS said this week that "It's a Go!" for students at the The Tom Wathen Center at the historic Flabob Airport in Jurupa Valley (Riverside County), California, for an amateur radio call from the International Space Station on Thursday morning, April 19, 2012 at 10:03AM PDT (UTC-7). The link will be via telebridge contact via IK1SLD providing the radio link to space and then connecting via phone lines with the students.

The Tom Wathen Center was chosen for this Amateur Radio on the International Space Station (ARISS) contact during an open application process in the Fall of 2011. The 10-minute live question-and-answer session will take place in Flabob□s Hanger 16A conference center, and is free to the public.

To prepare for the ARISS contact, Flabob students are studying the history and mission of space station and mission control, rocket fabrication, astronaut selection and training, and mission control and station operations along with radio technology and communication topics.

An amateur radio station is operational onboard the International Space Station. Most astronauts have amateur radio licenses and operate the onboard station to contact radio amateur ground stations in their free time. Per an agreement with multiple space agencies involved with building the ISS, ARISS prepares and implements educational contacts for students - more than 120 in 2011 alone. Amateur radio operators on the ground volunteer their radio station, expertise and time to make the conversations between the students and astronauts happen. The ARISS international working group is supported by the national radio amateur societies AMSAT-NA and the American Radio Relay League (ARRL).

This ARISS contact is one in a series with educational organizations in the U.S. and abroad to improve teaching and learning in science, technology, engineering and mathematics. It is an integral component of Teaching From Space, a NASA Education office. The office promotes learning opportunities and builds partnerships with the education community using the unique environment of human spaceflight.

Clint published all of the details on the Flabob Project Web site.

The City of Jurupa Valley will declare the week of April 15-21 'Space Week' at their April 19, 2012 regular city council meeting acknowledging the efforts of the students at The Tom Wathen Center's Flabob Airport Preparatory Academy, who have spent months learning about space exploration while preparing for their amateur radio contact with the

ISS.

[ANS thanks Clint Bradford, K6LCS for the above information]

UT1FG/MM and K8YSE Enjoy Eyeball QSO Aboard Ship

John Papay, K8YSE had a unique experience on Easter Sunday, April 8 when he got the opportunity for an eyeball QSO with Captain Yuri Bodrov, UT1FG/MM aboard the MV Barnacle traveling from Thunder Bay, Ontario, Canada on Lake Superior en route to Puerto Rico via the Great Lakes and St. Lawrence Seaway.

Yuri has been activating wet grids as UT1FG/MM operating this year from the MV Barnacle as he sails the seas between Europe, South America, the Caribbean, and North America. Last year Yuri captained the MV Mottler on a similar sea voyage when many first met him operating on the air via the amateur radio satellites. He is the Captain of the state-of-the-art seagoing vessel with 10,000 horsepower plant.

John had an idea that he could drive from his QTH to watch as the MV Barnacle passed through the Welland Canal connecting Lake Erie and Lake Ontario. The ship would have to pass through eight locks which might put John and Yuri within shouting distance.

On Saturday night John and Yuri chatted on 144.200 sideband as the MV Barnacle sailed from the Detroit River and across Lake Erie en route toward Lake Ontario. Yuri estimated his arrival at the Welland Canal would be around 0800. John hit the road from his QTH at about 0315 Sunday morning,

passed customs to enter Canada and then drove to the Lake Erie entrance to the Canal.

Sunday morning John met up with Kevin, VE3RCN/VA3OR in Port Colborne, Ontario. Radio contact was established with Yuri on 146.520 MHz. The ship came in sight along the Lake Erie shore. John and Kevin were within waving distance. As the MV Barnacle entered Lock 8 the shore party was close enough to talk with Yuri aboard the ship.

As the ship cleared the lock John and Kevin lost contact for a short time. They were able to catch up with Yuri at the next lock. As the new Canal Pilot was boarding ship John got an invitation to come aboard. John boarded as the ship lowered to the dock level. He told what happened next, "A minute later I was on the bridge with Captain Yuri UT1FG. Finally I was able to meet a guy that I've been working on the satellites in hundreds of water grids since April 2009!"

A tour of the ship included a visit to Yuri's cabin, one level below the bridge. His quarters are quite nice and private. This is where he operates with his IC706, manually tuning the radio and doing a great job at that! The power supply from HP1CQ (see ANS-078) sat on the table in the corner and a computer running Orbitron is on the other side.

Yuri now has an ELK antenna installed (thanks to the efforts of Rick, WA4NVM). It is mounted on a manually rotatable mast that goes up from the bridge, starboard side, directly above his cabin. The ELK is tilted up at 15 degrees and was just installed on the way back from Thunder Bay. A CJU antenna is mounted on the crossboom next to the ELK. A vertical for 2 meters is on a separate mast above those antennas. Until this season Yuri only used the 2 meter vertical for transmit and re-ceive. The CJU improved things greatly and the ELK takes it to a new

level. Yuri plans to install SatPC32 when he has more free time on the open sea; passing through the St. Lawrence Seaway keeps him and his crew very busy.

John said he sailed with Yuri until Lock 2 where it was time to get back ashore. Kevin, VE3RCN/VA3OR and his XYL Donna, VE3WIZ were waiting and gave John a ride back to his car, 30 miles away in Port Colborne.

John wrote, "I want to thank Kevin VA3OR/VE3RCN and his wife Donna, VE3WIZ, for spending their Easter Sunday hosting my visit to the Canal. I'm sure they had better things to do but they decided to take me all around and make my visit a memorable one. I hope they enjoyed the day as much as I did." And a big thanks to Master Yuri Bodrov and his crew for their hospitality. It was an experience that very few will ever have."

Yuri plans to work the water grids on the way south to San Juan, Puerto Rico where he is due on April 20. The next port-of-call for Yuri and the crew of MV Barnacle is yet to be determined. Yuri will be the Captain until the end of May, 2012. If you work Yuri on the air QSL via his manager UX0FY (on qrz.com).

[ANS thanks John Papay, K8YSE for the above information]

NASA-TV Plans Coverage of April 17 Washington DC Shuttle Fly Over

NASA's 747 Shuttle Carrier Aircraft (SCA) with space shuttle Discovery mounted atop will fly approximately 1,500 feet above various parts of the Washington, D.C. metropolitan area on Tuesday, April 17.

The flight, in cooperation with the Federal Aviation Administration, is scheduled to occur between 10 and 11 a.m. EDT (UTC-4). NASA Television and the agency's web site will provide live coverage.

The exact route and timing of the flight depend on weather and operational constraints. However, the aircraft is expected to fly near a variety of landmarks in the metropolitan area, including the National Mall, Reagan National Airport, National Harbor and the Smithsonian's Udvar-Hazy Center. When the flyover is complete, the SCA will land at Dulles International Airport.

Discovery completed 39 missions, spent 365 days in space, orbited the Earth 5,830 times, and traveled 148,221,675 miles. NASA will transfer Discovery to the National Air and Space Museum to begin its new mission to commemorate past achievements in space and to educate and inspire future generations of explorers.

For more information about NASA's transfer of space shuttles to museums can be found here. This NASA YouTube video shows the flight of the Shuttle Carrier Aircraft.

Following the event NASA Goddard Space Flight Center in Maryland will publish a photo slideshow on the Goddard homepage and on Goddard's Flickr page.

Mexico Satellite Activation for IARU Celebrating 50 Years in Space

Members of the Grupo DXXE in Mexico will use the special call 6H6IARU on 160-6 meter and via satellite from different grids between April 13 to April 18. This station marks the founding of the International Amateur Radio Union (IARU) 87 years ago and the "World Amateur Radio Day" on April 18.

This year's World Amateur Radio Day has the motto "Celebrating 50 Years in Space" with the first launches of amateur radio satellites OSCAR 1 on December 12, 1961, and OSCAR 2 on June 2, 1962.

QSOs with 6H6IARU count for the IARU Region 2 award, several FMRE awards and the DXXE award. QSL via N7RO, LoTW. More information is posted on the DXXE web page.

Satellite Beacon Mission Suggested for Asteroid Apophis

This week UniverseToday.com carried an article about a Russian mission proposal to send a satellite with a radio beacon to asteroid 99942 Apophis to better determine its trajectory and find out how big of a threat it might be to Earth in passes the asteroid will make in 2036 and 2068.

Apophis is approximately 270 meters (885 ft) in diameter, the size of two-and-a-half football fields.

Apophis is expected to make a record-setting ☐ but harmless ☐ close approach to Earth on Friday, April 13, 2029 when it comes no closer than 29,450 km from Earth (18,300 miles). The Russian Academy of Sciences said, "From the technical point of view, the mission could be started for implementation around 2015".

[ANS thanks UniverseToday.com for the above information]

Russia to Build Nuclear Space Engine by 2017

In contrast to last week's ANS-099 news item about Switzerland's EPFL University's MicroThrust ion motor which will be capable of reaching the Moon using just a tenth of a liter of fuel, a news report published on Space-Travel.com this week says a Russian Megawatt-class

nuclear propulsion system for long-range manned spacecraft is under development.

Russian space officials believe that nuclear engines for interplanetary spaceships are a very promising area, as solar power is too weak to be used as a power source at distances beyond Earth's orbit.

The megawatt power system may be the power plant producing the high energy required for an ion thrust system capable of powering manned spacecraft to the moon, Mars, and interplanetary destinations.

NASA started a program to develop a nuclear propulsion system in 2003, and spent several hundred million dollars on the project before cutting funding.

India's Atharva Satellite Ground-Station Inauguration

The Atharva College of Engineering, University of Mumbai in India has inaugurated the Atharva Satellite Ground Station. Currently, they are associated with the Indian Institute of Technology, Bombay for the communication, telemetry and data acquisition of their Pratham student satellite project.

The primary aim of the Atharva Satellite Ground-Station team at the is to establish a center for the development of wireless technology and satellite communication in Mumbai. During the journey of the last three and half years, we have grown from fundamental research phase to the current phase where we have achieved full operational status.

During the formal inauguration on March 15, 2012 VU2MUE used VO-52 to communicate over a distance of 850 Miles with VU2YEP located in Delhi, the

Indian Capital.

The Atharva Satellite Ground-Station Team has an objective of providing communication and telemetry services for the various satellite projects undertaken by the student satellite teams around the globe.

The student blog and photos are posted on-line. The APRS locator map is available here.

[ANS thanks the Atharva Satellite Ground-Station Team for the above information]

CubeSat TURKSAT-3USAT in the Press

The AMSAT-UK web has a story about the Ankara based Amateur Satellite Technology Association (TAMSAT) which has received more press coverage for their new CubeSat TURKSAT-3USAT. The 3USAT is expected to launch near the end of 2012.

IARU coordinated frequencies are:

Transponder uplink: 145.940-145.990 MHzTransponder downlink: 435.200-435.250 MHzCW beacon: 437.250 MHz

This cubesat is a three unit CubeSat developed for SSB/CW communications in low earth orbit. The VHF/UHF transponder and all other sub-systems, except the stabilization, are doubled for redundancy. Where possible, both COTS systems and in-house development is employed.

The energy is provided using lithium polymer batteries together with super capacitors. Satellite stabilization is accomplished using passive magnetic attitude control system with hysteresis rods. The satellite is to include de-orbiting system which will make it re-enter the atmosphere following completion of its life time.

Read the newspaper story in Google English on-line.

Cuba Satellite Group (GROS) Hosts Country-wide Events

Raydel, CM2ESP reported April 13-14 was a busy weekend for Cuba's recently founded "Grupo de Radioaficionados para Operaciones Satelitales" (GROS). The events were coordinated in commemoration of the first human manned spaceflight by Yuri Gagarin the April 12, 1961, the inaugural launch of NASA's Space Shuttle on the same day of 1981 and the celebration of the 87th Anniversary of the founding of the International Amateur Radio Union, IARU, on April 18, 1925. This year the IARU theme for "World Amateur Radio Day" on April 18 is "Celebrating 50 Years in Space" with the first launches of amateur radio satellites OSCAR 1 on December 12, 1961, and OSCAR 2 on June 2, 1962.

On Friday night Hector CO6CBF hosted a talk about amateur radio satellite on Cuba's Pico San Juan 2m repeater. He gave a presentation about GROS, a brief history of amateur radio satellites, and a talk about current

operational satellites. Additional topics included station requirements and equipment and operating practices. Arnaldo Coro, CO2KK, Cuba's second ham in perform a satellite QSO and Cuba's first in conduct a EME QSO was a special guest.

On Saturday morning Pavel CO7WT gave a talk at Camagüey City Amateur Radio Club. His presentation also included information about GROS, satellite status, equipment and operating techniques, orbital mechanics, and a discussed how to set up a APRS/Beacon Packet station using the ISS digipeater.

[ANS thanks Raidel Abreu Espinet, CM2ESP for the above information]

Satellite Shorts From All Over

AMSAT's Fox-1 Paypal donation widget went over the $6000 mark on Saturday, April 14! Thank you for your generous support.
The NASA SkyWatch 2.0 Java applet shows when visible ISS passes worldwide are happening. The applet runs in your browser window.

1. http://spaceflight.nasa.gov/realdata/sightings/

2. Click Start Applet (some systems may require Java upgrade)

3. When Skywatch starts click on your continent.

4. Then click on nearby city. Use the buttons to select how you want your data reported.
The SA AMSAT Space Symposium will be held at the University of KwaZulu-Natal on Saturday 12 May. The theme of the symposium is 50 years of amateur satellites celebrating the launch of OSCAR 1 fifty years ago. The full program and registration details are on-line.
It is time to submit nominations for the upcoming open seats on the AMSAT-NA Board of Directors. Three directors and two alternate directors have terms expiring this year. The director seats open for election are held by Tom Clark, K3IO; Lou McFadin, W5DID; and Gould Smith, WA4SXM. The alternate director seats open for election are held by Mark Hammond, N8MH and Patrick Stoddard, WD9EWK. The AMSAT front page news has the instructions to submit your nominations.
The Ararat Shrine Hambash in Kansas City, Missouri will be on Saturday, April 21, 2012. Appearing again at this year's Hambash will be Hams in Space, the team of Randy Schulze - KDØHKD, Eddy Paul - KYØF, and Jeremy Widner, KØPDX, formerly known as the KC Amateur Radio Satellite Team. They've dusted off and revised their informative and entertaining presentation on how to work the FM Amateur Radio Satellites for the 2012 Season. The Hambash will be held at 5100 Ararat Drive, Kansas City, Missouri 64129.
As the ISS orbited 240 miles (386 km) above Volgograd, the Expedition 30 crew captured a photo of Moscow at night. The night lights of Ireland and England are visible in this photo from the ISS. While we're looking out of the window on the ISS ... Soyuz and Progress spacecraft are still lit by the setting sun as the International Space Station flies over Europe at night.

NASA Goddard Space Flight Center posted a movie captured by the STEREO spacecraft showing coronal mass ejections slamming into Mercury. In this movie the Sun is just to the left of the field of view and the Earth would be millions of miles to the right. Mercury is the bright object moving from right to left against the background of stars near the center of the images.
Enjoy a photo tour of the cockpit of the space shuttle Endeavour on the SpaceFlightNow web.
Keep Spaceport Gagarin in mind for future vacation plans. Russia is building the facility as a part of entertainment resort Vazuza and Yauza Park, being built in Smolensk region, 200 kilometers from Moscow. It will host museums, entertainment facilities, exhibitions and tours for Russian and foreign guests, especially children.
Southgate ARC site has a news item about a 2007 Japan-Broadcasting Corporation TV report about amateur radio Moonbounce (EME) 8N1EME Big Dish operation.
Visit this AMSAT-UK web link to download the free April, 2012 issue of SatMagazine. The student built Hiscock Radiation Belt Explorer (HRBE) amateur radio CubeSat formerly known as Explorer-1 [PRIME] is featured on page 10.
Eric Knaps, ON4HF posted NOAA APT satellite pictures that he received with his FunCube dongle on-line.

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that please keep in mind the memory of ANS

Editor Dee Interdonato, NB2F who became a Silent Key this week. This was Dee's week for the bulletins. Take a moment and wish him 73 and offer thanks for all Dee did for AMSAT.

73,

Radio Club Amateurs Take to the Airwaves:

Posted: 15 Apr 2012 05:21 PM PDT
http://www.eham.net/articles/28109

VIDEO might have killed the radio star, but radio amateurs are alive and well in Bendigo.
Yesterday was a national amateur radio field day. Across Australia clubs promoted the hobby under the banner 'tune into the world'. Down at the Bendigo Showgrounds, the Midland Amateur Radio Club set up shop, showing people the internet still had an old-school competitor when it came to worldwide communication. Club member Graeme Knight said radio was still the most efficient form of communication despite some of its old-style technology. "Radio is a direct form of communication, you don't have to go through complex networks," he said. "So all you need is a radio, a battery and an antenna. That lends itself well to emergency communications. If the internet is down or phone towers are down, we can still use radio. "In times of disaster amateur radio clubs come along and provide communication while infrastructure is rebuilt."

The Sun Has Got Its Spots On - Will This Bring A Bright Outlook?

Posted: 15 Apr 2012 05:17 PM PDT
http://www.eham.net/articles/28107

COULD be in for some improved winter weather over the coming years, according to Dr Ryan Milligan. He's a 36-year-old Queen's University astrophysicist who was formerly based at Nasa - and who, in his spare time, does road haulage work, just to keep his hand in. He's a native of Ardglass, Co Down and a member of a family that has been involved in the fishing business for generations. With a group of other astrophysicists around the globe, he is trying to penetrate the many mysteries of the sun.

He's something of an inspirational figure, too - particularly for late academic developers. When he did his A-levels he gained two Bs in pure and applied maths and an E in economics - not exactly the sort of grades expected of a future Nasa astrophysicist. After that result, Milligan did what many students before and since have done - he took some time out. He travelled the world for a while, drummed in rock bands, studied sound engineering, worked in fish factories and coal yards, and also made a living driving lorries after getting his HGV licence. Then, when he was 23, he decided to enrol at Queen's to pursue a degree in astrophysics, and later with his first-class honours Masters degree was head-hunted by Nasa. His particular focus is on solar flares, massive eruptions or explosions in the sun's atmosphere, which are becoming more frequent these days due to the increase in the number of sunspots.

Looking to share a ride from Rahway, NJ to Dayton

Posted: 16 Apr 2012 04:26 AM PDT
http://forums.qrz.com/showthread.php?342502-Looking-to-share-a-ride-from-Rahway-NJ-to-Dayton&goto=newpost

I live in Rahway, NJ (Near exit 12 on the Turnpike and 5 minutes from exit 135 on the Garden State Parkway.

I am looking for someone who is driving the the Hamvention this year, I might be able to help you out with a free place to stay.

I will share Gas and Tolls for going to and returning from Dayton.

If you can help please email me at: WS2L@QRZ.COM

'Ham' Takes Over City Park:

Posted: 16 Apr 2012 05:03 PM PDT
http://www.eham.net/articles/28112

Wires were strung from tree to tree and from pole to pole at Brewton City Park Saturday when the Brewton Amateur Radio Union (WB4ARU) set up for broadcasting and demonstrations.
Several members of the ham radio organization gathered in the park to broadcast and advertise the fact that they were having a radio party in the park. WB4ARU was the call signal of Jimmy Godwin, who was the main force behind the forming of the original club and who built the first repeater. Godwin died just before the repeater became operational.

==> FCC SEEKS PUBLIC COMMENTS ON EMERGENCY COMMUNICATIONS BY AMATEUR
RADIO AND IMPEDIMENTS TO AMATEUR RADIO COMMUNICATIONS

In response to the Congressional directive to prepare a study to assess
Amateur Radio's role in emergency and disaster communications and the
impact of private land use regulations on the amateur community's
ability to provide such communications, the FCC issued DA 12-523
soliciting comments from the public. The period for public comment runs
until May 17, 2012.

"As part of the study contained in Public Law No. 112-96, the
Commission has opened a 45 day period for comments to be filed on the
```

issue," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "Because of the short deadline for the study to be completed and presented to Congress -- before the end of August -- the ARRL and the amateur community must quickly mobilize their response."

The FCC Public Notice focuses on two specific areas for comments. The first is the role that Amateur Radio has played and continues to play to support emergency and disaster relief organizations, such as FEMA and local/state emergency management agencies. The second is to determine impediments to enhanced Amateur Radio communications. This would include the impact that private land-use regulations -- such as deed restrictions and homeowner association covenants -- have on the ability of licensed amateurs to fully participate in providing support communications to the served agencies.

"This study is not about zoning ordinances or regulations adopted by the local or state governments," Henderson explained. "Amateurs already have the limited protection of PRB-1 to assist them with those situations. The areas of concern here are the limitations that are placed on a property when it is purchased, either as part of the deed of sale or by restrictions imposed by the neighborhood/homeowner's association. Those restrictions -- sometimes referred to as CC&Rs -- are not currently covered by the FCC's PRB-1 decision from 1985."

To allow the ARRL to quickly collect and collate relevant information from the amateur community to help support the filing it will make with the FCC on this issue, a website has been setup. The site -- www.arrl.org/ccr-study-information <http://www.arrl.org/ccr-study-information> -- provides details about what kind of information is needed by the ARRL.

Also on the site, you will find links to two online data collection forms. The first form allows you to provide information about specific emergency communications in which Amateur Radio has played a role since January 2000. The second form asks for specific information on the CC&Rs/deed restrictions that control your property. It also asks you to provide information on how those restrictions have impacted your ability to fully support emergency communications.

"Whether you are an ARRL member or not, your information and situation are important to helping us make the case for all amateurs," Henderson said. "Whether your support communications are with ARES®, RACES, SKYWARN, CERT or other emergency and disaster groups, your voice should be heard. If you cannot operate effectively from home during an emergency because CC&Rs prohibit adequate antennas on your property, that is important to document and quantify. This issue affects all of Amateur Radio, not just ARRL members."

Henderson said that due to the short timeframe that the FCC has allotted for public comment, time is of the essence. In order to allow the ARRL to develop its comments, the ARRL asks that all information sent by the amateur community be received at the ARRL no later than

April 25, 2012: "We realize this is a very short turnaround asking for your response, but this is based on the time provided by the Commission for the comment window."

It is important that when you provide specifics of your CC&R, you also provide the ARRL with a copy of its actual wording. If you have the CC&R in a digital format (or you can scan the document into a file), it can either be uploaded through the website above or it can be sent via an e-mail to CCRinfo@arrl.org . If you do not have an electronic format, a hard copy may be sent via US mail to: CCR Study Information, ARRL, 225 Main St, Newington, CT 06111.

"We need factual, specific details," Henderson said. "The more accurate information we have -- including copies of the CC&R language -- the stronger case we can make. Having copies of the exact CC&Rs is important. It allows us to demonstrate the wide variation of restrictions. Including the specific text is as important as any other piece of information you provide."

If you have questions about what is being requested, you may contact the ARRL Regulatory Information Office via e-mail <reginfo@arrl.org>. "Again, time is of the essence in this matter," Henderson said. "This is the best opportunity that amateurs have had to address the impact of overly burdensome private land use restrictions. If Amateur Radio is to succeed in this effort, it is going to take all of us working together."

==> NORTH TEXAS ARES/RACES OPS RESPOND TO TORNADOS

On April 3, perfect conditions conducive to tornado activity converged on North Texas. A slow moving front, combined with abnormally warm temperatures and moist air coming in from the south, produced large hail, numerous funnel clouds and tornados. As the weather worsened, hams in North Texas activated ARES® and RACES nets. Spotters reported their observations to their local Emergency Operations Center, which acted on that information in a timely manner to inform the public of the approaching storms, giving them time to get to safety. A total of 21 confirmed tornados -- including one EF3 and two EF2 twisters -- swept through the Dallas-Fort Worth metroplex during the seven hour storm. More here <http://www.arrl.org/news/north-texas-hams-respond-when-tornados-strike>.
-- ARRL Letter

==> ARRL EPM MIKE COREY, KI1U: PUT YOUR EMERGENCY OPERATIONS CENTER ON THE AIR

How often is the Amateur Radio station at your local emergency operations center on the air? Only during emergencies? For nets? For training? In many cases the EOC Amateur Radio station may only see activity when it's needed, but this really shouldn't be the case. This Amateur Radio station plays two critical roles. First it is the station you will rely on during an emergency. Not just for the operator at the

EOC, but all those communicating with your EOC via Amateur Radio. Second, it is your Amateur Radio showcase to your served agencies.

Putting this station on the air, not just regularly but as often as possible, accomplishes several things. Each time you are on the air you are training. You are learning about propagation, band conditions, and improving your operating skills. In doing this you also learn more about your station. You learn its strengths and weaknesses, its capabilities, and you become more familiar with the equipment. Finally, you learn to identify problems in the station. Through regular activity you develop a baseline of how the station should perform. When something goes wrong you will know it quickly and be better prepared to fix the problem.

This on the air activity also has other potential benefits. As you and your group spend more time exercising the station your served agency will take notice. They will see that this station has value. They may even take interest in how well it is performing. And don't forget that through activity you are given the chance to promote the Amateur Radio Service. Remember there's more to it than emergencies and public service, don't miss an opportunity to show off the other facets of our great service.

The opportunities to get on the air are diverse. Your group could make it a goal to add an operating achievement to the wall such as DXCC or Worked All States. Participating in a contest is a great way to hone your operating and traffic handling skills (a contest exchange is traffic!). It also provides a great way to test your station's capabilities. You can also design a friendly in-house competition between operators, and see who can make the most QSO's each month or log check ins to HF nets.

Never forget what truly makes Amateur Radio a great asset, the spectrum to provide communications. We have this spectrum because we use it, not because we talk about using it. As an Amateur Radio operator you should get on the air as much as possible and so should your EOC station. -- Mike Corey, KI1U, ARRL HQ

==> AMATEUR RADIO IN TSUNAMI EXERCISE: PUERTO RICO AND U.S. VIRGIN ISLANDS

The National Weather Service Forecast Office in San Juan, in coordination with the Puerto Rico Seismic Network and the Caribbean Tsunami Center prepared the exercise called LANTEX12 <http://www.srh.noaa.gov/sju/?n=lantex2012_pns>. The purpose of this exercise, held on March 28 at precisely 9:04 am AST, was to support tsunami preparedness efforts throughout Puerto Rico and U.S. Virgin Islands.

The exercise tested sirens, the Emergency Alert System (EAS) and how well messages get on the air on local radio, TV, cable and other outlets. Also tested were evacuation procedures in public schools

around the island. The drill scenario was an earthquake off the shores of South Carolina, and the Tsunami wave it would create.

Angel Santana, WP3GW, reported that he was present at the Agencia Estatal de Manejo de Emergencias y Administraci&#65533;n de Desastres- AEMEAD (Puerto Rico Emergency Management Agency - PREMA) central offices, and served as Net Control using the KP4CVR call of the Cuerpo de Voluntarios Radioaficionados team, for which he is a volunteer. Santana was on the KP4CAR - 147.210 Mhz repeater system taking reports from all eleven Zones in which rhe agency divides the island. [The KP4CAR repeater is sponsored by Carlos A. Rosado, KP4CAR, the owner and trustee, and is one of the best situated on the island -- during Hurricane Irene it was one of the few on the air.] The agency wanted to know how Amateur Radio operators learned of the activation to have an idea of which communication systems worked best. Amateurs from Mayag&#65533;ez up to the island of Vieques reported in. There were several others on other repeater systems and on HF participating in the drill.

Here is a TV report <http://www.wapa.tv/noticias/locales/exitoso-el-simulacro-de-tsunami_20120328162652.html?utm_source=feedburner&utm_medium=feed&utm_campaign=Feed%3A+WapatvNoticias+(WAPA.TV%3A+Noticias> about the exercise. Satellite telephones were also used, and the KP4 Amateur Radio operators net was activated. As an aside, AEMEAD Director Heriberto Sauri lamented that only one cellular company participated in the exercise -- some cell phone companies were under fire last year for not sending any test messages as planned.

This is the third year in a row that Amateur Radio has participated in this exercise. -- Angel Santana, WP3GW, ARRL Puerto Rico Section Public Information Officer

==> STORM OPERATOR JENNIFER MELFI, KC2TMA, RECEIVES SPECIAL SERVICE CITATION

On August 27 and 28, 2011, for 28 hours during Tropical Storm Irene, 13 year old Jennifer Melfi, KC2TMA, assisted the Town of Babylon (New York) Emergency Operations Center by calling for volunteers on the radio several hours before the storm struck. She tirelessly provided emergency communications, relaying information about shelters and highways to Town of Babylon officials, Red Cross shelters and other nets throughout Long Island.

In January, Senator Owen H. Johnson (D-4), presented her with a much deserved Citation at the Ham Radio University event at Briarcliff College in Bethpage, New York. The citation states, in part, "Age does not play a factor in one's ability to volunteer their time to serve one's community. This citation recognizes your outstanding community service to the residents of the Town of Babylon, may you be an inspiration to others who follow in your footsteps." - Peter Portanova, WB2OQQ

==> CALIFORNIA EMERGENCY PREPAREDNESS EXPO SHOWCASES AMATEUR RADIO EMCOMM

March 23, 2012 was the date of the Outdoor Resort Palm Springs (ORPS) Emergency Preparedness Expo. Local Palm Springs KESQ channel 3 TV reporter Bianca Rae interviewed Coachella Valley EC John Polak, NF6N, which made the evening news broadcast.

In addition to RACES, the Cathedral City Fire Department, Riverside County Emergency Services, American Red Cross, FEMA, Costco, Palm Springs Community Emergency Response Team (CERT) and the ORPS Safety & Security Committee also participated.

Outdoor Resort Palm Springs <http://www.palmspringsrvparks.com/cc-outdoorresort.html> is an RV community of 1213 individually owned lots. Most of the owners are snowbirds from western Canada and Northwest US. -- Jim Koski, KT6W

==> LETTERS: MORE ON GPS

It is my experience and that of friends too, that GPS decisions about what turns to make to get to the desired destinations are often wrong. After all, the GPS has an internal decision making program that may have flaws or wrong logic in its design created by each GPS manufacturer. So to depend on this in a critical situation is a naive and foolish belief in the infallibility of the device. Yet, so many people have this trust. I have found that a majority of drivers have little or no map reading skills. That may be why they have to depend on GPS devices to find their way around when traveling. Poor map skills trap them into depending on the fallible substitute of the GPS device, sometimes leading to dangerous, even near tragic situations. Perhaps map reading skills should be tought to everyone in ARES and emergency sevices in general. --Murray Goldberg, KD2IN, Toms River, New Jersey

==> LETTERS: IS-201

In re the last issue's item on FEMA course IS-201, it is really based on the forms used in the ICS's Planning Section. That doesn't mean that the other sections are not involved but it does work mostly with planning forms to make it around what is called the "Planning P" to put a "Plan" in the Incident Commander's hands at the proper time. The Plans folks live in the future and not so much in the "now" or "past." They take what the Incident Commander wants to do in the NEXT period and put it on paper. If he wants to be in front of the fire with ten fire trucks and 100 people and planning finds out that there are only 5 fire trucks and 50 people on hand, they will contact Logistics to make sure that the additional supplies will be on hand BEFORE that next period begins. They will determine from the Operations folks what they will need to make all of this happen. They may need more food, water and porta-potties. As soon as this "new plan" is put into place at 0600 (or whatever time the Incident Commander says it will happen), Planning moves on to the NEXT operation period.

So again, they live at least 12 hours into the future. There is a saying that if the Planning section has nothing to do for that next operational period, then their job is to "plan the demobilization." If there is nothing to do, you don't need that many people or that much equipment.

So IS-201 is directed towards those Planning types but we as amateurs need to be headed in that direction also. If I am one of the amateurs operating in the field, I want to know that my ARES staff is "planning" for my relief at such and such a time. They might need to be planning to make sure I am counted for lunch and water. If operations are expanding in the next operational period, the ARES staff might be planning on new nets (or another net) to handle the increased traffic. If the ARES staff is slowly sinking then they might want come up with their own planning guy who has been trained to handle amateur planning. Anyway, just another person's 1-cent (after taxes). -- Edward Tune (Otto), KV7J, Carson City, Nevada

==> MALAYSIA TO HOST EIGHTH GLOBAL AMATEUR RADIO EMERGENCY COMMUNICATIONS CONFERENCE

The Eighth Global Amateur Radio Emergency Communications Conference (GAREC) -- called MyGAREC 2012 <http://www.mygarec2012.com/garec/> -- will be held November 12-14 in the Malaysian state of Negeri Sembilan at the Thistle Port Dickson Resort <http://www.thistle.com/en/hotels/malaysia/port_dickson/thistle_port_dickson>.

GAREC -- which began in 2005 in Tampere, Finland -- attracts radio amateurs who have an interest in providing emergency communications in response to disasters or during training exercises. MyGAREC 2012 has been timed to immediately follow the IARU Region 3 Conference in Vietnam (scheduled for November 5-9) with its theme of disaster relief communications.

General information for MyGAREC 2012 -- including information on the venue, registration fees the tentative agenda <http://www.mygarec2012.com/garec/index.php/info-mygarec-2012/mygarec-2012-schedule> and registration forms -- has been posted on the MyGAREC website. According to organizers, the website will be updated weekly with the latest news and program changes. Among the topics to be discussed include the HF emergency operating procedure and the future of GAREC, as well as presentations from the three IARU regions. Presentations from various IARU Member-Societies regarding recent disaster relief communications operations will also be scheduled.

Previous GARECs have been held in Finland (2005 and 2006), the USA (2007), Germany (2008), Japan (2009), Cura&#65533;ao (2010) and South Africa (2011). -- ARRL Letter

==> LETTERS: TRAINING -- TOO MUCH OF A GOOD THING?

In March QST you wrote about ICS, CPR and AED training for volunteers. I spent 16 years as a volunteer in Emergency Management and I am an instructor for NIMS and when I read your write up I could not believe

what you are asking volunteers to do. Yes, they need IS courses 100, 700 and 800 but unless they are going to be a leader and have the full knowledge of Emergency Management I don't see that the volunteers need courses 230, 250, 288 and the others that deal with the EOC.

If you are in a rural area your EOC could be out of your house or work for an Emergency Manager who doesn't even have the ICS training. As a volunteer I feel -- along with our club -- that the other classes are not necessary. You have to realize that the rural areas don't have DSL, and dial up Internet won't let you take some of these classes online. I feel that if ARES volunteers take IS courses 100, 200 and 700 then they have the knowledge to assist in an emergency. Remember, they are volunteers and have regular jobs, families and other commitments.

So I hope your recommendations do not become requirements because you will lose a lot of great volunteers in the process. Rural fire departments are getting smaller and smaller because of the requirements that are put on them. I was an Assistant EMD for 16 years and was in charge of our volunteers so I know how hard it is to get them to take these classes. Please consider talking with rural ARES groups and learn how hard it is to get and keep volunteers. --Teresa Tost, KC0OKP, President, Douglas County Amateur Radio Club <http://www.dcham.com/>, Ava, Missouri

==> LETTERS: BEST DIGITAL MODE?

I read your column on digital methods in the current QST. I am an active member of Army MARS and operate on a 4 MHz Digital Net at least one hour daily six days a week. Our experience shows OLIVIA works very well in noisy conditions, much faster then PSK31 and can get through as well as CW. MT63 is faster when signals are good. EASYPAL can send pictures (very useful in disaster conditions) and large text files error free. There are several programs that can connect for ARQ transmissions including WINMOR, FLDIGI and V4CHAT. All of these methods use freeware programs and have been used on HF and VHF. There is no "best" method any more than there is a best tool. To be a competent digital operator requires practice with several methods to be able to pick the optimum solution in a given situation. -- Scott McCann, W3MEO/AAR3FK

==> K1CE FOR A FINAL

Below are the actual questions posed by the FCC to the public in its Public Notice referenced at the outset of this issue:

The FCC said "We pose specific questions below to provide structure for commenters. Commenters may also address questions not set forth below that relate to the topics of the study to be submitted to Congress. Commenters should not, however, view this Public Notice as an opportunity to seek Commission rulings regarding specific situations."

1. Importance of emergency Amateur Radio Service communications.
As noted above, the statute requires a review of the importance of

emergency Amateur Radio Service communications relating to disasters, severe weather, and other threats to lives and property.

a. What are examples of disasters, severe weather, and other threats to life and property in which the Amateur Radio Service provided communications services that were important to emergency response or disaster relief? Provide examples of the important benefits of these services.

b. Under what circumstances does the Amateur Radio Service provide advantages over other communications systems in supporting emergency response or disaster relief activities? Under what circumstances does the Amateur Radio Service complement other forms of communications systems for emergency response or disaster relief?

c. What Federal Government plans, policies, and training programs involving emergency response and disaster relief currently include use of the Amateur Radio Service? What additional plans, policies, and training programs would benefit from the inclusion of Amateur Radio Service operations? How would Amateur Radio Service operations fit into these plans and programs?

d. What State, tribal, and local government plans, policies, and training programs involving emergency response and disaster relief currently include use of the Amateur Radio Service? What additional plans and programs would benefit from the inclusion of Amateur Radio Service operations? How would Amateur Radio Service operations fit into these plans and programs?

e. What changes to the Commission's emergency communications rules for the Amateur Radio Service (Part 97, Subpart E) would enhance the ability of amateur operators to support emergency and disaster response? In addition, are there any specific changes that could be made to the technical and operational rules for the Amateur Radio Service (Part 97, Subparts B, C, and D) that would enhance the ability of amateur operators to support emergency and disaster response? What other steps could be taken to enhance the voluntary deployment and effectiveness of Amateur Radio Service operators during disasters and emergencies?

f. What training from government or other sources is available for Amateur Radio Service operators for emergency and disaster relief communications? How could this training be enhanced? Should national training standards be developed for emergency communications response?

g. What communications capabilities, e.g., voice, video, or data, are available from Amateur Radio Service operators during emergencies and disasters? Are there any future technical innovations that might further improve the Amateur Radio Service?

h. Are national standards in data transmission needed to enhance the ability of Amateur Radio Service operators to respond to emergencies and disasters? Are there restrictions with regard to transmission

speeds that, if removed, would increase the ability of operators to support emergency/disaster response? If so, what issues could arise from removing these restrictions?

i. Would it enhance emergency response and disaster relief activities if Amateur Radio Service operators were able to interconnect with public safety land mobile radio systems or hospital and health care communications systems? What could be done to enable or enhance such interconnections? What issues could arise from permitting such interconnections?

j. Should there be national certification programs to standardize amateur radio emergency communications training, mobilization, and operations? How would such programs improve emergency communications?

2. Impediments to enhanced Amateur Radio Service communications. The statute also requires that the study identify impediments to enhanced Amateur Radio Service communications andrecommendations regarding the removal of such impediments.

a. What private land use restrictions on residential antenna installations have amateur radio operators encountered? What information is available regarding the prevalence of such restrictions? What are the effects of unreasonable and unnecessary restrictions on the amateur radio community's ability to use the Amateur Radio Service? Specifically, do these restrictions affect the amateur radio community's ability to respond to disasters, severe weather, and other threats to lives and property in the United States? What actions can be taken to
minimize the effects of these restrictions?

b. What criteria distinguish "unreasonable or unnecessary" private land use restrictions from reasonable and necessary restrictions? How do local circumstances, such as neighborhood density or historic significance, affect whether a private land use restriction is reasonable or necessary? How does the availability of alternative transmitting locations or power sources affect the reasonableness of a particular private land use restriction?

c. What steps can amateur radio operators take to minimize the risk that an antenna installation will encounter unreasonable or unnecessary private land use restrictions? For example, what obstacles exist to using a transmitter at a location not subject to such restrictions, or placing an antenna on a structure used by commercial mobile radio service providers or government entities?

d. Do any Commission rules create impediments to enhanced Amateur Radio Service communications? What are the effects of these rules on the amateur radio community's ability to use the Amateur Radio Service? Do disaster and/or severe weather situations present any special circumstances wherein Commission rules may create impediments that would not otherwise exist in non-disaster situations? What actions can

be taken to minimize the effects of these rules?

e. What other impediments to enhanced Amateur Radio Service communications have amateur radio operators encountered? What are the effects of these impediments on the amateur radio community's ability to use the Amateur Radio Service? Specifically, do these impediments affect the amateur radio community's ability to respond to disasters, severe weather, and other threats to lives and property in the United States? What actions can be taken to minimize the effect of these impediments?

f. The legislation requires the Commission to identify "impediments to enhanced Amateur Radio Service communications."7 What specific "enhance[ments]" to Amateur Radio Service communications have been obstructed by theimpediments discussed above?

http://forums.qrz.com/showthread.php?342745-Yakub-Kolas-130-years&goto=newpost

Diplom-YAkuba-Kolasa.jpgDiploma of Education established a department of Gomel City Executive Committee of the Republic of Belarus in honor of the 130th anniversary of the birth of national poet of Belarus Yakub Kolas (Konstantin Mikhailovich Mickiewicz), and issued to radio amateurs, made with amateur radio stations of Belarus. At the diploma are counted as radio communication with the cities and regions, which is related to bio Belarusian classic Yanka Kupala: Kursk and Kursk, Moscow and Moscow region, Vilnius, Perm, Tashkent. To obtain the award must be made within 2012 to collect 130 points. Radio communications with amateur radio stations of Belarus to give 5 points. Radio communications with amateur stations of the above cities and regions to make two points. November 3, 2012, the birthday of the poet, points are doubled. September 1-2, 2012, during the days of the Belarusian written language, and points are doubled. At the diploma are counted radio carried any kind of radiation, radio re-counted at different ranges. Observers certificate is issued on similar terms. Application for certificate shall be prepared in the form of an extract from the log with full information about the QSO (observations). The electronic form of diplomas will be sent free of charge. To obtain a paper certificate must pay the cost of its delivery - 2 IRC. World War II veterans, as well as children's collective paper certificates are sent to radio stations for free. Applications for certificates are accepted in electronic or paper form.

http://forums.qrz.com/showthread.php?342684-International-Marconi-Day-N2MO-IMD&goto=newpost

The Ocean □ Monmouth Amateur Radio Club will be on the air Saturday April 21, 2012 signing N2MO/IMD. This year marks the 25th anniversary of this World Wide Event. As in years pass we will be operating from the Marconi Belmar Receiving Station, located in Wall Township NJ. This site was operated by the America Marconi Radio company from the early 1900□s till the onset of World War One. The US Military took over the facility and it was renamed Camp Evans. Look for N2MO/IMD on Twenty and Forty Meters. We will be running a mix of CW, SSB, and Digital Modes. QSL information can be found at www.omarc.org and on QRZ.com

http://forums.qrz.com/showthread.php?342785-Riley-Hollinsgworth-K4ZDH-to-be-CQ-Columnist&goto=newpost

Riley Hollinsgworth, K4ZDH, to be CQ Columnist

Retired FCC amateur radio enforcement chief Riley Hollingsworth, K4ZDH, has been named a CQ magazine contributing editor, it was announced today by CQ Editor Rich Moseson, W2VU. Hollingsworth will succeed "Washington Readout" editor Fred Maia, W5YI, who recently became a Silent Key.

Hollingsworth, a ham since 1960 and a longtime FCC attorney, became a household name in amateur radio in 1998 when he was named Special Counsel for Amateur Radio in the Commission's newly-created Enforcement Bureau. His highly-visible enforcement actions were cheered by a vast majority of the amateur community after more than a decade during which FCC enforcement on the ham bands was virtually non-existent. Hollingsworth retired from the FCC in 2008, but has continued to be in demand as a speaker at hamfests and radio club meetings.

His new monthly column - to be titled "Riley's Ramblings" - will incorporate "Washington Readout's" coverage of legislative and administrative actions that affect amateur radio, as well as additional topics of importance and/or interest to CQ's readers, all related in the distinctive common-sense style that has made Riley a sought-after speaker. His first column will appear in the July, 2012, issue of CQ, and will explain why ongoing FCC enforcement actions since his retirement have been somewhat "under the radar."

"We are pleased and honored to have Riley joining our staff," said Moseson. "His stature in the amateur radio community is second-to-none, and his ability to explain sometimes-arcane legal and regulatory language in plain English fits right in with CQ's long-standing dedication to providing practical, useful information for our readers to help them get the most enjoyment possible out of the amateur radio hobby. I look forward to a long and fruitful relationship."

"I am delighted to have the opportunity to contribute to CQ and to amateur radio generally," noted Hollingsworth. "As a 13-year-old Novice in South Carolina nervously making my first contact with an overheated Johnson Challenger and a barely effective vertical, not in my wildest imagination

did I think I would be writing for a ham radio magazine someday. I am very appreciative of this offer and I hope I can be a valuable asset to the magazine."

Hollingsworth holds a Master□s degree from the University of South Carolina, and a law degree from Wake Forest University. He lives in Gettysburg, Pennsylvania, with his wife, Pat.

Working with NBEMS

Posted: 16 Apr 2012 05:03 PM PDT
http://forums.qrz.com/showthread.php?342593-Working-with-NBEMS&goto=newpost

paNBEMS.org is a working group for training in the use of the NBEMS (Narrow Band Emergency Massage System) software which is available for free from www.w1hkj.com. paNBEMS has been active now for about 4 years. We have helped train hundreds of radio operators in the use of NBEMS, many of whom have moved on to train many more.

The NBEMS software provides a digital radio sound card modem and a form-based messaging program in two separate applications that work together to form a perfect software suite for emergency radio digital communications for use on HF and VHF/UHF. The software is free and multi platform... so, no matter if you run MAC, Linux or WIndows, the software runs, looks and feels the same on any OS platform.

A few of the major advantages of NBEMS are:

1) The use and purchase of proprietary, expensive and complex hardware is not necessary. We often run without even using a direct-wired interface from the computer to the transceiver. Acoustic coupling is accomplished by keying up the transceiver mic near the computer speaker and hitting send on the software. Conversely, to receive, all you need is a working computer microphone (internal or cheap plug in) that can hear the transceiver□s received audio to decode the digital audio back to text... this method works especially well with the 200 WPM MT63 2k long mode on FM simplex or over repeaters or for just receiving digital NBEMS traffic on HF.

2) Because NBEMS is so simple and fun to use, it makes it much easier to bring new volunteer amateur radio operators in to the digital radio emergency communications ranks. We regularly get new folks up and running in the course of a single UHF repeater net session. When we have someone new to NBEMS check in that says they have the software installed but haven□t tried it yet, we walk them through a few initial settings and they□re amazed when a few minutes later they□re successfully sending and receiving data. And with regards to the □fun□ aspect of NBEMS, we have the

huge advantage of being able to use the NBEMS software for a good deal of our recreational hamming for ragchew and DX contacts, so we□re regularly using the same software that we might be called upon to use during an emergency or disaster.

3) Although NBEMS has the capability of running ARQ based operations (one to one connection with ack/nak for error correction) we tend to use the modes with heavy forward error correction (FEC) in a broadcast type transmission, with one amateur radio operator sending (i.e. NCS) and an unlimited number of amateur radio stations receiving from the single transmission. The FLMSG application allows form-based data entry with several of the ICS, HICS, MARS, American Red Cross and the NTS/ARRL Radiogram forms. There are also generic email type forms and a blank form option and the forms can be further customized with savable text templates for common reports. The FLMSG messages include an embedded checksum calculation and all receiving stations can independently and automatically confirm 100% accurate receipt. So, we can guarantee to our served agencies that the message was received exactly as it was sent without error.

NBEMS nets are popping up all across the country.... some run on 6m or 2m SSB, some on 2m FM (simplex and repeaters like we do here in Pittsburgh) and many regional and local nets are running on 80m and 40m. Just within the last month or so, we have been learing about many upcoming drills where NBEMS will at least play some part. In several other drills, NBEMS has been chosen by the served agencies as a primary means of communications due to its reliability, simplicity, portability and ability to handle detailed messages and spread sheet data such as logistical spread sheet files or needed or available resource lists.

Please visit our website if you would like to learn more about NBEMS. All are welcome to join us on our net schedules. If you would like some help and suggestions in getting your own NBEMS net up and running, just drop us a line. We□ll be glad to try to help.

No home QTH? DXpeditions are the answer!

Posted: 16 Apr 2012 12:40 PM PDT
http://forums.qrz.com/showthread.php?342563-No-home-QTH-DXpeditions-are-the-answer!&goto=newpost

Hi folks,

DXCoffee.com published today my interview to Bill Vanderheide, N7OU. Not only he's a reputed contester and DXer, but he tells about a situation that can interest many hams: he has no home QTH, and DXpeditions mark the only moments he can be active.

Read it in English here:

http://www.dxcoffee.com/eng/2012/04/...am-radio-home/

And for Italian speakers, here is the translated version:

http://www.dxcoffee.com/ita/2012/04/...o-la-sua-casa/

I count on your help to spread the word!

73, and thanks in advance,

Chris - IX1CKN / HB9EYT / KC2YXI

574. [RAC-Bulletin] RAC Bulletin 2012-023E - Distracted Driving in Ontario

Newsgroup: rec.radio.amateur.misc
Date: 2012-04-18 21:53:53 UTC
From: rac-bulletins@eton.ca
Message-ID: <4F8F376D.2030702@rac.ca>

Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

RAC Bulletin 2012-023E - Distracted Driving in Ontario
2012-04-17

On April 16 the MTO posted a regulatory notice proposing a change to Ontario Regulation # 366/09 (Display Screens and Hand-Held Devices) that would Extend the current exemption for licenced amateur radio operators for an additional five years.

As you know, the exemption was due to expire at the end of this calendar year, and Radio Amateurs of Canada has been lobbying for a permanent exemption since this regulation was introduced back in 2009. We will be providing comments to the Road User Safety Branch of MTO on this issue and will continue to press for a permanent exemption. That said, a 5-year extension is certainly welcome at this point but is not the ultimate resolution that we have been seeking.

The only other group to obtain an extension are commercial, public transit, and public function drivers.

You can view the notice in the provincial registry at:

http://www.ontariocanada.com/registry/view.do?postingId=43&languageen
<http://www.ontariocanada.com/registry/view.do?postingId=43&languageen>

RAC and the Distracted Driving Committee wishes to thank all organisations that supplied letters of support to assist us in obtaining this extension. This shows the support we have from many Ontario organisations.

Bill Unger VE3XT - North/East Ontario Regional Director
Chair - RAC Distracted Driving Committee
Radio Amateurs of Canada

Ham Radio Grows at Two Rivers:

Posted: 17 Apr 2012 05:10 PM PDT
http://www.eham.net/articles/28119

It's serious business, this being a ham. Sixth- through eighth-graders at Two Rivers School learned the intricacies of ham radio during a two-day, hands-on activity that turned part of the school into an amateur radio studio. Stephen Kangas, a longtime ham radio aficionado, along with teacher Joe Burgener and his assistant Denise Atkinson, hosted the School Club Roundup. The event, which occurred this winter, was the fifth year that Two Rivers has participated alongside schools across the nation, Kangas said in a press release. The American Radio Relay League, which sponsored the event across the United States, described the roundup as a way to get young people interested in ham radio. "Very often, a new operator will be intimidated by the fear of not knowing what to say to the stranger on the other side of the radio," New York ham radio operator Lew Malchick wrote on the ARRL website. "The exchange of information helps to overcome this fear in a low-pressure format. Operators are encouraged to take some time to chat."

//
Michael R. Hoffman, KBOZFS (SK):

Posted: 17 Apr 2012 05:10 PM PDT
http://www.eham.net/articles/28118

Michael Ray Hoffman, 57, of St. Joseph, passed away Saturday, April 14, 2012, at a St. Joseph hospital. He was born July 17, 1954, in St. Joseph, son of Virginia and Joseph Hoffman. He married Carol Fleischman on December 2, 1982, and they shared 29 years of marriage together. He graduated from Lafayette High School. He retired from Mead Products as a machine operator and Truck driver after 27 years of service. He then was a truck driver for several truck lines. He served in the United States Navy from 1976 to 1981 serving on the USS Juno. He enjoyed deer hunting, fishing, ham radio operating, and spending time with his children and family. He was a member of the Mead 25 year club, he was a Cub Scout leader, and T-ball coach, he was also a member of ARES Amateur Radio Emergency Service his call sign KBOZFS.

NASA Satellite Captures Spectacular Solar Eruption:

Posted: 17 Apr 2012 05:09 PM PDT
http://www.eham.net/articles/28115

A NASA satellite yesterday captured spectacular images and video of a massive solar flare erupting from the eastern side of the Sun. The M1.7 (medium intensity) class solar "prominence eruption" produced a coronal mass ejection (CME) that was captured by NASA's Solar Dynamics Observatory (SDO). The event occurred at 1:45 p.m. EDT on April 16, 2012. The ejection, impressive as it was, was only a moderate event by astronomy standards. Such flares are measured on a letter scale and fall into three categories: C, M and X -- X is the strongest. Some of the strongest eruptions the Sun has produced have released as much energy as one billion megatons of TNT.

//
Riley Hollingsworth, K4ZDH, Named CQ Contributing Editor:

Posted: 17 Apr 2012 04:38 PM PDT
http://www.eham.net/articles/28114

Hicksville, NY) April 17, 2012 -- Retired FCC amateur radio enforcement chief Riley Hollingsworth, K4ZDH, has been named a CQ magazine contributing editor, it was announced today by CQ Editor Rich Moseson, W2VU. Hollingsworth will succeed "Washington Readout" editor Fred Maia, W5YI, who recently became a Silent Key. Hollingsworth, a ham since 1960 and a longtime FCC attorney, became a household name in amateur radio in 1998 when he was named Special Counsel for Amateur Radio in the Commission's newly-created Enforcement Bureau. His highly-visible enforcement actions

were cheered by a vast majority of the amateur community after more than a decade during which FCC enforcement on the ham bands was virtually non-existent. Hollingsworth retired from the FCC in 2008, but has continued to be in demand as a speaker at hamfests and radio club meetings.

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CT, PORTUGAL
The special event station CR6IARU is active until Apr 19 to celebrate
the "World Amateur Radio Day" on Apr 18. QSL via CT1REP.

EA8, CANARY ISLANDS, AF-004
EH8WDX is working from Gran Canaria (AF-004) until Apr 19 also on the
occasion of the "World Amateur Radio Day". QSL via EA8ADL.

EI, IRELAND, EU-115
The special event call EI1MGY of the "Mayo Radio Experimenters Network"
remembers the Titanic disaster until Apr 21 on the air. QSL via EI6IZ.
See also: http://ei7mre.org

EL, LIBERIA
The Liberia Radio Amateur Association (LRAA) activates the clubstation
EL2RL on 20m, 17m, 15m and 10m during the "World Amateur Radio Day" on
Apr 18. QSL via EL2BA, unfortunately only direct.

G, ENGLAND, EU-005
The Chelmsford Amateur Radio Society (CARS) operates the special event
station GB100MWT in CW and SSB on HF from the Marconi hut near Sandford
Mill and from a tent during the "International Marconi Day" on Apr 21.
They will use a Marconi 1154 AM transmitter and a 1155 receiver.
OP will be Peter Bridgeman,G3SUY. All QSOs count for the Marconi award.
QSL via bureau or direct to G0MWT (QRZ.com). http://www.g0mwt.org.uk

GW, WALES, EU-005
The Barry Amateur Radio Society is going to activate the special event
station GB4MDI during the "International Marconi Day" on Apr 21.
QSL via GW0ANA. See also: http://bars.btck.co.uk

The Telford & District Amateur Radio Society will use the special call
GB8MD on the same day operating fieldday style from Tywyn in Gwynedd

County (EU-005, WLOTA 0453, WAB SH50, Loc IO72XN). They want to exceed their result from the year before (470 QSOs with 34 DXCCs in SSB/CW). QSL via bureau or direct to M0PNN. See also: http://www.tdars.org.uk

HB9, SWITZERLAND
The HB9RL members Claudio,HB9EFJ, Luciano,HB9FBI, Augusto,HB9TZA, and others will be active as HB9WFF from Forte Olimpo (WCA: HB-00898, DCS-SSD: TA-073) in the Magadino park (HBFF-101) on Apr 21/22. QSL via HB9FBI, LoTW.

The "Union Schweizerischer Kurzwellen-Amateure" (USKA) celebrates the "World Amateur Radio Day" with the special event station HB9WARD. OPs will be HB9JOE and other HAMs from Bern. QSL via HB9JOE.

HH, HAITI, NA-096
Tiho,9A7GAE, is working for the Red Cross in Leogane and should have received his licence meanwhile. Listen for HH2/9A7GAE on 80m/40m/20m/17m/10m/6m working in SSB and digital modes (later) during his spare time. QSL via homecall, later also via LoTW.

HS, THAILAND
HS0ZFZ, HS0ZFD, HS0ZGQ and HS0ZIL plan to become active via EME from several squares in the north of Thailand using the special call E2E from Apr 20-25. Donations are welcome for the rebuilding of the Thai clubstation HS0AC of the "Radio Amateur Society of Thailand" (RAST). QSL via HS0AC. See also: http://www.moonbouncing.net/e2e.html and http://www.qsl.net/rast

IS0, SARDINIA, EU-024
The ARI section Olbia will use the special call IY0GA from Cape Figari at Golfo Aranci (EU-024) during the 25th International Marconi Day on Apr 21. Guglielmo Marconi did a microwave test there with Rocca di Papa in Rome on Aug 11, 1932. QSL via IS0JMA.

JD1/OG, OGASAWARA, AS-031
Harry,JG7PSJ, will be QRV again from Chichijima (AS-031, WLOTA 2269, JCG #10007) signing JD1BMH in CW, SSB and RTTY on 80m-10m between Apr 22 and May 4. QSL via bureau or direct to his homecall.
See also: http://sapphire.es.tohoku.ac.jp/jd1bmh

JW, SVALBARD, EU-026
Michael,JW/DB5MH, is on a skiing tour until Apr 23 and shows up on the air mainly on 14315 kHz using a FT817, two solar cells and a wire on a 6m fishing rod. QSL via homecall. See also: http://www.diskoisland.de

KH0, MARIANA ISLANDS, OC-086
Masahiko,JH4VUC, is working as WH0VU again in all modes on all bands from Saipan (OC-086, USi NI002S, WLOTA 1333, Loc QK25ue) from Apr 18-21 QSL via homecall, unfortunately only direct.

KP2, US VIRGIN ISLANDS, NA-106
Harry,KP2/W6DXO, is working holiday style in SSB/CW on 17m and 20m from Cruz Bay on St. John Island (NA-106) using an IC706IIG and a vertical

from Apr 18-23. QSL via KF6JOQ.

KP4, PUERTO RICO, NA-099
Jeff,KP4/VA3QSL, will be QRV in holiday style from Puerto Rico (NA-099, USi PR006S, WLOTA 2802) between Apr 22 and May 4. He plans to activate Vieques Island (USi PR-007S, WLOTA 4042) for two days and if possible he wants to work from several lighthouses as well. Listen for Jeff in SSB/CW near the IOTA frequencies on 40m, 20m and 6m with 100 watts, dipole and Hamsticks. QSL via homecall.

Some members of the "Puerto Rico Field Day Group" are celebrating the "World Amateur Radio Day" and 87th anniversary of the "International Amateur Radio Union" on Apr 18 with the callsign KP4FD in SSB on all bands. A special electronic award can be requested from WP3GW.
QSL via LoTW, eQSL.

OE, AUSTRIA
The amateur radio group of the Austrian radio ORF and the "Documentary Archives Radio Communications" (QSL Collection) are activating the special event station OE12M during the International Marconi Day from Apr 20-22. QSOs on Apr 21 count for the IMD award. QSL via OE1WHC.
See also: http://dokufunk.org

P4, ARUBA, SA-036
The special event station P487IARU is working until Apr 30 to mark the World Amateur Radio. QSL via LoTW.

PA, THE NETHERLANDS
The special event call PC100T is active until Apr 18. QSL via PA7HPH.

TA, TURKEY
The "TC Special Wireless Activity team" (TCSWAT) is using the special call TC57A in SSB, CW and PSK on HF from Apr 21-26. QSL via TA1HZ.
See also: http://www.tcswat.org

UA, EUROPEAN RUSSIA
The special event station R150SPA remembers the 150th birthday of the Russian Pyotr Stolypin until Apr 23. QSL via RA4CEO.

UA9, ASIATIC RUSSIA
RA9LR, RV9LF, UA9LAC, UA9LAO, UA9LEW, UA9LL, UA9LP, UA9LT and UB9LBS will sign RK9LWA/9 from the Olenyi Ruchyi nature park in CW, SSB and digital modes on 80m-10m (maybe also SSB/FM via satellite on 2m/70cm) from Apr 19-22.
QSL via UA9LP, bureau QSLs can be requested via e-mail to ua9lp@mail.ru

VK0/MQ, MACQUARIE ISLAND, AN-005 (update)
Trevor,VK0TH, is active until Apr 19. See QRZ.com.

XU, CAMBODIA
Barry,ZL1DD, is signing XU7AEL in CW and SSB on 80m-6m from the Samkam Beach Hotel in Sihanoukville (Kompong Som) until Apr 21. QSL via ZL1DD.

XV, VIETNAM
Mal,VK6LC, plans to show up as XV4LC in CW/SSB on 20m and 17m from
Vinh Long from Apr 19-24. QSL via VK6LC, unfortunately only direct.

YJ, VANUATU, OC-035
The Oceania DX Group (ODXG) members Allan,VK2CA, Michael,VK3GHM,
Chris,VK3QB, Luke,VK3HJ, Lee,VK3GK, and Benton,VK3CBV, announced to
show up as YJ0VK from the Nirvan Resort in Port Vila on Efate Island
(OC-035, Loc RH42df) between Apr 21 and May 5. They will work in SSB,
CW, RTTY and PSK31 on 160m-10m with focus on the WARC bands.
QSL via VK2CA, only direct, LoTW. See: http://yj0vk.odxg.org

YO, ROMANIA
A group of Romanian HAMs celebrates the "World Amateur Radio Day" on
Apr 18 with the special callsign YP1WFF (YOFF-111, DYO-08).
QSL via YO3JW. See also: http://wff-yo.blogspot.com

ZA, ALBANIA
Franck,F4DTO, and Patrick,F4GFE, will sign ZA100I from Elbasan only in
SSB on 40m-10m from Apr 22-29. QSL via F4DTO.

INTERNATIONAL MARCONI DAY
The "International Marconi Day" (IMD) organized by the "Cornish Radio
Amateur Club" is an annual 24 hours event to honour the birthday of
Guglielmo Marconi (Apr 25, 1874). This is not a contest but HAMs get
the opportunity to work with historic Marconi sites. This year's IMD
will take place on Apr 21. See also: http://www.gb4imd.org.uk

TITANIC AWARD
If you have worked/heard five Titanic special event stations listed on
the website below you can request a PDF award for free by sending an
e-mail to Hans-Juergen,DE3EAR (de3ear@darc.de). See also:
http://coastradio.intco.biz/maritime/ships/titanic/Titanic-2012.htm

HK0NA QSL
The QSL card of the Malpelo DXpedition is ready and mailing will start
by the end of April.

SILENT KEYS
Adam Perz,SP5JTF, passed away on Apr 2 aged 56. He was HF manager of
the Polish amateur radio society, a wellknown DXer and Contester,
member of the Warsaw DX Club (SP5PBE) and the team of SN0HQ.
They keys of Ladislav Pagac,OM4DA, and Jan Horsky,OM3MM, Slovakia's
leading DXer with 389 DXCCs (mixed) will stay silent forever as well.
Jean Porquet,FP5BU, dies on Apr 9.
Our condolences and sympathy are with their families and friends.
We do not want to be sad that we lost them, but grateful that we could
get to know them as a radio friend. We will always keep them in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

---
The final results of the CQMM Contest 2011 were published on their
website http://www.cwjf.com.br
The CQMM DX Contest 2012 will take place on Apr 21/22.

UPCOMING CONTESTS

Apr 20/21 Holyland Contest
Apr 21 ES Open Championship
Apr 21 European Sprint Contest
Apr 21/22 YU DX Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
EU-008, GM/MM, Inner Hebrides: The Kilmarnock and Loudoun Amateur Radio Club
plans an IOTA DXpedition to the Isle of Muck (IOSA NH06, SCOTIA DI18)
from Apr 24-28. Listen for MM0KLR in all modes on all bands.
QSL via RSGB bureau. Direct QSLs only via MM0GHM.
See also: http://www.klarc.org

EU-015, SV9, Crete Island: Seppo,SV9/OH1VR, is going to visit Crete (GIOTA
KRS-005, MIA MGC-005, WLOTA 1400) from Apr 21-28. He will work mainly
in CW on 80m-10m. QSL only direct via OH1VR.

EU-095, F, Provence-Cote D'Azur (Bouches-du-Rhone) Region group: Ivano,I2RFJ
Alberto,IV3BSY, Tony,IZ2ESV, and Andrea,IZ2LSC, will be QRV as TM1F
from Ratonneau Island (DIFM ME-003/MIA MF-024/Loc JN23PG) from
Apr 21-25. They plan to work in CW, SSB and digital modes on 6m-80m.
QSL via IK2DUW (d/B/L). More info at: http://www.timpy.it/tm1f and
http://www.youtube.com/watch?v=H5hq2_-Bkcs&feature=youtu.be

EU-171, OZ, Jylland North group: Ela,DL1TM, and Tor,DJ4MG, are signing OZ7TM
and 5P4MG in SSB on 160m-15m and 2m from Vendsyssel-Thy (DIA NJ-001,
Loc JO47UH) until Apr 26.
QSLs for OZ7TM via DL1TM and 5P4MG via DJ4MG (direct/bureau).

OC-185, VK8, Northern Territory (Arafura Sea Coast) East group: Craig,VK8AS,
is making a DXpedition to Bermer Island from Apr 18-23. He will sign
VK8BI only in SSB with 400 watts and Spiderbeam on 10m/12m/15m/17m/20m.
If time permits he wants to work also in PSK31 and RTTY.
Emphasis will be put on working North America and Europe.
QSL via VK8AS. More details can be found at: http://oc185.blogspot.com

SA-048, YV7, Secure State East group: Some members of the "Grupo DX Caracas"
will show up as YX5P from Isla de Patos ("Duck Island", WLOTA 0499,
ARLHS VEN-039) from Apr 19-23. This is only the second activity from
this island and IOTA points will be handed out in all modes and bands.
QSL via DM4TI (direct/bureau).

Digital QST

Dear ARRL Member,May Digital QST
<http://www.nxtbook.com/nxtbooks/arrl/qst_201205/>

In addition to the print edition of /QST/, all ARRL members have access
to the convenient, new digital edition of /QST/ at no additional cost.
The current edition of /QST/ is available now: May 2012 /QST/
<http://www.nxtbook.com/nxtbooks/arrl/qst_201205/>

**

Special Digital Communications Edition...

* /QST/ reviews: the Kenwood TM-281A 2 meter transceiver, the Tokyo
Hy-Power Labs HL-350VDX 2 meter linear amplifier and the Network
Sciences/ACï¿½C roofing filter for the Yaesu FT-2000
* Your smartphone can be a digital communications terminal
* HF digital messaging made easy
* Buoys in the classroom

Digital QST <http://www.nxtbook.com/nxtbooks/arrl/qst_201205/>
Digital-Only Features...

* Video walkthroughs of two items featured in Product Review: the
Kenwood TM-281A transceiver and the Tokyo Hy-Power Labs HL350VDX
linear amp
* Behind-the-scenes commentary on the recent successful WRC-12
* Audio link: What does JT65 sound like?

**Every issue of /QST/ is filled with the news and features you need to
keep active in Amateur Radio. After you read through it, find us on
Faceb <http://www.facebook.com/ARRL.org>ook
<http://www.facebook.com/ARRL.org> and tell us what you enjoyed!

Editor

What is a digital edition?
The digital edition of /QST/ is a web-based edition of the journal...a way to read and interact with the current issue of /QST/ anytime, anywhere. It simulates the look and feel of our printed version, complete with page flipping, indexing and easy ways to move around to get to the content you want. You can choose to read it online, or download the entire issue to your laptop. Each issue includes unique, digital-edition-only content such as video, audio features and extra content. Members can also access the digital archive for access to previous issues.
*
How do I access the digital edition?*
Members must have a valid ARRL website login to access this benefit. You can always find a link to the current digital edition and archives at www.arrl.org/new-qst <http://www.arrl.org/new-qst>.

To login or register, go to www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Forgot password? Go to www.arrl.org/forgot-password <http://www.arrl.org/forgot-password> to reset your password.

Not a member? Join today <http://www.arrl.org/join/QDF> and get access to the current digital edition, now.

Need help? Visit the digital edition help page <http://www.arrl.org/digital-qst-faq> for frequently asked questions. Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@arrl.org <mailto:circulation@arrl.org>.

Go Green. Go Digital-Only.
You can choose to opt-out* of the mailed, print edition of /QST/ at any time. Complete our online opt-out form <http://www.arrl.org/QST-print-edition-opt-out-form>. Due to the lead time required to prepare /QST/ for mailing, you may receive one last printed issue.
* Disclaimer: Choosing to opt-out of the print edition of /QST/ is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of /QST/. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

WIANEWS WEEK COMMENCING APRIL 22 2012.

Hobby farm death not suspicious.

SUMMITS ON THE AIR VK ACTIVATION

Spectacular explosion on the Sun

VK100WIQ

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING APRIL 22 2012.

Hobby farm death not suspicious.

Police are investigating the death of a man who fell from his vehicle onto
an antenna at his hobby farm.

The 51-year-old man is believed to have suffered fatal injuries after he
fell onto the 20-metre high metal antenna at the Cunderdin property in WA.

Police spokeswoman Ros Weatherall said the antenna was used for surveying
services, and had been removed by the man from the roof rack of his
Landcruiser utility before the incident. Initial investigations reveal that
he may have slipped from the top of the car and fallen onto the antenna.

watoday.com.au/wa-news/hobby-farm-death-not-suspicious-20120416-1x2ed.html#ixzz1sA3VujOO

(Trevor VK4BAT)

Spectacular explosion on the Sun

On April 16th around 17:45 UT, magnetic fields curling over the sun's north-eastern limb rose up and erupted, producing one of the most visually-spectacular explosions in years.

The event, which also produced an M1.7-class solar flare and a coronal mass ejection, was not Earth-directed.

Nevertheless, it confirms suspicions that a significant active region is rotating onto the Earth-side of the sun.

Visit http://spaceweather.com for movies and updates.

The blue mountains (www.bmarc.org) Amateur radio club's May meeting will be its AGM.

The meeting is on Friday 4th May and will be held at the new club house 4 Moore Street Glenbrook at 8pm.

There is a $2 fee for anyone attending the club. All are welcome.

(Danny Clark VK2FDCA Blue Mountains Amateur radio club)

PADDLE FOR LIFE - LISMORE TO BALLINA BY RIVER. 14-16 Apr.

About 40 canoes took part to complete the second stage, no adverse incidents.

Lismore, Coraki, and Woodburn six boats, and two civvy boats gave safety cover.

Comms assistance provided by WICEN with five operators with good comms.

Lions and other service clubs provided feeding and assistance at the stops, with no accidents, everyone completed the courses with sometimes a little boat help.

Pics on the Album page http://www.ourphotos.net.au/albums.php?album=3473

BLACKHAWK DOWN

A Blackhawk Pilot will be down at Paluma in NQ, active during AM and CW on ANZAC Day.

Chris VK4FR has advised that he will be leaving the chopper in the hangar and travelling to Paluma by road with a vehicle equipped with HF gear and portable internet to activate a site near the old World War 2 Radar Bunkers and is excited about Joining The Gang on AM and CW.

(sourced to theTARCinc)

SUMMITS ON THE AIR VK ACTIVATION
www.sotawatch.org

www.sota.org.uk

You have heard of Islands on the Air.

Now think tops of hills and mountains instead of islands, and you will be thinking of Summits on the Air or SOTA.

SOTA commenced on the 1st of February in VK3 with six hundred and nine summits. Operators around all of VK can participate by chasing activations on these summits, or any other SOTA summits around the world. Indeed some VK operators are already well on their way to the entry level SOTA awards for both activators and chasers.

For chasers, there are SOTA activations in VK3 on most weekends, and many of these are on either 20 or 40 metres. Activations can be on any amateur band using any mode, so an activation can be as simple as carrying a handheld FM rig to a summit top.

Don't miss out on your chance to be the first VK Shack Sloth or Mountain Goat.

This is Allan, VK4FABR , from the Queensland Centenary Committee.

On behalf of Mike Charteris VK4QS, and members of the Committee, we can announce that June 1st, 2012, will see the official launch of "VK100WIQ" on the airwaves to celebrate the Centenary of the establishment of the Wireless Institute in Queensland.

Our Centenary has its origins at a meeting organised in 1912, by Mr Sydney Victor Colville, a Broadcast Radio Engineer, who held the Amateur Call Sign "XQF" in Queensland.

>From this meeting in 1912 came the establishment of the Wireless Institute in the state of Queensland.

Therefore, we, the members of the Queensland Centenary Committee would like to invite all amateur radio operators in Queensland and the rest of Australia to embrace this once in a lifetime opportunity to work "VK100WIQ .

Those Radio Clubs of Queensland wishing to participate, will be required to seek a three day block by way of an on-line roster currently being established.

VK100WIQ will be on air during the period June 1st to July 31st , from Radio Clubs of Queensland, operating on HF, VHF, UHF, and most other amateur modes. They will be looking forward to working stations all over Australia and the rest of the world during their individual three day blocks.

The Centenary Committee, is currently organizing a special QSL Card and Centenary Certificate for those making contact with VK100WIQ.

Details will be posted on the Centenary Website at www.wiaq.org.au by June 1st 2012.

One of the highlights will be the holding of the Centenary President's Luncheon at the Hervey Bay RSL Club, on Saturday July 21st 2012.

Special guests include WIA President, Mr Michael Owen, VK3KI, and
WIA Director, Mr Ewan McLeod VK4ERM.

If you will be attending, this very special luncheon, then please contact
Norm Greenaway VK4NP at nwg46@bigpond.com President of the Hervey Bay Club,
He would love to hear from you.

The next day, Sunday July 22nd will see the Hervey Bay Amateur Radio Club
hosting a free BBQ at the Hervey Bay SES Buildings, on Old Maryborough Road
Pialba. What better way to top off the President's Luncheon on Saturday,
then to go out for dinner Saturday night, and stay for the Sunday Free BBQ
and make a weekend of it in beautiful Hervey Bay.

Hervey Bay will be hosting VK100WIQ, and will be on air with it from the
SES Buildings on the day of the BBQ.

So that's all from the centenary committee for now.

Be sure to check your calendar, mark the dates in July, and check out our
website at www.wiaq.org.au

We look forward to seeing you at the Presidents Luncheon and working you on
air.

What use is an f-call?

The annual National WIA conference is just over a month away in Mildura.
This year I'll be participating in my first and I wondered if there are any
f-call's who'd like to go, but have some trepidation on the idea of attending
an event with lots of strangers.

Perhaps you might like to come along and share a room.

I've got a large family suite with spare beds available and if you're
hesitant to be there because you know no-one, perhaps this might help you.
I'm sure that we'll find something to talk about - amateur radio perhaps
- hi hi.

If you'd like to take me up on this offer, get in touch - contact details in
the text edition.

email: vk6flab@harg.org.au
phone: 04 1219 8888

People are inventive, continually trying new things, solving problems,
discovering new ones, making and breaking things, scratching an itch.
Amateurs are no different. Well they are, but in essence they're no different
from people.

Amateurs just like to invent more stuff than the average person on the
street. Meet any group of amateurs in the wild and before long you'll be
embroiled in a discussion about how to solve a problem that is bugging one of
you. There will be hand-waving, charts, calculators and good cheer to fill up
the room.

If you're new to Amateur Radio, you might find yourself overwhelmed by all this interaction. All you did was get your shiny new license and turn up. Now all these experts are jabbering on about stuff you know next to nothing about.

Ironically, if you stop and think about it for a moment, you'll quickly come to the realization that this is true for everyone in the room. Some people did this yesterday, others last year, and some have been around since before you were born. The only trick in interacting with these people is to ask questions.

Hearing a new Amateur on-air is a similar experience. What do you talk about and how do you avoid looking silly?

I can't help with looking silly, but wearing a clown-costume on air is generally not a problem, since we're really only working with audio. More seriously, looking silly is in the eye of the beholder, if your intent is to learn, there can be no place for looking silly.

So, my advice to you is to walk into the room or push your talk button and have a go. Ultimately, this hobby contains many different people, some of whom are going to share many of your interests.

I'm Onno - VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Jo&#65533;o Alberto Costa CT1FBF brings news of an extension to the amateur radio 6m band.

He writes:
The National Communications Authority of Portugal (ICP-ANACOM) welcomes the proposal of 2 amateur radio colleagues, Jos&#65533; Carlos CT1DHM and Jo&#65533;o Costa CT1FBF, in order to amend the upper range limit of 50.5 MHz on the 6 metres band, from next April 26, 2012; the date of the complete switch-off of the analogue TV broadcasting transmissions to digital terrestrial television.

The new limits of the band allocation for Portugal will be from 50 MHz to 52 MHz.

Such opening, regarding the new upper limit for Portuguese ham radio 6 metres band, was possible thanks to the end of the old analogue signal TV broadcasting transmissions, on the lower VHF band (channels 2 to 4) after that date.

World Amateur Radio Day

On 18 April 2012, radio amateurs celebrated World Amateur Radio Day, on the 87th anniversary of the founding of the International Amateur Radio Union or IARU.

This year's theme was "Amateur Radio Satellites: Celebrating 50 Years in Space" in remembrance of the launching of OSCAR 1 on 12 December 1961 and the launch of OSCAR 2 on 2 June 1962.

Nothing was heard after our initial notification here on VK1WIA News from any society/organisation in Australia of any celebration in VK.

In 1924, ARRL President Hiram Percy Maxim, W1AW, had scheduled a business trip to Europe. While in Europe, Maxim was asked by the ARRL Board of Directors to represent the ARRL in fostering international relations between amateurs.

Following an informal meeting in 1924, representatives from France, Great Britain, Belgium, Switzerland, Italy, Spain, Luxembourg, Canada and the United States formulated a plan to hold an International Amateur Congress in Paris, France, in April 1925, for the purpose of founding the IARU.

Representatives from Europe, North America, South America and Asia attended the congress, adopting a constitution for the IARU on April 17.

At a closing assembly on the following day, officers were elected and the actions of the congress ratified by representatives from 25 countries. Thus, April 18 became the official "birthday" of the IARU and is now designated World Amateur Radio Day.

There were HOWEVER several special event stations from OTHER IARU's Member Societies active on different dates during April:

South Africa - ZS6IARU, was active 18 April. QSL via ZS4BS.
Bulgaria - LZ1WARD, by the Bulgarian Federation of Radio Amateurs, active throughout the month of April. QSL via bureau.

Switzerland - HB9WARD by Union Schweizerischer Kurzwellen-Amateure, active 18 April. QSL via HB9JOE.

Poland - HF87WARD, by members of the SP-CFF will be active from 17 to 30 April. There is an award for this operation. QSL via eQSL.cc and WFF LogSearch.

Liberia - EL2RL, by the Liberia Radio Amateur Association active 18 April. Direct QSL to EL2BA.

Mexico - 6H6IARU by the Federaci&#65533;n Mexicana de Radio Experimentadores who were active from 13 to 18 April. QSL via LoTW and N7RO.

Chile - 3G87IARU by the Radio Club de Chile, active throughout the month of April. QSL via CE3AA.

==========

NEWS FROM ARNEWSLINE USA

NZART CHANGES ITS REPEATER LICENSE FEE METHODS

A decision from the New Zealand Association of Radio Transmitters will have an impact on several of its branches. Those where repeater and beacon licenses currently held in the name of NZART will be handed back to them.

The current system of invoicing and renewals means a heavy administrative workload for society's resources at a time when subscription renewals are also being processed. This will mean that this coming November when the individual licenses are up for renewal, each branch will receive the license renewal invoice direct from the government telecommunications regulatory authority. This in turn means that branch secretaries will need to be aware of this and ensure that payment is made by the date due. Failure to do so may result in the license being cancelled.

Unlike the United States where individual hams own and hold license to repeaters, in many nations it is the national society that is the repeater and beacon licensee. Those hams involved merely build and maintain repeaters. In fact, in some nations these hams are known as repeater keepers rather than as owner operators of such devices.

NEW 50 MHz EME DIGITAL SARL DX RECORD

Derek Gravette, ZS5Y, in Scottburgh, South Africa established a new 50 MHz South Africa Radio League Earth-Moon-Earth record. This, by making contact with Mike Staal, K6MYC, in northern California in the United States.

On April 4th, the two completed a QSO on E-M-E using the JT65a digital mode. JT65 was developed by Joe Taylor, K1JT and released in late 2003. It is intended for extremely weak but slowly-varying signals, such as those found on tropo-scatter or of coarse E-M-E paths.

(SARL)

N0BYH GIVEN AWARD FOR AIDING HAM RADIO SCOUTING

In the United States, Tim Arimond, N0BYH, has been awarded the Boy Scouts' District Award of Merit. This for his work in promoting amateur radio with the Boy Scouts in the Minneapolis and St Paul area.

The award recognizes Airmond's extraordinary service to youth that has included instruction to help prepare scouts to take the amateur radio exam as well as his service as a merit badge councillor for Electricity, Electronics, and Radio. It was also noted that he was also one of the adult leaders behind the local K0BSA.

(KD0NYS)

RADIO SPORT AND OPERATIONAL NEWS

TITANIC EVENT IN VK4

The Redcliffe club's brightly coloured tent stood out among the old maritime relics in a pristine area on the banks of the Brisbane River and as Bevan reports, the tent was not in the best position for radio communication but the operators persisted. There were many visitors to the radio tent including families as a result of media advertising with many asking questions about Morse code, and the role radio played in the Titanic disaster.

Most visitors were fascinated at actually seeing the operators sending and receiving CW and many visitors were able to send morse themselves with keys attached to audio oscillators. The club had 3 operators until about 1100Z and one from then until the station closed at about 2230Z.

Bevan also said that that the QSL cards for the event were printed last Wednesday as soon as the logs are collated the task of sending QSL cards will begin.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

First activation of Botley Flour Mills for Mills on the Air weekend

Botley Flour Mills near Southampton in the UK is one of the oldest known milling sites and is listed in the doomsday book and is believed to have been a mill site in pre-Roman times.

The Mill will be activated for what is believed to be the first time with the callsign GB 0 BFM for Mills on the Air weekend on the 12/13th of May from 10:00-1600 BST with an NoV for 80m, 40m, 2m & 70cm.

The station will be run by M 0 IED and father G 6 FRT and other members of Itchen Valley Radio Club with added assistance from Southampton University Wireless society.

Itchen Valley Radio Club: http://www.ivarc.org.uk/
Southampton University Wireless society: http://www.suws.susu.org
Botley Flour Mills: http://www.botleymills.co.uk/heritage.htm

In DX, EA3OW is now active through May 12th as EA 3 0W/HH8 from Southern Haiti. Listen out for him on 40 through 10 meters using SSB, RTTY and digital modes. QSL via his home callsign, EA 3 OW

DJ 9 RR will be on the air as S 79 RR from Mahe Island between May 15th and the 23rd. Activity on 40 through 10 meters using CW and RTTY.
QSL via his home callsign, JJ 9 RR.

Members of the Jersey Contest Group will be active as GJ 2 A from the Isle of Jersey during the Radio Society of Great Britain's' Islands on the Air Contest July 28 and 29.
QSL direct to GJ 3 DVC.

Mozambique operation

ZS6JR and ZS6DJD will be operating from Mozambique for seven days starting the 3rd of May 2012.
QTH is Shai Shai, Mozambique, 400 km north of the capital and they will operate all vertical antennas with the earth wires in lake water.
40m to 10m.

The 2012 Asian Weightlifting Championships is being held this month in South Korea. To celebrate the event the special callsign DT 12 AWC is activated until 30th of April.
QSL Manager is DS 2 GOO.

REWIND

Radio Ham established Broadcasting

Amateur radio operator Frank Conrad 8XK established the concept of radio broadcasting.

Frank first became interested in radio in 1912 when, in order to settle a bet on the accuracy of a watch, he built a radio in order to hear time signals from the Arlington, Virginia Naval Observatory.

He then constructed, in his garage, a new transmitter, licensed in 1916 as 8XK, whose signal could be heard throughout the Pittsburgh area.

In response to popular demand, Frank began broadcasting for two hours each Wednesday and Saturday night.

Watch Frank Conrad Invents Broadcasting by doing a youtube google.

wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and
Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a
range of fascinating and memorable activities.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

http://forums.qrz.com/showthread.php?342909-Distracted-Driving-in-Ontario&goto=newpost

Distracted Driving in Ontario

On April 16 the MTO posted a regulatory notice proposing a change to
Ontario Regulation # 366/09 (Display Screens and Hand-Held Devices) that
would extend the current exemption for licenced amateur radio operators for
an additional five years.

As you know, the exemption was due to expire at the end of this calendar
year, and Radio Amateurs of Canada has been lobbying for a permanent
exemption since this regulation was introduced back in 2009.

We will be providing comments to the Road User Safety Branch of MTO on this
issue and will continue to press for a permanent exemption. That said, a
5-year extension is certainly welcome at this point but is not the ultimate
resolution that we have been seeking.

The only other group to obtain an extension are commercial, public transit,
and public function drivers.

You can view the notice in the provincial registry at:

http://www.ontariocanada.com/registr...43&language=en

RAC and the Distracted Driving Committee wishes to thank all organisations
that supplied letters of support to assist us in obtaining this extension.
This shows the support we have from many Ontario organisations.

Bill Unger VE3XT

North/East Ontario Regional Director

Chair - RAC Distracted Driving Committee

Radio Amateurs of Canada

NIAR Sets Up Ham Radio Station at G P Sinha Centre:

Posted: 18 Apr 2012 06:04 PM PDT
http://www.eham.net/articles/28123

Patna, Apr 18 (PTI) The National Institute of Amateur Radio (NIAR), Hyderabad today joined hands with Prof G P Sinha Centre for Disaster Management and Rural Development, Patna, by setting up a ham radio station at the latter's office at Rajendra Nagar here. Today is the World Amateur Radio day. The Union ministry of Information Technology has sponsored the programme. While the NIAR is a renowned organisation with exemplary services in the field of amateur radio nationally, G P Sinha centre is a premier organisation doing project works in the fields of disaster management and rural development.

//
Zehr Brings Ham Radio to Good Sam-Flanagan:

Posted: 18 Apr 2012 06:03 PM PDT
http://www.eham.net/articles/28122

Flanagan, Ill. -- After five years of being packed away, Dick Zehr's Ham radio has made its way back to him at Good Samaritan Home, Flanagan. Zehr, who will be 91 April 28, and his wife, Lois, are both residents at Good Sam and have been licensed to use the radio since 1953. "We had to pass a Morse code test of 13 words per minute and a written test to get our license. The license is renewable and the license we have today expires in 2017, so we have a little time to go," Zehr said. He said his wife, who is 87, can't speak anymore due to an illness, but she still keeps her license current. Using the Ham radio has been a hobby the couple has enjoyed for numerous years, speaking to people in more than 250 countries, including keeping up with missionaries in South America and Africa, captains on airplanes and ships out at sea and an encounter with the King of Jordan in 1972.
"I have it all written down in my log book. I heard him on there quite often," Zehr said of King Hussein. The amateur radio enthusiast said that the available bands, or frequencies, aren't what they used to be and that he only has a reach of about 50 square miles today.

//
Connecting The World Through Their Own Radios:

Posted: 18 Apr 2012 06:01 PM PDT
http://www.eham.net/articles/28121

Life is busy for VT Sadasivan (78), a retired physics professor based in Madurai. He is teaching batches of students the nuances of amateur radio communications. After the teaching sessions, Prof Sadasivan tunes in to his Ham Radio transceiver communicating with friends across the globe. "I am on the vigil all the time. As a Ham Radio (amateur radio) operator I have a lot of responsibilities," he said. When earthquake devastated Gujarat on January 26, 2001 and tsunami waves struck Tamil Nadu coast in December 2004, Prof Sadasivan was the point of contact for thousands of people who wanted to know about their near and dear ones. The 2004 tsunami attack was no different. "Telephone and mobile phone network in the coastal districts went off the air for almost 15 days. The Hams (amateur radio buffs) moved into the camp office of the district collector with their equipment. The entire communication responsibility was undertaken by the hams," said Arulmozhi, another ham radio buff who is also a staff of the National Informatics Centre. Telephone posts and mobile phone towers were uprooted when Cyclone Thane struck Tamil Nadu coast in December 2011. "District authorities in Cuddalore and Nagapattinam had to depend on hams for rescue and relief operations," said Shankar Satyapa, director, Indian Institute of Ham Radio, Bangalore. Hams across the globe observe April 18 as the World Amateur Radio Day to commemorate the formation of the International Amateur Radio Union on April 18, 1925. Out of two million Ham Radio operators in the world who work selflessly for One World; One Language, 20,000 are from India. "We have 5,000 active amateur radio operators in India," said Satypal. Every ham radio operator has something exciting to tell about his/her contacts and experiences. E S Aruswamy (83), the oldest Ham Radio operator in South India was in regular touch with King Hussein of Jordan. Aruswamy breathed his last early this year.

William B. (Will) Wales, N0NNG (SK):

Posted: 18 Apr 2012 05:59 PM PDT
http://www.eham.net/articles/28120

William B. (Will) Wales, 71, of Wheatland, died April 11th at Cheyenne Regional Medical Center following an extended illness. He had suffered with diabetes much of his life. He was born June 17, 1940 in Denver, Colorado and lived in Colorado until moving to Wheatland in May of 2000. He and his wife purchased a small farm SW of Wheatland and had various livestock. Mr. Wales was retired and had worked for the Colorado Department of Communications from 1969 to 1992. He had also been in business in various other trades or occupations as well. He and his wife once owned a candy store at Grand Lake, CO. He was a jack-of-all-trades and master of many. Gunsmith, locksmith, clock repair, and his most loved trade as a radio/electronics technician. He was an accomplished HAM radio operator and enjoyed sharing his knowledge with other radio operators.

Special Event station VX3W
2012-04-19

Members of the Manotick Amateur Radio Group will be operating special event station VX3W from Fort Wellington in Prescott, Ontario, on Saturday, May 19th from 10:00 EDT to 16:00 EDT (1400Z to 2000Z) to commemorate the 200th anniversary of the War of 1812.

Operating Modes: We will be operating on various HF bands, depending on the conditions. Local operators may be able to find us on simplex VHF and/or UHF. While most operations will be voice, we may also operate in digital modes.

Check the VX3W board on our club's forums for more information :http://www.ve3rix.ca/forums/forumdisplay.php?fC.

If you make contact with VX3W, please send us a QSL card to the address below. We will send out cards in return and ask that you include a first class stamp for Canadian addresses or an IRC for any other country.

==> + DAYTON HAMVENTION: GET READY FOR ARRL EXPO AT THE DAYTON
HAMVENTION

The ARRL has finalized its planning to bring its large exhibition --
ARRL EXPO -- to Dayton Hamvention, May 18-20. The ARRL EXPO has been a
mainstay at Hamvention since 2005, serving as the centerpiece for most
of the League's activities at the country's largest Amateur Radio
convention. "Our goal is help represent the fullness of the ARRL
membership programs and services at the convention," said ARRL
Marketing Manager Bob Inderbitzen, NQ1R. "ARRL EXPO is as much about
creating an experience for convention goers as it is about having a
```

place for members to interact with other members. The ARRL EXPO team includes more than 100 ARRL volunteers, officials and staff members. If you are an active Amateur Radio operator or want to renew your interest in ham radio, the ARRL EXPO is the place to be at Dayton." Read more here <http://www.arrl.org/news/get-ready-for-the-2012-arrl-expo-at-the-dayton-hamvention>.

==> + PUBLIC SERVICE: IOWA HAMS HELP LOCAL AND NWS OFFICIALS BEFORE, AFTER TORNADO

<http://www.arrl.org/images/view/News/CrestonTornado.jpg> On April 14, a string of tornados swept through the Central US and Great Lakes Region, including an EF2 tornado in Creston, Iowa, causing severe damage to the Greater Regional Medical Center and the Southwestern Community College campus. Prior to the tornado, radio amateurs in Creston reported storm observations directly to the National Weather Service. After the storm forced the evacuation of the hospital, hams provided communications support to local officials. Read more here <http://www.arrl.org/news/iowa-hams-support-local-officials-before-after-tornado>.

==> + ON THE AIR: AMATEURS MUST PROTECT NEW RADARS IN 23 CM BAND

The Federal Aviation Administration (FAA <http://www.faa.gov/>) is deploying a new generation of Common Air Route Surveillance Radar (CARSR) that has some implications for the use of the 1240-1300 MHz (23 cm) band by amateurs. The Amateur Service allocation in this band is on a secondary basis, with aeronautical radionavigation and several other services primary in the United States Table of Frequency Allocations. The FCC rules require that amateur stations operating in the 23 cm band may not cause harmful interference to stations in the radionavigation-satellite service, the aeronautical radionavigation service, the Earth exploration-satellite service (active) or the space research service (active). One case of harmful interference in Southern California has been reported.

CARSRs are being installed in several dozen locations throughout the country and will use various frequencies in the 1240-1350 MHz range with an occupied bandwidth of about 3 MHz. In the vicinity of the radars, amateur operation may be precluded in a portion of the 23 cm band. The ARRL is in contact with FAA engineers. We anticipate that the constraints on amateur use of the band will be limited to those necessary to protect aviation safety, which of course cannot be compromised.

==> + ON THE AIR: CHANGES PERMIT MORE FIELD CHECKING OF DXCC CARDS

Acting on a recommendation by ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, the ARRL's Programs and Services Committee (PSC), adopted new rules for ARRL field card checkers. ARRL card checkers now may check QSL cards for those entities deleted from the

DXCC list and, with exceptions, check cards for 160 meters. In addition, the PSC decided not to change the process by which card checkers are appointed. Read more here <http://www.arrl.org/news/arrl-card-checkers-can-now-check-cards-for-160-meters-deleted-entities>.

==> + FIELD DAY: REGISTER YOUR ARRL FIELD DAY SITE ON THE FIELD DAY LOCATOR

First introduced in 2008, the ARRL's Field Day Station Locator Service <http://www.arrl.org/field-day-locator> has proved a popular addition to the Field Day toolbox. This service -- an interactive map that helps amateurs or those interested in Amateur Radio find a Field Day <http://www.arrl.org/field-day-locator> site near them -- is free to clubs or individuals who will be operating public Field Day stations. Stations can also be listed by state or province. So far, hams in 47 states, Puerto Rico and six Canadian provinces have listed Field Day sites on the Field Day Locator. If your group would like to be a part of the Station Locator Service, it's easy to get started -- just go to the Field Day Station Locator website <http://www.arrl.org/field-day-locator> and follow the instructions. ARRL Field Day is the most popular on-the-air operating event in Amateur Radio. On June 23-24, join tens of thousands of radio amateurs as they gather for a public demonstration of the Amateur Service.

==> AMATEUR RADIO IN THE CLASSROOM: ATTENTION TEACHERS: APPLICATIONS FOR TEACHERS INSTITUTE AND ETP GRANT APPLICATIONS DUE SOON

Thinking about using Amateur Radio and wireless technology in your classroom to help facilitate hands-on learning opportunities? The ARRL's Education & Technology Program offers two programs that can help make this happen, but the deadline to apply is fast approaching: The deadline for the 2012 Teachers Institute on Wireless Technology is May 15, while the deadline for equipment and resource grants is May 1. Read more here <http://www.arrl.org/news/attention-teachers-applications-for-teachers-institute-and-etp-grant-applications-due-soon>.

==> + DIGITAL QST: COMING SOON TO A COMPUTER NEAR YOU!

The new digital edition of QST will debut toward the end of May. If you are an ARRL member and you haven't yet signed up to be notified automatically when the digital edition becomes available, you can do so easily. Just click on the "Edit your profile" link on the ARRL website <http://www.arrl.org/>. Once you are in your profile, click "Edit e-mail subscriptions" and then check the box next to "Notification of monthly digital edition of QST." That's all there is to it. A new FAQ <http://www.arrl.org/digital-qst-faq> about the digital edition has the answers to the questions ARRL members have been asking (it can also be accessed from the QST page on the ARRL website <http://www.arrl.org/qst>). We hope you enjoy the new digital edition of QST.

==> MINUTES FROM MARCH'S ARRL EXECUTIVE COMMITTEE MEETING NOW AVAILABLE

The ARRL Executive Committee met

==> INTERNATIONAL NEWS: ITU TELECOM WORLD 2012 CONFERENCE SEEKING
PARTICIPANTS FOR YOUNG INNOVATORS PROGRAM

As part of ITU Telecom World 2012 -- scheduled for October 14-18 in
Dubai -- the conference will present the Young Innovators Program. With
its theme of Youth Innovation for Development, the Young Innovators
Competition is a chance for the next generation of young visionaries to
demonstrate their ideas and innovations on this global stage and show
how their fresh digital thinking can change the world for the better.
The program seeks to attract dynamic, engaged young people and identify
projects with a genuine potential to succeed. The goal of the program
is to build a cohesive international community of highly talented of
social entrepreneurs from age 18-25 who are working on ICT-based
initiatives from the conceptual stage through to projects in areas of
critical relevance to the burning issues facing the world today. Read
more here

nts-for-young-innovators-program>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: The solar flux and sunspot numbers reached
a short term low on April 8-11, but they are rising again. For the past
week -- April 12-18 -- the average daily sunspot numbers more than
doubled, compared to the previous seven days, rising more than 39
points to 71.7. The average daily solar flux increased from 95.9 to
105.1. The predicted solar flux for April 19-22 is 120, followed by 115
on April 23-26, 105 on April 27-28, 100 on April 29-30, and 95 on May
1-9. The predicted planetary A index is 5, 5, 8, 5, 6, 10, 12 and 8 on
April 19-26, 5 on April 27-29, 8 on April 30, 5 on May 1-7, and 8, 12,
15 and 10 on May 8-11. Look for more information -- including
propagation reports from readers, updated predictions and a piece by
Carl Luetzelschwab, K9LA, regarding the current stalled state of Solar
Cycle 24 -- on the ARRL website on Friday, April 20. For more
information concerning radio propagation, visit the ARRL Technical
Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>.

==> + ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE SET FOR ATLANTA

The dates have been set -- September 21-23 -- for the 31st Annual
ARRL/TAPR Digital Communications Conference (DCC
<http://www.tapr.org/dcc>) in Atlanta at the Sheraton Gateway Hotel.
The DCC schedule includes forums, demonstrations, a Saturday evening

banquet and an in-depth Sunday seminar. This conference is for everyone with an interest in digital communications -- from beginner to expert. Technical papers are also being solicited for the conference proceedings. You do not have to attend the conference to have your paper included. The submission deadline is July 31. Please send papers to Maty Weinberg, ARRL, 225 Main St, Newington, CT 06111, or you can make your submission via e-mail <maty@arrl.org>. Papers will be published exactly as submitted and authors will retain all rights. For more information, please see the DCC website <http://www.tapr.org/dcc> or call TAPR at 972-671-8277.

==> THIS WEEK IN RADIOSPORT

This week:

- April 20-21 -- Holyland DX Contest
- April 21 -- Feld Hell Sprint; EU Spring Sprint (SSB); TARA Skirmish Digital Prefix Contest; ES Open HF Championship
- April 21-22 -- Michigan QSO Party; South Dakota QSO Party; Ontario QSO Party; CQ Manchester Mineira DX Contest; EA-QRP CW Contest; YU DX Contest
- April 25 -- 432 MHz Spring Sprint (local time)
- April 25-26 -- CWops Mini-CWT Test

Next week:

- April 27 -- NCCC Sprint Ladder
- April 28-29 -- Florida QSO Party; Nebraska QSO Party; 10-10 International Spring Contest (Digital); SP DX RTTY Contest; Helvetia Contest; QRP to the Field
- April 29 -- BARTG Sprint 75
- May 1 -- AGCW QRP/QRP Party

All dates, unless otherwise stated, are UTC. SWAP FEST

ELECTRONICS & RADIO

CLOUD PEAK RADIO AND ELECTRONICS GROUP

Saturday April 21, 2012 8AM ☐ 2PM

Masonic Lodge Building

109 S. Gould St.

Sheridan, WY 82801

Gather all of your electronic items that you no longer use and bring them
for

sale at this SWAPFEST. START SEARCHING NOW!

Items may include radio gear, computers, electronic test equipment,

antennas, rotors, TVs and many other items that relate to electronics.

Food available.

Talk-in on 146.82 (100htz tone)

COST INFORMATION

Seller tables . $10 if reserved in advance by April 7, 2012

$15 after April 7, 2012

(Table size is 30 in. by 8 ft.)

Tailgaters . $15 per parking space

General Admission $2 per person (children under 12 FREE)

Free Parking for general admission

Seller setup will start at 7AM / Sellers to begin packing up by 2PM and out by 3PM

Amateur Radio Newsline(tm) Report 1810 - April 20 2012

Amateur Radio Newsline report number 1810 with a release date of April 20th, 2012 to follow in 5-4-3-2-1.

The following is a QST. A new report released by a ham in Germany highlights various radar sources that could interfere with amateur radio; the Sun shows its might again as a major eruption hits the North-East limb; amateur radio responds to tornado devastation in the central U-S; Scouting gets its own IRLP Topic Channel and Riley is coming to CQ Magazine. Find out the details are on Amateur Radio Newsline(tm) report number 1810 coming your way right now.

WORLDBEAT: NEW OTH RADAR REPORT RELEASED BY DK20M

A new paper released by a ham in Germany may shed some light on sources of interference on the ham bands caused by radar systems world-wide. Jim Davis, W2JKD, has more:

--

Wolfgang Hadel DK2OM has made available a report documenting High Frequency Over The Horizon radar systems used around the world. Also included are Ionosphere and Troposhere Diagnostic Radars as well as well as Ocean Wave and Coastal Radars. All of these can interfere with amateur radio and shortwave listening.

The report is an exceedingly thorough look at these various Radar systems and their uses. It also includes explanations of how some of these systems work and include photographs, maps and graphs of some of the operations.

The 36 page report is free to anyone who wants a copy. You can download it in Adobe .pdf format at tinyurl.com/oth-radar-report.

I'm Jim Davis, W2JKD.

--

Again that U-R-L to obtain a free copy of the paper is tinyurl.com/oth-radar-report

(IARU-R1)

NEWSLINE FOLLOW-UP: NEW RADAR MAY HAVE CAUSED SOCAL HAM TO ECEIVE NOV

A follow-up and a possible answer to the question raised last week of just what aeronautical radar system Gary Dent, AF6HP, was issued a Notice of Violation by the FCC for interfering with. Its now been made public that the FAA is in the process deploying a new generation of Common Air Route Surveillance Radar that operates in the 23 centimeter band. Bill Pasternak, WA6ITF, is in the newsroom with what we know:

--

Well Don, most of what we know comes in the form of a news release from the ARRL Letter. It says that the deployment of what is known as the updated Common Air Route Surveillance Radar has some implications for the use of the 1240 to 1300 MHz band by radio amateurs.

According to the ARRL story, the improved Common Air Route Surveillance Radar systems are being installed in several dozen locations throughout the country, albeit the exact placement has not been announced. And as stated, this radar system is a primary user of the band meaning that any and all other users must protect it from any man made interference. That includes amateur radio which holds secondary status.

At this point, all that's really known is that the radar will use various frequencies in the 1240-1350 MHz range with an occupied bandwidth of about 3 MHz. As such, the League says that in the vicinity of these radars, amateur operation may be precluded in a portion of the 23 cm band.

The ARRL says that it is in contact with FAA engineers and that it anticipates that the constraints on amateur use of the band will be limited to those necessary to protect aviation safety. This of coarse is something that cannot ever be compromised.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

Whether or not this radar is the reason that AF6HP received his Notice of Violation is not known because it's also not known if the Los Angeles area is the home of one of the improved radar facilities. Nor does it explain the additional charge of broadcasting that was included in the NOV issued to AF6HP. (ARRL, others)

PROPAGATION: SPECTACULAR APRIL 16th EXPLOSION ON THE SUN

Another spectacular display from old Sol. On April 16th around 17:45 UTC, magnetic fields curling over the sun's northeastern limb rose up and erupted, producing one of the most visually-spectacular explosions in years.

The event, which also produced an M1.7-class solar flare and a coronal mass ejection, was not Earth-directed. Nevertheless, it confirms suspicions that a significant active region of our home star is rotating onto the Earth facing side of the sun. This could mean more flares and some interesting propagation in the coming days and weeks.

Please visit spaceweather.com for videos of this solar event and the very latest updates. (W0WOI, VHF Reflector)

**

NAMES IN THE NEWS: K4ZDH NAMED NEW CQ MAGAZINE CONTRIBUTING EDITOR

Retired FCC amateur radio enforcement chief Riley Hollingsworth, K-4-Zed-D-H, has been named a CQ magazine contributing editor, succeeding "Washington Readout" editor Fred Maia, W5YI, who recently became a Silent Key.

Hollingsworth, a ham since 1960 and a longtime FCC attorney became a household name in amateur radio in 1998. That's when he was named Special Counsel for Amateur Radio in the Commission's then newly-created Enforcement Bureau.

His highly-visible enforcement actions were cheered by a majority in the amateur community. Especially after more than a decade during which FCC enforcement on the ham bands was virtually non existent.

Riley Hollingsworth retired from the FCC in 2008, but has continued to be in demand for personal appearances within the ham radio community. And according to CQ Editor Rich Moseson, W2VU, he was the natural choice for a column on regulatory matters concerning amateur radio:

--

W2VU: "If you are looking for a columnist on regulatory affairs, who is better qualified than Riley Hollingsworth?

"He spent 30 years in the FCC; kept us all in-line for over a decade; continues to be a widely sought after speaker at hamfests and clubs and is very widely respected throughout the amateur community."

--

Riley Hollingsworth's new monthly column will be titled "Riley's Ramblings." According to Moseson, it will incorporate "Washington Readout's" coverage of legislative and administrative actions that affect amateur radio along with additional topics of importance and/or interest to CQ's readers and the ham radio public at large.

Hollingsworeth's first column will appear in the July, 2012, issue of CQ. In it he will explain why ongoing FCC enforcement actions since his retirement have been somewhat "under the radar."

Riley Hollingsworth holds a Master's degree from the University of South Carolina, and a law degree from Wake Forest University. He lives in Gettysburg, Pennsylvania, with his wife, Pat. (CQ)

RESCUE RADIO: AMATEUR RADIO RESPONDS TO MID-WEST TORNADOES

Amateur radio operators in several states responded as a spate of tornadoes devastated areas of several states. We have more in this report:

--

When high winds and tornadoes called on Oklahoma Friday, April 13th, amateur radio Skywarn spotters and Amateur Radio Emergency Service members were ready.

Rick Smith, KI5GT, the warning coordination meteorologist in Norman said: "Once again, storm spotters played a critical role in helping the National Weather Service and local officials deal with dangerous storms during the past week across Oklahoma.

Amateur radio reports from local storm spotters gave forecasters important ground truth information when tornadoes struck southwest Oklahoma on April 13th. And it was a trained storm spotter from a volunteer fire department in northwest Oklahoma who alerted the National Weather Service as the tornado that would go on to strike Woodward, Oklahoma first developed. That information prompted a tornado warning that gave residents of Woodward about 20 minutes advance warning."

Near the town a Blair, Altus Skywarn Association members were providing spotter reports on the WX5ASA repeater system. In fact, the day after the tornado, Skywarn Coordinator Steve Grayson, KE5BPL, was leading a team of Red Cross volunteers in damage assessment. Within another two days, Grayson was deployed to Woodward to help with the recovery from the tragic F-3 tornado strike there.

Similar stories played out in the "tornado ravaged" cities of Woodward, Cherokee, and Norman where a total of seven deaths were reported. Cleanup and Recovery continues in Oklahoma which has seen at least one County so far declared by the Governor as a disaster area.

In addition to Oklahoma, several other states suffered storm damage as well. There, ham radio operators played key roles in severe weather spotting and relief efforts as well.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

More on this in future Amateur Radio Newsline reports. (KC5FM, National Weather Service Norman OK., others)

**

RADIO LAW: HAM GATHERING SIGNATURES ON PETITION TO VOID ANTENNA PROHIBITIONS

N4UM tells Newsline that he has begun a petition drive to the FCC. This, in an attempt to get the regulatory agency to void antenna prohibitions by developers and Home Owners Associations.

As of this report the petition has garnered over 700 signatures. N4UM says that he is doing this now because the FCC is currently requesting formal comments on emergency communications in amateur radio. The agency also wants to know the effects of impediments to the amateur radio service as part of the Docket GN 12-91 inquiry.

Comments on this federal study close on May 17th. N4UM says that his petition will also close on this same day. You can find his petition on-line at tinyurl.com/antenna-rights (N4UM)

**

ENFORCEMENT: FCC SETTLES 2007 UNCERTIFIED TRANSMITTERS WITH CONSENT DECREE

A Consent Decree has ended the case involving a hobby electronics supplier accused by the FCC of selling non-certified broadcast transmitters in the United States. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

The FCC has entered into a Consent Decree with Richard Mann doing business as the Antique Radio Collector. The Consent Decree settles an enforcement proceeding begun back in November of 2006, when the FCC's Spectrum Enforcement Division issued the Letter of Inquiry to Mann in response to a complaint alleging that he was assembling SSTRAN model AMT3000 AM transmitters built from kits and then marketing them in the United States.

In March of 2007 the regulatory agency issued the Notice of Apparent Liability for Forfeiture against Mann in the amount of $7,000 wich was affirmed that November. This lead to a number of Petitions for Reconsideration over the next 5 years and finally to a decision by the FCC and Mann that it would be far more prudent to finalize the matter through a Consent Decree. This decree has now been accepted by all parties and brings the matter to a close.

For the Amateur radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

You can read the entire decision and the text of the Consent Decree on-line at tinyurl.com/RichardMannConsentDecree (CGC, FCC)

**

ENFORCEMENT: ANOTHER UNLICENSED FLORIDA BROADCASTER FINED

The FCC has affirmed a Forfeiture Order in the amount of ten $10,000 to Robenson Thermitus of Miami, Florida. This for his alleged operation of an unlicensed radio transmitter on the frequency 98.7 MHz in the Miami area.

Back on January 20, 2012, the Enforcement Bureau's Miami Office issued the $10,000 Notice of Apparent Liability for Forfeiture to Thermitus. Since that time Thermitus has not filed a response to the NAL.

Now, based on the information the FCC has before it, the regulatory agency has now upheld the forfeiture order and given. Its also provided Thermitus the customary 30 days to pay the fine or to file an appeal. (FCC)

**

HAM RADIO AND SCOUTING: NEW DEDICATED IRLP TOPIC CHANNEL FOR SCOUTS

Radio Scouting and the Jamboree on the Air now have a common meeting place for Internet Radio Linking Project contacts or IRLP. As one of the new Topic Channels, scouts need only connect to IRLP Node 9091 to make contact with one another.

The Radio Scouting and Jamboree on the Air Topic Channel is available for use 24 hours a day, 7 days a week. A recommended time for calling has initially been established for 1800 UTC for weekend activities, such as Radio Merit Badge events, as well as contacts during Summer Camp. Another suggested time is 0100 UTC to accommodate most scouts during the evening hours.

For detailed information on available IRLP repeaters in your area, how IRLP works and operating guidelines, visit www.irlp.net on the World-Wide-Web. For more information about this and other IRLP Topic Channels take your web browser to www.irlptopics.net. (NZART)

**

WITH QCWA: BECOME A MEMBER OR PAY DUES ON-LINE

The Quarter Century Wireless Association has announced that those eligible can now join the organization or renew membership on-line.

The link to the applications are at www.qcwa.org/how-to-join.php After you complete the form, click 'Add to Cart. From there you yiu will be taken to PayPal to complete the transaction.

You don't need to be a member of PayPal to use a Debit or Credit card. You do need to be a member of PayPal to use your checking or savings account electronic transfer. Eligibility to join QCWA requires a

continuous 25 years as a licensed amateur radio operator. (N0UF)

**

HAM HAPPENINGS: N6G TO CELEBRATE GOLDEN GATE BRIDGE AT AGE 75

A Healdsburg, California ham has announced a special event operation to celebrate the 75th anniversary of one of the states most usefull landmarks. Jim Damron, N8TMW, is here with more:

--

Will Pattullo, AE6YB, tells Newsline that he will be hosting special event N6G an May 26 and the 27th. This to celebrate the 75th anniversary of the opening of San Francisco's Golden Gate Bridge.

AE6YB says he will definitely be on 7.265, 14.265 and 21.265 MHz during the two-day operation. He will also try to get on 80 and 10 meters if time permits. Domestic U-S stations should QSL N6G via AE6YB with a self addressed stamped envelope direct via his callbook address. DX stations are asked to include a US dollar to cover return postage.

>From Charleston, West Virginia, I'm Jim Damron, N8TMW, reporting.

--

More about the event is on line at AE6YB's information page on QRZ.com. (AE6YB)

**

HAMVENTION HAMVENTION 2012 AFFILIATED EVENT: MEGALINKT TO PROVIDE HAMVENTION AREA WIDE COVERAGE

If you will be attending Hamvention 2012, heres a bit of news for you. And again this year, K9NZF Systems and the Chief Anderson Amateur Radio Club are hosting the Dayton Hamvention MegALinK special event wide area voice network.

The MegALinK was conceived as a way to provide FM mobile voice coverage from west central Indiana all the way to Dayton, Ohio. This year it will also provide coverage into and on the grounds of the Dayton Hamvention itself.

More about it and how to use it is on-line at www.k9nzf.com. Questions and comments go by e-mail to megalink (at) k9nzf (dot) com. (K9ZF Systems)

**

HAMVENTION 2012 AFFILIATED EVENT TALK VIA A SATELLITE AT THE DAYTON HAMVENTION

AMSAT is inviting students attending the 2012 Dayton Hamvention to stop by the Satellite Demonstration Area just outside of the Ball Area entrance. This to experience the thrill of taking part in an actual

contact using one or more of the currently on-orbit amateur satellites.

There will be AMSAT volunteers there to explain how to make the contacts and during actual satellite passes. AMSAT adds that its volunteers will try to get as many students as possible to complete actual contacts.

There will be lists of satellite pass times in the satellite demonstration area and at the AMSAT booth inside the exhibition area to help those wanting to talk via a satellite to plan their schedule accordingly. (ANS)

**

HAMVENTION 2012 AFFILIATED EVENT: A MORNING OF D-STAR INFORMATION AND INSTRUCTION

Hamvention goers who are thinking of getting a D-STAR radio or those who are newly involved in the technology might want to take note of an affiliated event session.

A three hour class titled "A Morning of D-STAR Information and Instruction for New D-STAR Users" will take place on Friday, May 18th from 9:00 am to 12:00 noon Eastern Daylight time with check-in starting at 8:30 a.m.. The venue is the Drury Inn Ballroom located at 6616 Miller Lane, in Dayton.

There, several well known instructors will take you step by step into the world of D-Star digital audio communications. Some of the subjects to be covered include what D-STAR is, what can it do and how is it used. You will also learn what equipment is currently available, how radio memory management works, how to link to other repeaters and reflectors and much more. And those who attend will be eligible at a chance to win an Icom ID-31A handheld D-STAR radio.

The cost of the session is $25 and anyone planning to attend must register on-line before April 25th. To do that, simply take your web browser to tinyurl.com/dstar-dayton-register and fill in the required fields. More information on the session itself can be found at www.dstarinfo.com. (DSTARINFO.COM)

HAM HAPPENINGS: EMCOMMWEST - MAY 4 TO 6 IN RENO NEVADA

While the Dayton Hamvention is the show on almost everyones mind, its not the only big show happening in May. Another is Emcommwest that's held each year in Reno, Nevada. Here's Amateur Radio Newsline's Don Carlson, KQ6FM, with the details:

--

Emcommwest is returning to Reno, NV on May 4th through the 6th. This year marks the 10th anniversary of the ARRL Specialty Convention, with focus on Emergency Communications. But hurry, the advance registration deadline will be at Midnight on Saturday April 28th.

This year our ARRL Keynote speaker will be League COO Harold Kramer, WJ1B who will bring us the latest on Amateur Radio in general, with our ARRL Forum, hosted by Pacific Division Director Bob vallio, W6RGG.

We are especially proud to bring special guest and Sat. night banquet speaker Chip Margelli, K7JA, who was with Heil Sound for many years and is now Director of Sales & Marketing for CQ Magazine. You may remember Chip from the Code vs. Texting contest on the Jay Leno show a few years back. Emcommwest is honored to have this Amateur Radio legend join us for the 10th anniversary year.

The Sunday morning breakfast will welcome back Tom Taormina K5RC operator of the legendary contest station.

New this year will be an "ARES Leadership Forum" on Sunday morning, with a panel of SEC's discussing new ideas, innovations, large scale exercises and a wide variety of topics of interest to the Emergency Communications world in Amateur Radio.

Also new this year will be NARRI's VOIP conference all day Friday May 4th, Of course there will be the Friday night BBQ hosted by the SATERN team, vendor hall, Saturday morning swap meet and a host of topical forums and training sessions again this year.

For The Amateur Radio Newsline, I'm Don Carlson, KQ6FM in Reno.

--

For more information and registration, please head to the website emcommwest.org, or email info (at) emcommwest (dot) org. (Emcommwest)

**

HAM RADIO IN SPACE: LYRID METEOR SHOWER APRIL 21-22

The rocks in the sky are coming again. W0WOI reports via the VHF Reflector that Earth is approaching the debris field of ancient Comet Thatcher which is the source of the annual Lyrid meteor shower.

Forecasters expect the shower to peak on April 21st and 22nd. A nearly new moon on those dates will provide perfect dark-sky conditions for meteor watching.

According to meteor scatter enthusiasts, usually the shower is mild with about 10 to 20 meteors per hour. But unmapped filaments of dust in the comet's tail sometimes trigger outbursts 10 times stronger.

You can follow the approaching event and get nmore information on it on-line at spaceweather.com. (W0WOI via VHF Reflector)

**

HAM RADIO IN SPACE: SA AMSAT SPACE SYMPOSIUM - MAY 12

The South Africa AMSAT Space Symposium will be held at the University of KwaZulu-Natal on Saturday May 12th. The theme of the symposium is five decades of amateur satellites and celebrating the launch of OSCAR 1 fifty years ago. The full program and registration details are at tinyurl.com/sa-amsat-symposium (SARL)

**

ON THE AIR: VO1AA SPECIAL EVENT TO CELEBRATE MARCONI BIRTHDAY

On the air, the Society of Newfoundland Radio Amateurs will be celebrating the birthday of inventor Guglielmo Marconi. This, by operating station VO1AA on Wednesday, April 25th and welcoming some special guest at the same time.

The club plans on making an amateur eadio contact with Princess Elettra Marconi who will be in Bologna, Italy to celebrate her father's birthday. On this side of the Atlantic it is planned to have the Canadian Heritage Minister, the City of St. John's Mayor along with the Newfoundland Lieutenant Governor, exchange greetings with the Princess via amateur radio from VO1AA which will be located at the Cabot Tower.

This is the first time that this event has been attempted. As such, it is anticipated that it may attain a high level media exposure for amateur radio in Canada and possibly in Italy as well. Marconi received the first wireless signal at Signal Hill, Newfoundland. (VO1DTM/VO1DM)

**

DX

In DX, word that ON4CIT is reporting that a DXpedition to Togo will take place at the end of 2012 or the beginning of 2013. The callsign mentioned is 5V7TH. The exact dates are still to be determined. More as new information is made available.

OH1VR will be operational portable SV9 from Crete between April 21st and the 28th. OH1VR along with OH1ZAA will then be on the air portable VP9 from Bermuda between May 7th and the 13th. Activity for both operations will be on the HF bands and 6 meters, and using CW and SSB. QSL via their respective home callsigns.

Members of the Polish Amateur Radio Club Flora Fauna are active as HF-87-WARD through April 30th. This to celebrate the World Amateur

Radio Day and the 87th anniversary of the founding of the International Amateur Radio Union. QSL electronically via eQSL.cc and W-F-F LogSerach.

ZL1DD is now active as XU7AEL from the XU7AAA Rental Shack in Cambodia. He should be at that location through at least April 21st. Operation is on 80 through 6 meters using CW and SSB. QSL via his home callsign.

VE2XB will be on the air as V-31-X-B from Caye Caulker Island, Belize, between May 11th and the 31st. His activity will be on all High Frequency bands, as well as 6 meters. Modes mentioned are CW and SSB using an Elecraft K3 into a Hexbeam. QSL via VE2XB as listed on QRZ.com.

Lastly, ON4CIT and ON4BEC will be active as TO3X from St Barthelemy through April 30th. They will be using 40 through 6 meters on SSB and RTTY with some CW. QSL via ON4CIT, direct, via the bureau, or electronically using Logbook of the World

(Above from various DX news sources)

THAT FINAL ITEM: JAPAN CONSTRUCTION COMPANY PLANS SPACE ELEVATOR

And finally this week, while it might the stuff of science fiction dreams are made ofr, a Japanese construction company has announced that it will have built a working space elevator by 2050. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with this glimpse into the future:

--

Imagine putting a microsat under your arm, taking it on an elevator ride to a geostationary on-orbit outpost and eventually hsving it tossed into space. Such might be the case in about 40 to 50 years if the plans of a Japan-based construction company come to pass,

According to the The Daily Yomiuri newspaper, the company known as Obayashi Corporation has announced it will build a kind of space elevator by the year 2050. One that will be capable of shuttling passengers and supplies 36,000 kilometers above the Earth.

The company plans to use carbon nanontubes, which are said to be 20 times stronger than steel, to produce the cables required for the elevator. Those cables will be stretched to a counterweight 96,000 kilometers above our planet. Thats about one-fourth of the distance between the Earth and the moon.

An Obayashi official told the newspaper that the terminal station to be located 36,000 kilometers above Earth, will be reached by cars that can carry 30 people and travel at 200 kilometers per hour.

He adds that at this moment, the company cannot estimate the cost for the project. However, they will try to make steady progress so that it won't end just up as simply a dream.

For the Amateur Radio Newsline, Im Heather Butera-Howell. KB3TZD, looking at the future from near Burwick, Pennsylvania.

--

The Obayashi spokesperson could not estimate the cost the cost of the project but did admit that it will be high. And whether this project can actually become a reality is up for discussion for at least the time being. (Yomiuri News)

W4C Special Event Station - Earth Day Festival - Monday April 23

Posted: 19 Apr 2012 07:51 PM PDT
http://forums.qrz.com/showthread.php?343017-W4C-Special-Event-Station-Earth-Day-Festival-Monday-April-23&goto=newpost

Clemson University ARC, in conjunction with Students for Environmental Action's Earth Day Festival, will be operating portable from Lever Beach on Clemson's campus on Monday, from 1800-2300Z, somewhere on 20/15/10m depending on band conditions. Operating under special event call W4C.

Still attempting to figure out how to play up the eco-friendly side of ham radio, excepting the possibility of running portable solar, if we run into a briefcase of money somewhere to buy a panel.

If you're in the area and want to stop by, here is the Facebook event page with more detail:

https://www.facebook.com/events/397747510253025

Or if you'd like to friend the club on Facebook:

https://www.facebook.com/CUARC

And apologies to those of you who may have contacted us in the last couple months and are still waiting on QSL cards, we will have those out soon. School got crazy for a while there, somehow its getting more reasonable as we get to the end of the semester.

Ham Radio Operators Prepared to Communicate in Emergency Situations:

Posted: 19 Apr 2012 05:42 PM PDT
http://www.eham.net/articles/28146

Wood County officials plan to be ready. "Listen, Act and Live" is the theme for the 2012 Tornado and Severe Weather Awareness week, which runs through Friday. At 1 p.m. today, Tornado Awareness Day, a mock tornado watch (a watch means conditions are right for a tornado to form) will be followed by a mock tornado warning (a warning means a tornado has been reported or Doppler radar indicates one is possible) starting at 1:45 p.m. in Wood County. Being prepared ensures everything -- and every person -- will be ready to take action, emergency officials say.

Ham Station Debut Music to Radio Fans' Ears:

Posted: 19 Apr 2012 05:41 PM PDT
http://www.eham.net/articles/28145

Young geeks and amateur radio enthusiasts in the state capital can now explore the exciting world of ham radio. National Institute of Amateur Radio (Niar), Hyderabad, on Wednesday joined hands with Prof G.P. Sinha Centre for Disaster Management and Rural Development, Patna for setting up a ham radio station at Rajendra Nagar as a pilot project sponsored by the Union ministry of information and technology. Derived from the initial letters of three pioneers of the radio ' Hertz, Armstrong and Marconi ' ham is used to describe an amateur radio operator who facilitates communication using radio waves. Ham radio is widely taken up by individuals above 12 years across the globe as hobby and a communication equip-ment during emergency.

RAC Bulletin 2012-24E - New Deputy Director Ontario North/East
2012-04-20

I am pleased to announce that Glenn MacDonell, VE3XRA of Ottawa has agreed to become the new Deputy Director for Radio Amateurs of Canada, North East Ontario Region.

He obtained his Basic Amateur certificate with honours in 2008 and obtained his Advanced Amateur certification in 2009. He has been interested in Amateur Radio since the late 1950's and participating in a couple of Field Days with the Kingston ARC in the early 1960's.

Once Glenn obtained his license he joined several Ottawa clubs and started to take a leadership role in the Ottawa ARC. In 2011 he was elected president, a position he continues to hold. He led the team that made presentations the Ottawa city council regarding amateur radio exemptions from the municipal public consultation process for antenna systems which was completed successfully in March 2012.

Glenn enjoys operating on the bands from 160 m to 70 cm using various modes of communications. He participates in public service, assisting in the Canadian Ski Marathon 2010, 11, 12, and as net control on local HF and VHF (SSB) nets. He also dabbles on microwave bands from 2.4GHz to 24 GHz during ARRL VHF and microwave contests.

During his working career he was employed by the Federal Government in various departments as diverse as Environment to Foreign Affairs. He was also an advisor on industrial development and international cooperation related to Canada's space program (Space Station, RADARSAT 1 and RADARSAT 2, space science and satellite telecommunications).

Glenn will bring administration, innovation and management skills to RAC and I am looking forward to working with him as part of the North'East Ontario team.

Glenn can be reached via email at ve3xra@rac.ca

SARL NEWS - SUNDAY 22 APRIL 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

RASSIE ERASMUS ZS1YT NEW SARL PRESIDENT

ANNUAL AWARDS

You are listening to ZS6SRL. Stay tuned for more details on these and other items.

RASSIE ERASMUS, ZS1YT, NEW SARL PRESIDENT

Rassie Erasmus, ZS1YT, was elected as SARL President. In his address at the annual dinner held last night he said that his objective for his year of office is "Together we will achieve more for amateur radio."

He said "I believe that clubs should become more active in the SARL and its national activities and, on the flip side, the SARL must be more engaged with clubs. The old clich&#65533; of "unity is strength" could not be more true today than ever before. While we achieve successes at international level, we need to work harder at successes at national level. We need to work better together, communicate more with each other. Clubs and the SARL need to support each other to grow and expand. The IARU's international voice is only strengthened by national members and societies.

"I urge each club to affiliate with the SARL and appoint a liaison officer to strengthen the communications channel. Communications must be two way and that is the important role of a liaison officer at every club. Communicate to the SARL what is happening at club level and how the SARL can add more value. It should also be the task of the liaison

officer to ensure that the SARL communication channels reach club members by including information in local bulletins, at club meetings and at club committee meetings."

W have now heard what Rassie's goal is, Let u's unanimously support him to achieve it.

Rassie, strength and good wishes.

MOTIONS AND DISCUSSIONS AT THE AGM

The results in respect of motions and discussions at the AGM will be included in next week's SARLNEWS.

ANNUAL AWARDS

Here follows some good news for a number of radio amateurs.

Awards were presented at last night's AGM Award Dinner as follows:

Honorary Life Membership, the SARL's highest honour to: Francois Botha, ZS6BUU Dennis Green, ZS4BS

Willie Wilson Gold Badge for exceptional and meritorious service to the League to: Dick Stratford, ZS6RO Tjerk Lammers, ZS6P

Jack Twine Merit Award to Amateurs who, in the opinion of their fellow amateurs and the League's Council, exemplify the qualities desirable in a Radioamateur,to: David Cloete, ZR6AOC Dawie Conradie, ZR6DHC Anthony Forteath, ZS2BQ Geoffrey Levey, ZS6GRL Romeo Nardini, ZS6ARQ Theunis Potgieter, ZS2EC Nico van Rensburg, ZS6QL Phillip van Tonder, ZS6PVT Willem Weideman, ZS6WWJ

President's Award to: Riaan Greeff, ZS4PR Hans van de Groenendaal, ZS6AKV Frik Wolff, ZS6FZ

Icom Excellence Award, the "premier" award of the SARL to: The 7P8EME team

Operating Awards.

Arthur Hemsley 2 metre Trophy to a Radio Amateur for his/her individual achievements with transmissions in the 2 metre amateur band, to: Andre Pretorius, V51B and Nazir Gesant, ZS1NAZ

Barney Joel Trophy to any member of the SARL for the best performance during the year whilst working HF mobile to: Alan TerBlanche, ZS6EXT

Joseph White Plaque for exceptional achievements in the 432 MHz band during the past year, not for the longest distance worked, but for all round achievements to: Derek Gravett, ZS5Y

Bert Buckley Six metre Trophy to any radio amateur for his/her individual achievements with transmissions in the six metre amateur band, not for the longest distance worked but for outstanding work or

activity on six metres to: Lynette Human, ZR6LHT/ 7P8LHT

Radio ZS Two Metre Floating Trophy to the amateur who achieved the longest distance on the 2 metre band during the year, to: Alan Saul, ZS1LS

Then, the Radio ZS Awards:

Radio ZS Shield. Awarded by the Editor of Radio ZS to a SARL affiliated Club or member who best supported Radio ZS during the year, to: Henry Chamberlain, ZS1AAZ Karl Canitz, ZS1KC Ren van Zyl, ZS1VR Hans Nothling, ZS1WZ

JJ Pienaar Trophy for the best article published in Radio ZS during the past year to: Pieter Human, ZS6PA

Gary Immelman RA Heritage Floating Trophy for the best article of an historic nature of an event that occurred more than 5 years previously or an interesting personality that has played an important part in the development of Amateur Radio in years gone by to: Vidi la Grange, ZS1EL

Contest awards.

Silent Keys Memorial Trophy SSB to the amateur who achieved the highest score during the annual HF Phone Contest to: Quartus de Witt, ZS6EE

Silent Keys Memorial Trophy CW to the amateur who achieved the highest score during the annual HF CW Contest to: Roger Jones, ZS6RJ

Joseph White Trophy to the amateur who achieved the highest score on any one band, during the annual HF Phone Contest to: Pierre van Deventer, ZS6A

Fred Mills Trophy for the highest score of a contestant who has never won a SARL contest before to: Geoffrey Levey, ZS6GRL

Anon Trophy to the amateur who achieved the highest score on any one band, during the annual HF CW Contest to: Bruce Dunn, ZS5XT

HOS Trough to the amateur who achieved the highest aggregate score in both annual HF Contests to: Hans Kappetijn, ZS6KR

The Club Participation Award (Branch Participant Trophy) for the Club who achieved the highest participation in both annual HF CW and Phone Contests to: West Rand ARC

The "Ray Webber, ZS6RSW" VHF/UHF Trophy to the amateur/club who achieved the highest score during the annual SARL VHF/UHF Contest to: Andre Botes, ZS2ACP

The SARL 80 m Club Contest Trophy to the amateur radio club who achieved the highest score in the six SARL 80 m club contests to: West Rand ARC

The Hamnet Shield for an individual or group for excellent service in a particular area to the community, the authorities and to Hamnet in particular for instance cooperation with disaster relief organisations and enthusiastic provision of emergency communications to: Dave Reece, ZS1DFR

RAE Awards.

An Arland Ussher Gold Pen for the highest marks in the two RAEs to: Duberette Labuschagne, ZS6DUB Jonathan Woodburne, ZS3JW

Then, the Boland Club presented an Icom dual band handheld to the best class B student, Karel Bezuidenhout, ZU6KB, who scored 98% in the RAE Exam last year.

Congratulations to all of you and we look forward to keen competition for next year's awards.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity remains at low levels. There are presently five visible sunspot groups with a sixth region forming. The past couple of days have shown a sharp increase in visible sunspots when compared to just last week.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 62.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 10 m not far behind.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

27 April - Last day to enrol for the May RAE. 28 April - West Rand Amateur Radio Club next flea market at 12:00. 12 May, SA AMSAT space symposium; visit www.amsatsa.org.za for details and registration.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570, was 17 760, kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230, was 4 895, kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73. /EX

Frequencies Tuned to Hamfest 2012:

Posted: 20 Apr 2012 06:01 PM PDT
http://www.eham.net/articles/28149

Amateur radio enthusiasts swarming Georgetown this weekend: GEORGETOWN, DEL. -- This Saturday, radio enthusiasts will descend on Georgetown for the Delmarva Amateur Radio and Electronics EXPO at Sussex Technical High School for a full day of information, camaraderie, shopping and fun. Sponsored by the Sussex Amateur Radio Association, the event is a one-of-a-kind, all-inclusive event that aims to please everyone from novice to expert. This year's expo aims to do the same. Hamfest Chairman Bill Duvenkeck said that the event will draw 300 to 600 people from all over the region. And, while a lot of these people won't seem much like amateurs, novices shouldn't shy away from the event. "We have a lot of vendors, especially commercial vendors," Duvenkeck said. "And, we expanded the number of commercial vendors this year so that people who come can buy everything they need for their enjoyment of electronics." If new electronics doesn't fit a recession-era budget, there is also a flea market area for people to buy, sell, and trade used items. It's also where most of the meeting and talking takes place.

//
TeleTweet for iOS Uses Morse Code to Turn Tweets into Telegrams:

Posted: 20 Apr 2012 05:59 PM PDT
http://www.eham.net/articles/28148

[prMac.com] Honolulu, Hawaii - Shacked Software, Hawaii's leading developer of iPhone and iPad apps, today announced the release of TeleTweet, an all-new mobile app that allows iPhone, iPad, and iPod touch users to send and receive Twitter messages via Morse code. TeleTweet is now available in Apple's App Store. Designed to preserve the look, feel, and sound of classic telegraph keys, TeleTweet integrates with Twitter to give users the nostalgic feeling of sending or receiving a telegram in Morse code. As messages are tapped on the realistic telegraph key, they are automatically translated into letters and numbers and published to your Twitter stream for your followers to read. For people you follow on Twitter, TeleTweet translates their messages into Morse code and prints them via an authentic 1869 Thomas Edison Ticker Tape Machine, as if you were receiving actual telegrams.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

596. rec.radio.info Posting Guidelines

Newsgroup: rec.radio.amateur.misc
Date: 2012-04-22 06:05:01 UTC
From: rram@panix.com
Message-ID: <radio/rec-radio-info/guidelines-1-1335074700@panix.com>

Archive-name: radio/rec-radio-info/guidelines
Revision: 1.5 2007/03/22 16:30:49
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rri/index.html

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

V55V_safariteam.jpg

Namibia is a country far south from the main communication paths in a
contest. However, it is not interesting only as a DX, but impressive by its
beauty and a very natural character. Operators of a German crew kept
something of this beauty on their cameras. See the video on YouTube.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 22nd April 2012

IRTS AGM & Rally 2012

Today we celebrate the 80th year of the foundation of the Irish Radio Transmitters Society. This takes the form of the traditional radio rally and in the afternoon approximately 14.30 we have the annual general meeting at the Fairways Hotel in Dundalk, hosted by the Dundalk Amateur Radio Society. Today is a milestone and an important day in the life of the Society which represents the interests of Amateur Radio Operators both at home and to the International Amateur Radio Union. Thank you for being part of the Irish Radio Transmitters Society.

Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 28th June at 2 p.m. in the ComReg Offices in Dublin. The examination may be held on that day at other centres where warranted by the number of candidates. Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis. Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form.

HAMCON

The Northern Ireland Amateur Radio Conference - brought to you by West Tyrone Amateur Radio Club, Technology Education Centre, 2 Spillers Place, Omagh. Lectures/Seminars, Demonstrations, Special Interest Groups, Trade Stands, National Societies, Disabled Facilities, Door Prizes, Raffle, Catering. The event this year takes place 16th June 2012.

South Eastern Amateur Radio Group

For those who have expressed interest in participating in Theory Classes leading to the Amateur Radio Licence with South Eastern Amateur Radio Group, there will be an information / planning session at our next general meeting which takes place at 8:30 p.m. on Monday 30 April in the Roanmore Centre, Cleaboy Road, Waterford. All are welcome!

The Geoparks communications weekend this year takes place on Saturday 26 and Sunday 27 May. South Eastern Amateur Radio Group will again operate from Tankardstown on the Copper Coast Geopark in Co. Waterford. The callsign is EI2GEO (pending approval). Activity will mainly be on HF. Anyone wishing to get involved should contact the club on info/ at/searg.com or phone Mark Wall on 087-6302026. For more information about the Geopark, visit www.coppercoastgeopark.com

---

ARACE

(F4KIR) is an amateur radio association located in Saint Malo, France. The Tall Ships Race (TSR) is the biggest European sailing event and will be organized in Saint Malo next July.

In celebration of the event a special call will be activated from 29 June to 9 July from Saint Malo with special QSL and award. The website address is www.arace.fr.

North Cork Radio Group

The North Cork Radio Group is pleased to announce confirmation of their annual rally, to be held on Sunday, 9th September 2012 at the Roebuck Room, Commons Inn, Blackpool, Cork. Doors open at 11am and admission is 5 per person (children are free, as per usual). Raffle tickets will also be available at the door. The usual traders will be present, and anyone wishing to reserve a table, or would be interested in setting up a stall, should contact Edwin Van Mierlo (EI2HEB) on 086 3885741 or via email at ei2heb /at/ ei1nc.com. More details will be available in the coming months.

DX News

Six Australian operators from the Oceania DX Group will be QRV from Vanuatu in the Pacific. Callsign will be YJ0VK and dates of the DXpedition are 21 April until 5 May. It is expected that 3 stations will be active on the HF bands. QSL manager is VK2CA.

Franck F4DTO and Patrick F4GFE will air the callsign ZA100I (ZA one hundred I) during a trip to Albania. They start on 22 April and will QRT on 29 April.

Seppo OH1VR returns to Crete on holiday and will be active as SV9/OH1VR until 28 April. QSLs go via the home call.

Larry W6NWS has been QRV recently as XV2W from Vietnam. He will be there until 12 June. QSLs are via his home call and QSOs are usually uploaded to Logbook of the World on a daily basis.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th-April, through Sunday, 22nd-April there were 224 countries active. Countries available: 1S, 3A, 3B8, 3D2, 3D2/r, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T5, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9X, VP2E, VP2M, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS (AF-049). Mart, DL6UAA, will once again be back on Mauritius as 3B8MM, but the length of his stay is unknown at this time. Activity is usually on 160-10 meters using mostly CW. Some SSB and Digital will be possible. QSL via DL6UAA, by the Bureau or direct.

4J, AZERBAIJAN (Special Event). The Ministry of Communications of Azerbaijan has approved the uses of the following special callsigns dedicated to and during the "Eurovision Song Contest" between April 15th and June 15th. Look for the special callsigns listed below using the suffixes SONG or S0NG:

Individual or Special Club Callsign	Individual or Special Callsign	Club Callsign	Callsign
Safari Club/4J4K	4JS0NG	Oktay/4J7A	4J7SONG
Gen. Aslanov Morita/4JR0HYT	4JR0SONG		
Club/4K7Z	4KS0NG	Andrey/4K6DI	4J1SONG
Leonid/4K8F	4K2012SONG	Mehdi/4J7FM	4K1SONG
Serqey/4J5A	4J12SONG	Rashad/4J9M	4J9SONG
Vladimir/4K9W	4K9SONG	Asif/4K6AL	4K4SONG
Boris/4K4K	4K12SONG	Mixail/4K8M	4K8SONG
Vladimir/4K6C	4K6SONG	Denis/4J9NM	4J4SONG
Natig/4J5T	4J5SONG		

5X, UGANDA. Freddy, F5IRO, is expected to be here on a work assignment starting early May through June (exact days are not yet known). With the help of David, 5X1D (KH9AE), and some others, he is hoping to get a license during the first week of his arrival. On his arrival Freddy plans on setting up his Elecraft K3 and DIY antennas, probably verticals or dipoles, space permitting at the location. Activity will be on CW on the upper HF bands, especially on 10 MHz in the evening (5X = GMT + 3) and possibly some PSK operations. Watch the DXClusters for spots. QSL is via Michel, F8DFP, by the French Cureau or direct (w/SAE and IRC). For more updates and info, watch Freddy's Blog page at: http://j28ro.blogspot.com

6O, SOMALIA. Andy, RN3AKK, reports that Darko, J28AA/E70A, will once again be active as 6O3A from Hargeisa between May 25-31st. Activity will be on SSB, RTTY and 50 MHz. QSL via K2PF. For possible updates (under news), online log, and pictures, check out the Bosnia and Herzegovina Contest Club's Web page [BHCC] at: http://bhcc.ba

6W, SENEGAL (Early Announcement). Al, F5VHJ, will once again be active as 6W1RY during the CQ WW DX SSB Contest (October 17-28th) as a Single-Op/ All-Band/High-Power entry. QSL via F5VHJ, direct, by the Bureau or LoTW.

9H, MALTA. Dick, DJ2EH, is currently active as 9H3XX from Malta. The length of his stay is not known at this time. Activity this past week has been on 30/17/12/6 meters CW. QSL via DJ2EH.

C6, BAHAMAS (Update to OPDX.1056). MDXC C6AGW PRESS RELEASE #2 (TESTING IN THE RAIN) [edited]: "During the [past] weekend, under the Italian rains (cats and dogs raining, hi), Gabriele, I2VGW, has tested all the antennas and the equipments for his Bahamas round trip. As announced, he plans to be operating as C6AGW starting April 26th through May 6th from Biminis Islands (NA-048) and/or Berry Islands (NA-054) quite rare IOTA references and, of course, also from New Providence and Long Island, Great Bahama Bank (NA-001). Following also the requests of many lighthouses chasers, Gabriele would like to confirm that all these references will be printed on his QSL card. That's meaning: New Providence (main) Island is LH 1115 and NA-001; Long Island is LH 1898 and NA-001; Bimini Island (South) is

LH 2467 and NA-048; and Berry Island (Gr. Stirrup Cay) is LH 1903 and NA-054. We remind you that this new Gabriele adventure will be a holiday style operation. In any case Gabriele, as usual, will give great emphasis to the Digital modes and the WARC bands, but he'll keep in his mind SSB too. He'll take with him his Icom 7200, a Hampole, a KW5 and a Buddipole. For more info and any updates, visit the DXpedition's Web site at: http://www.mdxc.org/c6agw
Gabriele will be supported by the MDXC with an online log, news in real-time, pictures and videos."

C9, MOZAMBIQUE. Daniel, ZS6JR, will once again be active as C91JR from the coastal resort of Bilene between April 22nd and May 10th. Activity will be holiday style and operating mostly RTTY or PSK with 100 watts into a vertical antenna. QSL via GI4FUM. Look for more details and updates on: http://www.3da0ss.net

CY0, SABLE ISLAND. Al, VE1AWW, is once again active as CY0/VE1AWW as of April 17th, and will be there for the next three months. He is an assigned worker on the island and his schedule is 3 months ON and 3 Months OFF. His activity will be limited to his spare time. Al mentions on QRZ.com, "I need to replace the feedline for the the 40/80m antenna, but up and running on 20/17/15/12/10 and 6m." He was heard this past week on 15 meters SSB - 21336 kHz between 2230-0000z. QSL via his home callsign, direct or by the Bureau.

DT12, SOUTH KOREA. Special event station DT12AWC is now active until April 30th. Activity is taking place during the 2012 Asian Weightlifting Championships being held in Pyeongtaek. Activity is expected on 80-10 meters, as well as 6 and 2 meters, using CW, SSB, RTTY and PSK31. QSL via DS2GOO.

EM350, UKRAINE (Special Event). Look for special event station EM350S to be active between May 1st and June 30th. Activity is to celebrate the 350th anniversary of Ivano-Frankivsk City [1662-2012]. Operations will be on all HF bands and 6 meters using CW, SSB and the Digital modes. QSL via UW8SM, direct, by the Bureau, LoTW and eQSL.

FO, FRENCH POLYNESIA (IOTA Op). Pat, F4EBT, will be active as FO/F4EBT between June 1-24th, and plans to activate the following French Polynesia IOTA Islands: Tahiti (OC-046), Moorea (OC-046), Raiatea (OC-067), Huaine (OC-067), Bora-Bora (OC-067) and Maupiti (OC-067). Activity will be holiday style, usually SSB only on 80/40/20/17/15/12/10 meters using a TS-50 w/100 watts into a FD4 Multiband antenna. QSL via his home callsign, direct (1 IRC or 2 USDs) or by the Bureau.

GM, SCOTLAND (IOTA/SCOTIA Op!). Andre, GM3VLB, will once again try to activate some of the SCOTIA islands (SCOTtish Island Award) he missed last year in the Orkney IOTA Group (EU-009, SCOTIA OI14). He states, "In the hope of completing what I now call the 'SCOTIA Challenge', which in my own case means activating the last five of the program's 200 islands which I haven't yet activated, I am returning to the Orkney (EU-009) group, arriving there May 21st. I have a return booking on June 7th, but I am

prepared to remain in EU-009 longer, if necessary. Having been dogged by high winds in late summer/early autumn on previous expeditions to the Northern Isles, I am trying the earlier part of 'activating season' this time. The 5 remaining islands are Muckle Green Holm (OI20), Linga Holm (OI21), Eynhallow (OI24), Faray (OI28) and Calf of Eday (OI29). Some are quite difficult to approach and to land on (steep rocky shores) as well as being subject to very strong tidal current (the waters off Eday are in fact the chosen location for testing the latest tidal generators, so near-perfect weather conditions will be required. I believe most may be first-time activations. This will be a 'solo' operation (XYL Veronica having decided discretion was the better part of valour!). If successful, I hope to continue activating islands, this season, in a more relaxed way, hopefully teaming up with regular 'island buddy' Alex, G(M)0DHZ, to re-activate some less remote islands, which even some of the high-scoring SCOTIA chasers may have missed - I will be doing an analysis of the records to determine the 'most wanted'."

HB0, LIECHTENSTEIN. Operators Nicola/IN3ADW and Luca/IN3HUU will be active as HB0/homecall from Liechtenstein between May 8-12th. Activity will be mainly on 40/20/17/12 meters, as well as 15/10 meters propaga-tion permitting, using SSB and some RTTY. Suggested frequencies are: 7110-7130, 18125-18135, 14215-14225 and 24945-24955 kHz. QSL via their home callsigns.

IOTA NEWS.....
AS-138. Dale, BA4TB, will lead a team of operators and be active as as BY1WXD/5 from Gulangyu Island between May 4-7th. QSL via BA4TB.

AS-146. Operators JunJian/BD4KYA, Zhigang/BD4KRB and Yongwei/BG4KLA will be active as homecall/4 from Jiming Island (WLOTA 2489), Chengshan Jiao area, Weihai Prefecture, Shandong Province, China, between April 23rd and May 3rd. Activity will be on all HF bands and modes. QSL via their home callsign, by the Bureau or via BA4EG (QRZ.com QSL forward service).

EU-008. Members of the Kilmarnock and Loudoun Amateur Radio Club will once again be active as MS0KLR from the Isle of Muck (IOSA NH06, SCOTIA DI18), Inner Hebrides, between April 24-28th. Activity will be on all HF bands and modes. QSL by the Bureau to MM0KLR, or direct to MM0GHM. More details at: http://qrz.com/db/MS0KLR Also see: http://www.klarc.org

EU-032. Be, F8GRY, will be active as F8GRY/p from Re Island starting Monday, April 23rd. His length of stay was not mentioned. Activity will be mainly on the Topband starting an hour before sundown throughout the night and on VHF during the daytime. He will operate on the other bands, but on requests. QSL via his home callsign, direct or by the Bureau.

EU-039. Members of the Charente DX Group (CDXG) will be active as TM0CI from Chausey Island (DIFM MA 004) between May 19-25th.

QSL via F5EOT, by the Bureau and direct (Postage or Mail
with Paypal). For updates, watch the CDXG Web page at:
http://www.frag33.org/www.cdxg.org

EU-108. (Reminder) Jim, MM0BQI, will be active as GB5TI from Lunga
Island (IOSA NH17, SCOTIA DI09, WAB NH17), Treshnish Isles,
Inner Hebrides, between April 27th and May 1st. Activity will
be on the HF bands, on or near the usual island and IOTA
frequencies. QSL via LoTW, direct or by E-mail Bureau requests.

EU-172. Noel, OO4O, will be active as OZ/OO4O from Hou Fyr, on Langeland
Island (WLOTA 0590) between April 29th and May 5th. Activity
will mainly be CW/SSB on the HF bands. QSL via LoTW and the
Belgian QSL bureau.

NA-143. Leslie, AD5WB, will once again be active from Galveston Island
(USI TX001s) during the RSGB IOTA Contest (July 28-29th) as a
Single-Op/Fixed-Island/High-Power entry. QSL via his home
callsign, direct, by the Bureau, LoTW or eQSL.

SA-048. (Update/Callsign Change) A team of Venezuelan operators from
the Grupo DX Caracas (GDXC) were active as YW5PI (not YX5P)
from the rare Patos Island between April 19-23rd. QSL via DM4TI.

KP4, PUERTO RICO. Jeff, VA3QSL, will be active as KP4/VA3QSL from
Puerto Rico (NA-099, USI PR006S, WLOTA 2802) between April 22nd and
May 4th. Activity will be holiday style but will include two days on
the Island of Vieques (USI PR-007S, WLOTA 4042). Operations will be
near the IOTA frequencies on 40/20/6 meters using CW and SSB. Jeff
hopes to activate some lighthouses too. He will be using 100 watts
into a dipole and hamsticks. QSL via his home callsign, direct (w/
SASE/SAE and sufficient postage) or by the Bureau.

MJ, JERSEY. Operators Peter/ON8ZZ, Dominiek/ON3JA and Frederik/ON3NT
will be active as MJ/OT9Z from La Moye, Jersey (EU-013, WLOTA 0818),
between July 20-27th. Activity will be on all HF bands using CW and
SSB. QSL via OT9Z, by the UBA QSL Bureau.

OD, LEBANON. Luigi, IV3XNF, will be on a United Nations Interim Force (UNIFIL) mission in Lebanon between May and October. He will be staying on a military base but plans to be active during his free time and operate as a QRP station using the callsign OD5/IV3XNF/QRP. Activity will be on 80-10 meters using a Yaesu FT-817ND into a Carolina Windom 80 antenna or an End-Fed Half-Wavelength Antenna (EFHWA - fishing pole). Preferred modes are CW and Digital. QSL via direct to his home callsign. For more update and info, see: http://iv3xnf.jimdo.com

E51M QSL STATUS. As of April 19th, the QSL cards are ready to send. The Online QSL Request Service (OQRS) is now available online at: http://manihiki2012.de/OQRS.html
QSL Manager is DJ8NK, direct (see QRZ.com) or by the Bureau.

AT2DW QSL STATUS. It was reported that the AT2DW QSOs were uploaded to LoTW on April 20th. The QSL cards have been printed and shipped by Gennady, UX5UO, and should reach the QSL Manager Sarla, VU2SWS, within the next few days. Snail-mail posting of cards would begin soon after. Meanwhile, if there are still any cases of busted or missing QSOs, please inform Sarla at: sarla.yl@gmail.com
The searchable log for the Bet Shankhodhar Island operation can be seen at: http://www.clublog.org/charts/?c=AT2DW
The expedition Web site is at: http://www.dxcoffee.com/at2dw

ST. PETER & ST. PAUL ROCKS LOGS (Update). Cesar, PY2YP, continues to obtain logs for St. Peter & St. Paul Rocks DXpeditions from the operators and uploads them into LoTW. This week he informs OPDX, "Just uploaded

to the LoTW a portion of the 1991 PY0SR operation." He also mentions, "I've received ZY0SA and ZY0SB logs from 1987 operation, and just waiting for PW0PP and PY1RO from the 1978 operation; the latter ones have already been mailed. These 2 DXpeditions are quite interesting for the low band DXers; so far I have noticed 160 meters QSOs in the 1978, 1987 and 2001 operations only."

QSL EH8WDX via EA8ADL. Special callsign used from the Island of Gran Canaria (AF-004), Canary Islands, during the World Amateur Radio Day celebration.

QSL RECEIVED VIA LoTW: 5B4AJC, 5H3MB, 5K3R, 5V7CC, 7Z7AA, 8P5A, 9U0A, A25KW, CO2WF, CQ7OA, CX4ACH, DQ4W, EB3JT, GW9T, HK1MW, HP1/IZ6BRN, JA0FVU, JA1VND, JA6LCJ, KH2L, KH7Y, MJ/K8PT, OK2WMC, OS8A, OZ1TMK, P49Y, PJ4/W9MNJY, PJ4Z, PJ5Z, PS2T, R3LA, SM5ELV, SP3FCO, UA3KW, UA9MA, UU7J, UX7QV, V21ZG, V25AA, V73NS, VK0BP, VK1HBB, VK3BRW, XE1/DL3DUE, YU8NU, ZP6CW, ZM4T, ZX2B and ZZ2T

QSLS RECEIVED VIA MAIL: 3D2T, 4S7NE, 6Y0A, 8P5A, 8P5Y, 8P9WH, 9M6/OH2YY, 9Y4LAS, 9Y4NW, A45XR, A71BU, CP4BT, EX2T, FM/F6AUS, HI3K, OA4SS, P40L, P40W, P49Y, PJ2T, PJ4Z, PJ7PT, RI1FJA, T2T, TI5W, TL0CW, TO4M, TX6T/P, V21ZG, V31RR, V31TP, V55V, VP6T, VK0TH, XT2IVU, XU7DLH and ZD7XF

QSLS RECEIVED VIA THE BUREAU: R750Y and YU4NC

ST, SUDAN. Robert, S53R, will be active as ST2AR from Khartoum during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band (TB) entry. QSL via S53R or LoTW.

T30, WESTERN KIRIBATI (Update). The T30PY and T30SIX DXpedition to Tarawa Island (OC-017), Western Kiribati, between October 16-25th, now has their Web page up and running at: http://www.mdxc.org/t30py
The current T30PY/T30SIX team members are: Leo/PP1CZ, Orlando/PT2OP, Fabio/PY2AAZ, Rick/PY2PT, Alex/PY2WAS (Team Leader), Fred/PY2XB (Team Co-leader), Miguel/PY3MM, Fernando/PY4BZ, Jim/PY7XC and Xavier/PY7ZY. Activity will be on 160-10 meters using the T30PY callsign, and T30SIX will be used on 6 meters. They expect to have 3 stations running simultaneously on HF and one on six meters. The following modes will be used: SSB, CW and RTTY. EME will be on six meters. Suggested frequencies are:
CW - 1833.5, 3524, 7024, 10124, 14024, 18084, 21024, 24894 and 28024 kHz
SSB - 3798, 7085, 14190, 18145, 21295, 24945 and 28495 kHz
RTTY - 3580, 7038, 14080, 18102, 21080, 24920 and 28080 kHz
6M - 50102/CW and Beacon 50110-50120/SSB
SPECIAL NOTES:
1] The CW listening frequency will always be up (except on 160m), starting at just 1 kHz or 2 kHz up depending on the pile-up size. On 160m, they will be listening 1823 and UP for WW and 1818 and UP for Japan. QSX will be announced.
2] They may use alternative frequencies depending on QRM, if necessary.
3] On 6m, 50110 kHz will be used for propagation checking calls. They will move to 50120 SSB and 50102 CW as soon as activity peeks up. The beacon is breakable. If you hear it, please break in and/or

advise HF operators.
4] EME: The frequency will be 50.198 MHz using WSJT-JT65A. T30SIX will transmitt the first sequence. Important -- EME operations are not confirmed at this time.

Considering the high cost of logistics, donations are welcome to help the team to support all related costs. There is a donation button on their site for which the donor may click and use Paypal. QSL via PY2PT, direct, by the Bureau ("Estimation to reply: at last, 3 years."), or by their OQRS on the Web page.

V2, ANTIGUA. Darrell, AB2E, will once again be active as V26E from Antigua (NA-100) between May 23-30th. Activity will include the CQWW WPX CW Contest (May 26-27th) as Single-Op/All-Band/Low-Power (A) entry, the same as last year which resulted in #2 World and #1 North America for the category. All operations before and after the contests will be either on the 30/17/12 meter bands or the lower bands. Also, for the first time, he will attempt RTTY on all bands. QSL direct via AB2E for any and all operations from 1993 to present. Be sure to include an SASE, green stamp, or new IRC or you won't get a card. Sorry, no Bureau cards at this time, and no eQSL. All logs from all V26E operations have been uploaded to LoTW.

V4, ST. KITTS AND NEVIS. John, W5JON, will once again be operating as V47JA from his Calypso Bay, St. Kitts, W.I., hillside vacation home (CQZ 8, IOTA NA-104, Grid FK87pg) between July 12th and August 2nd. Activity will be on 80-6 meters using SSB. His activity will also include RSGB IOTA (SSB) Contest as a Single-Op/All-Band entry. Equipment will be: Kenwood TS-590S and a SB200 Amplifier and a 80-10m Multiband Dipole and S9 Vertical; 6m will be a 3 element yagi. His XYL Cathy, W5HAM, will occasionally operate as V47HAM. ALL QSLs go to his home callsign W5JON. Also via LoTW.

VK0, MACQUARIE ISLAND (Update). Trevor, VK0TH, is now QRT. He went QRT earlier than expected due to "2 hours of EU Jamming, Tuning and Mayhem". Trevor states, "Thank you everyone for all the contacts it was great fun in the main. I was disappointed by stations that operated outside the Amateur Radio Code of Conduct. However, I guess that's just human nature. Certainly a lot of you were very passionate to make that VK0/mm contact, and the last few days were quite over whelming as the frenzy increased with people aware it was final days." QSL via JE1LET direct ONLY.

VP2M, MONTSERRAT. John, KB4CRT, will once again be active as VP2MRT from Gingerbread Hill, St. Peters Parish, Montserrat (NA-103, WLOTA 1475, WW Loc. FK86VS) between June 6-12th. Activity will be on 80-2 meters using SSB, some CW, possibly PSK, and be in the June VHF Contest. He will be looking for AS and OC stations. QSL via KB4CRT, direct (w/SASE or DX 2GS). NO Bureau QSL. Logs will be uploaded to LoTW within a week of his returning home.

VY0, CANADA (IOTA Op). Operators Dick/AH6EZ and Harry/K9DXA plan to be active as YV0/homecall from Rankin Inlet, Nunavut Province[Canada's largest and newest federal territory], between June 21st and July 2nd.

Activity will be on 80-6 meters, with a focus on 30/17/12 meter bands
using CW, SSB and RTTY. The duo plans to make a side trip to Marble Island
(NA-185) for a few hours sometime between June 25-29th. On July 1st,
during Radio Canada Day Contest, both Dick and Harry will be active as
VY0RAC. Listen for QSL instructions. For more details and updates, go
to: http://ah6ez.yolasite.com

YJ, VANUATU (Reminder). Members of the Oceania DX Group Inc. (ODXG), will
once again be active as YJ0VK from Port Vila on Efate Island (OC-035),
Vanuatu, between April 21st and May 5th. Operators mentioned are Chris/
VK3QB (team leader), Luke/VK3HJ, Lee/VK3GK, Mike/VK3GHM, Benton/VK3CBV
and Allan/VK2CA. Activity will be on all HF bands 160-10 meters, with an
emphasis on 30/17/12 meter bands using CW, SSB, and RTTY/PSK31. They do
plan to have three stations on the air as often as possible. QSL via
VK2CA, direct or by the Bureau. For updates, visit the YJ0VK Web page
at: http://yj0vk.odxg.org/yj0vk2012/default.html
LAST MINUTE NOTE: The team was advised that the resort they are staying
at was recently hit by lightning, and the resort' Internet connection
was taken out. They hope to have it repaired and available by early next
week, so at the moment it looks like no connectivity until then. They will
try other options to do their daily log uploads if it continues to be
unavailable. Stay tuned!

ZA100, ALBANIA (Reminder/Update). Operators Franck/F4DTO and Patrick/F4GFE
will once again be active from Albania, but as ZA100I between April
22-29th. Activity with their special callsign is in celebration of the
100th anniversary of Albania's independence. Operations will be on 40-10
meters SSB only using a Yaesu FT-450 into a dipole and vertical for 10m.
QSL via F4DTO, direct (w/1 IRC, 1 Euro or 2 USDs) or by the Bureau. No
eQSL.

Ham Operators Help When Newer Technology Goes Dead:

Posted: 21 Apr 2012 05:12 PM PDT
http://www.eham.net/articles/28151

When some modern communications systems were knocked out recently by storms, local officials had no way of calling for help or reporting damage. That's where amateur radio, or "HAM" operators stepped-in. Tom Reis, SKYWARN Coordinator for the Des Moines National Weather Service Office, says HAM operators reported storm observations just before an EF-2 tornado hit Creston, causing severe damage to the hospital and other structures. Reis says they're a valuable asset to discerning information that could help save lives. "The National Weather Service recognizes the importance of ground truth information and a variety of methods to get the information to them at the Weather Service office," Reis says. "And one of those methods is via amateur radio. The Weather Service has a quite extensive amateur radio station that they then staff when the time arises, when the need arises." When severe weather is imminent, the National Weather Service office in Des Moines calls in one of four trained operators to come out and coordinate HAM communications. When the storms hit April 14th, Reis, who lives nearby, was called into action.

//
Petition FCC: Void Antenna Restrictions:

Posted: 20 Apr 2012 05:00 PM PDT
http://www.eham.net/articles/28150

Over 900 signatures have been collected via an online petition at Change.org to ask the FCC to void existing outdoor antenna prohibitions made by developers and homeowner's associations. The petition requests that "reasonable accomodations" be made for amateur antennas in HOA's etc. Those of you who do not wish to submit formal comments on this matter (GN Docket 12-91) to the FCC may support the petition by a very simple process of going to the site listed below and signing the petition.

GB2RS NEWS

Sunday 22nd April 2012

The news headlines:

* 2O12xx special prefix stations

* New FAQs section on RSGB website

* Details of Olympics amateur band restrictions announced

The London 2012 Olympics and Paralympic Games provide an outstanding opportunity to publicise amateur radio. To that end, the RSGB negotiated a very limited number of special prefixes, 2O12x (two Oscar one two x), with the intention that these calls are given an extensive airing over the Olympic period this summer. Special stations are already planned for London, 2O12L, and Wales, 2O12W, and there will be a special callsign for the National Radio Centre. Groups in Scotland and Northern Ireland are encouraged to take advantage of the special callsign secured for their region. Groups who would like to use the callsigns for all or part of the Olympic period should bear in mind that public access and good world-wide coverage will be required. Expressions of interest should be sent, without delay, to Bob, G3PJT, by email to G3PJT@btinternet.com.

This week, the RSGB has posted comprehensive sets of frequently asked questions and answers at www.rsgb.org/faq. Amateurs may find that this is a useful first place to look for any questions you have about the hobby, membership of the RSGB or for information on the amateur exam system. The resource will continue to be updated with new answers as necessary.

Details of amateur band frequency restrictions during the London 2012 Olympic and Paralympic Games have now been released by Ofcom. Parts of the 70cm, 13cm and 9cm bands are affected between 28 June and 23 September 2012. The restrictions only apply in geographically limited areas, with 70cm being particularly affected around London and Weymouth. Full details are on the RSGB website at www.RSGB.org/olympics.

The Radio Communications Foundation is charged by Ofcom with the creation and maintenance of the examination arrangements for the Amateur Radio Examinations in the UK. In discharging its role, the RCF has an agreement with RSGB that the Society handles the administration of the processes involved. Questions of syllabus, examination questions

and related policy issues are handled by the RCE Examinations Committee of the RCF. As a result of turnover in Committee membership there are vacancies on this Committee and applications are sought from those with relevant skills and experience. If you have an Advanced licence, a keen interest in training and education, experience of examination processes, syllabus development, examination performance assessment, question development and the time to devote to four meetings a year, plus e-mail working, which will become the more normal way of working, then please express your interest, enclosing a relevant CV, to Professor Simon Watts, Chairman of the RCE Standards Committee, via SC.chairman@commsfoundation.org.

The RSGB has made available a Media Information Pack for affiliated radio clubs because of the expected upswing in interest in amateur radio courtesy of the Olympics. There have been some excellent examples of clubs and societies using special events to promote amateur radio widely and the aim of the pack is to help more clubs achieve this success. You can read details of the media pack at www.tinyurl.com/RSGBmedia, although the downloadable material is in the Members Only area.

Following the recent consultation on the Spectrum Strategy, the final version can now be downloaded from the Spectrum Strategy consultation page as well as from the Spectrum Forum website. Whilst the response to the consultation was small, the quality of comment was good and as a result a number of improvements have been made to the document. As with all strategy statements, it will need to be reviewed and updated every few years to reflect changes in our needs and the spectrum management context. The RSGB would like to thank the members of the Spectrum Forum for developing the strategy and those who responded during the consultation. The RSGB is pleased to announce the appointment of Andy Talbot, G4JNT, as Technical Forum Chair. Andy brings a wide and deep understanding of the technical side of amateur radio to this role.

Changes to the RSGB QSL bureau operation that were detailed in the December 2011 RadCom have now taken effect. Volunteers now despatch, where possible, all available incoming cards to members and pay-to-receive users on a quarterly basis. Currently they are sending out their last batch of cards to non-members, together with the return of unused collection envelopes and details of how to access the new scheme. All members with more than one active callsign, especially those in the M3, M6, 2 and M0 series, urgently need to visit the RSGB website and update their membership details, if they have not already done so. To avoid envelopes being returned incorrectly and cards lost, this information is vital. It would be most helpful if those who do not collect traditional QSL cards change the wording of any QRZ.com entry to include the wording "No bureau cards". Please note that all NOV holders of GB Special Event and abbreviated single letter callsigns must be registered to a valid member or affiliated Society in order to continue sending and receiving cards. To update your information visit www.rsgb.org/amend or telephone RSGB headquarters, without delay.

>From 28 April to 4 May, the Camb-Hams will be continuing their traditional Scottish Island activation by returning to the Isle of Mull in the Scottish Inner Hebrides, which is IOTA reference EU-008. All HF bands from 160m to 10m will be covered with five stations on air simultaneously, all capable of running the legal power limit from five linear amplifiers. 6m, 4m and 2m will be active with a great take-off to the UK and Europe, again all at legal limit. 10GHz is also being used, for a first-time activation of IO66 square. There will also be a 24 hour activation from Lunga, IOTA EU-108, using the callsign GS6PYE/P. This will most likely take place from Sunday 29th until Monday 30th and is weather dependent. You can follow the progress at http://dx.camb-hams.com, or on Twitter as @g3pye.

Enrolment for the next Bath-based Distance Learning course for the Advanced exam opens on 1 May. The course will start in June, heading for the December exam. The course is open to anyone that has passed the UK Intermediate exam. Each week students will receive directed reading instructions and a set of revision questions, every three weeks they will also receive a progress test and mock exams at the end of the course. Students' answers are marked and worked solutions are provided. You will need your own copy of the Advanced textbook, a non-programmable scientific calculator and access to the internet; material is distributed via a dedicated Yahoo Group. You will need to set aside at least two hours a week for twenty weeks. Applicants should not underestimate the commitment required to do this home study option, but those that see it through to the end have had a very high pass rate. The course team are based in Bath but have a growing number of remote tutors across the UK. Further details and enrolment forms can be obtained by contacting Steve Hartley, G0FUW, at 5 Sydenham Buildings, Bath BA2 3BS or by email to G0FUW@tiscali.co.uk.

And now for the details of rallies and events for the coming week

The 28th Yeovil QRP Convention takes place today, 22 April, in Digby Hall, Hound Street, Sherborne, Dorset DT9 3AA, which adjoins the central shopping car park. Doors open 9.30am and there will trade stands, a Bring & Buy as well as a lecture programme. Contact Derek, M0WOB on 01935 414 452 for more details.

Today, 22 April, the West London Radio & Electronics Show takes place at Kempton Park Racecourse, Staines Road East, Sunbury on Thames, Middlesex TW16 5AQ. There is free car parking and doors open at 10am. There will be trade stands, a Bring & Buy and special interest groups. Details from Paul, M0CJX on 08451 650 351.

The Radio Security Service Reunion takes place today, 22 April, at Bletchley Park. Starting at 11am, all are welcome to this event commemorating the 1,500+ radio amateurs who monitored German signals in WWII. There will be lectures and a vintage equipment exhibition. The National Radio Centre is also open for visitors from 11am.

Moray Firth Amateur Radio Society will be holding their spring junk sale on Saturday 28 April at 12 noon in the Scout Hall, Christie Place,

Fochabers. Contact Barry, GM4TOE, on 01807 580376. Now for the news of special events

Today, 22 April, the North Cork Radio Group will be activating Mizen Head Visitors Centre using the callsign EI0IMD.

Ripon and District ARS are organising the first Inns and Pubs on the Air weekend. Using GB2TH they will be operating from the Tan Hill Inn on 22 April. At 1732 feet ASL, the location is the highest licensed premises in Great Britain.

230 (Congleton) Squadron Air Training Corps will be hosting special event station GB1AC on 28 April. Station operators will include newly licensed Cadets. Visitors and VIPs at the event celebrating the Squadron's newly enlarged premises will be involved. Contact with current and previous Cadets and service personnel will be much welcomed. The station will be active from 11am to 3pm. Skeds on any bands between 10 and 80m can be arranged via email to rogerm0gmg@gmail.com.

Botley Flour Mills near Southampton is one of the UK's oldest known milling sites and is listed in the Domesday Book. The Mill will be activated with the callsign GB0BFM for Mills on the Air weekend on 12 and 13 May from 10am to 4pm using 80m, 40m, 2m & 70cm. The station will be run by M0IED, his father G6FRT and other members of Itchen Valley Radio Club, with added assistance from Southampton University Wireless Society.

And now the DX news compiled from 425 DX News and other sources

JS6RRR and JA5DUR will be active as /JS6 from Miyako Island, AS-079, between 26 April and 7 May. They will operate SSB, CW, FM and some RTTY and PSK31 on the 160 to 6m bands. QSL to their home callsigns, preferably via the bureau.

VA3QSL will be active as KP4/VA3QSL from Puerto Rico, NA-099, from 22 April to 4 May, including a two-day side trip to nearby Isla de Vieques. He will operate SSB and CW on 40, 20 and 6m. QSL via his home callsign, direct or via the bureau.

Mal, VK6LC will be active again as XV4LC from Vinh Long, Vietnam until 24 April. He will operate holiday style on 20 and 17m CW and SSB. QSL direct only to VK6LC.

F4DTO andF4GFE will be active as ZA100I from Albania until 29 April. They will operate SSB only on the 40 to 10m bands. QSL via F4DTO, direct or via the bureau.

Now the contest news

The First 50MHz contest takes place from 0900 to 1200UTC today, 22 April. Using all modes, the exchange is signal report, serial number, locator and postcode.

It's busy on 24 April with two contests taking place between 1900 and 2130UTC. The 50MHz Activity Contest uses all modes on the 6m band and the exchange is signal report, serial number and locator. The SHF UK Activity Contest uses the 2.3GHz and up bands. The exchange is also signal report, serial number and locator.

The weekend of 28 and 29 April is a RTTY contest time. From 1200 to 1200UTC, the SP DX RTTY contest takes place on the 3.5 to 38MHz bands. The exchange is signal report and serial number, with SP stations sending their province code too. The BARTG Sprint takes place from 1700 to 2100UTC on 29 April. It's 75 baud only and all entries are single op. Using the 3.5 to 28MHz bands the exchange is serial number only. And now the solar factual data for the period from Friday the 13th of April to Thursday the 18th, compiled by Neil Clarke, G0CAS on Friday the 20th of April.

This week several sunspot groups were visible every day. As the week progressed, some of the groups increased in size and complexity. At first solar activity was very low on the 13th and the 14th, but by the 16th activity increased to moderate levels when a small M class solar flare took place. The remaining day's activity was low, with several large C class solar flares taking place. Solar flux levels increased from 98 units on the 13th to 138 by the 19th. The average was 111 units. The 90 day solar flux average on the 19th was 112, that's two units down on last week. X-ray flux levels increased from B1.5 units on the 13th to B5.2 by the 19th. The average was B2.9 units. Geomagnetic activity started at active levels with an Ap index of 22 units on the 13th due to a recurring coronal hole. Activity then declined to quiet levels for the rest of the period. The average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 690 kilometres per second to 330 by the 18th. Particle densities were low every day. Bz varied between minus 10 and plus 5 nanoTeslas during the disturbance of the 13th and between minus and plus 2 nanoTeslas on the quieter days.

And finally the solar forecast. This week solar activity could be slightly higher than recent weeks, especially at first. Solar flux levels should be around 130 for the next few days but then decline towards next weekend. Due to a small coronal hole, geomagnetic activity is expected to be at unsettled levels on Monday and Tuesday, after which, quiet conditions should return for the remainder of the week. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows are expected to be about 10 or 11MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 30MHz. The optimum working frequency with a 90 per cent success rate will be about 25MHz. The best time to try this path will be between 1100 and 1600 hours. Occasional small sporadic-E openings should take place, mainly affecting 28MHz and occasionally 50MHz.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS First, an apology we got our own email address wrong last week. Despite that, several people did get in touch and the feedback was generally favourable. One useful suggestion was that we should only use the revised format on clubs with several events during the week, so we are trying that approach today. Once again, we would appreciate feedback, by email to GB2RS@rsgb.org.uk, putting the subject as GB2RS FEEDBACK. And yes, GB2RS@rsgb.org.uk is the correct address.

We start with clubs that have several events this week. Friskney and East Lincolnshire Communications Club has a club net on 144.165 USB, vertical polarization, from 7pm on Monday 23 April. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm. On Friday the club HF net is on 3.748MHz from 8pm. For more information contact the FELCC Information Line on 07554 362 020.

Lincoln Short-Wave Club is participating in the 50MHz UK AC on Tuesday 24 April. On Wednesday, John Rogers, M0JAV will be giving a talk on building practical antennas at the BSA Club. On Thursday there is a simplex club net on 145.375MHz from 20.00. Finally, Saturday in the Shack commences at 09.00 on that day. Details from Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society is visiting Kempton Park Radio rally on Sunday 22 April. On Monday there is a field day planning meeting. Thursday sees training classes with Dave Murphy, G8OWL, and there is a construction evening on Friday. More information from Don, on 0121 458 1603.

Wythall Radio Club is visiting Kempton Park Radio rally on Sunday 22 April. Then on Tuesday, Callum, M0MCX will be speaking on Field Day Disasters - and stuff that went right too! Contact Chris, G0EYO, on 07710 412 819.

Now we return to the traditional listing in date order. On Monday 23 April Gloucester Amateur Radio & Electronics Society is on the air. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 23 April Stratford Upon Avon District Radio Society is having a quiz night. Contact G0CHO, on 01608 664 488.

On Tuesday 24 April Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 24 April Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 25 April Midland Amateur Radio Society is holding training classes and planning for field day. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 25 April Telford & District Amateur Radio Society is holding a treasure hunt in Little Wenlock, starting at 1930 prompt. Contact Mike, G3JKX, on 01952 299 677. On Thursday 26 April Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop- ars.org.uk.

On Friday 27 April Coventry Amateur Radio Society is having a project calibration night. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND First, an apology we got our own email address wrong last week. Despite that, several people did get in touch and the feedback was generally favourable. One useful suggestion was that we should only use the revised format on clubs with several events during the week, so we are trying that approach today. Once again, we would appreciate feedback, by email to GB2RS@rsgb.org.uk, putting the subject as GB2RS FEEDBACK. And yes, GB2RS@rsgb.org.uk is the correct address.

Wirral & District Amateur Radio Club has two events this week. On Sunday 22 April it's the North Wales DF, and on Wednesday there's a talk on vertical HF antennas by David, G3UFO. Contact Simon, G6XHF, on 0151 601 3269.

Now we return to the traditional listing in date order. On Monday 23 April Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 23 April Sheffield Amateur Radio Club is having a talk on remote station operation by Steve, M1ERS. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday 24 April Chester & District Radio Society is having an operating afternoon. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 24 April Halifax & District Amateur Radio Society is on the air. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday 24 April Morecambe Bay Amateur Radio Society is looking at the 20m Moxon with by Andrew. Contact Sheila, on 07867 516 836.

On Wednesday 25 April Denby Dale Radio Club is on the air from 1930 on 145.575MHz or thereabouts. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 25 April Durham and District Amateur Radio Society is planning the special event station for when the Olympic Flame is in Durham. Contact David, M0BPM, on 0191 388 8113.

On Wednesday 25 April Hornsea Amateur Radio Club is having a fox hunt with G4YTV. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 26 April Ripon & District Amateur Radio Society is examining the aftermath of GB2TH, Inns and Pubs On The Air. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 26 April South Manchester Radio and Computer Club is holding a home construction clinic with Ged, G8RSI. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 27 April East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 27 April Tynemouth Amateur Radio Club is having a talk by G4VPU on how he started in radio. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND First, an apology we got our own email address wrong last week. Despite that, several people did get in touch and the feedback was generally favourable. One useful suggestion was that we should only use the revised format on clubs with several events during the week. This week's Local News is in the traditional format because no clubs in this report have multiple events. Once again, we would appreciate feedback, by email to GB2RS@rsgb.org.uk, putting the subject as GB2RS FEEDBACK. And yes, GB2RS@rsgb.org.uk is the correct address.

On Tuesday 24 April Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 25 April Glenrothes & District Radio Club is having a talk on cryptography by Tam, MM0TGB. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Wednesday 25 April Lothians Radio Society is having DXCC and Logbook of the World explained by Rob Ferguson, GM3YTS. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 26 April Aberdeen Amateur Radio Society is on the air and holding a Morse class. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Thursday 26 April Paisley Amateur Radio Club is having a talk on the FM satellites by MM1HMZ & GM0FFB. Contact Bill Anderson, 2M0BZZ, on 01505 613 633.

NEWS FOR THE SOUTH EAST and EAST ANGLIA First, an apology we got our own email address wrong last week. Despite that, several people did get in touch and the feedback was generally favourable. One useful suggestion was that we should only use the revised format on clubs with several events during the week, so we are trying that approach today. Once again, we would appreciate feedback, by email to GB2RS@rsgb.org.uk, putting the subject as GB2RS FEEDBACK. And yes, GB2RS@rsgb.org.uk is the correct address.

We start with clubs that have several events this week. Bedford and District Amateur Radio Club is running a club net on GB3BF from 20.30 on Monday 23 and Thursday 26 April, and has technical anecdotes by John, M0XZL on Tuesday 24 April. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

Brede Steam Amateur Radio Society is at the shack on Tuesday 24 and Friday 27 April. For more information contact Steve, on 01424 720 815.

East Kent Radio Society is visiting Kempton Park Rally on Sunday 22 April, then having cheese and wine at the Mill on Monday 23 April. Details from Karl Davies, M1DFM, on 01227 710 120.

Norfolk Amateur Radio Club is running a club net on Monday 23 April from 19.30 on GB3NB, to which everyone is welcome. On Wednesday 25 April there is a fox hunt preparation session. Details from Chris Danby, G0DWV, on 01603 898 678.

Now we return to the traditional listing in date order. On Tuesday 24 April Chelmsford Amateur Radio Society is running a club net from 8.30. Contact Martyn, G1EFL, on 01245 469 008. On Tuesday 24 April Dorking & District Radio Society is having a talk on radio from the Falklands, VP8, by Roger Eeles, G0SWC/VP8DBR. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday 24 April Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524 844.

On Tuesday 24 April Home Counties ATV Group is having a talk on radio at the London 2012 Olympics by Tom, G6IGA. Contact Pete, G8FRC, on 01189 695 697.

On Wednesday 25 April Chesham & District Amateur Radio Society is on the air and planning for Windmills on the Air. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 25 April Darenth Valley Radio Society is holding a fox hunt around the Crockenhill area. Contact Bob, M0RAW, on 01322 663 804.

On Wednesday 25 April Havering & District Amateur Radio Club is having an informal evening. More information from John, M0UKD, on 07890 222 111.

On Wednesday 25 April Newbury & District Amateur Radio Society is having a presentation on running a Hospital Radio station by M0JEC. Contact Rob, G4LMW, on 01635 862 737.

On Thursday 26 April Bittern DX Group is holding a club meeting. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 26 April Echelford Amateur Radio Society is having a natter night with a Bring & Buy and CW practice. Contact John, G4GSC, on 01784 451 898.

On Thursday 26 April Edgware & District Radio Society is having a talk on searching for drugs and explosives using radio frequency spectroscopy by Dr Jamie Barras. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 26 April Hilderstone Radio and Electronics Club is having a talk by Lorna Marchant, G7EPS, on simple ways to increase your energy. Contact Chrissie Turner, by email to hilderstoneclub@gmail.com.

On Thursday 26 April Horndean & District Amateur Radio Club is holding a skittles evening at Mead End, Denmead, from 7.30pm. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 26 April Horsham Amateur Radio Club is having a social evening at the Blue Ship, The Haven, Billingshurst, RH14 9BS. Details are on the web at www.harc.org.uk.

On Thursday 26 April Reading & District Amateur Radio Club is holding its 2012 Martin Lynch Raid at Chertsey. Details from Pete, G8FRC, on 01189 695 697.

On Friday 27 April Cambridge & District Amateur Radio Club is having a talk on intelligent life in the universe by Peter, M0DCV. Contact Ron, G3KBR, on 01223 501 712.

On Friday 27 April Fort Purbrook Amateur Radio Club is having a natter night. Details from Mick Ponsford, M0GWD, on 02392 366 699.

On Friday 27 April Itchen Valley Amateur Radio Club is having a members' forum. Details from Liz, M0ACL, on 02380 254 599.

On Friday 27 April Mid-Sussex Amateur Radio Society is having a radio night and is testing equipment for Mills weekend. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday 27 April Radio Society of Harrow is having a demo of the Acorn SDR kit by G3WCB. More information from Linda, G7RJL, on 0208 386 8586.

On Friday 27 April Wimbledon & District Amateur Radio Society is on the air. Contact Andrew Maish, G4ADM, on 0208 335 3434. On Saturday 28 April Bredhurst Receiving and Transmitting Society is running a light-hearted & fun day, experimenting with home-made magnetic loops with Charles Darley, G4VSZ. Details from Andrew, M6AAE, on 07403 325 075.

On Saturday 28 April Shefford & District Amateur Radio Society is visiting the Shuttleworth Collection. Details from John Burnett, M6JBU, on 07860 804 793.

NEWS FOR THE SOUTH WEST First, an apology • we got our own email address wrong last week. Despite that, several people did get in touch and the feedback was generally favourable. One useful suggestion was that we should only use the revised format on clubs with several events during the week. This week's Local News is in the traditional format

because no clubs in this report have multiple events. Once again, we would appreciate feedback, by email to GB2RS@rsgb.org.uk, putting the subject as GB2RS FEEDBACK. And yes, GB2RS@rsgb.org.uk is the correct address.

Advanced notice now that the Plymouth training Team will be conducting an Advanced Exam in Plymouth on Thursday 31 May at 7pm. If anyone would like to sit the Advanced Exam in Plymouth on that date, please contact Bob, G7NHB, by email to g7nhb@hotmail.co.uk. The closing date for applications is 1 May.

On Monday 23 April Exeter Amateur Radio Society is having a club night at the Moose Centre. Contact Nick, 2E0NRJ, on 01363 775 756.

On Wednesday 25 April Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 26 April South Bristol Amateur Radio Club is holding open house and is on the air. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 26 April Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Friday 27 April Torbay Amateur Radio Society is holding a 90/10 sale. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Thursday 26 April Aberystwyth & District Amateur Radio Society is having a night on the air on 145.500 then 145.550MHz. Details from Ray, GW7AGG, on 01970 611 853.

606. Weekly Highlights of Solar and Geomagnetic Activity, 16 - 22 April 2012

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
16 - 22 April 2012

Solar activity was at low to moderate levels. Moderate levels were reached on 16 April with an M1.7 flare from Region 1461 (N13, L=070, class/area Hsx/090 on 18 April) that occurred at 1745 UTC. Low levels were observed from 17-22 April. On 18 April, Region 1463 (S26, L=160, class/area Cso/100 on 20 April) produced a C8.9/Sf flare at 1239 UTC with an associated coronal mass ejection (CME) and a C5.3 flare with an associated Type II (est. 621 km/s) and Type IV radio sweeps. On 19 April, a C7.0 flare occurred at 1126 UTC with an associated Type II and Type IV radio sweeps and a non-geoeffective CME off the west limb. This event was likely from old Region 1455 (N06, L=206, class/area Fsi/200 on 16 April). Region 1462 (S25, L=141, class/area Dho/410 on 20 April) produced a C1.8 flare at 1515 UTC with an associated CME on 19 April as well. Only low level C-class flares were observed for the rest of the summary period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at high levels on 16 and 17 April. Moderate levels were observed on 18,19, and 21 April while normal levels were observed on 20 and 22 April.

Geomagnetic field activity was mostly quiet, with brief intermittent periods of unsettled and active levels on several days due to nighttime effects and southward Bz. A solar sector boundary crossing was observed on 20 April, and a weak glancing blow CME occurred on 21 April, again producing unsettled to active periods briefly.

Forecast of Solar and Geomagnetic Activity
23 April - 19 May 2012

Solar activity is expected to be at very low to low levels with the slight chance for M-class flares during the period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels from the beginning of the period on 23 April, and persist through 10 May. Flux values are forecast to increase to high levels from 11-14 May due to a coronal hole (CH) high speed stream. From 15 May through the end of the period on the 19th, values are expected to return to moderate or lower levels.

Geomagnetic field activity is expected to begin the period at unsettled and active levels, as the result of a few weak CMEs along with effects from a negative polarity CH. Conditions should settle to mostly quiet levels from 26 April through 08 May, before increasing to active levels with the chance for a minor storm on 09-11 May. Mostly active conditions are expected 14-15 May. The increases in activity are expected from a pair of negative polarity coronal holes. Mostly quiet levels are expected in between the two features on 12 and 13 May, and again from 16-19 May to close out the period.

Fisher's Ghost Amateur Radio Club Exhibit a Hit:

Posted: 22 Apr 2012 06:36 PM PDT
http://www.eham.net/articles/28153

RADIO equipment dating back to the 1930s was on display at HJ Daley Library at Campbelltown last month. The Fisher's Ghost Amateur Radio Club hosted an exhibition featuring a variety of radio and transmission devices. Club treasurer Lynn Kelly said the radio devices on display included old defence equipment which had been sourced from club members.

Bomber Command Memorial 28 June, T1154, R1155, ARC-5 etc activity suggestion

Posted: 23 Apr 2012 05:34 AM PDT
http://forums.qrz.com/showthread.php?343491-Bomber-Command-Memorial-28-June-T1154-R1155-ARC-5-etc-activity-suggestion&goto=newpost

The UK's memorial to Bomber Command is due to be unveiled 28th June.
http://www.bombercommand.com/ Those of us with WW2 radio (ex - RAF, USAF,
RCAF, Luftwaffe, etc) could put them on air that day as a tribute to the
wireless operators of that time. In UK the T1154, R1155 are still in
service and an evening of CW seems a good idea to me. Would anyone like to
do this?

Andrew

GW3OQK

PS My T1154 is nearly ready!

http://forums.qrz.com/showthread.php?343515-ANS-113-AMSAT-News-Service-Weekly-Bulletins&goto=newpost

AMSAT NEWS SERVICE

ANS-113

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

Volunteers are needed to help at the AMSAT booth at Dayton. Gould, WA4SXM, is looking for volunteers to help man the AMSAT booth during the 2012 Hamvention. People are needed all 3 days for 2 hour shifts. Please send the days and times you are available to help as well as how many shifts you are willing to work via e-mail to wa4sxm at amsat.org. Monitor AMSAT's Dayton News Page for the latest information and developments.

In this edition:

* Schedule of AMSAT Activities at Dayton Hamvention

* May 15 Deadline to Apply for ARRL TI-2 Space in the Classroom Institute

* Five CubeSats in Preparation for July Launch to ISS

* Naval Postgraduate School Develops Multi-CubeSat Deployment System

* Successful ARISS School Contacts with California, Ecuador, and Japan

* Two Months to Field Day - AMSAT FD Rules Posted

* FAA CARSR Radar May Impose Amateur Operating Restrictions on 23cm

* AMSAT-UK on Satellites for World Amateur Radio Day

* UK Will Restrict Use of Amateur Satellite Frequencies During Olympics

* Silent Key - Greg Butler, KI4OTG

* Satellite Shorts From All Over

SB SAT @ AMSAT $ANS-113.01

Schedule of AMSAT Activities at Dayton Hamvention

Here are the daily AMSAT activities at the 2012 Hamvention!

Thursday 17 May 2012

10:00 AM - 5:00 PM AMSAT Booth Setup at Ball Arena (contact Gould Smith, WA4SXM, wa4sxm@amsat.org if you can help during this time).6:30 PM - 10:00 PM The third Annual AMSAT ☐Dinner at Tickets☐ party will be held at Tickets Pub & Eatery in Fairborn, OH. Food can be ordered from the menu and drinks (beer, wine, sodas and iced tea) are available at the bar. Directions and coordinates are on the AMSAT Web site. Bring some friends and have a great time the night before Hamvention. Tasty selection of Greek and American food and great company!

Demos Daily on Friday, Saturday, and Sunday for All Available Passes

AMSAT is encouraging all students attending the 2012 Dayton Hamvention to come by the Satellite Demonstration Area just outside of the Ball Area entrance and make a contact using the amateur satellites. There will be AMSAT volunteers there to explain how to make the contacts and during actual satellite passes will try to get as many students as possible to complete actual contacts. There are lists of satellite pass times in the satellite demonstration area and at the AMSAT booth.

Friday 18 May 2012

9:00 AM - 6:00 PM at the AMSAT Booth AMSAT Booth open for membership renewals, books, new items and information. Outdoor satellite demonstrations right outside the Ball Arena entrance. Engineering area with Fox and ARISSat-1 satellite prototype displays.4:00 PM at the ARRL Stage AMSAT and ARRL are teaming up during the 2012 Hamvention to recruit new ARISS (Amateur Radio on the International Space Station) Technical Mentors and Ground Station Operators. Friday and Saturday (May 18 & 19) at 4pm in the ARRL stage area AMSAT Vice President for Educational Relations Mark Hammond N8MH will explain the need for additional ARISS Technical Mentors and Ground Station Operators and the requirements and responsibilities needed to help provide a reliable conversation between astronauts and

selected schools or groups.6:30 PM - 10:30 PM AMSAT/TAPR Banquet at Dayton 2012 AMSAT/TAPR Banquet on Friday night, May 18 is one of the main AMSAT activities during the 2012 Hamvention at Dayton. AMSAT is pleased to announce that Howard Long, G6LVB will be the featured speaker for the evening event. Howard will be talking about his FUNcube Dongle, the 64 - 1700 MHz Software Defined Receiver. Banquet tickets will not be sold at the AMSAT booth during the Hamvention so reservations must be made through the AMSAT Store. Tickets are $30 apiece.

Saturday 19 May 2012

9:00 AM - 6:00 PM at the AMSAT Booth AMSAT Booth open for membership renewals, books, new items and information. Outdoor satellite demonstrations right outside the Ball Arena entrance. Engineering area with Fox and ARISSat-1 satellite prototype displays.11:15 AM - 1:30 PM The AMSAT Forum Get the latest information about what is going on with AMSAT and its projects. The AMSAT Forum will be held in Forum Room 5.4:00 PM at the ARRL Stage AMSAT Vice President for Educational Relations Mark Hammond N8MH will explain the need for additional ARISS Technical Mentors and Ground Station Operators and the requirements and responsibilities needed to help provide a reliable conversation between astronauts and selected schools or groups.

Sunday 20 May 2012

9:00 AM - 1:00PM at the AMSAT Booth AMSAT Booth open for membership renewals, books, new items and information. Outdoor satellite demonstrations right outside the Ball Arena entrance. Engineering area with Fox and ARISSat-1 satellite prototype displays.1:00PM - 5:00PM at the AMSAT Booth Take down and storage of the AMSAT Booth. (contact Gould Smith, WA4SXM, wa4sxm@amsat.org if you can help during this time).

[ANS thanks Gould Smith, WA4SXM for the above information]

May 15 Deadline to Apply for ARRL TI-2 Space in the Classroom Institute

The ARRL Education & Technology Program (ETP) is offering an advanced Teachers Institute (TI-2) session that focuses on space in the classroom. This four-day professional development workshop is sponsored by the Dayton Amateur Radio Association and is held in their location in Dayton, Ohio (July 9-12).

The TI-2 Space curriculum focuses on the nuts and bolts of setting up and operating a satellite ground station. This serves as excellent preparation for a scheduled contact with the ISS through the Amateur Radio on the International Space Station (ARISS) program. But it also provides instruction for continued use of satellites and other man made space assets to explore naturally generated signals, space and a variety of topics.

Thanks to generous assistance from Yaesu USA and Ham Radio Outlet, participants will receive a full ground station that is configured for satellite communications, as well as training on how to set it up and use it to make Amateur Radio contacts and download telemetry data.

To be considered for a seat in TI-2 Space, participants must possess at least a Technician class license at the time off application. ARRL membership is required. Priority for attending the TI-2 Space session will be given to teachers who have developed an educational proposal accepted for participation in the ARISS Program.

This session has a class limit of 8 participants, so apply early! The deadline for the TI-2 Space in the Classroom sessions of the Teachers Institute is May 15. Full details are posted on the ARRL web.

[ANS thanks the ARRL for the above information]

Five CubeSats in Preparation for July Launch to ISS

Five CubeSat teams continue work on preparations for a launch to the International Space Station in the July 18-21, 2012 time frame. These CubeSats will be launched from Tanegashima, Japan aboard the JAXA HTV-3 ISS resupply mission. The CubeSats will be loaded into the J-SSOD deployer on the Japanese Experiment Module, also known as Kibo. They will be deployed with the Kibo robotic arm planned for September, 2012 timeframe.

The five CubeSats include:

RaikoWe WishFITSat 1F-1 Vietnam Student CubeSatTechEdSat

RAIKO - Wakayama University, Japan

This 2U CubeSat includes experiments for:

Earth photography with a fish-eye lens cameraPhoto tracking during deployment from ISS to measure relative motion.Experimental star sensorMembrane deployment experiment for de-orbitHigh speed data communication experiment by Ku-band communication equipment:

Orbit determination experiment by Doppler frequency measurement of Ku-band beacon.Mobile ground station and global cooperation for reception

FITSAT-1 - Fukuoka Institute of Technology, Japan

The main mission of this 1U CubeSat will be a demonstration of high speed data transfer from a satellite. A second experiment aboard the satellite involves an attempt at visual tracking from the ground of the high-output LED flash to investigate the possibility of optical communication with satellites. The light from this flash will be received by the ground station equipped with a telescope with photomultiplier linked to a parabolic antenna tracking the 5.8GHz downlink.

Frequencies announced for FITSAT-1:

CW Beacon 437.250 MHz,

FM Data 437.445 MHz,

High speed data 5840.00 MHz.

WE WISH - Meisei Electric Co., Ltd., Japan

The WE WISH mission plans to investigate the monitoring the global environment from space with the use of an upper atmosphere measurement experiment. This includes GPS technology, and technical proof of concept of a micro infra-red camera. The team has the additional goal of contributing to local technical education through the use of CubeSat ground data acquisition.

F-1 Vietnam Student CubeSat

Vietnamese students in Hanoi plan to orbit the country's first satellite, their amateur radio CubeSat F-1 with the callsign XV1VN. The satellite will carry a low resolution C328 camera and two Yaesu VX-3R transceivers using 145.980 and 437.485 MHz.

VX-3R1, 437.485 MHz FM downlink:

Solar cell power only, operates in sunlight onlyOutput power: max 0.3W, half-wave dipole antennaMorse code beacon (10 chars) using PWM CW every 30 seconds

VX-3R2, 145.980 MHz FM downlink:

Rechargeable battery, operates in dark and sunlightOutput power: max 1.0W, half-wave dipole antennaAFSK 1200bps, half duplex, one AX.25 packet every 30 seconds

If the The F-1 web page is not available the latest news and photos have been posted on the AMSAT-UK web.

TechEdSat - San Jose State University

TechEdSat is a 1U CubeSat built by San Jose State University in partnership with NASA Ames Research Center and AAC Microtec. It's mission is to evaluate Space Plug-and-play Avionics (SPA) designed in Sweden by AAC Microtec, and to perform a communications experiment utilizing the Iridium and Orbcomm satellite phone network.

Student hands-on learning opportunities were presented during the International Space Apps Challenge on April 21-22. For this challenge, space hackers implemented a fault-tolerant command and control system, utilizing both the OrbComm and Iridium modems as uplink and downlink. Ground segment of the software includes the ability for a laptop, Apple or Android phone to issue commands to the spacecraft over Iridium/Orbcomm. The students will also be challenged with designing the capability for relaying data received from the spacecraft automatically to Twitter.

TechEdSat has received IARU frequency coordination for its downlink on 437.465 MHz. Additional news has been posted on the AMSAT UK web.

[ANS thanks the CubeSat teams, AMSAT-UK, and Mineo Wakita JE9PEL for the above information]

Naval Postgraduate School Develops Multi-CubeSat Deployment System

The Space Systems Academic Group (SSAG) at the US Naval Postgraduate School has developed the NPS CubeSat Launcher or NPSCuL (pronounced NPS-cool).

This is an auxiliary payload platform to allow multiple CubeSats to be launched aboard rockets as secondary payload meaning the rocket would be able to carry satellites in onboard space that would otherwise be unused.

NPSCuL can accommodate up to 24 CubeSats in a single ESPA-class [Secondary Payload Adapter] payload volume. Upon reaching the desired orbit spring-loaded doors will release the satellites one-by-one.

First flight is planned for August 2012 which will carry 11 CubeSats for the Operationally Unique Technologies Satellite (OUTSat). This will enable NPS researchers to get one of their own CubeSats into space. The NPS STARE CubeSat is part of a collaborative effort between NPS and the Lawrence Livermore National Laboratory (LLNL) on a

proof-of-concept mission to observe other satellites and help determine threats posed by space debris.

The NPS has published a press release available on-line.

The AMSAT-UK web also provided coverage of this story.

[ANS thanks the US Naval Postgraduate School for the above information]

Successful ARISS School Contacts with California, Ecuador, and Japan

Academia Cotopaxi in Quito, Ecuador

On Friday, April 13, an ARISS) contact was held between students from Academia Cotopaxi in Quito, Ecuador and on-orbit astronaut Don Pettit, KD5MDT via station IK1SLD in Italy. Cotopaxi, an international American school with students in grades pre-K to 12, has a strong relationship with Ecuador's astronaut, Ronnie Nader, and the Ecuadorian Civilian Space Agency (EXA). It utilized several NASA resources in its curriculum covering space, technology and radio. Approximately 500 students and visitors were present for the event.

Saitama Scout Council Japan

Scouts from the Troop 2nd & 3rd Iruma Group, Saitama Scout Council, Scout Association of Japan participated in an ARISS contact on Saturday, April 14. An audience of 70 people, including one magazine representative, turned out for the contact and listened as the Scouts had their questions about living on the ISS answered by on-orbit astronaut Dan Burbank, KC5ZSX. The Scouts have their own radio club, JQ1YWJ and many of the Scouts have been attending amateur radio classes to become licensed.

Flabob Airport Preparatory Academy California

The Flabob Airport Preparatory Academy in Riverside, California had a successful ARISS contact on Thursday, April 19. The telebridge station IK1SLD in Italy provided the radio connection with the ISS. The ARISS contact complemented a comprehensive education plan to pique students' interest in Science, Technology, Engineering and Math (STEM).

After the event, ARISS mentor Clint Bradford, K6LCS declared, "SUCCESS at Flabob Airport this morning! Flight engineer Pettit answered all seventeen of our questions - from fifteen students." There were 211 in the audience, including 120 Flabob students, media, city council members, Gordon West and Don Arnold, and other dignitaries, AND a lot of parents, too!

Media coverage of the Flabob ARISS contact included California's sixth largest daily newspaper, The Press-Enterprise, sent a reporter, videographer, and photographer, the Bob Heil & Gordon West mediacast, Ham Nation, sent a videographer - and the contact will be on an episode of their webcast in the next couple of weeks. Newspaper coverage included the editor and publisher of The Riverside County Record. Clint was interviewed on PBS radio affiliate KVCR. The Inland Empire Television Network videotaped the entire event.

The Press-Enterprise is the region's major newspaper. Links to their video, article, and photographs are posted on ISS-Flabob site blog.

Clint invites you to check out http://www.iss-flabob.com since this site created for the ARISS event also offers links and publications on amateur radio, our space programs, ARISS, AMSAT, ARRL, ham radio licensing - and MORE - on the MORE INFO page.

[ANS thanks Carol Jackson, KB3LKI and the Amateur Radio on the International Space Station (ARISS) Status Report for April 16, 2012 and Clint Bradford, K6LCS for the above information]

Two Months to Field Day - AMSAT FD Rules Posted

AMSAT Director Contests and Awards, Bruce Paige, KK5DO reminds you that time of year is once again approaching - Field Day!

Each year the American Radio Relay League (ARRL) sponsors Field Day as an emergency preparedness exercise. The event takes place during a 24-hour period on the fourth weekend of June. For 2012 the event takes place during a 27-hour period between 1800 UTC on Saturday, June 23, 2012 and 2100 UTC on Sunday June 24, 2012. Those who set up prior to 1800 UTC on June 23 can operate only 24 hours.

The Radio Amateur Satellite Corporation (AMSAT) promotes its own version of Field Day for operation via the amateur satellites, held concurrently with the ARRL event.

With the loss of AO-51 and SO-67 field day this year is going to be most challenging. If you are considering ONLY the FM voice satellites like AMRAD-OSCAR-27 or SaudiSat-Oscar-50 for your primary AMSAT Field Day focus: Don't, unless you are simply hoping to make one contact for the ARRL rules bonus points.

The congestion on FM LEO satellites was so intense in prior years that we must continue to limit their use to one-QSO-per-FM-satellite. This includes the International Space Station. You will be allowed one QSO if the ISS is operating Voice. You will also be allowed one digital QSO with the ISS or any other digital, non-store-and-forward, packet satellite (if operational).

If you have worked the satellites on Field Day in recent years, you may have noticed a lot of good contacts can be made on some of the less-populated, low-earth-orbit satellites like VUSat OSCAR-52,Fuji-OSCAR 29 (may or may not be operational), AMSAT-OSCAR 7. During Field Day the transponders come alive like 20 meters on a weekend. The good news is that the transponders on these satellites will support multiple simultaneous contacts. The bad news is that you can't use FM, just low duty cycle modes like SSB and CW.

The AMSAT Field Day 2012 event is open to all Amateur Radio operators. Amateurs are to use the exchange as specified in ARRL rules for Field Day. The AMSAT competition is to encourage the use of all amateur satellites, both analog and digital.

For the complete listing of the AMSAT Field Day Rules please refer to

the documents posted on-line at:

http://www.amsatnet.com/fd2012.doc

http://www.amsatnet.com/fd2012.pdf

Links are also accessible from http://www.amsat.org front page.

[ANS thanks AMSAT Director Contests and Awards, Bruce Paige, KK5DO for the above information]

FAA CARSR Radar May Impose Amateur Operating Restrictions on 23cm

An ARRL bulletin this week noted that the Federal Aviation Administration (FAA) is deploying a new generation of Common Air Route Surveillance Radar (CARSR) that has some implications for the use of the 1240-1300 MHz (23 cm) band by amateurs.

The Amateur Service allocation in this band is on a secondary basis, with aeronautical radionavigation and several other services primary in the United States Table of Frequency Allocations. The FCC rules require that amateur stations operating in the 23 cm band may not cause harmful interference to stations in the radionavigation-satel-

lite service, the aeronautical radionavigation service, the Earth exploration-satellite service or the space research service.

One case of harmful interference in Southern California has been reported. CARSRs are being installed in several dozen locations throughout the country and will use various frequencies in the 1240-1350 MHz range with an occupied bandwidth of about 3 MHz. In the vicinity of the radars, amateur operation may be precluded in a portion of the 23 cm band. The ARRL is in contact with FAA engineers. The ARRL said they anticipate that the constraints on amateur use of the band will be limited to those necessary to protect aviation safety, which of course cannot be compromised.

[ANS thanks the ARRL for the above information]

AMSAT-UK on Satellites for World Amateur Radio Day

Members of AMSAT-UK operated on the amateur radio satellites from the RSGB National Radio Centre at Bletchley Park to celebrate World Amateur Radio Day (WARD) on Wednesday, April 18, 2012.

World Amateur Radio Day commemorates the founding of the International Amateur Radio Union (IARU) on April 18, 1925. This year□s theme was □Amateur Radio Satellites: Celebrating 50 Years in Space□ in remembrance of the launching of OSCAR 1 on December 12, 1961 and the launch of OSCAR 2 on June 2, 1962.

Those taking part in the event were Jim G3WGM, Dave G4DPZ, Trevor M5AKA, Ciaran M0XTD, Matthew SWL, Clive G3CWV, Carlos G0AKI and Elaine G4LFM. The satellites worked during the day included FO-29 and AO-7 and contacts were made with stations across Europe using the 144 and 430 MHz bands.

The equipment used comprised a Kenwood TS-2000 with WiMo X quads for 144 and 430 MHz, with pre amps and polarisation switches.

Read the rest of this article, along with links to photos and video on-line on the AMSAT-UK web.

[ANS thanks AMSAT-UK for the above information]

UK Will Restrict Use of Amateur Satellite Frequencies During Olympics

Trevor, M5AKA has filed the following notice on the AMSAT-UK web. The Olympic and Paralympic Games will be using almost half of the 430 MHz amateur radio allocation as well as segments of 2.3 GHz and 3.4 GHz during the period June 28 to September 23.

The impact on the Amateur-satellite Service 435-438 MHz allocation has been restricted to 436.25-437.25 MHz. It is understood that the equipment being used in the 430 MHz band will include handheld FM rigs at the hotels, the routes to the venues and the venues themselves.

The UK communications regulator Ofcom has provided details of the areas that need to be protected from RF within the designated frequency ranges. Follow the link to the AMSAT-UK web for the details of the region affected by the restrictions.

Ofcom say the use of radio by Amateurs in the designated areas could cause interference to Games applications; it is also possible that higher power transmissions from outside these areas could cause interference. Consequently, to avoid the risk of interference to Games applications, Ofcom request that Amateurs do not operate within the frequency ranges identified in the areas defined in Annexes A and B, and that Amateurs ensure that any signals that could be received in these areas are negligible. This indicates that the specified frequency ranges should be avoided for a considerable distance outside the designated zones. Clearly a well equipped station on a good site 75 km from the edge of a zone could still put a signal into that area.

[ANS thanks Trevor, M5AKA and AMSAT-UK for the above information]

Silent Key - Greg Butler, KI4OTG

AMSAT has received the sad news of the passing of satellite operator Greg Butler, KI4OTG of Memphis, Tennessee. Greg had a heart attack on April 18 and did not survive it. He just turned 48 in February. He is survived by his 18 year old son

Rick Tillman, WA4NVM noted, "Greg was one of the truly nice guys, always polite and there to help. It's been our great pleasure and privilege to know and work with him in the Memphis ham community. He will truly be missed. God bless your soul faithful servant,"

John Papay, K8YSE recalled, "Greg was one of the most courteous operators that I've known. He was active on the birds and enjoyed working new grids. Greg was a gentlemen. We will miss hearing his voice on the birds."

[ANS thanks Rick Tillman, WA4NVM and John Papay, K8YSE for the above information]

Satellite Shorts From All Over

It is time to submit nominations for the upcoming open seats on the AMSAT-NA Board of Directors. Three directors and two alternate directors have terms expiring this year. The director seats open for election are held by Tom Clark, K3IO; Lou McFadin, W5DID; and Gould Smith, WA4SXM. The alternate director seats open for election are held by Mark Hammond, N8MH and Patrick Stoddard, WD9EWK. The AMSAT front page news has the instructions to submit your nominations.The 2012 AMSAT Annual Meeting and Symposium will be held at the Holiday Inn, Orlando (Florida) Airport on October 26-28, 2012. Watch for the Call for Papers and more details as they become available. If you are interested in a Monday Trip (October 29) to the Kennedy Space Center please contact Martha via email: martha at amsat.org. The trip will include a round trip bus from the hotel and entrance to the Space Center. The cost will be about $100. This is a wonderful experience for those that haven't been and for those that have been multiple times. We need to get an idea of how many will participate to select the correct bus.If you worked KP4FD as members of the Puerto Rico Field Day Group celebrated the IARU "World Amateur Radio Day" on April 18 you can receive an electronic certificate by sending a request via WP3GW. The group will also provide confirmations will be via eQSL and LoTW.The next Hudson Valley Satcom net date is Thursday, April 26 at 8:00 PM EDT (UTC -4) on the 146.970 MHz repeater, and also on the N2EYH-L Echolink node. (via Stu, WA2BSS)Technical papers are solicited for presentation at the 31st Annual ARRL and TAPR Digital Communications Conference on September 21-23, 2012 in Atlanta, Georgia. Please send papers to: Maty Weinberg, ARRL, 225 Main St., Newington, CT 06111 or via e-mail to: maty@arrl.org.UniverseToday posted a collection of photos of the Shuttle Discovery final flight aboard NASA's 747 Shuttle Carrier Aircraft during its Washington DC overflight and delivery to the Smithsonian Udvar-Hazy Center in Chantilly, Virginia.

Video of the event is posted at: http://tinyurl.com/April17-Discovery

Photos and a video of Discovery's departure from the Kennedy Space Center in Florida are posted at: http://tinyurl.com/Florida-Discovery

NASA Goddard Center photos of the flight over Washington DC are at:
http://www.flickr.com/groups/discoverygoddard/

A time-lapse photo panorama of Discovery's take-off from Florida:
http://spaceflightnow.com/shuttle/st.../pano_full.jpgSee how the moon appears to the crew aboard the ISS.Students at Drexel University need mentoring in setting up a ground station. If you can help please contact Nick Pugh, K5QXJ via e-mail at quadpugh@bellsouth.net and he will put you in touch with the professor leading the cubesat program.Painstakingly assembled from over 150,000 digital photos taken over the course of eight months, this stunning time-lapse video of aurora-filled Arctic skies is the latest creation by photo/video artist Ole C. Salomonsen. Take a moment, turn up the sound, sit back and enjoy the show! Play this too much and the XYL is going to wonder what you're up to in the shack.

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that please keep in mind how fast we are going as the Earth orbits the sun at an average speed close to 30 km per second. The Sun travels at a speed of 250 km per second, but it still takes 230 million years for it to complete a single revolution of the galaxy.

73,

FOR IMMEDIATE RELEASE

Contact:

Scott Roberts, KK4ECR

kk4ecr@gmail.com

(904) 759-7812

BOY SCOUTS OF AMERICA, THE NORTH FLORIDA COUNCIL CHARTERS AMATEUR RADIO STATION KB4SA ☐ INAUGURAL EVENT ON MAY 12, 2012.

Clay County, Florida (April 12, 2012) ☐ Boy Scouts of America, The North Florida Council announces the charter of amateur radio station, KB4SA. KB4SA encourages, equips and prepares young people to be vibrant citizens and dynamic community leaders through the use of amateur radio and the practice of emergency communication guided by the Scout Oath and Scout Law.

The inaugural event of KB4SA is scheduled for May 12, 2012 at Camp Echockotee, 2513 Doctors Lake Drive, Orange Park, FL 32073. Scouts will see local amateur operators in action and also communicate, via radio, with other amateur radio operators, local and around the world.

During future events, Scouts will earn merit badges related to radio, communications and science; receive a FCC Amateur Radio license; participate in local emergency communications drills; and provide communication support for community charity events such as bike-a-thons.

Peter Duzant, founder of the KB4SA said, ☐Amateur radio is a rewarding hobby that allows Scouts to learn, not only about radio and electronics, but also that it goes hand-in-hand with duty to country and community.☐

Chuck Courson, Director at Camp Echockotee adds his support, ☐The starting of Amateur Radio Club, KB4SA, will allow us to be able to help scouts be better prepared to give back to their community in a very meaningful way. We are excited about the opportunities that this will provide for the scouts.☐

Sponsors for the Amateur Radio Club KB4SA include Clay County Amateur Radio Emergency Service and Journey Church.

# # #

Boy Scouts of America was founded in February of 1910 with the purpose of providing programs for young people that build character, and trains them in the responsibilities of citizenship and giving back to the community. The Boy Scouts of America now has a membership of 2,723,869 youth.

More information about the Amateur Radio Club KB4SA and other events scheduled with the Boy Scouts of America can be found on the club web site at http://www.kb4sa.org. To schedule an interview, or your attendance at the event, please contact Scott Roberts at (904) 759-7812 or by email at kk4ecr@gmail.com.

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

April 25, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Beyond VHF - Spring Sprints, EME, 2 GHZ and Up
- Out and About - QRP To the Field and ARS Spartan Sprint
- Relax - You're Two Tents
- Titanic Radio History
- The Ultimate in Cool Transmitters
- Sweepstakes, 160 Meter, and Rookie Roundup Results
- Base Bolts Basics
- History of Character Codes
- To See Things for Yourself

NEW HF OPERATORS - THINGS TO DO

There are several "targeted" contests coming up that are excellent
opportunities for new HF operators. In the DX arena you'll find the
Helvetia (Swiss), SP DX RTTY (Polish), and ARI International (Italian)
contests. Here in the US you can operate in two regional (New England
and 7th District) and two state (Nebraska and Florida) QSO parties. Get
your logging software configured and have fun!

BULLETINS

The ARRL Programs and Services Committee has approved a rule change for
ARRL VHF+ contests effective beginning in 2013 (not this year) to
create a Single-Op FM-only category (100 W max, 50/144/222/440 MHz) and
a three-band Single-Op category (100 W PEP on 50 and 144 MHz, 50 W PEP
on 432 MHz). These changes will apply to the January, June, and
September contests - again, beginning with the 2013 January VHF
Sweepstakes.

BUSTED QSOS

Info on the 7QP came from K4XU/N7XU which your editor comingulated to
K7XU. The proprietor of RF Technology International is K9AY, not K9AG.
But do check out the magazine, regardless! (Thanks, Pete N4ZR and Tom
K1KI)
```

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

April 28-29

- VHF Spring Sprints--432 MHz (Apr 25)
- Worldwide EME Contest
- Ten-Ten Spring Digital Contest
- Nebraska QSO Party
- SP DX RTTY Contest
- Helvetia Contest
- QRP To The Field--CW
- Florida QSO Party
- BARTG 75 Sprint

May 5-6

- 2 GHz and Up World Wide Contest
- Microwave Spring Sprint
- Ten-Ten Spring CW Contest
- 7th Area QSO Party
- Indiana QSO Party
- Radio Club of America QSO Party--Phone
- ARI International DX Contest
- New England QSO Party
- ARS Spartan Sprint--CW (May 8)
- OK1WC Memorial Contest (May 8)

A reminder - check out the online contest calendars of WA7BNM and SM3CER. They often have additional contests to those listed here, including links to the sponsoring websites.

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

WRTC 2014, Inc., host of the 2014 World Radiosport Team Championship <http://www.wrtc2014.org/>, is pleased to announce the first two tent sponsors <http://www.wrtc2014.org/sponsors/tent-sponsors> from Europe - the Contest Club of Finland (sponsor of WRTC 2002) and Contest University (CTU) Italy 2012. WRTC 2014 provides each of the 59 teams a complete operating location including tent, tower, antenna, generator, etc. Tent sponsorships of $1,000 from clubs and other groups help to provide the funding for this equipment. Here in the US, the Northern California Contest Club, Potomac Valley Radio Club, Society of Midwest Contesters, and Yankee Clipper Contest Club have each sponsored two or more tents.

Dave W9ZRX is making his first and LAST call for VHF Contest Logs for the 2012 Super Check Partial (SCP) Database <http://www.k3lr.com/w9zrx/>. Due to some upcoming surgery, the June release will be the only release in 2012. Please do continue to send Dave your 2012 Contest logs for the remainder of the year - they will be archived for the 2013 release.

Ed WA3WSJ has released a new Kindle book "Amateur Radio and the Great Outdoors <http://www.wa3wsj.org/WA3WSJ-Kindle-Book-Store.html>" on the joys of operating "out and about." 300 pages long, it covers all sorts of topics associated with portable operation - antennas, power sources, hiking, safety, and more. This is a companion to Ed's "Amateur Radio Pedestrian Mobile" book.

European Sprint Manager, Dave G4BUO writes, "Unfortunately we have had a number of problems with the European Sprint and a new email address for logs was not ready in time. If you get a bounce message from the published address for logs please email your log directly to me at sprint@g4buo.com. I want to give thanks publicly to Dima, RW3FO who has been working very hard to keep the EU Sprint show on the road, including spending many hours processing the logs from the autumn contest, after our new checking software became unavailable."

Dick K6KAL has created a Frequency Display add-on <http://www.qsl.net/k6kal/> for N1MM that shows main VFO and secondary VFO frequencies in a variable window and font size, variable font size, type, and color to make the information easier to see. (Thanks, Larry N6NC)

AMSAT is closing in on the $6500 needed to purchase the special high-efficiency, space-rated solar panels for its new Fox-1 Cube-Sat <http://www.amsat.org/amsat-new/fox/> that will act as a temporary replacement for AO-51, lost to battery failure. Five additional Cube-Sats from Japan, Vietnam, and the United States are in final preparation for launch to the ISS in July in a Japanese re-supply mission. If your Field Day group is planning on obtaining the bonus points for a satellite QSO, not having AO-51 means a lot of congestion on the FM-only AO-27 and ISS space-borne repeaters. Check out the AMSAT Field Day operational rules <http://www.amsat.org/amsat-new/images/fck_images/2012_AMSAT_FD_Rules%281%29.pdf> before making your final plans - you might want to try the birds featuring linear transponders that can handle more signals on CW and SSB.

The DXCoffee website has published an interview <http://www.dxcoffee.com/eng/2012/04/16/pacific-ocean-n7ous-ham-radio-home/> on DX operating with contester and DXpeditioner, Bill N7OU. Bill traded a home station for 100% expeditioning some years again and is thoroughly enjoying himself. (Thanks, Christian IX1CKN)

Technical papers are being solicited for presentation at the 31st Annual ARRL and TAPR Digital Communications Conference <http://www.tapr.org/dcc.html> on September 21-23, 2012 in Atlanta, Georgia. Please send papers to: Maty Weinberg, ARRL, 225 Main St., Newington, CT 06111 or via e-mail to: maty@arrl.org.

Web Site of the Week - Along with remembering the Titanic in this centennial year of its sinking, there is an elevated interest in early radio. The IEEE Spectrum discusses the Titanic's role in radio reform <http://spectrum.ieee.org/static/the-titanics-role-in-radio-reform/?utm_source=techalert&u

tm_medium=email&utm_campaign=041212>
and Doug K1DG tips us to the Communications Act of 1912
<http://earlyradiohistory.us/1912act.htm> that led Amateur Radio into
the "200 meters and down" wilderness (see Section 15) with all that
came next. Imagine what a shock it must have been in those days to
discover that the short waves were open during the day! If that
paragraph had been absent, so would have modern ham radio. A BBC
Titanic "special broadcast
<http://www.bbc.co.uk/iplayer/console/p00q89fy>" converts the wireless
telegraphy to voice, including losing the signal as the ship sunk. Tim
K3LR recommends the portions from 4:43 - 23:00 and after 26:28 as the
best parts of the nearly hour-long program.

WORD TO THE WISE

Brag tape - a pre-programmed message describing a station's equipment
and accomplishments. The word "tape" recalls the long-gone days when
RTTY teleprinters used punched paper tape
<http://www.wps.com/J/paper-tape/index.html> to store messages.

==> SIGHTS AND SOUNDS

This looks like the ultimate transmitter <http://youtu.be/neHreW-PNtw>
- don't you think everyone should have one? (Thanks, Jim K7WA)

Photos from the Visalia International DX Convention have been
published by Bob N6TV <http://bit.ly/Visalia2012> and Hector XE2K
<https://plus.google.com/photos/117177580566330031658/album/5734786094851761057?gpinv=AMIX
al-Fihxv7-wyK3Lj3ufrvYw20lf_tBOrX5OvRE-ovHfpdnsQXmB7cO0KGYT-bOsR9aEGq4A2bfql0KLi07emxxO6zq
LamAG1Uiur6fbszU4q52VJ4TI#photos/117177580566330031658/albums/573478609485176>.
You'll recognize a lot of the call signs - and there are lots of
smiling faces, too.

Top-scoring Rookie Roundup participant Ashley K6NAA was captured on
video <http://www.youtube.com/watch?v=CNfsw19_4-Y> making a couple of
contacts by station host and contest Elmer, Bob N6TV.

==> RESULTS AND RECORDS

Expanded results <http://www.arrl.org/results-records-and-awards> for
the 2011 ARRL Phone and CW Sweepstakes, including excellent in-depth
articles by Steve London N2IC and Kelly Taylor VE4XT, results databases
and Log-Checking reports, are now online. Also on-line as of today is
the extended version of Gary K9AY's 160 Meter Contest report. Results
for the April 15th Rookie Roundup <http://www.arrl.org/rookie-roundup>
have been released today, too. (Thanks, ARRL Contest Branch Manager,
Sean KX9X)

Looking for the line scores of ARRL contests? "Full line scores for
all ARRL contests are already available on-line
<http://www.arrl.org/contest-results-articles>. Select your favorite
contest, and select "Printable Line Scores". (Thanks, Steve N2IC)

WRTC-2014 standings
<http://www.wrtc2014.org/competitors/qualification-standings/> have
been updated to include the official results from CQ WPX CW, All Asia
DX CW and SSB, WAE CW and SSB, and ARRL Sweepstakes CW. Team Selection
Direction, Dan K1TO is getting excited - "22 down, 33 to go! Once
again, the standings show a number of new leaders in their Selection
Areas. CQ WPX CW next month is the 35th qualifying
<http://www.wrtc2014.org/competitors/team-selection/qualifying-event-calendar>
event out of the 55 total events so there are still 21 events left to
operate!"

The CQ WPX Contest's "official" high claimed scores just went online
<http://www.cqwpx.com/claimed.htm?mode=ph>. The 5,264 logs submitted so
far is a new record for the contest. Scores are calculated by the log
checking software and before any reductions. (Logs submitted as check
logs are not included in the claimed scores.) Please check that your
log has been placed in the correct category. Any feedback or
corrections should be made to k5zd@cqwpx.com. Even though 10 meters
didn't open as much as everyone had hoped, we still had a number of
record scores and stations across the US are seen in the Top Ten.
(Thanks, CQ WPX Director, Randy K5ZD)

Barry W5GN reports that direct mailing of the US, Canadian, and
Mexican certificates for the CQ WPX 2011 CW Contest was completed on
Saturday. 43 envelopes were found to have been mis-addressed and have
been re-mailed - it is not necessary to return or re-mail the
certificates.

The 2011 Florida QSO Party results
<http://floridaqsoparty.org/results/fqp2011.pdf> are complete and have
been posted! (Thanks, Ron WD4AHZ)

OPERATING TIP

During the recent April ARRL Rookie Roundup
<http://www.arrl.org/rookie-roundup> there was a bit of confusion about
call signs and identification requirements. A Technician call sign
cannot be used on the HF phone bands (other than 10 meters) without
adding the control operator's call. For example, a Technician such as
KE7VDA working 20 meter phone at her station with control operator
K6UFO would have to sign KE7VDA/K6UFO to show that the control operator
is authorized for those frequencies, or simply use the control
operator's call sign. (See FCC §97.119
<http://www.arrl.org/part-97-amateur-radio>) For non-Rookie operators,
should you encounter an operator identifying with a call sign not
authorized for that frequency, politely inform them of the problem,
make sure there isn't some mistake, and then suggest the correct
procedure as you would like to be informed of a problem with your
operating - no need to get upset as we all make mistakes.

==> TECHNICAL TOPICS AND INFORMATION

If you are putting in a tower base that will place significant tension on the anchor bolts, follow US Tower's lead and use a large, straight bolt with two nuts on the concrete end. With the two nuts on the bolt, spoil the threads below the lower nut (smash them with a hammer and chisel, for example) to prevent the nuts from working loose before the concrete sets. (Thanks, Steve K7LXC and Hank KR7X)

John K6MM provided a great overview of log analysis tools in his Visalia International DX Convention presentation, "Post-Contest Log Analyzers <http://www.nccc.cc/pdf/K6MM-IDXC2012.pdf>". You can learn a lot about your log and use that information for doing better in the next contest!

"Does Anyone Repair Electronics Any More?" Electronic Design <electronicdesign.com> magazine answered that question in a blog entry of the same name by Lou Frenzel.

What's the deal on Arduino? Howduino! But you can find out in this Make magazine online introduction <http://www.instructables.com/id/Intro-to-Arduino/> to the growing family of Arduino microprocessor development boards.

Portable contest operators - such as for Field Day, roving, and run-and-gun adventures - will find a lot of good information on the use and care of telescoping poles <http://www.allfishingbuy.com/Surf-Rods.htm> about half way down the page. (Thanks, Steve NU7T)

The May edition of the Potomac Valley Radio Club (PVRC) newsletter <http://pvrc.org/Newsletters/may12.pdf%20> has a good article by Tom K3AJ on raising small towers with a tow truck. There is also a good article on Samuel Morse by John K3TN.

Contesters drill through walls quite a bit - hanging plaques and certificates, no doubt. Make cleanup a little easier with this idea for using coffee filters <http://blog.makezine.com/2011/10/20/tape-up-a-coffee-filter-to-catch-drill-dust/> from Make magazine's online tip collection.

Technical Web Site of the Week - Have you ever wondered where the digital mode character codes come from? Wonder no more after reading Tom Jennings' history of character codes <http://www.wps.com/J/codes/index.html> unearthed by Bob N7RDP. The WPS website is full of fascinating articles and information.

==> CONVERSATION

To See Things for Yourself

I continue to find many parallels between the amateur astronomy community and Amateur Radio. Perhaps it is because we both use sensitive instruments to discern the signals from distant and wonderful places? As such, a special premium is often awarded for using one's own senses to perform as much of the detection and understanding as

possible.

The "Focal Point" column by Thomas Watson in the May issue of Sky & Telescope <http://www.skyandtelescope.com/> discussed why this is so through the eyes of an astronomer. The question for his community of stargazers revolves around the use of astroimaging technology - once film cameras and now CCD detectors - as opposed to peering through the eyepiece yourself.

Initially, he states, "The best picture postcard of the Grand Canyon will never replace standing on the rim and gazing into it with your own eyes." I do love visiting the Astronomy Picture of the Day <http://apod.nasa.gov/> web site and often follow the links describing the picture and the technology used to acquire it. Similarly, I thrill to see deep-space objects imaged by the Hubble Space Telescope and other magnificent instruments. I'll never confuse those views, however, with lining up my own dim and wavering view of a Messier object <http://en.wikipedia.org/wiki/Messier_object> through my small reflector - astronomy's DXCC.

Later in the column Watson arrives at the crux, writing, "The depth and beauty of the universe gain a new level of meaning when you take the time to see things for yourself." Replace "see" with "hear" and you can easily understand the parallels between those of us who experience the universe through our radios and those who use telescopes. Those two are very much the same - collectors and concentrators of photons - although of quite different wavelengths.

Not explicitly stated in Part 97.1's Basis and Purpose but underlying it all the same, the ability to experience the natural world one-on-one through the magic of radio is Amateur Radio's great reservoir of strength. Some may prefer to copy CW like free climbers gripping a granite face with fingers and toes and rosin. Other may prefer to pull signals swimming deep in and ocean of noise to the surface through coding wizardry. Yet we all share the same fundamental spirit of adventure and discovery, educing beauty in the diminutive and ephemeral electromagnetic vibrations of space and time--to see it for ourselves.

73, Ward N0AX

==> CONTESTS

25 April through 8 May

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Ten-Ten Spring Digital Contest--Digital, from Apr 28, 0001Z to Apr 29, 2359Z. Bands (MHz): 28. Exchange: Call, name, county & S/P/C, 10-10

number. Logs due: 15 days. Rules <http://www.ten-ten.org/>

Nebraska QSO Party--Phone,CW,Digital, from Apr 28, 1100Z to Apr 29, 1700Z . Bands (MHz): 1.8-28, 50, 144, Frequencies: CW: 1.805 and 35 kHz above band edge,Nov/Tech--10 kHz above band edge; Phone--1.915, 3.865, 7.265, 14.265, 21.365, 28.465, 146.460. Exchange: RS(T), NE county or S/P/C. Logs due: May 31. Rules <http://www.hdxa.net/>

SP DX RTTY Contest--Digital, from Apr 28, 1200Z to Apr 29, 1200Z . Bands (MHz): 3.5-28. Exchange: RST, serial, SP province. Logs due: May 24. Rules <http://www.pkrvg.org/zbior.html>

Helvetia Contest--Phone,CW,Digital, from Apr 28, 1300Z to Apr 29, 1259Z . Bands (MHz): 1.8-28. Exchange: RS(T), serial or Swiss canton. Logs due: 15 days. Rules <http://www.uska.ch/>

QRP To The Field--CW, from Apr 28, 1500Z to Apr 29, 0300Z. Bands (MHz): 7-28. Exchange: RST, S/P/C. Logs due: Jun 1. Rules <http://www.zianet.com/qrp>

Florida QSO Party--Phone,CW, from Apr 28, 1600Z to Apr 29, 0159Z and Apr 29, 1200Z to Apr 29, 2159Z . Multiple operating periods. Bands (MHz): 7-28. Frequencies: see website. Exchange: RS(T), FL county or S/P/C. Logs due: 30 days. Rules <http://www.floridaqsoparty.org/>

BARTG 75 Sprint--Digital, from Apr 29, 1700Z to Apr 29, 2100Z. Bands (MHz): 3.5-28. Exchange: Serial. Logs due: Jun 1. Rules <http://www.bartg.org.uk/documents/contests/hf/rules/bartg-hf-rtty-contest-rules-2012.pdf>

Ten-Ten Spring CW Contest--CW, from May 5, 0001Z to May 6, 2359Z. Bands (MHz): 28. Exchange: Call sign, name, 10-10 number, state. Logs due: 15 days. Rules <http://www.ten-ten.org/>

7th Area QSO Party--Phone,CW,Digital, from May 5, 1300Z to May 6, 0700Z. Bands (MHz): 1.8-28, 50, 144, Frequencies: CW--40 kHz above band edge; SSB--1.845, 3.855, 7.235, 14.255, 21.355, 28.455. Exchange: RS(T)+S/P or 7th-area county code. Logs due: Jun 2. Rules <http://7qp.org/>

Indiana QSO Party--Phone,CW, from May 5, 1600Z to May 6, 0400Z. Bands (MHz): 1.8-28. Frequencies: CW--1.805 and 40 kHz above the band edge on 80-10 meters, SSB--1.845, 3.820, 7.190, 14.250, 21.300, 28.400. Exchange: RS(T) + S/P or IN county, DX RS(T) only. Logs due: Jun 15. Rules <http://www.hdxcc.org/inqp>

Radio Club of America QSO Party--Phone, from May 5, 1700Z to May 6, 0459Z. Bands (MHz): 3.5-21. Exchange: RS, QTH, name, equipment. Rules <http://www.radio-club-of-america.org/>

ARI International DX Contest--Phone,CW,Digital, from May 5, 2000Z to May 6, 1959Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or Italian province. Logs due: 30 days. Rules <http://www.ari.it/>

New England QSO Party--Phone,CW,Digital, from May 5, 2000Z to May 6, 0500Z and May 8, 1300Z to May 8, 2400Z. Multiple operating periods. Bands (MHz): 3.5-28. Frequencies: CW--3.540, 7.035, 14.040, 21.040, 28.040; SSB--3.850, 7.180/280, 14.280, 21.380, 28.380. Exchange: RS(T) and S/P or New England county. Logs due: 30 days. Rules <http://www.neqp.org/>

ARS Spartan Sprint--CW, from May 8, 0200Z to May 8, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

OK1WC Memorial Contest--Phone,CW, from May 8, 1600Z to May 8, 1659Z, first through fourth Monday of each month. Bands (MHz): 3.5, 50, 144, Frequencies: see website for bands. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

VHF+ CONTESTS

VHF Spring Sprints--Phone,CW,Digital, from Apr 25, 7 PM to Apr 25, 11 PM. Bands (MHz): 432. Exchange: Grid square (6-character preferred). Logs due: 14 days. Rules <http://sites.google.com/site/springvhfupsprints>

Worldwide EME Contest--Phone,CW, from Apr 28, 0000Z to Apr 29, 2400Z. Bands (MHz): 2.3G. Exchange: TMO/RS(T) and "R". Logs due: Jun 25. Rules <http://www.dubus.org/>

Nebraska QSO Party--Phone,CW,Digital, from Apr 28, 1100Z to Apr 29, 1700Z . Bands (MHz): 1.8-28, 50, 144, Frequencies: CW: 1.805 and 35 kHz above band edge,Nov/Tech--10 kHz above band edge; Phone--1.915, 3.865, 7.265, 14.265, 21.365, 28.465, 146.460. Exchange: RS(T), NE county or S/P/C. Logs due: May 31. Rules <http://www.hdxa.net/>

2 GHz and Up World Wide Contest--Phone,CW,Digital, from May 5, 6 AM to May 6, 8 PM. Bands (MHz): 2.3G+. Exchange: 6-char grid locator. Logs due: 60 days. Rules <http://www.ham-radio.com/sbms>

Microwave Spring Sprint--Phone,CW,Digital, from May 5, 6 AM to May 5, 1 PM. Bands (MHz): 902+. Exchange: Grid square (6-character preferred). Logs due: 14 days. Rules <http://sites.google.com/site/springvhfupsprints>

7th Area QSO Party--Phone,CW,Digital, from May 5, 1300Z to May 6, 0700Z. Bands (MHz): 1.8-28, 50, 144, Frequencies: CW--40 kHz above band edge; SSB--1.845, 3.855, 7.235, 14.255, 21.355, 28.455. Exchange: RS(T)+S/P or 7th-area county code. Logs due: Jun 2. Rules <http://7qp.org/>

Indiana QSO Party--Phone,CW, from May 5, 1600Z to May 6, 0400Z. Bands (MHz): 1.8-28. Frequencies: CW--1.805 and 40 kHz above the band edge on 80-10 meters, SSB--1.845, 3.820, 7.190, 14.250, 21.300, 28.400. Exchange: RS(T) + S/P or IN county, DX RS(T) only. Logs due: Jun 15. Rules <http://www.hdxcc.org/inqp>

==> LOG DUE DATES

25 April through 8 May

- April 25 - NSARA Contest, CW <http://nsara.ve1cfy.net/nsaracst.htm>

Eastern North Carolina - 22nd Annual Down East Hamfest - Kinston, NC - June 30, 2012

Posted: 24 Apr 2012 12:55 PM PDT
http://forums.qrz.com/showthread.php?343704-Eastern-North-Carolina-22nd-Annual-Down-East-Hamfest-Kinston-NC-June-30-2012&goto=newpost

The 22nd annual Down East Hamfest in Kinston, North Carolina will be held at Lenoir Community College on Saturday, June 30, 2012. LCC is located at 231 Highway 58 South, Kinston, NC 28503. Doors open at 8:00 AM with the scheduled closing time at 3:00 PM.

Ticket / Table information: Advance Tickets are $5 each or 3 for $12. Tickets at the door are $6 each or 3 for $15. Tables are $12 each and electrical outlets are $5 each. Tailgating Sites are $12 each for 2 slots. Tables and tailgating sites are available through Pre-Registration on a first come - first served basis. Table and Tailgate site locations are assigned by the HAMFEST.

PLEASE USE THE ATTACHED FLYER TO PRE-REGISTER. Additional information can be obtained from Byron Highland K4BMH by email at bhighland@nc.rr.com or by phone at (252) 347-1498 between the hours of 5:00 PM and 10:00 PM. All other calls will go to voicemail and will be answered as soon as possible.

Amateur Radio Exam Testing (Walk-Ins Only) begin at 11:00 AM. Those wishing to test need to bring an original and a copy of your license or certificate and Credit Certificate (if applicable).

SkyWarn Training & Information presented by NWS Newport / Morehead City will be held during the morning with times posted on the hamfest website when confirmed.

The Lenoir Community College Gym is a climate controlled facility with plenty of table space.

Economical Meals and Refreshments are available on site.

VENDORS: SET UP IS AVAILABLE FRIDAY, JUNE 29TH FROM 1:00 PM UNTIL 9:00 PM. An "Eastern NC Pig Pickin'" will be held at 6:00 PM Friday night for Vendors, so please try to arrive to set up early enough to eat. Barbeque Pork and Barbeque Chicken along with side dishes will be served.

The DOWN EAST HAMFEST is an ARRL Sanctioned Hamfest and has been for its entire life!

Ei80irts special event station

Posted: 24 Apr 2012 12:29 PM PDT
http://forums.qrz.com/showthread.php?343700-Ei80irts-special-event-station&goto=newpost

The Irish Radio Transmitters Society (IRTS) are celebrating 80 years in
2012. This call will be used by affiliated clubs and individuals throughout
2012, and as a headquarter station, full details of the contest can be
found here:

http://www.irts.ie/cgi/cqir.cgi

ei80irts award

The Irish Radio Transmitters Society was founded in 1932 and we are proud
to celebrate our 80th anniversary in 2012. As part of the celebrations the

Society will be using the special callsign EI80IRTS.

A special certificate, available to all amateurs and SWLs, is being offered to celebrate this wonderful occasion. Contact the special callsign EI80IRTS during the period of January 1st 2012 to December 31st 2012.

Requirements

2-way communication on Phone, CW or Digi modes on the HF (1.8-28) and VHF (50-1200MHz) bands.

Cross band QSO☐s will not be accepted for this award.

Contacts made via active earthbound reflectors, repeaters and EchoLink will not be counted.

The certificate is available in three levels:

☐Bronze Award 3 different bands.

☐Silver Award 5 different bands.

☐Gold Award 8 different bands.

Applicants

Applicants should submit a list showing the date and time you worked or heard EI80IRTS, plus frequency and mode. QSL cards are not required. The declared QSO☐s will be cross-checked for validity based on the logs of EI80IRTS. The application fee is ☐5 or US $7.

Thos EI2JD will be the manager for this award.

Send applications to:

Thos Caffrey,

The Slip,

Clogherhead,

Co. Louth,

Ireland.

At the same time, please send an e-mail to contestmanager@irts.ie to inform him that you sent your application by mail.

Award is sponsored by the Dundalk Amateur Radio Society.

Thank you for working us, and full QSL info is available on the Detail tab above. You can do a log search by entering your callsign on clublog, all log enquiries to EI4GXB.

Sláinte

Jim EI4KE

** MMMonVHF Newsletter / No.01 - WEEK 17/2012 **

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-04-04
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF back on track **

During the last two weeks you will have noticed that the MMMonVHF
webpages have been offline a couple of times for several hours and
once for more than one day. You will also have noticed that you
have not received our weekly newsletter in the last two weeks
before this issue.

Main reason is that we had a security issue to deal with.
When this occured while sending the weekly newsletter, the pages
went offline.
The real cause and solution was not easy to find so we decided
to skip the newsletter and were able to remove the NL-scrips
from our server to have a better understanding what happened.

Our webmaster Ansgar, DG2KBC, succeeded in finding the cause of the
security issue and soon after that the webpages were online again
and the newsletter script was reinstalled.

Our apologies for not being there for some time. We received some
E-mails that we were missed and for our team it's good to know
that our work is appreciated.

73 de Frank, PA4EME, on behalf of the team of MMMonVHF

** PI9CAM last activity before restauration **

The Dwingeloo Dish, also known as PI9CAM, will be removed from it's
pedastal for the BIG restoration. The last activity from the dish
will be on April 28th in the evening. Bands in use will be 432 MHz
and 1296 MHz. As there are many visitors there will be also
some SSTV, listing to pulsars and optical telescopes. Around 22.00
UTC the 25 meter dish will taken out of service with a small ceremony
and the 56 year old monument is expected back in early 2013.
More information can be found on: www.camras.nl

TF3ML Portable operation from south coast of Iceland (HP94AC)

I will be on my specially built truck with large antennas,
high power on VHF and UHF and also on 50mhz, 70mhz and 28mhz.
Please look at my facebook site, there I will post my locator,
frequency and mode, which I will be operating.
If you have any requests on a special locator, I am completely
mobile. Send me a text or e-mail if you have any requests or
want to set up a sced. E-mail address: tf3ml@hotmail.com,
and mobile phone: 00354-8418311.

SOURCE: tnx to TF3ML direct to MMMonVHF

DXCC: GM; Scotland; square IO66; start 2012-04-28 **

Camb-Hams qrv again from IO66VH

Continuing the Camb-Hams traditional Scottish Island
activations, beginning with Mull in 2008, Harris in 2009
and 2010, and Arran in 2011, we&#65533;ve decided to return to
the Isle of Mull in the Scottish Inner Hebrides (IOTA EU-008).

But where the first year was part-time operation of a single
station, in a cottage at the base of some cliffs blocking
the path to North America, this year we are going for something
bigger.

ME-DXpedition 2012 de DL1YMK

The M&M-team is preparing the next EME-DXpedition, taking place in
May 2012. We will set out for our destination just after having
returned from the Swedish EME Meeting, organised by Lars, SM4IVE,
on the weekend 12./13th of May in Oerebro. We hope to reach our
destination in time and to get QRV on Thursday, 17th of May
(bank holiday in Europe) on 23 cm, followed by 70 cm on 18.05.
On Saturday, 19.05., we will be on 13 cm and on Sunday again on
23 cm. 13 cm will be run with a significant increase in power and
full 2424 MHz coverage. For the first time during an EME- DXpedition,
we intend to get also operational on 6 cm with our old, but proven
stressed dish and a new superb feed made by our friend Tommy,
WD5AGO. 6 cm will have an experimental character despite some 100 W
out, as we could not test so far, if the under-illuminated dish will
work up that high in frequency, so keep your fingers crossed!! Our
plan is to give it a try on Monday, 21th May. Also, we intend to
get active on 3 cm with a separate solid dish, which of course is
a lot smaller. Last weekend we made the first test with LX1DB, having
installed the dish in our garden place. The tests were not yet
satisfying, so our friend Willi right now is trying to help us out
with some substantial development aid!
During the DUBUS contest 26./27th of May, we will of course be
active on 23 cm in order to boost activity in the moonbounce contest
of contests. Our last day of operation will be Thursday, 31st of May.
A detailed schedule for the days from 21th May onwards predominantly
will depend on the progress with 10GHz in the meantime. Further details
to be published soon!! This years DXpedition will be the 9th
EME-DXpedition in a sequence for us. We hope to have fun all together
as experienced during past years DXpeditions.but this largely depends
on you.
Needless to say that it will be again a CW random event, although
doodle mode technically is possible (with a new laptop computer)
on request. We have no idea yet to what extent (if at all) i-net
access is feasable, though.

Vy 73, Michael and Monika

I will be on my specially built truck with large antennas,
high power on VHF and UHF and also on 50mhz, 70mhz and 28mhz.
Please look at my facebook site, there I will post my locator,
frequency and mode, which I will be operating.
If you have any requests on a special locator, I am completely
mobile. Send me a text or e-mail if you have any requests or
want to set up a sced. E-mail address: tf3ml@hotmail.com,
and mobile phone: 00354-8418311.

Camb-Hams qrv again from IO66VH

Continuing the Camb-Hams traditional Scottish Island
activations, beginning with Mull in 2008, Harris in 2009
and 2010, and Arran in 2011, we&#65533;ve decided to return to
the Isle of Mull in the Scottish Inner Hebrides (IOTA EU-008).

But where the first year was part-time operation of a single
station, in a cottage at the base of some cliffs blocking
the path to North America, this year we are going for something
bigger.

SOURCE: tnx to Gavin, M1BXG, direct to MMMonVHF

ME-DXpedition 2012 de DL1YMK

The M&M-team is preparing the next EME-DXpedition, taking place in
May 2012. We will set out for our destination just after having
returned from the Swedish EME Meeting, organised by Lars, SM4IVE,
on the weekend 12./13th of May in &#65533;rebro. We hope to reach our
destination in time and to get QRV on Thursday, 17th of May
(bank holiday in Europe) on 23 cm, followed by 70 cm on 18.05.
On Saturday, 19.05., we will be on 13 cm and on Sunday again on
23 cm. 13 cm will be run with a significant increase in power and
full 2424 MHz coverage. For the first time during an EME- DXpedition,
we intend to get also operational on 6 cm with our old, but proven
stressed dish and a new superb feed made by our friend Tommy,
WD5AGO. 6 cm will have an experimental character despite some 100 W
out, as we couldn&#65533;t test so far, if the under-illuminated dish will
work up that high in frequency, so keep your fingers crossed!! Our
plan is to give it a try on Monday, 21th May. Also, we intend to
get active on 3 cm with a separate solid dish, which of course is
a lot smaller. Last weekend we made the first test with LX1DB, having
installed the dish in our garden place. The tests were not yet
satisfying, so our friend Willi right now is trying to help us out
with some substantial development aid!
During the DUBUS contest 26./27th of May, we will of course be
active on 23 cm in order to boost activity in the moonbounce contest
of contests. Our last day of operation will be Thursday, 31st of May.
A detailed schedule for the days from 21th May onwards predominantly
will depend on the progress with 10GHz in the meantime. Further details
to be published soon!! This year&#65533;s DXpedition will be the 9th
EME-DXpedition in a sequence for us. We hope to have fun all together
as experienced during past years DXpeditions.but this largely depends
on you.
Needless to say that it will be again a CW random event, although
doodle mode technically is possible (with a new laptop computer)
on request. We have no idea yet to what extent (if at all) i-net
access is feasable, though.

Vy 73, Michael and Monika

3B8, MAURITIUS, AF-049
Mart,DL6UAA, is once again active as 3B8MM from Mauritius (AF-049),
the length of his stay is not known. Listen for him mainly in CW with
some SSB and digital modes on 160m-10m. QSL via homecall.
See also: http://www.dl6uaa.de/indexa.html

4J, AZERBAIJAN
Following special event stations with the suffix SONG or S0NG will be
activated during the "Eurovision Song Contest" until Jun 15:
Special Individual
calls club calls

4JS0NG Safari Club, 4J4K
4KS0NG Gen. Aslanov Club, 4K7Z
4K2012SONG Leonid, 4K8F
4J12SONG Serqey, 4J5A
4K9SONG Vladimir, 4K9W
4K12SONG Boris, 4K4K
4K6SONG Vladimir, 4K6C
4J5SONG Natig, 4J5T
4J7SONG Octay, 4J7A
4JR0SONG Morita, 4JR0HYT
4J1SONG Andrey, 4K6DI
4K1SONG Mehdi, 4J7FM
4J9SONG Rashad, 4J9M
4K4SONG Asif, 4K6AL
4K8SONG Mixail, 4K8M
4J4SONG Denis, 4J9NM

9H, MALTA, EU-023
Dick,DJ2EH, has been spotted in CW as 9H3XX on 30m, 17m, 12m and 6m.
The length of his stay is not known. QSL via homecall.

9Q, DEMOCRATIC REPUBLIC OF CONGO
Sergiy,UV5EVJ, is working as 9Q0HQ/7 in CW and SSB on 80m-10m from
Lubumbashi during his spare time until May 22. He is part of the
UN mission MONUSCO. QSL via homecall.

C6, BAHAMAS
Gabriele,I2VGW, plans a trip around the Bahamas as C6AGW between Apr 26
and May 6. He will hand out some IOTA points mainly in digital modes
and SSB on 30m/17m/12m from New Providence (NA-001, LH 1115),
Bimini (NA-048, LH 2467), Berry (NA-054, LH 1903) and Long Island
(NA-001, LH 1898). QSL via homecall. See: http://www.mdxc.org/c6agw

C9, MOZAMBIQUE
Daniel,ZS6JR, is working in holiday style as C91JR from Bilene mainly
in RTTY or PSK withh 100 watts and a vertical until May 10.
QSL only direct via GI4FUM. See also: http://www.3da0ss.net

EY, TAJIKISTAN
Frank,DL8YHR, and Rene,PE1L, will be active via EME signing EY8ZF from
Tajikistan (Loc MM48jn) from Apr 27-29. QSL only direct via PE1L.
See also: http://www.emelogger.com/ey/default.asp?page=eme

G, ENGLAND, EU-005
The special event station GB4WSF (EU-005, WLOTA 1841, Loc IO84) will
be activated on all bands during the silver jubilee of the annual
"Wray Scarecrow Festival" between Apr 28 and May 8. QSL via G1LAT.

HB0, LIECHTENSTEIN
Kasimir,DL2SBY, and Georg,DF1SR, will be QRV as HB0/DL2SBY in SSB, CW
and RTTY on 80m-10m from Apr 25 until May 5. Their equipment includes a
TS2000, Acom1010, Spider beam for 20-10m and a Butternut HF9V Vertical.
On VHF they will use the callsign HB0/DF1SR via EME. They plan to join
the Dubus EME Contest on 13cm on Apr 28/29 and want to work also on 6cm
and 9cm from Apr 30 till May 3. You can find them in the HB9Q chatroom.
This would be a first time EME operation from Liechtenstein on the last
two bands. Their VHF equipment is a TS2000, FT726R and a 3.7m dish.
QSLs via homecall.

JD1/OG, OGASAWARA ISLAND, AS-031
Koji,JI1LET/JD1, will be QRV again in CW, SSB and RTTY on 80m-6m from
Chichijima Islands (AS-031) between Apr 29 and May 5. QSL via homecall.

Makoto,JI5RPT, is also working from Chichijima (IOTA AS-031) signing
JD1BLY in CW/SSB/digital modes on 80-6m and via satellite also from
Apr 29 until May 5. QSL via homecall. See: http://www.ji5rpt.com/jd1
and http://twitter.com/jd1bly

Toshio,JD1BLC, and the clubstation JD1YBT are active in CW/SSB/RTTY on
160m-6m during the same period of time from Ogasawara. QSL via JP1IOF.

KH0, MARIANA ISLANDS, OC-086
Pete,W2GJ/KH0, will be QRV in all modes on 80m-10m (maybe also 6m)
from Saipan (OC-086, USi NI002S, WLOTA 1333, Loc QK25uf) from Apr 29

until May 3. QSL via homecall.

KH2, GUAM, OC-026
After staying in Micronesia (see below) Kay,JH3AZC, plans to become
active from Guam (OC-026) as W2AZ/KH2 from May 5-6. QSL via homecall.

OD, LEBANON
Luigi,IV3XNF, is member of the "United Nations Interim Force" Mission
(UNIFIL) located on a military base in Lebanon from May until October.
During his spare time he wants to use his QRP station as OD5/IV3XNF/QRP
mainly in CW and digital modes on 80m-10m. See: http://iv3xnf.jimdo.com
QSL via homecall, unfortunately only direct and LoTW.

ON, BELGIUM
Robert,ON4LRG, Janny,ON5PO, Paul,ON6DP, Didier,ON6YH, Pierre,ON7PC,
and Jean,ON7ZM, are going to activate Hoyoux Castle (WCA: ON-00497,
BCA: LG-096) on all bands using OP0P/p or their homecalls on
Apr 29 from 0600-1000 UTC. QSLs for OP0P/p via ON6DP, LoTW or eQSL.

T8, PALAU, OC-009
Kan,AB2RF/JJ2RCJ, is going to hit the airwaves as T88RF from the
West Plaza by the Sea Hotel on Koror (OC-009) from Apr 30 until May 4.
Emphasis will be put on the digital modes (PSK63, RTTY, Hell) and the
lowbands. QSL via JJ2RCJ, LoTW.
See also: http://www.clublog.org/logsearch/T88RF and
http://www.qsl.net/ab2rf/framepage1.html

UA, EUROPEAN RUSSIA
Serge,RQ1AP (ex RU9YT), plans to show up as RQ1AP/1 in BPSK from
Novgorod Kremlin (WCA: UA-00012, COTA-RU: C-112) and from
Belaya Tower (WCA: UA-00405, COTA-RU: C-138) on Apr 29/30.
QSOs count for the ETPA and the log will be uploaded to the WCA eLog.
QSLs via homecall.

UR, UKRAINE
The special event station EM350S celebrates the 350th anniversary of
the city Ivano-Frankivsk (Grid Loc. KN28) between May 1 and Jun 30.
They will operate in CW, SSB and digital modes on all HF bands and 6m.
QSL via UW8SM, LoTW and eQSL.

V6, MICRONESIA, OC-010
Kay,JH3AZC, announced to become active in CW, SSB and RTTY on HF
signing V63AZ from Pohnpei (OC-010) between Apr 30 and May 4.
QSL via homecall.

VE, CANADA
On the occasion of Marconi's birthday on April 25 the "Society of New-
foundland Radio Amateurs" (SONRA) wants to make a QSO from Signal Hill
in Newfoundland (NA-027) with Princess Elettra (Marconi) in Bologna.
QSL via VO1HE. See also: http://www.sonra.ca

The special event station VC2CBS30 celebrates the 30th anniversary of
the Sorel-Tracy Amateur Radio Club Inc (VE2CBS) in all modes on all

bands from May 1-30. QSL via VE2DWE.

W, USA
The "North Jersey DX Association" remembers the 75th anniversary of the
"Hindenburg" zeppelin disaster by activating the special event station
W2H from Apr 28 until May 12. They will be QRV from Lakehurst on May 6.
QSL via bureau, US stations unfortunately only direct.

SILENT KEY
Patrizio Ciancarini,I0KHP, passed away on Apr 8. He was founder and OP
of the Marconi memorial station IY0TC (ex IY0TCI).
Our condolences and sympathy are with their families and friends.
We do not want to be sad that we lost them, but grateful that we could
get to know them as a radio friend. We will always keep them in memory.

http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Apr 28/29 SP DX RTTY Contest
Apr 28/29 Helvetia Contest
Apr 28/29 Dubus EME Contest
Apr 29 BARTG Sprint 75

WAE DX SSB Contest
The WAE DX Contest Manager Joerg,DL8WPX/HB9FDJ, thanks everybody for
their participation. The final results are now available at:
http://www.darc.de/referate/dx/contest/waedc/en/results/ssb
Using the correct password you can download your personal UBN file from
http://www.darc.de/referate/dx/contest/waedc/en/results/ssb/ubn

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-079, JA6, Miyako Islands: Takeshi,JS6RRR, and Fusao,JA5DUR/JS6, will be
QRV from Miyako Island (WLOTA 0249, JCC 4714, JCG 47004, Loc PL24) from
Apr 26 till May 7. They will work in SSB/CW/RTTY/PSK31 on all HF bands.
QSL via homecall (bureau/direct).

AS-146, BY4, Shandong Province North East group: Jun Jian Cong,BD4KYA/4,
Zhigang Rong,BD4KRB/4, and Yongwei Yu,BG4KLA/4, are working on HF from
Jiming Island (WLOTA 2489, Loc PM17FK) until May 3.
QSL via homecall (bureau), direct requests via BA4EG.

AS-147, JA8, Hokkaidos Coastal Islands: Yuki,JO2ASQ/8, makes a CW DXpedition
to Rebun Island (Apr 30-May 1) and Rishire Island (May 2/3).
QSL via homecall (bureau/direct).

EU-008, GM/MM, Inner Hebrides: Members of the "Camb-Hams group" will run
five stations with amps as GS3PYE/p from the Isle of Mull (Loc IO66vh)
between Apr 28 and May 5. Listen for them on 160m-10m and also on 6m,
4m, 2m and tests on 3cm.
They will make a side trip Lunga Island (EU-108) signing GS6PYE/p on
Apr 29/30. More information is available at: http://dx.camb-hams.com
QSLs for both calls via G3PYE (bureau) or M0VFC (direct).

EU-029, OZ, Sjaelland Archipelago: Some members of the Belgian UBA section
Diest will activate Lolland Island (EU-029, WLOTA 2773, DIA NS-001,
Loc JO54pq) as 5P5Y on all bands from Apr 29 until May 4.
QSL via ON4AMM (bureau/direct).
More details can be found at: http://www.on4dst.be/iota.html

EU-108, GM/MM, Treshnish Isles: Jim,MM0BQI, is working as GB5TI on the usual
IOTA frequencies from Lunga Island (IOSA NH17, SCOTIA DI09, WAB NH17)
between Apr 27 and May 1. QSL via GB5TI (LoTW or direct).
Bureau QSLs can be requested via e-mail to gb5ti.qsl@gmail.com

EU-172, OZ, Jylland East ans Fyn group: Noel,OZ/OO4O, will be QRV in SSB and
CW on the HF bands from Langeland Island between Apr 29 and May 5.
QSL via OO4O (bureau/direct/LoTW).

When Storms Topple Towers, Ham Radio Can Help Save The Day:

Posted: 24 Apr 2012 05:35 PM PDT
http://www.eham.net/articles/28158

When modern communications systems in Nebraska were knocked out by recent tornadoes and severe storms, local officials had no way of calling for help or reporting damage. That's where amateur radio, or "HAM" operators stepped in. Tom Reis, a Skywarn coordinator for the National Weather Service, says HAM operators are a valuable asset who can get out messages that help save lives. "The National Weather Service recognizes the importance of ground truth information and a variety of methods to get that information to them at the Weather Service office," Reis says. "And one of those methods is via amateur radio. The Weather Service has a quite extensive amateur radio station that they staff when the time arises, when the need arises." HAM radio operators can confirm sightings of severe weather as it approaches and damage after the storm passes, while providing communications support to local officials.

//
Vertical Dxpedition:

Posted: 23 Apr 2012 05:00 PM PDT
http://www.eham.net/articles/28157

Daniel ZS6JR and my self ZS6DJD will be operating from Mozambique for Seven to ten days starting on the 3th or 4th of may 2012 depending how quick we get the equipment up. The idea was to park next to a small lake in Shai Shai Mozambique 400 km north of the capital and operate all vertical antennas with the earth wires in the water and see what we could do.

Tony's 10-metre band report

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/0Sry9xTQpr0/april_26.htm?utm_source=feedburner&utm_medium=email

During the week the DX was there but signals were not strong and many
operators gave up. There were plenty of opportunities to work IARU stations
and even ET3AA (Ethiopia) was about. I did shout loud and long but to no
avail. I think he may well be the last/only operator there. No doubt
someone will correct me if I’m wrong

UKRANIAN MINI-EXPEDITION(WFF PROGRAM) with ki6eeo . EO5UFF from
URFF-0084 .MAY 1-2

Posted: 25 Apr 2012 02:11 PM PDT
http://forums.qrz.com/showthread.php?343826-UKRANIAN-MINI-EXPEDITION(-WFF-PROGRAM)-with-ki6eeo-EO5UFF-from-URFF-0084-MAY-1-2&goto=newpost

From the end of April-2012 till beginning of June-2012

I will visit a country I was born- UKRAINE, East Europe

http://en.wikipedia.org/wiki/Ukraine, in English ,

later, on pictures of expeditions you will see always two

flags -AMERICAN and GERMAN, because of my dual citizenship.

Ukranian hamradio enthusiasts invited me to the

two mini-expeditions,two Hamfests and UCC Conference!

(UCC= Ukranian Contest Club)

ENTIRE MAY 2012 I WILL WORK AS : UT / ki6eeo ,

YOU CAN TALK TO ME IN ENGLISH, GERMAN and RUSSIAN .

So, let me explain my trip in details.

wfflogo.jpg

May 1-2, 2012

ENGLISH/GERMAN, etc...

NATIONAL RESERVATION PARK - DELTA of DNEPR/DESNA Rivers ,

URFF-0084 (Ukranian WFF program)

OUR CALLSIGN : EO5UFF

I also will work as UT / ki6eeo in May 2012.

TEAM 4x4 WFF Expeditions Group : (EO5UFF)

UR4UHE - Igor, US5UFF - Olga, US5WCP - Victor, US1GBH - Alex, UT4UJA - Vlad,

KI6EEO - Alex, UT5EMU - Sergey, UX7FB - Inna, SWL - Alex, SWL - Artem.

Mods :CW, SSB, FM, RTTY, PSK, JT65A.

Freqs: 80m , 40m, 30m, 20m, 17m, 10m, 2m.

QSL via US5UFF.

EXPEDITION LOG can be seen electronically in WFF LogSearch

GENERAL INFO :

==========

http://www.wff44.org/ ,

http://www.ew4dx.org/WFFsearch.html,

World Flora Fauna (WFF) is an International Award Program which aims to unite nature conservation for Flora Fauna and Amateur Radio. It is organized to attract attention of the World to the problems of protected areas and to

provide them with feasible practical support, to waken a feeling of pride in the minds of the Earths population for natural and cultural heritage, for visiting National Parks and Nature Reserves and also making contacts with them

from the Amateur Radio prospective.

The Program was launched in 2008 under the auspices of International Foundation World Flora Fauna and RRC. For you to get a WFF Award you need to contact locations africapossessing an official status of National Parks

or Nature Reserves which are listed in the WFF Program and their directory.

In the WFF Directory you have a list from WFF Database of National Parks and Nature Reserves throughout the World.

Also, during a QSO each of the Countries provides a reference number, for example: GFF-013 (UK), RFF-002 (Russia), UNFF-003 (Kazakhstan) etc, which corresponds to a particular National Park or Nature Reserve.

Moreover, the Internet site contains a Database (which is continually being updated and added to with your information) that has an indication from which location one or another station is working. We welcome any help

possible in WFF Database formation based on the past experience of work valid for the WFF Programme.

==> + DAYTON HAMVENTION: ARRL EXPO -- WHERE THE DX COMES TO YOU!
```

As part of the ARRL EXPO -- part of the 2012 Dayton Hamvention® -- the ARRL is pleased to present a plethora of DX activities. Visitors to the ARRL EXPO will see a lot of DX activities, including DXCC card checking and a chance to drop off QSL cards for the ARRL Outgoing QSL Bureau, as well as representatives from the International Amateur Radio Union (IARU) and IARU Member-Societies. The Dayton Hamvention will take place May 18-20 at Hara Arena, located near Dayton, Ohio. Read more here <http://www.arrl.org/news/arrl-expo-at-the-dayton-hamvention-where-the-dx-comes-to-you-1>.

```
==> + ON THE AIR: WPX AWARDS VIA LOTW ENTERS BETA TESTING
```

Earlier this year, the ARRL and CQ Communications announced that the ARRL will provide support for CQ-sponsored operating awards by the ARRL's Logbook of the World (LoTW) electronic confirmation system. The WPX Award is the first of the CQ-sponsored awards that LoTW will support. "We had originally planned to introduce this new program in early April, but due to the introduction of the new DXCC fee structure and our new Online DXCC application, we had to push the date back," explained ARRL Chief Operating Officer Harold Kramer, WJ1B. "We are now beta testing the program with a select group of hams and are looking forward to launching to LoTW-WPX partnership in the first part of May." Read more here <http://www.arrl.org/news/wpx-awards-via-lotw-enters-beta-testing>.

==> + ARRL THANKS RADIO AMATEURS WHO FILED COMMENTS

In April, the FCC put out a Public Notice <http://www.arrl.org/news/fcc-seeks-public-comments-on-emergency-communications-by-amateur-radio-and-impediments-to-amateur-ra>, requesting comments regarding a Congress-mandated study to assess Amateur Radio's role in emergency and disaster communications and the impact of private land use regulations on the amateur community's ability to provide such communications. The ARRL asked that the amateur community forward comments directly to the ARRL so that it could use them to develop its comments -- more than 1200 radio amateurs responded! These comments will be reviewed in the next few weeks and used to help bolster the ARRL's formal response by the FCC's May 17 deadline. Thanks to everyone who took the time to send their comments!

==> + AMATEUR RADIO IN THE CLASSROOM: APPLY TO HOST A REAL-TIME CONVERSATION WITH ISS CREWMEMBERS

NASA is now accepting proposals from US schools, museums, science centers and community youth organizations to host an Amateur Radio on the International Space Station (ARISS <http://www.arrl.org/amateur-radio-on-the-international-space-station>) contact between November 1, 2012 and May 1, 2013. To maximize these radio contact opportunities, NASA is looking for organizations that will draw large numbers of participants and integrate the contact into a well-developed education plan. Proposals are due July 2, 2012.

Using Amateur Radio, students can ask astronauts questions about life in space and other space-related topics. Students fully engage in the ARISS contact by helping set up an Amateur Radio ground station at the school and then using that station to talk directly with a crew member on the International Space Station for approximately 10 minutes. ARISS has a network of mentors to help organizations obtain the technology required to host this exciting opportunity for your students.

Interested parties should contact NASA's Teaching From Space office via e-mail <JSC-TFS-ARISS@mail.nasa.gov> to obtain complete information, the proposal/application form. You can find more information here <http://www.nasa.gov/audience/foreducators/teachingfromspace/students/ariss.h

tml>.

==> + FIELD DAY: REGISTER YOUR ARRL FIELD DAY SITE ON THE FIELD DAY LOCATOR

First introduced in 2008, the ARRL's Field Day Station Locator Service <http://www.arrl.org/field-day-locator> has proved a popular addition to the Field Day toolbox. This service -- an interactive map that helps amateurs or those interested in Amateur Radio find a Field Day <http://www.arrl.org/field-day-locator> site near them -- is free to clubs or individuals who will be operating public Field Day stations. Stations can also be listed by state or province. So far, hams in 49 states, Puerto Rico and eight Canadian provinces, as well as a station located just outside Bogot&#65533;, Colombia, have listed Field Day sites on the Field Day Locator. If your group would like to be a part of the Station Locator Service, it's easy to get started -- just go to the Field Day Station Locator website <http://www.arrl.org/field-day-locator> and follow the instructions. ARRL Field Day is the most popular on-the-air operating event in Amateur Radio. On June 23-24, join tens of thousands of radio amateurs as they gather for a public demonstration of the Amateur Service.

==> SUPPORT ARRL: ATTENTION FEDERAL EMPLOYEES: ARRL APPROVED FOR 2012 COMBINED FEDERAL CAMPAIGN!

For the past 11 years, the US Office of Personnel Management has designated the ARRL to participate in the Combined Federal Campaign (CFC), the annual giving campaign for federal employees. In that time, this campaign for federal government civilian employees, US Postal Service workers and members of the military has generated almost $192,000 for ARRL programs. The CFC provides an easy way to support the ARRL's effort to represent its members and all radio amateurs. Similar to the United Way, the CFC encourages individuals employed in all branches of the federal government to pledge by payroll deduction to non-profit organizations of their choice. The ARRL encourages eligible radio amateurs to consider the League when designating campaign recipients. Payroll deduction through the CFC is an easy way for participants to support ARRL over and above their annual membership. Such contributions support programs that are not funded by member dues, enriching ARRL's ability to serve its members and all of Amateur Radio. Read more here <http://www.arrl.org/news/attention-federal-employees-arrl-approved-for-2012-combined-federal-campaign>.

==> + INTERNATIONAL NEWS: ITU TELECOM WORLD 2012 CONFERENCE SEEKING PARTICIPANTS FOR YOUNG INNOVATORS PROGRAM

As part of ITU Telecom World 2012 -- scheduled for October 14-18 in Dubai -- the conference will present the Young Innovators Program. With its theme of Youth Innovation for Development, the Young Innovators Competition is a chance for the next generation of young visionaries to demonstrate their ideas and innovations on this global stage and show

how their fresh digital thinking can change the world for the better. The program seeks to attract dynamic, engaged young people and identify projects with a genuine potential to succeed. The goal of the program is to build a cohesive international community of highly talented of social entrepreneurs from age 18-25 who are working on ICT-based initiatives from the conceptual stage through to projects in areas of critical relevance to the burning issues facing the world today. Read more here <http://www.arrl.org/news/itu-telecom-world-2012-conference-seeking-participants-for-young-innovators-program>.

==> SOLAR UPDATE

Tad "When the Sun gives way to April showers <http://www.youtube.com/watch?v=vMCU7OF3sVM>" Cook, K7RA, reports: Solar activity revived over the past week, with a big increase in sunspot numbers. On Friday, April 20, the daily sunspot number reached 162; four days later on April 24, the number reached 169. This level of activity has not been seen since last fall, when the daily sunspot number reached 173 on September 16, 184 on October 21 and 208 on November 9. The average daily sunspot numbers more than doubled over the previous week's average, rising 73 points to 144.7, while the average daily solar flux was 133.9, an increase of nearly 29 points. Associated with all this was a rise in geomagnetic activity, peaking with a planetary A index of 35 on Tuesday, April 24. The geomagnetic activity increase was due to several solar flares launched from new sunspots. The latest forecast shows the solar flux at 125 on April 26, 120 on April 27-29, 115 on April 30, 110 on May 1-2, 105 on May 3-4, 110 on May 5-6, 115 on May 7-8, 120 on May 9, 130 on May 10-12, 135 on May 13, 140 on May 14-17, and down to 135 on May 18-21. Predictions for the planetary A index are 25, 15, 6, 5, 5, 8 and 6 on April 26-May 2, 5 on May 3-7, rising to 8, 12, 15 and 10 on May 8-11, and back down to 5 on May 12-19. Look for more on the ARRL website on Friday, April 27. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Al Jolson's April Showers <http://en.wikipedia.org/wiki/April_Showers_%28song%29>.

==> + ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE SET FOR ATLANTA

The dates have been set -- September 21-23 -- for the 31st Annual ARRL/TAPR Digital Communications Conference (DCC <http://www.tapr.org/dcc>) in Atlanta at the Sheraton Gateway Hotel. The DCC schedule includes forums, demonstrations, a Saturday evening banquet and an in-depth Sunday seminar. This conference is for everyone with an interest in digital communications -- from beginner to expert. Technical papers are also being solicited for the conference proceedings. You do not have to attend the conference to have your paper included. The submission deadline is July 31. Please send papers to Maty Weinberg, ARRL, 225 Main St, Newington, CT 06111, or you can

make your submission via e-mail <maty@arrl.org>. Papers will be published exactly as submitted and authors will retain all rights. For more information, please see the DCC website <http://www.tapr.org/dcc> or call TAPR at 972-671-8277.

==> THIS WEEK IN RADIOSPORT

This week:

- April 27 -- NCCC Sprint Ladder
- April 28-29 -- Florida QSO Party; Nebraska QSO Party; 10-10 International Spring Contest (Digital); SP DX RTTY Contest; Helvetia Contest; QRP to the Field
- April 29 -- BARTG Sprint 75
- May 1 -- AGCW QRP/QRP Party

Next week:

- May 4 -- NCCC Sprint Ladder
- May 5 -- Microwave Spring Sprint (local time)
- May 5-6 -- New England QSO Party; Indiana QSO Party; 7th Call Area QSO Party; 10-10 International Spring Contest (CW); ARI International DX Contest; Araucaria VHF Contest
- May 8 -- ARS Spartan Sprint
- May 9-10 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- May 4-6 -- EMCOMMWEST <http://www.arrl.org/hamfests/emcommwest-convention-1>, Reno, Nevada
- May 18-20 -- Dayton Hamvention <http://www.arrl.org/hamfests/dayton-hamvention-3>, Dayton, Ohio
- June 1-3 -- ARRL Northwestern Division Convention <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-3>, Seaside, Oregon
- June 2 -- ARRL Georgia Section Convention <http://www.arrl.org/hamfests/georgia-section-convention-atlanta-hamfest-1>, Marietta, Georgia
- June 8-9 -- ARRL West Gulf Division Convention <http://www.arrl.org/hamfests/west-gulf-division-convention-ham-com-1>, Plano, Texas
- June 9 -- ARRL Arkansas State Convention <http://www.arrl.org/hamfests/arkansas-state-convention>, Rogers, Arkansas; ARRL Tennessee State Convention <http://www.arrl.org/hamfests/tennessee-state-convention-2>, Knoxville,

Tennessee
- June 30 -- ARRL Eastern Pennsylvania Section Convention
<http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-electro
nics-expo-firecracker-hamfest>,
Harrisburg, Pennsylvania
- July 20-22 -- ARRL Montana State Convention
<http://www.arrl.org/hamfests/montana-state-convention-78th-glacier-waterton-
international-hamfest>,
East Glacier, Montana
- July 26-28 -- Central States VHF Society Conference
<http://www.arrl.org/hamfests/central-states-vhf-society-conference-1>,
Cedar Rapids, Iowa
- July 27-28 -- ARRL Oklahoma Section Convention
<http://www.arrl.org/hamfests/oklahoma-section-convention-ham-holiday-2012>,
Oklahoma City, Oklahoma
- July 27-29 -- ARRL Rocky Mountain Division Convention
<http://www.arrl.org/hamfests/rocky-mountain-division-convention-2>,
Bryce Canyon, Utah
- August 3-4 -- ARRL Texas State Convention
<http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-2>,
Austin, Texas
- August 3-5 -- Pacific Northwest DX Convention
<http://www.arrl.org/hamfests/pacific-northwest-dx-convention-1>,
Portland, Oregon
- August 4 -- ARRL Ohio State Convention
<http://www.arrl.org/hamfests/ohio-state-convention>, Columbus, Ohio
- August 10-12 -- RAC National Convention 2012
<http://www.arrl.org/hamfests/rac-convention-2012>, Edmonton, Alberta,
Canada
- August 18 -- ARRL West Virginia State Convention
<http://www.arrl.org/hamfests/west-virginia-state-convention-2>,
Weston, West Virginia
- August 18-19 -- ARRL Southeastern Division Convention
<http://www.arrl.org/hamfests/southeastern-division-convention-huntsville-ham
fest>,
Huntsville, Alabama
- August 19 -- ARRL Kansas State Convention
<http://www.arrl.org/hamfests/kansas-state-convention-2>, Salina,
Kansas
- August 24-26 -- ARRL New England Division Convention
<http://www.arrl.org/hamfests/new-england-division-convention-1>,
Boxboro, Massachusetts
- August 26 -- ARRL Western Pennsylvania Section Convention
<http://www.arrl.org/hamfests/western-pennsylvania-section-convention-2>,
New Kensington, Pennsylvania

Quebec Provincial HAMFEST May 20 2012

Sponsor: Sorel-Tracy VE2CBS ARC

Start date: Sunday, May 20, 2012

End date: Sunday, May 20, 2012

Location :Sorel-Tracy Québec 70km from Montreal 1½ hour from the US border

Directions to location: Highway 30 east from Montréal

Highway 20 road 122 from the east and south

Opening times: Sellers set up: 6 AM

Doors open to Public: 9 AM to 12 PM

Cost: Admission: $8 per person. Vendors: $15 per table, includes 1 admission.

Early bird admission at 6AM 15$

Talk-in frequency: VE2RBS 145.370- T 103.5 VE2RBS 442.150+ T 103.5 VE2FCT DSTAR 146,985 - (VE2FCT C VE2FCT G)

Eastern Canada's Largest Amateur Radio Flea Market. Door prizes, 2 major raffle for one Icom IC-2300H from Radioworld and one Icom IC-2300H from Elkel, commercial exhibits, QSL Bureau, 50/50 Draw, food and refreshments. More than 100 tables of amateur radio and electronic equipment bargains. Free parking and RV parking (No service) on site. Special callsign VC2CBS30 from may 1st to may 31 2012

Saturday May 19 2012 Owls network banquet 6 pm in La Bouf-Tifail restaurant open to all.

Amateur Radio Newsline(tm) Report 1811 - April 27 2012

Amateur Radio Newsline report number 1811 with a release date of April 27th, 2012 to follow in 5-4-3-2-1.

The following is a QST. Japan says it will be launching 16 educational ham-sats; NASA says now is time for educators to request I-S-S contacts for 2013; UK hams learn of ham band restrictions during the 2012 Olympics; US hams will not be affected by Part 90 narrow-banding and a new video on VHF and UHF digital audio is on-line. Find out the details are on Amateur Radio Newsline(tm) report number 1811 coming your way right now.

HAM RADIO IN SPACE: JAPAN TO LAUNCH 16 NEW EDUCATIONAL HAM-SATS

Japan says that it plans to launch sixteen educational satellites over the next two years. The tiny birds are currently under construction in Japan with the first launch to take place on May 17th followed by the others in as rapid succession as possible. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

The first of the new birds to be launched will be the amateur radio satellite HORYU-2 built by students at the Kyushu Institute of Technology. Its mission is to take pictures of the Earth using a small C-MOS camera called SCAMP that was developed by the University of Surrey in the UK. The SCAMP camera takes a 640x480 pixel picture in the popular JPEG format. That means from 700 km altitude, one pixel corresponds to 1.6 km.

HORYU-2 will be followed in July by the transport of several items to the International Space Station. This mission will deliver the Japanese Experiment Module Small Satellite Orbital Deployer or JEM along with the Japanese CubeSats WE-WISH, FITSAT-1 and RAIKO. These CubeSats should be deployed from the ISS in September using the JEM and robot arm.

FITSAT-1 may be the most interesting of these. It will use a neodymium magnet for attitude control. It will also have multiple downlinks. These include CW on 437.250 MHz, AX.25 on 437.445 MHz and a 4 watt high speed data transmitter on 5840 MHz. The latter is capable of sending a

640 by 480 VGA JPEG image in 6 seconds.

In addition to its other experiments, FITSAT-1 will also carry a set of high power LED's that will be driven with 100W pulses to produce extremely bright flashes. It is hoped, will be observable by the unaided eye or with small binoculars from the ground. Both the 5840 MHz and optical downlinks have a high power consumption so it may be that they are only activated only over Japan.

In December the TSUBAME satellite is planned to be launched on a Japanese H-IIA booster. It will carry a CW beacon on 437.250 MHz and AX.25 packet at 1200 and 9600 bit per second telemetry on 437.505 MHz. The remaining satellites will be placed into orbit on subsequent flights.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, bear Burwick, Pennsylvania.

--

Further information on all the satellites can be found on line at www.uk.amsat.org/6691 (AMSAT-UK, JA-AMSAT)

**

HAM RADIO IN SPACE: NASA OPENS PROPOSAL CYCLE FOR 2013 CLASSROOM ISS CONTACTS

NASA's Teaching From Space Office has announced a new proposal cycle for United States ARISS school contacts. Proposals may be submitted from April 23rd through July 2nd for contacts that will be scheduled beginning in January 2013.

NASA says that informational sessions will be held to answer any questions concerning the proposal process. To attend a session or to have questions answered, contact the Teaching From Space office by e-mail to JSC-TFS-ARISS (at) mail (dot) nasa (dot) gov. You can also call the office during normal business hours Eastern time at 281-244-1919. More information is on the Teaching From Space website at tinyurl.com/teach-from-space. (NASA)

RADIO SAFETY: RADIO HOBBYIST LOOSES LIFE IN ANTENNA ACCIDENT

A sad story from down-under where a radio hobbyist has been killed in a strange accident. Graham Kemp, VK4BB, of the WIA News is here with whats known so far:

--

Police are investigating the death of a man who fell from his vehicle onto an antenna at his hobby farm. The 51 year-old man is believed to have suffered fatal injuries after he fell onto the 20 meter high metal antenna at the Cunderdin property in Western Australia.

Police spokeswoman Ros Weatherall said the antenna was used for surveying services, and had been removed by the man from the roof rack of his Landcruiser utility before the incident. Initial investigations reveal that he may have slipped from the top of the car and fallen onto the antenna.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

As we go to air the victim has not been identified by authorities. Nor is it known if he may have been a VK radio amateur. More is on-line at tinyurl.com/7kehv5s (VK4BAT, WIA News)

**

2012 OLYMPICS: UK REGULATOR OFCOM ANNOUNCES HAM BAND RESTRICTIONS DURING 2012 OLYMPICS

Details of amateur band frequency restrictions during the London 2012 Olympic and Paralympic Games have now been released by U-K Telecommunications regulator Ofcom. The greatest impact to ham radio appears to be satellite and other operations in the 436 to 437 Mhz segment of 70 centimeters. Amateur Radio Newsline's Norm Seeley, KI7UP, explains why:

--

Parts of the 70, 13 and 9 centimeter amateur bands in the United Kingdom will face restrictions between June 28th and September 23rd. This, due to need for spectrum during the 2012 Olympic and Paralympic Games.

The restrictions only apply in geographically limited areas, with 70cm being particularly affected around London and Weymouth. Also hard hit by the restrictions will be ham radio satellite operations.

According to a notice on the AMSAT-UK web site the Amateur-satellite Service allocation in the 435 to 438 MHz range will be restricted to 436.25 to 437.25 MHz. This is based on an understanding that the equipment being used for Olympics communications in the 430 MHz band will include handheld FM rigs at the hotels, the routes to the venues and at the venues themselves.

The U-K communications regulator Ofcom say the use of radio by amateurs in the designated areas could cause interference to various communications at the games. Also, it is possible that higher power transmissions from outside these areas could cause interference as well. Consequently, to avoid the risk of interference, Ofcom has requested that United Kingdom amateurs do not operate within the frequency ranges it has outlined. This says AMSAT-UK means that the spectrum identified by Ofcom should be avoided for a considerable distance outside the designated Olympic communications zones.

AMSAT-UK notes that a well equipped station on a good site 75 km or more from the edge of an Olympics communications zone could still put a fairly decent signal into that area.

Newsline did a bit of research and found that the closest heavily populated mainland European city to London appears to be Calais, France. This is mainly over water path only about 93 airline miles or 149 kilometers away from the closest Olympic venue.

That said, Ofcom has so far not asked the French or any other European telecommunications administrations to restrict their nations Amateur Service allocations during the Olympic and Paralympic games.

For the Amateur Radio Newsline, Im Norm Seeley, KI7UP, far from the U-K in Scottsdale, Arizona.

--

More on this is on-line at www.uk.amsat.org/6574 and RSGB.org/olympics. (GB2RS, AMSAT-UK, ARNewsline(tm))

RADIO RULES: US PART 97 HAM RADIO NOT AFFECTED BY FCC PART 90 NARROWBANDING

A lot of mis-information is going around in amateur radio FM and repeater circles regarding an upcoming FCC mandate on narrow-banding communications in the 150 to 512 MHz spectrum is finally being debunked. Ham radio is not affected by this change as we hear from Amateur radio Newsline's Cheryl Lasek, K9BIK:

--

Much of the mis-information regarding narrowband on amateur radio FM appears to be coming from hams who have purchased various low cost Part 90 radios built in China. These radios are capable of narrowband operation on the 2 meter and 70 centimeter ham bands in addition to Part 90 frequencies.

The manuals that come with these radios are written with Part 90 users in mind and much of the material has no meaning to Part 97 Amateur Service operations. However, some hams do not realize this and that's likely the way the erroneous rumors that ham radio FM and repeater operations at 70 centimeters and above would have to narrowband got started.

To make it clear, ham radio is not affected in any way by this FCC edict and your ham gear is not going to become obsolete.

The switch to 12.5 KHz from the current 25 KHz channel spacing only affects operations in the FCC Part 90 regulated services. There is no narrow band mandate by the FCC for Part 97 ham radio operations. Hams are free to voluntarily switch to narrowband operations if they so desire, but the Amateur Part 97 Service as a whole is not obligated to make any change.

For the Amateur Radio Newsline, Im Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Once again, ham radio is in no way affected by the switch of Part 90 to narrowband operation. What ham radio decides is strictly up to those within the hobby to determine. (Repeater Remailer, ARNewsline(tm))

**

ENFORCEMENT: FCC SAYS IT WONT RECONSIDER NYC $10000 FINE

The FCC has told Alexander Kissi, that he must pay a $10,000 fine for operating of an unlicensed radio broadcast station on the frequency 96.5 MHz in Bronx, New York. In its April 20th Memorandum Opinion and Order, the FCC noted that back on February 28 and March 1, 2008, agents in the Enforcement Bureau's New located the unlicensed transmitter at a two-story building on White Plains Road in the Bronx. After completing the field strength measurements the agents returned to conduct a station inspection. The agents spoke to a man who worked there and a woman who was doing a live radio broadcast from a small broadcast studio. In response to agents' questions both the man and the woman stated that Alexander Kissi was in charge of the station, but that he was not there at the time. The agents reached Kissi by phone on March 6, 2008, at which time he took full responsibility for operation of the station.

On June 18, 2008, the New York Office issued Mr. Kissi a Notice of Apparent Liability for Forfeiture by operating an unlicensed radio transmitter and proposing a forfeiture in the amount of $10,000. Mr. Kissi did not file a response to the NAL. So on September 11,2008, the Enforcement Bureau's Northeast Region issued a Forfeiture Order affirming the findings and assessing a $10,000 forfeiture.

That's when Kissi filed an appeal in which he claimed that he was out of town at the time the unlicensed transmissions took place. He also asserted that a construction worker had stolen his radio transmission equipment for the purpose of selling. Also that when the construction worker was doing equipment tests, he mistakenly left the equipment running for several days.

But in denying the appeal the FCC says that Kissi does not meet any of the three criteria that would allow the Bureau to consider his

Petition. This is because Kissi accepted responsibility for the unauthorized operation just five days after the violation. Therefore his new assertions regarding the theft of his radio transmission equipment directly contradicts his March 6, 2008, admission to an FCC agent that he was fully responsible for the operation of the station on February 28, 2008, and March 1, 2008.

Given that it finds this newly-presented information unsubstantiated and unreliable, the FCC says that it does not believe that further consideration of the Petition would serve the public interest. For these reasons, the FCC says it finds no basis for reconsideration and therefore affirms the finding in the Forfeiture Order. Its given Kissi the customary 30 days to pay the $10,000 fine or take the matter to further appeal. (FCC)

**

PUBLIC SERVICE: MORE HAMS NEEDED FOR PROJECT BREAD WALK COMMUNICATIONS IN BOSTON

Eric Horwitz, KA1NCF, tells Newsline that there is still need for more volunteer ham radio operators for this years Boston, Massachusetts area Project Bread Walk for Hunger. The walk takes place Sunday, May 6th and is the 44th ouuting of the event.

Horowitz says that they need people to provide communications support for the Project Bread Staff and volunteers along the 20 mile route. If you will be in the Boston area on May 6th and are interested in helping out this year, go to www.mmra.org/wfh to log in and fill out the signup form. (KA1NCF)

**

HAMVENTION 2012: UNPAID RESERVED GREEN FLEA SPACES NOW AVAILABLE FOR RENT

Any reserved Dayton Hamvention Flea Market Green booth space that has not been paid for or payment armaments made have been released and are available for rental.

According to the Hamvention's Assistant Flea Market Chairman Stan Leeds, KC7EHJ, to find out what is available simply just take your web browser to tinyurl.com/flea-spaces-green. Then scroll to the bottom of the left side of the screen and click the "View Floor Plan" link. This will give a map of rented, reserved and available spaces. From this link you can also use the web portal for ordering a space if you so desire. (Hamventionc Remailer)

**

HAM VIDEO: DIGITAL MOBILE RADIO ON HAM RADIO NOW

The future of digital audio in VHF and UHF amateur radio is the subject of a video conversation between video producer Gary Pearce, KN4AQ, and

expert Jeff Parker, WA1WXL, who works for Motorola Solutions. The video presents a discussion of alternative digital audio systems available today and what may be coming to the ham radio market in the very near future. You can see it on line as Episode 7 of Pearce's Ham Radio New series. The URL is hamradionow.tv. (Various)

HAM RADIO PROMOTION: FREE POSTERS FROM THE RSGB

The Radio Society of Great Britain has made available a collection of high quality amateur radio promotional posters that can be used when demonstrating the hobby to the general public. These posters are in Adobe .PDF format are being provided free of charge to the amateur radio community for the purpose of promoting the hobby.

It should be noted that the posters do contain the RSGB logo and contact information making then basically more useful to UK hams than others. You can see them and download them at www.rsgb.org/posters. (RSGB)

CHANGING OF THE GUARD: AUTHOR ROBERT L. SHRADER, W6BNB -S.K.

The changing of the guard in amateur radio continues. This with the sad news that writer and author Robert L. Shrader, W6BNB, became a Silent Key on Wednesday, April 11th.

The author of numerous books and articles dealing with almost every area of communications, possibly his best known work was the textbook Electronic Communications, which was first published in 1959 and is currently in its 6th edition from McGraw Hill.

Robert Shrader, W5BNB, is survived by his wife Dorothy, W6ECU, a son Doug, KJ6TEJ, and daughter Patricia. At the time of his passing Robert Shrader was age 98. (PressDemocrat, others)

WORLDBEAT - JAPAN: ULTRA THIN FLEXIBLE BATTERIES EXPECTED IN 2013

In news from around the world, an ultra-thin flexible battery is on its way from Japan electronic giant NEC. According to reports, the company has worked for over a decade to design an organic battery is just one one-hundredth of an inch thick, can refresh a teeny screen 2,000 times and can be recharged in less than a minute.

In 2013, the battery is expected to be included in such items as enhanced credit and debit cards that display balances, electronic hotel keys, subway and train passes, and in much slimmer and lighter smart phones. The organic battery is also expected to pave the way for slender flat-screen displays and e-readers with a texture that feels like paper. (Kiplinger, CGC)

**

WORLDBEAT - CANADA: ONTARIO EXPECTED TO EXTEND HAM RADIO HAND HELD DEVICE LAW ANOTHER FIVE YEARS

Some good news for hams living in the Canadian Province of Ontario. You likely will be able to continue to operate mobile using a hand mic or other hand held device for at least another 60 months.

On April 16th the Ontario Ministry of Transportation posted a regulatory notice proposing a change to Ontario motor vehicle regulations that deal with the use of display screens and hand-held devices in motor vehicles. If approved it would extend the present exemption for licensed amateur radio operators for an additional five years.

As previously reported, Radio Amateurs of Canada has been lobbying for a permanent exemption for ham radio since this regulation was first enacted back in 2009. The current exemption was due to expire at the end of this calendar year. (VE3XT, RAC)

ON THE AIR: W4F COMMEMORATES 2010 NASHVILLE FLOODS

Back in the USA, Tennessee's Sumner County ARES team will be hosting a special event station W4F on Saturday, May 12th. This to commemorate the 2nd Anniversary of the 2010 Nashville Flood and give recognition to the amateur radio community that responded to that disaster.

W4F will be on the air from 10 am to 7 pm Central Standard Time. If you make contact, QSL via WR1Q at his call book address. More is on-line at specialevent.sumnerares.org (N4WRD)

**

DX

In DX, word that DL6UAA will once again be back on Mauritius as 3B8MM, but the length of his stay is unknown at this time. His on the air activity is usually on 160 through 10 meters using mostly CW. Some SSB and Digital will also be possible. QSL via DL6UAA, either via the Bureau or direct.

IRO, is expected to be in Uganda on a work assignment starting early May. He is hoping to get a license during the first week of his arrival. Once secured, listen out for him on CW on the upper HF bands, especially on 10 MHz. QSL routes include F8DFP, the French Cureau or direct with a self addressed envelope and include one I-R-C.

J28AA will once again be active as 6O3A from Somalia between May 25th and the 31st. His operation will be on SSB, RTTY and 50 MHz. QSL via K2PF.

F5VHJ will operate the CQ World Wide DX SSB Contest from Senegak as 6W1RY this October. He plans to be on as a Single-Operator All-Band High-Power entry. QSL via F5VHJ, direct, by the Bureau or Logbook of the World.

Members of the Oceania DX Group be operational as YJ0VK from Efate Island, Vanuatu through May 5th. Activity will be on all HF bands 160-10 meters, with an emphasis on 30/17/12 meter bands using CW, SSB, RTTY and PSK31. QSL via VK2CA, direct or by the Bureau.

Lastly DJ2EH is currently active as 9H3XX from Malta. The length of his stay is not known at this time but he has been heard on 30, 17, 12 and 6 meters using CW. QSL via DJ2EH.

(Above from various DX news sources)

THAT FINAL ITEM: NORTH FLORIDA SCOUTING COUNCIL TO INAUGURATE KB4SA

And finally this week, we say congratulations to a group of scouts who have chartered a new scouting amateur radio station. Heres Mark Abramowicz, NT3V, with the details:

--

Hams in the Jacksonville area had been helping Scouts in the North Florida Council earn their Radio merit badges over the years.

But they were looking to do more for the Scouts and for ham radio.

Scott Roberts, KK4ECR, says a group of those hams finally decided to make a move.

"We approached one of the local Scout camps here in the area and talked to them about it and they said, 'Yes, we're all for it, let's do it,' Roberts says.

"And, basically, at that point, amateur radio club KB4SA was born."

The station is being set up at Camp Echockotee in Orange Park, Florida. It also has backing from Clay County Amateur Radio Emergency Service operators.

Roberts says KB4SA will be staffed by Scouters and Scouts looking to share the fun of the amateur radio hobby.

On Saturday, May 12, Roberts says the station will launch operations with a special event station from the camp. And he's looking to make contacts with.

"Other Scout clubs, with other DX stations that are around that can be available that day to talk to the Scouts and kind of make it a big hit for some of these Scouts that have been on the radio before and then some of those that have never been on the radio before," Roberts says.

You can find more about the KB4SA operation by going online to our website, arnewsline.org for a link (http://kb4sa.org) to information about the station and the frequencies.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Our congratulations to The North Florida Council on its upcoming inauguration of amateur radio station KB4SA. If you hear the station on the air please be sure to give the scouts operating it a call and say hello. (N. FL. Council, NT3V)

WIANEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING APRIL 29 2012.

Are You coming the WIA Annual Conference in Mildura ?

With only one month remaining on the calendar till
this years WIA Annual Conference registrations have
been filling quickly particularly since the announcement
of our special guests and details of the weekend Technical
program. In previous weeks we have talked to Peter Cossins
about his Digital ATV Presentation, Andrew Martin VK3OE
about the developments with his chirp radar system
and we have interviewed Jan King W3GEY a founding member
of AMSAT and we spoke with Jan about his much anticipated
presentation of the AMSATsatellite program. A major feature
of the technical program is the presentation by the Adelaide
based Project Horus team who will be both presenting in the
Saturday afternoon technical Symposium AND launching a real
Horus balloon, Horus 25 on Sunday morning from the old
aero ovals a publicly accessible councilproperty in Mildura.
So this morning it's my pleasure to introduce to you Terry
Baum VK5VZI who one of the lead members of the Horus team
Good morning Terry...

Good morning Robert

First up Terry thanks to you and your team for being part of the WIA Annual Conference in Mildura. Now I'm sure that many will have heard of and be familiar with the Horus program, but for those listeners who are not, could you tell us a little of the background behind the program.

No problems Robert and a very good morning to all the listeners here on this WIA news broadcast. Project Horus is a amateur high altitude balloon project. Our aim is to build and fly low cost weather balloon payloads into the stratosphere, capturing photographs, recording sensor data and providing a reliable launch platform for high altitude experiments. Our typical launches attain altitudes in excess of 35,000m (115,000ft), passing through regions of extremely low pressure and temperature - temperatures frequently reach as low as -55 degrees Celcius. Payloads are tracked by GPS and radio communications - once the balloon has burst, the payload descends to Earth and is retrieved. We had our first launch in 2010 and since then we have launced 23 balloons, Mildura will be our 25th launch and so it has the designation Horus 25

So the plan is to launch Horus 25 on a public oval on Sunday Morning at 8:00am and everyone attending the WIA conference and the general public is invited to come along and watch the launch. What happens after the balloon is launched?

Well as part of the payload on the balloon, we will have a rtty stream of telemetry on 70cm, with the aid of some software that people can install on their laptop, using the laptop sound card hooked to their 70cm radio they will be able to decode telemetry data. We will also be sending this same information to our Project Horus website in real time so people with internet access including interested Midura residents will be able to track the balloons progress via the internet. Horus 25 will also have and amateur voice repeater on board with input on 70 cm and output on 2m. We expect the balloon will remain in the air for about two and a half hours before it bursts and the payload parachutes back down to the ground.

I guess your balloon launches would normally attract a lot of public interest.

Yes they do and quite often we get inquiries from people if they can come and watch a launch, in many cases this may not be practical for a number of reasons, sometimes they are on private property, sometimes access is a problem etc, so for all the people out there who have been hanging out to see a launch, come to Mildura and see us launch Horus 25

And there is a prize for the person who tracks and recovers
the payload.

Yes I have been informed a Yaseu FT 1900r has been
generously donated as a prize for the person who locates and
recovers the balloon payload, mind you it's much easier
these days with the balloons onboard GPS than it was in days
gone by when you had to DF the payload, I doubt it will land
on the Paddleboat Mundoo so if you plan to follow and track
the payload that will be separate exercise to the Mundoo
lunch and afternoon boat trip. I understand the boat boards
at 11:00 an departs at 11:30

Well thanks again Terry for you and your team, we are
looking forward not only to your talk during the Saturday
technical Symposium but also the Sunday morning balloon launch.

Thanks again Robert and our team are very excited about
coming to Mildura

Join us at the WIA Annual Conference in Mildura and be part
of history in the making with the launch of Horus 25.
Register online today, simply visit the WIA website
www.wia.org.au and click the link to the Annual Conference
Mildura

Olympic Games 3D TV trials

The Australian Communications and Media Authority has agreed to issue
licences to Nine Network Australia, provided certain conditions are met,
to conduct trials of 3D TV featuring daily highlights of the 2012 Olympic
Games, ACMA Chairman, Chris Chapman has confirmed.

The ACMA has considered Nine's applications to use unassigned TV channels
for 3D TV trials in Adelaide, Brisbane, the Gold Coast, Melbourne, Perth and
Sydney.

'Viewers with a 3D television should be able to view the trial if they are
within the coverage area of the trial services,' Mr Chapman said.

To ensure that viewers understand the month-long transmission will only be
available in certain areas, the Nine Network has agreed to implement a range
of consumer protection measures.

The ACMA developed the measures in consultation with the Australian
Competition and Consumer Commission following misleading statements from a
number of electronics retailers during previous 3D TV trials.

'Viewers need to be aware these broadcasts are temporary trials of the
3D TV format and that the long term technology is still developing,'
Mr Chapman said.

Detailed information about the coverage areas and other aspects of the trials
will be available from the Nine Network before the services are due to
commence on 16 July.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

In recent times a number of amateurs have asked questions about the WIA Awards program.

I expect that the release published in the last few days will answer those questions.

Shortly after becoming the WIA Director for Awards Chris Platt VK5CP found that he had very little time for the task because of increasingly intense work pressures.

WIA Director Trent Sampson VK4TS has been appointed Acting Director for Awards until Chris is able to devote the necessary time to the role.

Steve Chamberlain VK6IR was appointed Awards Manager last February but found that he was unable to use the time he had set aside for establishing the role and so felt it better to allow someone else the opportunity to deal with this important area of WIA interest.

Bob Robinson VK3SX has been appointed Awards Manager.

In addition, Allan Meredith VK2CA has rejoined the Awards Committee and Laurie Davison VK7ZE has joined the Committee. Laurie is expected to become the first VK ARRL card checker in the very near future.

Last March Dale McCarthy VK4DMC retired from the Awards Committee as he felt that he was no longer able to devote the necessary time to that role.

The routine management of the Awards process will continue to be through the WIA office, and WIA Treasurer John Longayroux VK3PZ, currently overseas, has reorganised much of the basic current data to provide a basis for the work being undertaken by Trent, Bob and the Awards team.

The Awards pages on the WIA website have been updated, work is continuing to update the DXCC standings and the delay in issuing WIA Award certificates is expected to be largely overcome in the next 6 weeks.

May I take this opportunity to thank everyone involved for their efforts to overcome the difficulties we ran into and their ongoing work to improve the program, and in particular Trent Sampson, Bob Robinson and John Longayroux working as ever in the background.

HAMS ACROSS AUSTRALIA.

Its all happening at the Summerland Amateur Radio Club this Sunday the 29th.

Starting at 10 am today, there will be a big tidy-up, and with many tasks to be done they need all hands on deck.

Things to be done include weeding, sorting out the magazine collection, tidying the workroom and storeroom, and also sorting out surplus sales stuff, ready for the Spring Hamfest.

There will be a BBQ lunch, then at 2pm will be the AGM of Northern Rivers WICEN. All members are asked to be there if possible, and all interested persons are welcome to attend.

That's this Sunday, at the clubrooms:

a map is available on the Summerland Club website.

Centenary of organized Amateur Radio in Queensland

Special Event Callsign and Operations

VK100WIQ will be available to Clubs during July and August and a special QSL card is being designed and printed for the operation.

Clubs interested in using the special call for a 3 day bracket (or more if you are keen) need to contact Michael VK4QS.

mikevk4qs@gmail.com or telephone 41 222 927

(sourced to thetarcinc)

VK5

For the last year the Adelaide Hills Amateur Radio Society has held the call VK5MGY. MGY being the radio call sign of the Titanic.

Doc VK5BUG and Shaun VK5ASC have used the call at Titanic displays. Doc, who operates exclusivly on CW has made over 300 contacts worldwide to over 30 countries. QSL's have been printed and distributed from a winning competition entry of James Zinkler.

Thanks to Doc and Shaun for their efforts.

Across Australia from VK1WIA you're tuned to the WIA National News Service. In Adelaide it can be heard on VK5RAD at 9am local time. I'm David VK5KC.

DISCUSSION POINT

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

Recently I had the opportunity to see a group of amateurs show and tell lots of little inventions, from antennas through measuring equipment, hand-made and historic. The atmosphere was electric, HAMs showing off their technical achievements. It was exciting to see the glint in the eye of each demonstrator, proudly sharing their accomplishments.

I realized that in many places in life there is competition, even in Amateur Radio there are contests, but this was something else. This was an experience that highlighted to me what Amateur Radio is all about, figuring out how to achieve something and sharing it with others.

I understand that you could
think that this too could turn into a competition, but the web-sites I've seen in the past year contradict that notion. Everywhere I look there are people trying to share their knowledge, trying to make Amateur Radio a great place to be, telling stories, inventing things, making and building.

All this is a run-up to something, a run-up to one question:

"What have you shared lately?"

If you received your license recently, you may think that you have nothing to share. Ironically that is absolutely untrue. You bring with you a new curiosity, a fresh set of inquisitiveness that you can share with fellow amateurs. You bring an excitement to the hobby that might assist experienced HAMs with a thrill of their own.

So, don't be shy, young HAM or old hand, share and share alike.

I'm Onno vk6flab

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Amateur Radio Posters for Download

The RSGB has made available a collection of amateur radio promotional posters that can be used when demonstrating the hobby to the public.

The posters can be downloaded from
rsgb.org/posters

Meteoroid the size of a mini-van explodes over California

An explosion over California that rattled homes across at least two states has been analyzed by NASA's Meteoroid Environment Office: It was a natural meteoroid the size of a mini-van.

Analysts say the space rock exploded in the atmosphere with an energy equal to nearly 4 kilotons of TNT and might have sprayed the Sierra Nevada mountains with meteorites.

Visit http://spaceweather.com for more information

Rassie Erasmus, ZS1YT new SARL President

Rassie Erasmus, ZS1YT, was elected as the South African Radio League (SARL) President.

In his address at the annual dinner he said that his objective for his year of office is "Together we will achieve more for amateur radio."

He said "I believe that clubs should become more active in the SARL and its national activities and on the flip side, the SARL must be more engaged with clubs. The old clich&#65533; of "unity is strength" could not be more true today than ever before.

While we achieve successes at international level, we need to work harder at successes at national level. We need to work better together, communicate more with each other. Clubs and the SARL need to support each other to grow and expand. The IARU's international voice is only strengthened by national members and societies.

"I urge each club to affiliate with the SARL and appoint a liaison officer to strengthen the communications channel. Communications must be two way and that is the important role of a liaison officer at every club. Communicate to the SARL what is happening at club level and how the SARL can add more value. It should also be the task of the liaison officer to ensure that the SARL communication channels reach club members by including information in local bulletins, at club meetings and at club committee meetings."

RADIO SCOUTING: NEW DEDICATED IRLP TOPIC CHANNEL FOR SCOUTS

Radio Scouting and the Jamboree on the Air now have a common meeting place for Internet Radio Linking Project contacts or IRLP. As one of the new Topic Channels, scouts need only connect to IRLP Node 9091 to make contact with one another.

The Radio Scouting and Jamboree on the Air Topic Channel is available for use 24 hours a day, 7 days a week. A recommended time for calling has initially been established for 1800 UTC for weekend activities, such as Radio Merit Badge events, as well as contacts during Summer Camp. Another suggested time is 0100 UTC to accommodate most scouts during the evening hours.

For detailed information on available IRLP repeaters in your area, how IRLP works and operating guidelines, visit www.irlp.net on the World-Wide-Web. For more information about this and other IRLP Topic Channels take your web browser to www.irlptopics.net

==========

NEWS FROM ARNEWSLINE USA

NEW OTH RADAR REPORT RELEASED BY DK20M

A new paper released by a ham in Germany may shed some light on sources of interference on the ham bands caused by radar systems world-wide. Jim Davis, W2JKD, has more:

--

Wolfgang Hadel DK2OM has made available a report documenting High Frequency Over The Horizon radar systems used around the world. Also included are Ionosphere and Troposhere Diagnostic Radars as well as well as Ocean Wave and Coastal Radars. All of these can interfere with amateur radio and shortwave listening.

The report is an exceedingly thorough look at these various Radar systems and their uses. It also includes explanations of how some of these systems work and include photographs, maps and graphs of some of the operations.

The 36 page report is free to anyone who wants a copy. You can download it in Adobe .pdf format at tinyurl.com/oth-radar-report.

I'm Jim Davis, W2JKD.

WEIRD AND WONDERFUL

JAPAN CONSTRUCTION COMPANY PLANS SPACE ELEVATOR

And finally this week, while it might the stuff of science fiction dreams are made ofr, a Japanese construction company has announced that it will have built a working space elevator by 2050. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with this glimpse into the future:

--

Imagine putting a microsat under your arm, taking it on an elevator ride to a geostationary on-orbit outpost and eventually hsving it tossed into space. Such might be the case in about 40 to 50 years if the plans of a Japan-based construction company come to pass,

According to the The Daily Yomiuri newspaper, the company known as Obayashi Corporation has announced it will build a kind of space elevator by the year 2050. One that will be capable of shuttling passengers and supplies 36,000 kilometers above the Earth.

The company plans to use carbon nanontubes, which are said to be 20 times stronger than steel, to produce the cables required for the elevator. Those cables will be stretched to a counterweight 96,000 kilometers above our planet. Thats about one-fourth of the distance between the Earth and the moon.

An Obayashi official told the newspaper that the terminal station to be located 36,000 kilometers above Earth, will be reached by cars that can carry 30 people and travel at 200 kilometers per hour.

He adds that at this moment, the company cannot estimate the cost for the project. However, they will try to make steady progress so that it won't end just up as simply a dream.

For the Amateur Radio Newsline, Im Heather Butera-Howell KB3TZD, looking at the future from near Burwick, Pennsylvania.

--

The Obayashi spokesperson could not estimate the cost the cost of the project but did admit that it will be high. And whether this project can actually become a reality is up for discussion for at least the time being.

RADIO SPORT

Greetings Everyone - this is Trent VK4TS- Coming up shortly is the WIA AGM and its time to reflect over the past 12 months in contesting - my area of special interest

2012 has seen the formation of the WIA Contest Committee and the introduction of general rules for WIA contests - Contrary to some misconceptions these are not an attempt to make all contests the same but rather to use the same terms for all our sponsored contests.

Sadly we saw the resignation due to ill health of our long time RD Contest manager Peter VK4OD - however Peter recommended Alan VK4SN as his replacement and Alan has taken on the role with gutso - Interestingly he has proposed a couple of changes to the rules and these are in the May issue of AR or on the WIA website

The Oceania Dx Contest has another record in logs received (over 1200 logs) an amazing turnaround by a contest that only 15 years ago was almost extinct Well done Brian VK3MI and team.

The Field Day contests have continued to increase activity with the John Moyle capably managed by Denis VK4AE leading the way however more interest is also being shown in the VHF/UHF only events under the stewardship of John VK3KM.

With the changes to the RD Contest there has been a proposal put forward for individual sponsored trophies, Chris VK3FY has already volunteered the South Pacific Contest Club to donate a shield for the highest scoring Multi Operator and I look forward to hearing from any others groups interested in sponsoring one.

this has been Trent VK4TS

When a new broadcaster comes on line they are encouraged to subscribe to the wiabroadcasters at yahoogroups.com webservice.

Twice a week you receive emails, the first is posted detailing that weeks news broadcast, duration and where the audio can be downloaded from.

The 2nd email is a detailed tally sheet from all the official rebroadcast stations across VK. Remember the only rebroadcast stations of this news shown on the WIA "where to hear us" web page are the ones regularly sending us the number of callbacks each week.

If you wish to join and are a rebroadcaster drop us an email now, to nationalnews@wia.org.au

Also when sending National News Material PLEASE read the "how to submit items" on the weekly news page at wia.org.au

Don't send us just url's and please post your audio onto the news area, not by email.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

16 Japanese educational satellites to be launched

Sixteen educational satellites are under construction in Japan. The first should be launched in May followed by the others over the next two years.

The first to launch is the amateur radio satellite HORYU-2 built by students at the Kyushu Institute of Technology (KIT). The launch is on a Japanese H-IIA rocket planned for May 17 at 1639-1642 UT.

The mission aims to take pictures of the Earth using a small CMOS camera SCAMP (Surrey Camera Payload) developed by the University of Surrey, a sister university of KIT. SCAMP takes a 640 480 pixel picture in a JPEG format. From 700 km altitude, one pixel corresponds to 1.6 km.

HORYU-2 will be followed in July by the launch of the HTV3 to the International Space Station (ISS). This will deliver the JEM-Small Satellite Orbital Deployer (J-SSOD) along with the Japanese CubeSats WE-WISH, FITSAT-1 and RAIKO. These CubeSats should be deployed from the ISS in September using the Japanese Experiment Module (JEM) robot arm.

FITSAT-1, also known as NIWAKA, will use a neodymium magnet for attitude control. It has multiple downlinks, CW on 437.250 MHz, AX.25 on 437.445 MHz and a 4 watt high speed data transmitter on 5840 MHz capable of sending a 640 by 480 VGA JPEG image in 6 seconds.

In addition it carries high power LEDs that will be driven with 100W pulses to produce extremely bright flashes. These, it is hoped, will be observable by the unaided eye or with small binoculars. Both the 5840 MHz and optical downlinks have a high power consumption so it may be that they are only activated over Japan.

In December TSUBAME is planned to be launched on a H-IIA. It aims to have a CW beacon on 437.250 MHz and AX.25 1200/9600bps telemetry on 437.505 MHz.

Further information on all the satellites can be found on the AMSAT-UK website at http://www.uk.amsat.org/6691

AMSAT-UK publishes a colour A4 newsletter, OSCAR News, which is full of Amateur Satellite information.

WIA Members who register for the event will be able to participate in a range of fascinating and memorable activities.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

Announcing QRZDroid - for your Android Device

Posted: 26 Apr 2012 01:15 PM PDT
http://forums.qrz.com/showthread.php?343952-Announcing-QRZDroid-for-your-Android-Device&goto=newpost

Today we're proud to announce the arrival of QRZDroid, the official QRZ Android application. This app gives you simple, fast access to the QRZ Callsign database in the palm of your hand. The app is completely FREE and is expected to run on most recent versions of the Android OS. It includes a 100 callsign memory as well as the ability to text, email, or send lookups via bluetooth.

The app is available in the Google Play (formerly Android Market) now. Just search for QRZ and choose the app with our logo, or use the direct link:

https://play.google.com/store/apps/d...abase.callsign

//////////////////////////////////////
QSL - How many non-members of the RSGB know about this change?

Posted: 25 Apr 2012 12:59 AM PDT
http://forums.qrz.com/showthread.php?343761-QSL-How-many-non-members-of-the-RSGB-know-about-this-change&goto=newpost

Changes to the RSGB QSL bureau operation that were detailed in the December 2011 RadCom have now taken effect. Volunteers now despatch, where possible,

all available incoming cards to members and pay-to-receive users on a quarterly basis. Currently they are sending out their last batch of cards to non-members, together with the return of unused collection envelopes and details of how to access the new scheme. All members with more than one active callsign, especially those in the M3, M6, 2 and M0 series, urgently need to visit the RSGB website and update their membership details, if they have not already done so. To avoid envelopes being returned incorrectly and cards lost, this information is vital. It would be most helpful if those who do not collect traditional QSL cards change the wording of any QRZ.com entry to include the wording ☐No bureau cards☐. Please note that all NOV holders of GB Special Event and abbreviated single letter callsigns must be registered to a valid member or affiliated Society in order to continue sending and receiving cards. To update your information visit www.rsgb.org/amend or telephone RSGB headquarters

So as I see it not only do you have to send stamped self addressed envelopes, (which I have no problem with) you now have to pay a fee just to get someone to send them to you

WHY BOTHER ....

JUST LIST YOURSELF AS QSL DIRECT ONLY,

OR DO NOT QSL

OR ELECTRONIC ONLY

Yet another tax on the pensioners,/ seniors (stamps going up by yet another unacceptable amount this month as well !!)

SOTA Saturday in SoCal

Posted: 26 Apr 2012 02:40 PM PDT
http://forums.qrz.com/showthread.php?343965-SOTA-Saturday-in-SoCal&goto=newpost

OK guys,

I'm hiking up to Mt Waterman on Saturday 4/28 to try out this SOTA thing.

I just picked up an ft-857 and LDZ AT. Antenna is a Buddistick vertical, power comes from a couple of 4S Lipos thru a Astron DC to DC converter.

Plan is to try and get as many QSOs as possible starting noon Pacific. Initially on 7.285 MHz, then 14.285 MHz.

If you are spinning dials Sat noon, please listen for an out of breath 50 something newbie.

Thanks

Mike

Vertical Dxpedition
Mozambique :rolleyes::rolleyes::rolleyes::rolleyes::rolleyes: :rolleyes::rolleyes:

From DW Deryer-Juselius

zs6djd

Email zs6djd@gmail.com

Daniel ZS6JR and my self ZS6DJD will be operating from Mozambique for Seven to ten days starting on the 3th or 4th of may 2012 depending how quick we get the equipment up. The idea was to park next to a small lake in Shai Shai Mozambique 400 km north of the capital and operate all vertical antennas with the earth wires in the water and see what we could do. So we will operate vertical on most bands 40m to 10m, but Daniel has also decided to take a Hex beam antenna with. I f we get the chance we will also work 6m and 80m. I do not have a call sign as yet. This we will only get soon . I will most probably get C 91 JD Or C 91 DJ or C 91 DN. Conditions allowing we should be on all these bands. on 20m around 14.200, 14.1950, 02 14.900 or 14.2100 on 15m at 28.2800 or 21.2750, 21.2700 21.650, 21.500. On Ten Meters at 28.450 or 28.470 or 28.500 and others bands 17m and 12m.

Would you be so kind as to tell as many Amateurs as possible. Thank you very much and all the best .73 and 88. :cool::cool::cool::cool::cool::cool:

Yours in the Amateur Radio Hobby

Dior

WIA Awards Program Changes:

Posted: 26 Apr 2012 05:18 PM PDT
http://www.eham.net/articles/28180

Shortly after becoming the WIA Director for Awards Chris Platt VK5CP found that he had very little time for the task because of increasingly intense work pressures. WIA Director Trent Sampson VK4TS has been appointed Acting Director for Awards until Chris is able to devote the necessary time to the role. Steve Chamberlain VK6IR was appointed Awards Manager last February but found that he was unable to use the time he had set aside for establishing the role and so felt it better to allow someone else the opportunity to deal with this important area of WIA interest. Bob Robinson VK3SX has been appointed Awards Manager. In addition, Allan Meredith VK2CA has rejoined the Awards Committee and Laurie Davison VK7ZE has joined the Committee. Laurie is expected to become the first VK ARRL card checker in the very near future.

British APCO and The Radio Amateur's Emergency Network sign MOU:

Posted: 26 Apr 2012 05:15 PM PDT
http://www.eham.net/articles/28179

The Memorandum of Understanding sets a framework for mutual co-operation in the interest of public safety. On the 16th of April British APCO President Alan House and The Network Chairman Cathy Clark signed an MOU that recognised the common objectives of both organisations in the promotion and influencing of public safety, civil contingency, information management and communications technologies. In the Memorandum of Understanding RAYNET is identified as "The Network", and in addition to the MOU a Schedule of Agreements is included which sets out some of the ways in which both organisations will work together, including networking opportunities and invitations to attend management meetings; website content sharing; joint working and sharing of publications; and engaging The Network in regional and national events.

//
Flying Away on a Magic Carpet Ride:

Posted: 26 Apr 2012 05:14 PM PDT
http://www.eham.net/articles/28178

I've gotten to do a lot of, what I consider, very interesting stories lately. The latest one was one about Dick Zehr hooking his Ham radio up in his room at the Good Samaritan Home in Flanagan. I got the call Monday morning from an employee at the nursing home, asking if we would consider running the story. Of course we would! I saw my dad later that night. I haven't ever talked to anyone about a story I was working on, especially before it was printed, but this time, I asked my dad if he remembered Mr. Zehr. My dad did remember he and his wife both, as the couple had worked at Flanagan schools while my dad was in school there (for the record, his wife still worked at the school my first couple of years in attendance, too). My dad recounted how he was part of a group of guys that learned Morse code from Dick. When my dad got older and had kids, he took my brother's Scout troop to visit Dick and they all learned how to use the Ham radio. I remember that trip. My brother thought that was the coolest thing in the entire world! I was very young when this trip took place - probably in the early grade school years. The way my brother described the Ham radio was like a magic carpet ride. It could take you anywhere you wanted to go. He talked about how Mr. Zehr had spoken to people all over the world and if you called out on the radio, anyone who heard you could pick up and you never knew who would or where they would be from. After all these years, I can't remember who my brother said they got to talk to that day, but I just remember the awe and amazement Nathan had as he was telling his mom and sisters about it when he and my dad got home that day.

Posted: 26 Apr 2012 05:12 PM PDT
http://www.eham.net/articles/28177

A different kind of birthday celebration took place on Signal Hill today for the father of trans-Atlantic wireless communication, Guglielmo Marconi. Morse code pierced the thick fog on Signal Hill this morning as it travelled all the way across the Atlantic ocean to Bologna, Italy. That's where Marconi's daughter, Princess Elettra was sitting, as the signal was received in celebration of her father's birthday. The Princess brought greetings and thanks to members of the Newfoundland Amateur Radio Club, Parks Canada and politicians who were all gathered on the second floor of Cabot Tower for the momenteous occasion.

Ham Radio Operators Prepared to Communicate in Emergency Situations:

Posted: 26 Apr 2012 05:10 PM PDT
http://www.eham.net/articles/28176

Wood County officials plan to be ready. "Listen, Act and Live" is the theme for the 2012 Tornado and Severe Weather Awareness week, which runs through Friday. At 1 p.m. today, Tornado Awareness Day, a mock tornado watch (a watch means conditions are right for a tornado to form) will be followed by a mock tornado warning (a warning means a tornado has been reported or Doppler radar indicates one is possible) starting at 1:45 p.m. in Wood County. Being prepared ensures everything -- and every person -- will be

ready to take action, emergency officials say. "We have already practiced our severe weather plan," said Melody Dearth, Riverview Hospital Association disaster committee chairwoman.

//
DXers Ride Marconi's Wavelength:

Posted: 26 Apr 2012 05:09 PM PDT
http://www.eham.net/articles/28175

Imagine the awe and personal satisfaction Guglielmo Marconi must have felt on Dec. 12, 1901 when he announced the first transatlantic wireless reception. Marconi and his team used a kite to raise a 500-foot antenna atop Signal Hill in St. John's, Newfoundland, and waited for pre-arranged Morse code signals from Poldhu, Cornwall, more than 2,000 miles away. The signals he reported were extremely faint, occurred during daylight and lacked independent authentication. However, he soon achieved comparable distances under more optimal circumstances from a ship in the mid-Atlantic and, later, from Nova Scotia. Radio proceeded to capture imaginations the world over. Even as it works to define itself in today's digital age, some dedicated listeners continue to get the same charge Marconi did.

http://www.eham.net/articles/28165

As part of ITU Telecom World 2012 -- scheduled for October 14-18 in
Dubai -- the conference will present the Young Innovators Program. With
its theme of Youth Innovation for Development, the Young Innovators
Competition is a chance for the next generation of young visionaries to
demonstrate their ideas and innovations on this global stage and show
how their fresh digital thinking can change the world for the better.

//
ARRL/TAPR Digital Communications Conference Set for Atlanta:

Posted: 26 Apr 2012 04:59 PM PDT
http://www.eham.net/articles/28164

The dates have been set -- September 21-23 -- for the 31st Annual
ARRL/TAPR Digital Communications Conference (DCC) in Atlanta at the
Sheraton Gateway Hotel.
The DCC schedule includes forums, demonstrations, a Saturday evening
banquet and an in-depth Sunday seminar. This conference is for everyone
with an interest in digital communications -- from beginner to expert.

SARL NEWS - SUNDAY 29 APRIL 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

SARL ELECTS NEW COUNCIL NEW SUBSCRIPTION RATE AGM DECISIONS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SARL ELECTS NEW COUNCIL

At the annual general meeting held as part of the SARL National Convention a new council was elected. Rassie Erasmus, ZS1YT, is the new president and Geoffrey Levey, ZS6GRL, the vice president. Fritz Sutherland, ZS6S,F takes over from Henry Chamberlain,ZS1AAZ, who, after many years as secretary, has retired from council. The other members of council are: Dennis Green, ZS4BS, Hans van de Groenendaal ZS6AKV, Fred Scheepers ZS1FCS, Laurie Deveraux ZS5DL, Francois Botha, ZS6BUU, Riaan Greeff, ZS4PR, Willem Weideman, ZS6WWJ, Frik Wolff, ZS6FZ, Johann Marais, ZU1JM, Ian Laubscher, ZS1LAU, and Pierre van Deventer, ZS6A. Details of the various portfolios can be found on www.sarl.org.za/members/council/portfolios.asp or simply go to the site index and select councillor portfolios. The council will have it first meeting by teleconference on 9 May.

REGISTER NOW FOR THE SA AMSAT SPACE SYMPOSIUM

Register now for the SA AMSAT Space Symposium to be held at the University of Kwa-Zulu Natal on 12 May. Telkom is the main sponsor, making it possible to have the most extensive number of speakers and subjects on a packed programme. SANSA has come on board and will sponsor students wishing to attend the symposium. Students wishing to

be considered for sponsorship should register by Thursday 3 May. Get all the detail on www.amsatsa.org.za or follow the link from the SARL web.

THE SARL REACHES OUT TO SADC RADIO AMATEURS

The SARL is reaching out to radio amateurs who are members of their national society in SADC countries, to join the SARL on a complimentary basis. This is part of the SARL's commitment to support the IARU Region 1 "Support for the Amateur Radio Service" or, for short, STARS programme. The objective of the STARS programme is to defend, protect, extend, develop and promote the amateur radio service in countries where amateur radio activity is low or nonexistent. To apply, radio amateurs in SADC countries should complete the SARL membership application form and submit the form and proof that they are a member of their local society, to admin@sarl.org.za.

NEW SUBSCRIPTION RATE

The SARL subscription for the various categories of membership has been marginally adjusted. The new rate for an ordinary member is now R400 and for a senior member over 65 years of age it is R230 per annum.

JOIN THE SARL NOW AND YOU WILL GET MAY AND JUNE ON THE HOUSE

The SARL has a special offer for non-members to join the SARL. If you join now you will get May and June on the house. It will cost you only R400 for a subscription that will carry your membership through to the end of June 2013.

The SARL as the national body for amateur radio is representing you both locally and internationally and look after your interests. In recent times supporting the International Amateur Radio Union, amateurs have gained two new frequency allocations in the long wave and medium wave spectrum while working on a new allocation in the 5 MHz band.

To make use of this special offer complete the form on www.sarl.org.za, click on membership or call Mariska at 011 675-2329 for assistance.

AGM DECISIONS

Motion 1 dealing with the Jack Twine award was accepted unanimously. The motion makes it compulsory to submit a a full motivation when proposing a person for the award and not simply the name and the required support from six SARL members.

Motion 2: The rules of debate, which have been in use for many decades, are now part of the rules and not just the AGM agenda.

Motion 3 dealing with date and venues of the AGM was accepted unanimously and leaves it to council to select the date for the AGM.

Motion 4 was accepted unanimously. Councillors are now elected for two years with six or seven members retiring each year.

Motion 5 was passed. It deals with expulsion from the SARL. The new rule ensures that in the case where it is necessary to expel a member, he or she gets a fair hearing.

Motion 6 changes rule 1.5.6 replacing membership with affiliation, which applies to clubs.

Motion 7 introduces the SADC class of member

Motion 8 opens the forum to non-members and sets out a number of requirements such as the appointment of three moderators, the development of rules and a code of ethics. The motion was voted on as follows: 52 abstentions, 75 votes against and 106 votes for the motion.

Newly elected councillor Pierre van Deventer, ZS6A, will handle the forum portfolio. A special email address for all matters related to the forum has been set-up: forumadmin@sarl.org.za.

All other correspondence with the SARL should be sent to secretary@sarl.org.za. Address changes and subscription enquiries should be addressed to admin@sarl.org.za.

Motion 9 was withdrawn as it addressed the same topic as motion 7.

Motion 10 suggesting member email addresses @sarl.org.za was lost. The cost implications make the proposal at this stage not financially viable.

MOTION 11 dealing with changes to the constitution to enable the SARL to apply for tax exemption was unanimously carried.

Under general the SARL regulator roadmap was discussed. Some discussion took place around the expiry of the ZU license for persons over 25 on 31 March 2013. It was agreed to make a further approach to ICASA. The roadmap will be available on the SARL web during next week.

2012 OLYMPICS NOT GREAT FOR RADIO AMATEURS

Details of amateur band frequency restrictions during the London 2012 Olympic and Paralympics Games have now been released by UK Telecommunications regulator Ofcom. The greatest impact to amateur radio appears to be satellite and other operations in 436 to 437 MHz. The restrictions only apply in geographically limited areas, with 70 cm being particularly affected around London and Weymouth.

CONTEST NEWS

ZS3 Sprint. The ZS3 Sprint, which will be run from 14:00 to 15:00 UTC on Sunday 6 May, is run to promote contacts between radio amateurs in the Northern Cape and radio amateurs in Southern African countries. It is a phone and CW contest on the 40-m band and the exchange is RS(T) and provincial or country abbreviation.

ZS3 stations will earn 1 point for a QSO from ZS3 and 2 points for a QSO from other ZS call areas or Southern African countries. Other stations will earn 2 points for a QSO with a station in ZS3 and 1 point

for a QSO with a station outside ZS3. Contacts with the Northern Cape ARC, ZS3NC, Namaqualand Aero Sport Association, ZS3FLY, or the Kalahari Karoo ARC, ZS3ARK, are worth 5 points each. Only one contact per station is allowed.

Log sheets must be submitted by 13 May and can be sent to ZS3 Sprint, PO Box 1049, Kathu, 8446 or by e-mail to zs3nc@qsl.net.

AWA Valve QSO Party.

On Saturday 12 May and Sunday 13 May the AWA Valve QSO party will be held. Saturday is the AM leg and Sunday the SSB leg. Time is from 15:00 to 19:00 CAT. Frequencies: 40 m, 7060 to 7100 kHz and 80 m, 3600 to 3650 kHz Exchange: Call sign, RS and consecutive numbers starting at 001 and the type of rig used. Scoring (your radio): All-valve radio, three points per contact; hybrid radio, two points per contact; solid state radio, one point per contact. Certificates will be awarded to the 3 highest scores in each category. Closing date for logs is 28th May 2012. Logs can be sent to andyzs6ady@vodamail.co.za or mailed to AWA of Southern Africa; PO Box 12320; Benoryn 1504.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity remains at moderate levels. The sun's surface is peppered with smaller, fairly quiet sunspots.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 67.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 10 m not far behind.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Sunday 6 May - ZS3 Sprint will be run from 14:00 to 15:00 UTC. 12 May - SA AMSAT space symposium; visit www.amsatsa.org.za for details and registration. Saturday 12 May and Sunday 13 May the AWA Valve QSO party/

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on

4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Fritz, ZS6SF.

Thank you for listening, 73. /EX

Amateur Radio Club Members Rewarded for Activities:

Posted: 27 Apr 2012 05:21 PM PDT
http://www.eham.net/articles/28183

TORBAY Amateur Radio Society is keen to encourage new faces to the hobby and welcomes visitors and potential new members to weekly meetings. The club boasts more than 120 members, most of whom attend the meetings regularly. On the last meeting of each month, members are entertained by a speaker and have been since the club started in 1947, goodness knows how many topics have been discussed since then. The club also runs regular courses with a dozen participants recently gaining their radio licenses. In March, the group held a presentation night when lucky members were awarded recognition for club activities, ranging from distances worked and number of stations on all the various amateur radio bands, also the awards for the construction items judged from the January meeting. This was followed by a very nice buffet. The society will be running a foundation course in the not-too-distant future, so if you are interested in getting your foot on the first rung of amateur radio then please come along to a meeting.

http://www.eham.net/articles/28182

LIMERICK - Rex Harper is the kind of do-it-yourselfer who likes to tinker with things. A native of Cape Elizabeth, he taught himself computer programming, and made a good living for a while running the first retail computer store in Maine, back when Apple was just bursting onto the scene. Through the years, Harper, 62, has also made a pretty decent living working on small startup companies, making everything from counterfeit-proof poker chips to water filtration systems to computer systems specially designed for the disabled. Many of the latter systems, he said, he designed himself. "That's what I do," he said. "I'm a thinker-upper." These days, he lives in Limerick with his wife and daughter, and keeps himself busy running a side business out of a metal Quonset hut on his property - which he built himself - making and selling ham radio kits. Yes, ham radio. Ham radio uses designated frequencies only for private, non-commercial use. For those unfamiliar with the hobby, the words might call to mind a metal box the size and weight of a large wall safe, full of confusing dials and knobs. For a time, that was what the hobby was all about. But that was when

Dwight D. Eisenhower was president, and like all electronics, amateur radio sets have gotten smaller and cheaper.

Propagation Forecast Bulletin #17 de K7RA:

Posted: 27 Apr 2012 03:29 PM PDT
http://www.eham.net/articles/28181

Solar activity revived over the past week, with a big increase in sunspot numbers. On Friday, April 20, the daily sunspot number reached 162, and four days later on April 24 the number reached 169. This level of activity was not seen since last fall, when the daily sunspot number reached 173 on September 16, 184 on October 21, and 208 on November 9.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd-April, through Sunday, 29th-April there were 227 countries active. Countries available: 1S, 3A, 3B8, 3D2, 3D2/r, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, DL, DU, E5/n, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2V, VP8, VP9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

7O6, YEMEN. An international team of operators will be active as 7O6T from Socotra Island (AS-028) very soon (within a week) and through May 17th. The team has obtained the license and is enroute to Sanaa. They

plan to have six stations on the air (5x Elecraft K3 and Kenwood TS-590). Activity will be on 160-10 meters using CW, SSB and RTTY. Suggested frequencies are:
CW - 1824, 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024 kHz
SSB - 1845, 3780, 7065/7180, 14145, 18145, 21295, 24945 and 28495 kHz
RTTY - 7035, 10140, 14080, 18100, 21080, 24920 and 28080 kHz

QSL via UA3DX. More details about OQRS/Direct/Bureau/ LoTW will be available during the course of DXpedition. Operators mentioned are Dmitri/RA9USU (Team Leader), Harry/RA3AUU (Co-Leader), David/K3LP (Co-Leader), Andrew/UA3AB, Oleg/R3FA, Vlad/R7LV, Alex/RM2M, Yuri/RL3FT, Aleksey/UA4HOX, Choigonjav/JT1CO, Paul/N6PSE, David/WD5COV, and Hrane/YT1AD. The 7O6T operation is supported by: Ministry of Interior Republic of Yemen, Ministry of Information Republic of Yemen, Ministry of Radio Republic of Yemen and the Ministry of Telecommunications and Information Technology Republic of Yemen. The 7O6T operation does have a Web page and Twitter page: http://www.yemen2012.com/index.php https://twitter.com/#!/7o6t

8Q, MALDIVES. A group of JA operators will be active from North Mahe Atoll (AS-013) between May 11-16th. Operators mentioned (w/8Q callsigns) are Kanno/JA2AAU (8Q7NK), Yoshiyasu/JA2AIC (8Q7IC), Iku/JA2ATE (8Q7TE), Iwao/JA2LSS (8Q7CJ) and Tug/JA2ZS (8Q7ZS). Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. QSL via their home callsigns, by the Bureau or direct.

9H, MALTA. Operators Olaf/DL4HG and Holger/DL5XAT will be active as 9H3OG and 9H3TX, respectively, from Gozo Island (EU-023) between November 21-26th. Activity will include the CQ WW DX CW Contest (November 24-25th) as a Multi-2 entry using the callsign 9H3TX. QSL 9H3OG via DL4HG, by the Bureau or direct. QSL 9H3TX via DL5XAT, by the Bureau, direct or LoTW.

9Q, DEM. REP. OF CONGO. News from the Association des Radio Amateur de la Republique Democratique du Congo (ARRAC) reports on QRZ.com [edited]:
"Finally after 2 years hard work good news from The Republique Democratique Congo. Thanks to STARS ON6WQ (IARU support To Amateur Radio service) for donation of a transceiver and antenna. Thanks to the Belgian DX Team: ON4AHF, ON4HIL, ON4ATW, ON4CIT, ON6CC, ON4IA and PA3EWP. Also thanks to Henk, ON4AHF, for the VHF donations and support on the training course via SKYPE and mail. Also, Pascal, ON4CFC, who lives in Kinshasa and helped the new members on their training course together with 9Q1PM and 9Q1HN. With this help, here are the results:
This is the list of the only real operators who passed the first exam on the date of January 27th, 2012, and now have their own their P.N.T.C Amateur Radio certificate.
YLs OMs
---------- ----------
9Q1BT - Tshiela Brigite 9Q1RM - Muamba Richard
9Q1ALA - Akongunuka Annie 9Q1WM - Mulumba Wamans
9Q1AD - Diluzeyi Angelique 9Q1JL - Lukusa Jean Willy
9Q1AK - Kitete Agnes 9Q1RE - Ekaya Robert

9Q1LJ - Lihau Jeanine 9Q1JI - Ifaso Jean Maurice
9Q1MM - Mbuyi Marie Louise 9Q1HN - Ngilima Henry
9Q1YM - Muaka Ngimbi Yvette 9Q1PM - Pascal Mbuyi
9Q1NH - Nsele Hortense 9Q1KM - Mpinda Khal
9Q1FS - Sua Francoise 9Q1LE - Enyeka Lazare
9Q1NW - Watuala Webe Nicole 9Q1CM - Makiamfu Jean Claude
9Q1MP - Mangala Jean Pierre
9Q1HM - Mbenga Hermes
9Q1DN - Ngelebeya Dieudonne

ON4CFC has received the 9Q1CFC trainer certificate from the office of the General Secretariat P.N.T.C RDC Kinshasa. 9Q0AR WILL SOON BE ON THE AIR WITH 100% QSL SUPPORT VIA A QSL MANAGER AND DXCC ACCEPTANCE. PLEASE BE PATIENT, MORE NEWS IS FORTHCOMING SOON."

A5, BHUTAN. A JA team of operators will be active from a hotel (altitude 10,000 ft.) in Thimpu between June 6-14th. Operators mentioned with their A5 callsigns are Shigeo/JA1JQY (A52JY), Nakayama/JA1KJW (A52KJ), Kaoru/ JA3MCA (A52MA), Akira/JK1EBA (A52BA) and Kunio/JA8VE (A52VE). Activity will be on 160-6 meters [with an emphasis on 6 meters] using CW, SSB and RTTY. A beacon will be on 50.125 MHz. QSL via their home callsigns.

C9, MOZAMBIQUE. Operators Daniel/ZS6JR and Dior/ZS6DJD will be operating from Mozambique for 7-10 days starting on May 3rd or 4th, depending on how quick they install/get their equipment up and running. Dior informs OPDX, [edited] "The idea was to park next to a small lake in Shai Shai, Mozambique, 400 km north of the capital and operate all vertical antennas with the earth wires in the water and see what we could do. So we will operate vertical on most bands 40m to 10m, but Daniel has also decided to take a Hex beam antenna with him. If we get a chance, we will also work 6m and 80m. I do not have a callsign as yet. We will be getting it soon. I will probably get C91JD or C91DJ or C91DN. Conditions allowing, we should be on all the bands." Some suggested frequencies by Dior are:
20m - 14210, 14200, 14195 or 14190 kHz
15m - 21280, 21275, 21270, 21.265 or 21250 kHz
10m - 28450, 28470 or 28500 kHz
Also, watch 17m and 12m.
Daniel, ZS6JR, will probably be signing C91JR, and will be active on RTTY and PSK. QSL C91JR via GI4FIM.

CARIBBEAN TOUR. Barry, ZS1FJ/9V1FJ/G4MFW, will be active from several different locations in the Caribbean during the month of May. All of the activities listed below will be under the CEPT authority, and he will be signing with the callsign ***/G4MFW (ex. PJ2/G4MFW, FS/G4MFW, etc...). Barry tells OPDX that this is not a holiday operation, but a serious operation. He will use low power (100w) with wire antennas, and it is possible that a fellow ham will be joining him to ramp up the activity. He also mentions that this is his 27th one man DXpedition, and that "I am an old style ham and this is on my 80th year. For example paper logs!" Look for him to be on 40/20/17/15/10 meters SSB only. Also, Dennis, ZS1AU, is expected to be the pilot for Barry's activities. QSL all

activities via 9V1FJ in Singapore. His tentative schedule is as follows:
May 9-11th - St. Maarten (PJ7) and St. Martin (FS) Islands
May 12-14th - Saba Island (PJ5)
May 15-16th - St. Barthelemy (FJ)
May 17-20th - Curacao (PJ2) and Bonaire (PJ4) Islands

DXPEDITION OF THE YEAR (Press Release #7, dated April 22nd). "ST0R voted as Dxpedition of the Year -- During this weekend's International DX Convention in Visalia, California, the ST0R team was honored as the 'Dxpedition of the Year' as voted upon by the membership of the Northern California DX Club.
The ST0R team is very honored to receive this recognition. ST0R Co-Leaders Antonio Gonzalez-EA5RM and Paul Ewing-N6PSE received the honors from NCDXC President, Russ Bentson-K6KLY. ST0R team members David Collingham-K3LP, Roberto Filloy Garcia-EA2RY and Hrane Milosevic-YT1AD were also present and participated in this great honor.
The Intrepid-DX Group and the DX Friends/Tifariti Gang are very proud of this honor and are actively working on future plans for further DXpeditions together.
Thank you,
Antonio Gonzalez-EA5RM -- The Tifariti Gang
Paul Ewing-N6PSE -- The Intrepid-DX Group"

E51, NORTH COOK ISLANDS. Warwick, E51WL, on Penrhyn, was heard this past week and weekend on 6 meters. Be looking for him just before 2300z on or around 50.120 MHz.

EG8, CANARY ISLANDS. Members of Gran Canaria DX Group and the local Club of the URE, will activate the special callsign EG8WFF from the central mountains of Gran Canaria (1650m above sea level - IOTA AF-004) on May 5th and 6th, and will be valid for the World Flora and Fauna Award (EAFF-078 Biosphere Reserve and DME 35033). They plan to have several stations on the air using CW, SSB and RTTY on all HF bands. QSL via EA8AKN.

EM67, UKRAINE (Special Event). Members of the Crimean Contest Radio Club (UU5J) will be active as EM67J during May 1-15th. Activity is to commemorate the 67th anniversary of the "Victory in the Great Patriotic War". QSL via K2PF. Log will be upload to LoTW in late May or early June.

HS, THAILAND (French News). Maurice, F5NQL, reports that Alain, F6HBR, has been living in Thailand since 2006. After seven years of negotiations between France and Thailand, a reciprocal agreement has been signed during last December 2011. So as of April 25th, and for the first time, a French operator has received a Thai license. Alain, F6HBR, (ex-FO8FW & FR5EM) is now HS0ZKG. Look for Alain to be active mainly on CW, and on a little PSK and RTTY from Koh Samui (AS-101). More information is to follow. A second French ham is living in Thailand -- Gerald, F8DEG. He is expected to be the second French ham signing HS0Z??.

IOTA NEWS.....
EU-011. Nobby, G0VJG, will be active as G0VJG/p from St. Mary Island

between July 27-30th. Activity will include the RSGB IOTA Contest (July 28-29th) as a Single-Op/SSB/High-Power entry. QSL via his home callsign.

EU-070. Operators Holger/DL1COP, Alex/DL1KD, Jurgen/DJ2VO, Martin/DL3KMS and Helmut/DL3KBQ will be active as F/homecall from Porquerolles Island (DIFM ME010, WLOTA 1107) between May 12-25th. Activity will be on 80-10 meters and on all modes. QSL via their home callsigns, by the Bureau or direct.

EU-103. Operators Adam/EI5JQ, Oleg/EI7KD, Michal/SP9UUC, Ark/EI9KC, Dan/EI3JZ, Robert/EI6KD and Krzysztof/SQ7NNM will be active as EJ0PL from Little Saltee, Ireland, during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Island entry. QSL via EI5JQ, direct or by the Bureau.

NA-015. Frank, CO2IR, is now active from La Habana (Grid Loc: EL-83) during his free time and between taking his university exams. Activity will last until May 1st, and operations will be on 14200 kHz (+/- QRM) on SSB, and 14010 kHz (+/- QRM) on CW, running 100w into a vertical ground-plane antenna. The QSL route is only direct to EB7DX (QSL manager).

NA-240. Operators Yuri/N3QQ and Tim/NL8F of the "KL7RRC/p 2012 Alaska Team Trip" will arrive in Bethel on May 10th, with a goal of activating Pingurbeck Island. Yuri informs OPDX that they are still looking for additional team member, if you have some time on your hands, please contact him or Tim ASAP. Locals are predicting the ice conditions on the river near Bethel will break around May 12th. Currently, the ice near the islands are now about 4-6". The only realistic way to get to the island is by air, and they hope that the company they are speaking with will meet them at the airport at 8 AM. More specific dates as it is looks now, if weather permits, they will fly on the same day, May 10th, in the evening to island. They will stay there at least until May 14th (evening or longer), so the estimated time is May 10-14th, to activate this NEW IOTA. QSLs can be confirmed by either QSL Manager Yuri/UA9OBA or Dick/N7RO. Activity wil be on 40-6 meters using CW and SSB. Their equipment: 3 radios (IC-7600, IC-7000 x2), 2 amps (Ameritron ALS-600S), EU2000i generator, several full size vertical dipoles for 20/17/15m and two 1/4 wave verticals for 40m/30m. Yuri states, "We would like to thank for a financial support Shu/JN6RZM and his dedicated group, IREF, GDXF and all individual donors world-wide. Since it is our second attempt, any additional help would be appreciated. Paypal E-mails <ttim@arctic.net>
or <n3qq@na-234.com>. Thank you! No need to mail QSL for donors, contacts will be confirmed direct, no postage is necessary. All Bureau cards will be confirmed via Bureau. We will keep you posted about new developments. Live tracking of

our location should be available after May 9th, at:
http://www.NA-234.com

SA-080. Renner, PY7RP, will be active as PY7RP/6 from Tinhar Island
between May 10-13th. Activity will be holiday style operating
CW and SSB. QSL via his home callsign.

LZ67, BULGARIA (Special Event/EME Op). Look for special event callsign
LZ67VZ to be active during the Memorial "Pobeda 67" (from 0800z, May 5th,
through 1400z, May 9th). Activity is devoted to the World War II hero and
Bulgarian General Vladimir Zaimov. Operators mentioned are Alex/LZ1ADF,
Boyan/LZ1BJ, Valyo/LZ1DOT, Ned/LZ1DX, Slav/LZ1MC, Gosho/LZ1ZF, Boris/LZ2JR,
Krasi/LZ2UW, Christo/LZ3FN and Emil/LZ3HI. Operations will be on PSK during
the Memorial "Pobeda 67" and details of this event can be found at:
http://www.epc-ru.ru/index.php?option=com_content&task=view&id56&It
emid3
Ned, LZ1DX, will activate this special callsign LZ67VZ on EME, and on the
following frequencies: 432.144 MHz, 2320.144 MHz and 2304.144 MHz. To
arrange SKEDs, please send an E-mail to: lz1dx@lz1dx.org
All contacts will be confirmed 100% via the QSL Bureau. For more details,
please see: http://www.qrz.com/db/lz67vz

JX5O QSL. Scotty, WK3N, provides OPDX readers with an interesting review/ video clip on the JX5O QSL card. Take a look:

http://www.flipshare.com/login.aspx?nRecipient=IEOTU4OUItODY3Ri00OEJDLU E5MjEtQzJDOEI0MUZEQUM3&nFrame=czQjAyNjktQjU3Mi00MEU3LUIwRDktQTRENzExQjQ2 MzIx&nMethod=1haWw=Media=BCMDMzNzAtQzBCRC00REFBLThCOTgtQzNBQTAxQ jJERkVG&emt=8804c0-c55c-43f4-bb5d-6f0b43b92e5c&slocale=_US&emailThum bnail=ngle

TO3A QSL STATUS. Nick, VE3EY, reports that all direct QSL requests are done and a few dozen FJ/VE3EY QSLs should be in the mail this week. Nick states, "I was hoping to have all this done earlier but more pressing things in life have gotten in between (mortgage, work, over-time etc etc). Thanks for your patience."

ZY0T & PP0T QSLS. Fred Laun, K3ZO, Manager of the NCDXA/ARRL Third Call Area Incoming QSL Bureau, reports, "DXers will be pleased to note that a recent shipment to the W3 Bureau from Global QSL included a sizable number of cards from ZY0T." He also mentioned, "The W3 QSL Bureau recently received a bunch of PP0T cards shipped out by EB7DX through the URE Bureau."

QSL RECEIVED VIA LoTW: 3D2R, 9N7MD, AT2DW, 6H6IARU, DQ4W, F8RZ, FY9PE, LW7DUC, OK1WCF, ON4CMT, PJ5/SP6EQZ, PW0PP, VK2GWK, XE2FGC, YL2JZ and ZX2B

QSLS RECEIVED VIA MAIL: 3DA0NJ, 603A, 6Y1V, 7U1MA, 9J2BO, C21HA, C6AZZ, FJ/VE3EY, J79WE, JX5O, KG4KL, OD5WPX, OH2BH, OJ0B, OJ0X, PZ5RO, TG8/W0OR, TL0CW, TO3A, TT8M, TX7M, V85TL, VK0TH, VK9N/ZL1RS, VO2NS, VP6T, VP8SGP, VU2ELJ, XW0ZJZ and YC0BNX

QSLS RECEIVED VIA THE BUREAU: 3C9B, 4W6A, 5R8HL, 5V7CC, 9Q6AL, 9U0A, 9X0SP, A92IO, CE0Y/DK7ZB, CE0Z/SM6CUK, D44TBW, DU1IST, FJ/OH2YL, HC8GR, HK0GU, J28JA, J5V, JW8DW, OJ0B, OY3AA, P29VCX, P29VJY, PJ4I, T30XG, T8CW, T88RX, UK/JI2MFD, V63JY, V73RRC, YE39AR, YI1RZ, YI9WV, ZD8O, ZD9T, ZL7J and ZL7/N7OU

SJ9WL AND LG5LG, MOROKULIEN STATION. Operators Ron/DL6AUK and Sven/DJ2AT will activate the special Swedish/Norwegian peace monument "Morokulien" as LG5LG and SJ9WL between May 22-31st. Activity will be on 160-6 meters [with a focus on 40/20m] using CW, SSB and the Digital modes. The callsign will change every day at 0000z. During the last 2 days there will be QRP operation exclusively on 80/40/30/20 meters. Look for updates and times of activities on the QRZ.com Web page under DJ2AT shortly before the DXpedition starts. An award (Morokulien) will be available for 2 contacts with each call on different bands and different days. QSL via Bureau or direct to LA4EKA. For more details on this station, visit: http://www.sj9wl-lg5lg.com

XX9, MACAO. Look for a Spanish/French team of operators to be active as XX9E from Coloane Island (AS-075, WW Loc. OL62SC) between May 17-23rd. Operators mentioned are Jose/EA1ACP, Ruben/EA5BZ (Team Leader), Pasqua/ EA5CEE, Fernando/EA5FX, Biel/EA6DD, Francisco/EA7FTR, Jose/EB5BBM, David/ EB7DX and Adrian/F5VLY. Activity will be on 160-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY, with at least 3 stations on

the air simultaneously on different bands and modes. Suggested frequencies are:
CW - 1823, 3523, 7023, 10103, 14023, 18073, 21023, 24893 and 28023 kHz
SSB - 1825, 3780, 7065/7160, 14145, 18145, 21295, 24945 and 28495 kHz
RTTY - 7035, 10140, 14080, 18100, 21080, 24921 and 28080 kHz
6m - 50103/CW and 50115/SSB kHz

A survey is available for bands/modes needs on their Web page. QSL via EB7DX, direct or by the Bureau. All QSL will be confirmed via LoTW. Visit the XX9E Web site at: http://www.adxg.org/xx9

XZ, MYANMAR (Update to OPDX.1037). Back in November, Simon, HS0ZIB/G6JFY, informed OPDX that his QTH in Thailand is only a few hours drive to Myanmar, and he makes regular trips to the country (He states that he is there weekly). It seems his discussions with authorities from the Myanmar Ministry of Post & Telecommunications and the Ministry of Tourism for about a year has paid off and he now has a license. Simon has been allowed to set up a "low-key" station in Kawthaung and is expected to be on the air as XZ1K. However, activity will be limited. Currently, Simon works as a volunteer language (English and Thai) and computer teacher in Myanmar, as well as a professional construction/ manager in both Myanmar and Thailand, so amateur radio operations have to fit in with his busy work schedule. He states, "I will try to schedule my ham radio activities to fit in with band and propagation conditions, and openings/greyline paths. His tentative band plan and mode of operation are as follows:
20m - PSK 14070 kHz UP (He will watch the waterfall up to 3 kHz)
20m - SSB 14160 kHz UP as directed
10m - SSB 28400 kHz UP as directed
SPECIAL NOTES (per Simon):
* For SSB operations, he will usually work split, up to 5 kHz UP (so please do not all call him on the exact same frequency).
* For PSK operations, he will watch his Digipan waterfall up to 3 kHz UP (please do not call on his transmit frequency).
* Please do not call for duplicate QSOs - you are either in the log or you are not in the log!
* If mobile network coverage allows, he will upload QSOs in real-time, otherwise please check his log later.
* Please use your full callsign, do not call using only the suffix.
* Shouting, pleading and invoking Mother of God will not help you to make a QSO.
* This is NOT a limited time DXpedition - Simon is expected to be in Myanmar for many years.
* Please consider making a donation to <MyanmarTeachers.org>.
* If you need to contact him, please do so via his E-mail address on QRZ.com.

All QSL card requests for QSO contacts and SWL (short wave listener) reports are made by OQRS (Online QSL Request Service). There is no direct mail, Bureau, LoTW or eQSL support. OQRS costs 5 USDs per QSL card, and you can also add (at your absolute discretion) an optional donation for

his volunteer work - please visit <www.myanmarteachers.org>. You can pay online using Paypal, debit or credit card. (If you do not have a debit/ credit card, please ask a friend to make the payment for you). For more details, updates and an online log search, visit: http://www.xz1k.org

ZS8, MARION ISLAND. "The Daily DX" reports that there is a new operator on the island, and he is Rory, ZS6RGV, who is a radio technician for the base on Marion Island. He currently does not have a ZS8 callsign, but Pierre, ZS1HF (ex-ZS8M), is expected to help him obtain one. Also, it may be sometime before we hear Rory because he is very busy at the moment helping with the change over (old team with the new team) on the island. "The Daily DX" reports that Rory has an IC-736 and FL-7000. Pierre, ZS1HF, is planning to be the QSL manager, once Rory is on the air.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 29th April 2012

IRTS AGM Weekend

Our AGM Weekend took place on Saturday and Sunday last in Dundalk. The event was hosted by the Dundalk Amateur Radio Society, who pulled out all the stops to ensure that everything went smoothly.

The first function was the IRTS Annual Dinner on Saturday. This was very well attended, with more than 90 members and guests present. The guests included Hans Timmerman, PB2T (President of IARU Region 1), Colin Thomas, G3PSM (representing RSGB), Rory Hinchy, EI4DJB (representing the Minister for Communications), Derek O'Reilly (representing ComReg) and Marianne Butler, who chairs Dundalk Town Council. After the dinner we were entertained by the Donal Nagle Band.

The usual traders and some more took tables at Sunday's Rally; business seemed to be reasonably brisk. Coinciding with the Rally there was a talk on SD Logging by Paul EI5DI, author of the SD Logging Program. The 80m news was read from the Rally at 12.00 noon by Ger EI4GXB inside the AREN mobile unit which was situated in hotel car park.

The turnout at the society's Annual General Meeting was the highest in recent years. In addition to the presentation of the Committee Report and the Annual Accounts, there was a lively discussion at the meeting on points raised by members. Also, Paul EI2CA formally handed over the presidency to S&#65533;amus EI8BP. Prior to the handover, Paul presented the President's Cup to John Tait, EI7BA "for his excellence in DXing over decades". The President's Cup - awarded to John Tait EI7BA "for excellence in DXing over decades" Sheila Piper Cup - awarded to Pat Fitzpatrick EI2HX "for his series of articles on Amateur Television which were published in Echo Ireland." See www.irts.ie/awards for more information on the trophies and cups presented at this year's AGM.

Tipperary Amateur Radio Group

The May meeting of the Tipperary Amateur Radio Group will take place on Wednesday next the 2nd of May in Raheen House Hotel, Raheen Road ,Clonmel at 8.30pm,All are welcome.

Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 28th June at 2 p.m. in the ComReg Offices in Dublin. The examination may be held on that day at other centres where warranted by the number of candidates. Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis. Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form.

South Eastern Amateur Radio Group

For those who have expressed interest in participating in Theory Classes leading to the Amateur Radio Licence with South Eastern Amateur Radio Group, there will be an information / planning session at our next general meeting which takes place at 8:30 p.m. on Monday 30 April (tomorrow) in the Roanmore Centre, Cleaboy Road, Waterford. All are welcome!

Vinny EI5GLB

Vinny EI5GLB is looking for new members to sign up for ecomputerclassifieds.com. All new members get 30 days free. Sign up today and start selling your unwanted items.

HAMCON

The Northern Ireland Amateur Radio Conference - brought to you by West Tyrone Amateur Radio Club, Technology Education Centre, 2 Spillers Place, Omagh. Lectures/Seminars, Demonstrations, Special Interest Groups, Trade Stands, National Societies, Disabled Facilities, Door Prizes, Raffle, Catering. The event this year takes place 16th June 2012.

Dave, WJ2O,

Dave, WJ2O is planning to visit and travel around Ireland and Northern Ireland for 10 days in the middle of July 2012. He is looking for suggestions of interesting ham radio sites on the island.

You can E-mail him at dave /at/wj2o/dot/.com. He maintains a website of all his ham radio travels at wj2o.com.

DX News

Luigi IV3XNF will be operating as OD5/IV3XNF from the Lebanon from early May until October next. He is part of the UNIFIL mission in that country and will be operating from a military base. QSLs go via his home call and he will also upload his logs to Logbook of the World.

Special prefixes of GQ, MQ and 2Q will be heard from the United Kingdom to celebrate Queen Elizabeth's Diamond Jubilee from 5 May until 10 June. In addition to this some stations in Gibraltar will use the prefix ZQ instead of the normal ZB.

Seppo OH1VR who was heard last week operating from Crete as SV9/OH1VR will be returning to Bermuda from 7 - 13 May where he will sign OH1VR/VP9.

As a result of a reciprocal licensing agreement between France and Thailand which was signed last December there should soon be a number of new calls on the bands. The first of these is Alain HS0ZKG. His home call is F6HBR and he has also been active as FO8FW and FR5EM. He operates mainly CW and will count as AS-101 for the Islands on the Air Award.

April 28th to May 5th.Hatteras Island IOTA NA 067 Andy Ronan N9TGR (EI6KG)(ex EI8IM) will be active family style.Yaesu FT-897,Ameritron AL-811 600 watts into a Cushcraft R7.Will pay special attention to EI calls.Callsign will be N9TGR/4

Eurovision Song Contest special callsigns

A number of amateur radio stations in Azerbaijan will be operating special event stations with the suffix SONG or S0NG during the "Eurovision Song Contest" until Jun 15.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Ham Radio Operators Prepare for the Big One:

Posted: 28 Apr 2012 05:18 PM PDT
http://www.eham.net/articles/28184

ASTORIA, Ore. (AP) -- The Big One is on Nathan Lee's mind. More than four years after the Great Coastal Gale of 2007, and in the wake of the 2011 Japanese earthquake and tsunami, Lee and a small cadre of amateur radio junkies are preparing for the worst and having a great time doing it. With concerns growing over the dangers posed by the Cascadia Subduction Zone, where shifting tectonic plates pose the risk of creating huge earthquakes along the western seaboard, Lee figures that when the inevitable strikes, people can either be part of the solution or part of the problem. Guess which he is? His Jeep is a mobile radio station for the survivalist set. Resting inside a locked metal briefcase, like a Russian nesting doll, is another locked metal box, all of which is chained to the back seat. Inside is a "terminal node controller," a thin rectangular box that looks like a standard car radio but is actually a special piece of amateur radio equipment used to transmit signals around the globe. His radio-outfitted rig ensures that when Mother Nature turns tempestuous, he and the other members of the Clatsop County Amateur Radio Emergency Service (ARES) will have the county covered. "It doesn't have to be a tsunami, either," Lee says. "It could just be another storm." Ham radio operators -- as amateurs are often called -- like Lee -- are a breed apart, says Jeff Holwege, Clatsop County's volunteer emergency coordinator. They dedicate hours a week to fiddling with their radio gear and are identifiable by their over-air call signs, which they use in place of their names.

GB2RS NEWS

Sunday 29th April 2012

The news headlines:

* New Ofcom Regulations for the Olympic Games

* Dr Marcus Walden, G0IJZ publishes 5MHz paper in Radio Science

* Planned maintenance for Cornish beacons

Ofcom have issued a consultation on regulations that will enable prompt enforcement action for interference cases that affect the Olympics. The draft regulations designate 25-35km radii around all major venues across the UK, including football stadia, where enhanced enforcement could apply. Ofcom's proposals can be found on their website at http://stakeholders.ofcom.org.uk/consultations. The announcement follows last week's Ofcom notice of restrictions to the 70cm, 2.3 and 3.4GHz amateur bands.

A paper entitled Comparison of propagation predictions and measurements for mid-latitude HF near-vertical incidence sky wave links at 5MHz has just been published in the peer-reviewed, academic journal Radio Science. The paper, by Dr Marcus Walden, G0IJZ, compares near-vertical incidence skywave, or NVIS, measurements from the UK 5MHz beacon network with HF propagation predictions using VOACAP and ASAPS software. Further information, including a link to the paper, can be found on the RSGB website at www.rsgb.org/spectrumforum/hf/5mhzintro.php.

The GB3MCB Mid-Cornwall beacons on 6 metres, 4 metres, 2 metres and 70cm will all be switched off between 8am and 7pm on Saturday 5 May. All four beacon antennas and their feeders are being replaced, because they are over 20 years old. The Mid-Cornwall Group apologises for the interruption in service, but it is hoped this will provide improved beacon signals in future on all four bands.

At the end of last year, the Emergency Services Amateur Radio DX Group was born on Facebook. The idea was that serving and retired members of any of the Emergency Services could meet through the Group to discuss their common interest in amateur radio. The Group has been very successful and a net has now started on 40m. The net is run by Jim, GM0GMN and Tony, M6AIV and is open to anyone who serves or has served within one of the services, either full time or as a volunteer. The net takes place on 7.173MHz every Thursday evening at 1800UTC. Further

details from Jim or Tony, both are QTHR.

RadCom HF columnist, Don Field, G3XTT took top honours in the first ever LA Contest Club CW Pile Up Competition held at LA Ham Meeting, Letohallen, near Oslo. The competition was organized by Bj�rn, LB1GB of LA Contest Club. Begali Keys sponsored the first prize, a fine Morse key, which Don brought home to England.

Over the last few years, GB0VUL has been used by various members of the Newbury & District Amateur Radio Society to promote XH558, the last flying Vulcan bomber. This year the callsign GB60VUL is being used to promote 60 years of the Vulcan Bomber and the Vulcan's Salute to Her Majesty during her Diamond Jubilee year. The call will be active from 6 different locations from 30 April to 27 May. These include Robin Hood Airport Doncaster, the Control Tower at Greenham Common, and the 211 Squadron ATC in Newbury. Details will appear in GB2RS nearer the time. And now for the details of forthcoming rallies and events

The Dambusters Hamfest will take place on 6 May at Thorpe Camp Visitor Centre, Coningsby, Lincs LN4 4PE. Admission is £3 and there is free parking. Pitches are free but size is limited if not pre-booked. There is a RAF heritage centre on site. Overnight camping is available by appointment. Gates open at 10am.

The Dartmoor Radio Club Rally takes place on Bank Holiday Monday, 7 May, at Tavistock College, Crowndale Rd, Tavistock, Devon PL19 8DD. Doors open at 10.30am and admission is £2. There will be trade stands, a Bring & Buy and special interest groups. Details from Viv on 01752 823 427.

Advance notice now for the Rochdale & District ARS Flea Market and Junk Sale to be held on 12 May. Taking place at St Vincent's Church Hall, Caldershaw Rd, Rochdale OL12 7QL, the doors open at 10am. There will be trade stands, car boot sale area and a Bring & Buy. Pitches cost £7.50. Unfortunately, the contact details that appeared in RadCom were incorrect, so to book your place, contact G0PUD on 01706 346 517 or e-mail dave.shaw1@sky.com.

Now for the news of special events

There will be a Vulcan special event station at Finningley Robin Hood International Airport, with the callsign GB60VUL, from 5 to 12 May. This will be in conjunction with Newbury Amateur Radio Society. The Finningley Amateur Radio Society will be there with their communications van and the radio station will be open from 8am to 9pm. Special QSL cards will be available for all contacts.

Sherwood Amateur Radio Club are operating GB1TBW for Nottinghamshire Scouts from 4 to 7 May. The organisers are hoping for plenty of contacts as the Scouts will be participating with QSOs. There will also be an ARDF event for them.

On 6 May, Felixstowe & District ARS will be operating GB2CRF using original Clansman radio equipment on HF, 4m and 6m from the Suffolk Aviation Heritage Society's Falklands 30th event at RAF Foxhall Heath. Further details from Iain G0OZS on 07850 424007. QSL cards for GB2CRF should be sent via the RSGB bureau please.

Dengie Hundred Amateur Radio Society will be operating GB0SMA from Stow Maries Aerodrome in Essex from 5 to 7 May to celebrate the 100th Anniversary of the Royal Air Force. They will be active on bands between 160m & 70cm. Stow Maries Aerodrome in Essex is probably the best preserved World War 1 airfield in the UK with over 20 of the original buildings still standing. It was home to 37 Home Defence Squadron, Royal Flying Corps and then after 1 April 1918, 37 Squadron, Royal Air Force.

And now the DX news compiled from 425 DX News and other sources

ZS6JR and ZS6DJD will be operating from Mozambique for seven days from 3 or 4 May. The idea is to park next to a small lake in Shai Shai, 400km north of the capital, and operate all vertical antennas with the earth wires in the water. They will operate vertically on most bands 40m to 10m.

Alain, F6HBR lives in Thailand and has been issued a reciprocal Thai callsign. Operating as HS0ZKG he works mainly CW with some PSK and RTTY from Koh Samui, which is IOTA reference AS-101.

Noel, OO4O will be active as OZ/OO4O from Hou Fyr on Langeland Island, which is IOTA reference EU-172, until 5 May. He will operate mainly SSB and CW on the HF bands. QSL via LoTW and the Belgian QSL bureau. Now the contest news

Today, 29 April, the BARTG Sprint takes place from 1700 to 2100UTC. Using 75 baud RTTY only on the 3.5 to 28MHz bands, the exchange is serial number. Please note all entries are single op.

Tuesday 1 May sees the 144MHz UK Activity Contest taking place from 1900 to 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

The first leg of the 2E0ITV Commemorative Multi Mode competition takes place on 4 May from 1900 to 2230BST. The event is organised by Friskney & East Lincolnshire Communications Club. The exchange is callsign, locator and serial number. The 4 May event uses BPSK-3 on the HF bands as well as 6, 4 and 2m. QRP entries have a maximum of 5W output and QRO entries 20W output. Further details from the FELCC information line on 0755 436 2020 or from bren.sykes@btinternet.com.

The 432MHz trophy takes place on 5 May from 1400 to 2200UTC. Using all modes, the exchange is signal report, serial number and locator.

Also on 5 May between 1400 and 2200UTC, the 10GHz trophy takes place. Using all modes the exchange is signal report, serial number and locator.

Finally, over the weekend 5 and 6 May, the 432MHz to 248GHz trophy takes place between 1400 and 1400UTC. Using all modes on the bands between 432MHz and 248GHz, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 20th to Thursday the 26th of April, compiled by Neil Clarke, G0CAS on Friday the 27th of April.

Despite several large sunspot groups, solar activity remained at low levels. Several C class solar flares took place every day, a couple produced Earth directed coronal mass ejections. Solar flux levels increased to 149 units on the 21st but then declined to 119 by the 26th. The average was 137 units. The 90 day solar flux average on the 26th remained at the same level as last week at 112 units. X-ray flux levels increased to B6.4 units by the 22nd but then declined to B4.1 units by the 26th. The average was B5 units. Geomagnetic activity started at quiet levels with an Ap index of 8 units for the first three days on the period before a coronal mass ejection arrived and activity increased to Ap 30 units on the 23rd and 43 the next day. Just as this storm was subsiding a coronal hole disturbance arrived with an Ap index of 31 and 20 units on the 25th and the 26th respectively. The average was Ap 21 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 290 kilometres per second on the 20th to 800 by the 25th. Particle densities were low except for an increase on the 23rd to 34 particles per cubic centimetre. Bz varied between minus 7 and plus 5 on the quieter days and between minus 16 and plus 14 nanoTeslas during the coronal mass ejection disturbance and between minus 12 and plus 10 nanoTeslas during the coronal hole disturbance. The disturbances resulted in degraded propagation on the higher HF bands, with MUFs being down several MHz from late on the 21st to the early hours of the 25th. Aurora was reported between the 21st and the 25th but for much of the time favouring North America. European contacts were largely confined to high latitudes.

And finally the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Solar activity is expected to be low on most days. Solar flux levels should be around the 120 mark for most of the week. Geomagnetic activity should be quiet every day. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 11MHz. Paths this week via the short path to Japan will be around 21MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 1100 and 1400 hours. Occasional Sporadic-E openings will take place with openings up to 50MHz possible.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Friskney and East Lincolnshire Communications Club has a club net on 144.165 USB, vertical polarization, from 7pm on Monday 30 April. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm. On Friday the club HF net is on 3.748MHz from 8pm. For more information contact the FELCC Information Line on 07554 362 020.

South Birmingham Radio Society is doing aerial and trailer work on Monday 30 April. On Wednesday 2 May there is a lecture in the main hall, and on Thursday there are training classes with Dave Murphy, G8OWL. On Friday 4 May attention turns to shack and aerial work. For more information contact Don, on 01214 581 603.

Derby & District Amateur Radio Society is holding a Junk Sale on Tuesday 1 May. On Friday 4 May they are operating GB2TBC from West Yorkshire Scouts' Big Camp at Harrogate. Contact Richard Buckby, by email to radio@dadars.org.uk.

Lincoln Short-Wave Club is taking part in the 144MHz UK AC on Tuesday 1 May. On Wednesday they are on the air and having a natter night. On Thursday 3 May there's a club net on GB3LM from 2000 and Saturday 3 May sees the Mentor Scheme. For more information contact Pam Rose, G4STO, on 01427 788 356.

Now we return to the traditional listing in date order. On Tuesday 1 May Loughborough & District Amateur Radio Club invites members onto the air on 2m from home. More information from Chris, G1ETZ, on 01509 504 319.

On Monday 30 April Gloucester Amateur Radio & Electronics Society is having an informal evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Tuesday 1 May Wythall Radio Club starts its CW Activity Month for the Lew Williams Shield. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 2 May Midland Amateur Radio Society is holding a general meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 2 May South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 2 May Telford & District Amateur Radio Society is putting GX3ZME on the air and holding a committee meeting. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 3 May Leicestershire Repeater Group is holding its AGM at 8pm at The Brant Inn, off Overdale Avenue, Groby LE6 0DU. Details from Geoff, G4AFJ, on 01455 823 344.

On Thursday 3 May Hucknall Rolls Royce Amateur Radio Club is holding a fox hunt, starting at 7.30pm from the club car park. All are welcome. Contract Dave Wilde, G1YAI, on 0845 463 9640.

On Thursday 3 May Salop Amateur Radio Society is having a talk by Richard, G3VZG. Details are on the club website at www.salop-ars.org.uk.

On Friday 4 May Coventry Amateur Radio Society is having reflections on Rugby Radio by Malcolm Hancock. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND Today, Sunday 29 April, Laurie, G0MRL is making his last news readings on VHF and UHF for listeners in the Greater Manchester area, which he has been doing for over 16 years. He will, however, continue to be a reserve newsreader for the 80 metres reading in the North West. With effect from next Sunday, 6 May, some changes are being made to the schedules. Firstly, the SSB reading on 144.250MHz is being discontinued. Likewise, all morning and evening readings on 51.530MHz and via GB3MR on 433.350MHz are being terminated. Readings on 2 metres and 4 metres FM will continue as before. If any RSGB members in the Greater Manchester area would like to join the team of news readers they should contact the GB2RS News Manager Gordon Adams, G3LEQ, on 01 565 652 652 for more information.

On Monday 30 April South Manchester Radio and Computer Club is holding a technical forum. Details from Ron, G3SVW, on 01619 693 999.

On Monday 30 April Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 30 April Bolton Wireless Club is holding a quiz night. For details, send an email to boltonwireless@gmail.com.

On Monday 30 April Sheffield Amateur Radio Club is watching the T32C East Kiribati DXpedition video. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday 1 May Chester & District Radio Society 'is looking at oscilloscopes and their uses with transmitters. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 1 May Halifax & District Amateur Radio Society members will be investigating tuning traps for dipoles, on the air and continuing the Foundation course. Details form Martin, M0GQB, on 01422 341 317.

On Tuesday 1 May Morecambe Bay Amateur Radio Society is having a members' night. Contact Sheila, on 07867 516 836.

On Tuesday 1 May Stockport Radio Society is having a talk by Bernard, G3SHF on baluns and how to build them. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 2 May Denby Dale Radio Club is having a talk by Terry Sigsworth of British Waterways on Standedge Tunnel, Huddersfield Narrow Canal. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 2 May Wirral & District Amateur Radio Club is having a drink and waffle at The Hooton Hotel. Contact Simon, G6XHF, on 0151 601 3269.

On Thursday 3 May Ripon & District Amateur Radio Society is having a talk on the GB3HG repeater. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 3 May South Manchester Radio and Computer Club is having a talk on modulation systems for the licence exams by Ron, G3SVW. Details from Ron, G3SVW, on 01619 693 999.

On Friday 4 May East Cleveland Amateur Radio Club is having a radio components catalogues evening.. For more information contact Alistair, G4OLK, on 01642 475 671.

On Sunday 6 May Tynemouth Amateur Radio Club is running a Queen's Diamond Jubilee Club Field Day and using the Queen's Diamond Jubilee callsign. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 1 May Livingston & District Amateur Radio Society is holding an operating evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 2 May Ayr Amateur Radio Group is holding a group meeting. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday 2 May Caithness Amateur Radio Society is having a visit by Rob Mannion from Practical Wireless at the Nethercliffe Hotel, Wick, from 19.30. Details from Bob Renshaw, MM0RJR, on 01847 831 643.

On Wednesday 2 May Glenrothes & District Radio Club is holding a social meeting. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Thursday 3 May Aberdeen Amateur Radio Society is holding a junk sale. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday 4 May Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week.

Bedford and District Amateur Radio Club is running a club net on GB3BF on Monday 30 April from 20:30. The club AGM is on Tuesday 1 May, and there's a club net on GB3BF from 20.30 on Thursday 3 May. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

Norfolk Amateur Radio Club is running a club net from 19.30 on GB3NB on Monday 30 April. On Wednesday 2 May there is a talk on computers and amateur radio by Mark, G0LGJ. Details from Chris Danby, G0DWV, on 01603 898 678.

Brede Steam Amateur Radio Society is at the shack on Tuesday 1 and Saturday 5 May. For more information contact Steve, on 01424 720 815.

Now we return to the traditional listing in date order.

On Tuesday 1 May Chelmsford Amateur Radio Society is having a talk on the future of the RSGB by RSGB Acting General Manager Don Beattie, G3BJ. All local club members are invited. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 2 May Chesham & District Amateur Radio Society is holding a general meeting. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 2 May Havering & District Amateur Radio Club is preparing for Mills on the Air week. More information from John, M0UKD, on 07890 222 111.

On Wednesday 2 May Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

On Thursday 3 May Cray Valley Radio Society is holding a club meeting. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 3 May Horsham Amateur Radio Club is having a talk on air traffic control by Ross McDonald. Details are on the web at www.harc.org.uk. On Thursday 3 May King's Lynn Amateur Radio Club is having a talk by G0KYA on HF propagation and software. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Thursday 3 May Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 3 May Vange ARS is holding a junk sale. Contact Steve, G0KVZ, on 01268 552 606.

On Thursday 3 May Verulam Amateur Radio Club is having a social evening with the GB3VH repeater group. Contact Ralph, G1BSZ, on 01923 265 572.

On Friday 4 May Loughton & Epping Forest Amateur Radio Society is having a visit from Norman Crampton M0FZW, the RSGB Essex DRM. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Friday 4 May Mid-Sussex Amateur Radio Society is having a talk on astronomy by Richie Jarvis. Details from Rob, 2E0RJA, on 01444 232 129.

On Friday 4 May Wey Valley Amateur Radio Group is having a talk on propagation modelling by Bob Bagwell, G4HZV. Details are on the web at www.weyvalleyarg.org.uk.

On Sunday 6 May Bromley & District Amateur Radio Society commences its Intermediate course. Details from Andy, G4WGZ, on 01689 878 089.

NEWS FOR THE SOUTH WEST On Monday 30 April Bristol RSGB Group is having a talk by Tony Griggs, G4KMB, on Tristan de Kuna and St Helena. Details from Robin, G3TKF, on 01225 420 442.

On Tuesday 1 May Exeter Amateur Radio Society is holding a 2m net on 145.575MHz at 19.45 and on Thursday 3 May there's a 4m net on 70.425MHz at 19.00. Contact Nick, 2E0NRJ, on 01363 775 756.

On Wednesday 2 May Thornbury & South Gloucestershire Amateur Radio Club is having the second part of the talk by Mike, M1DPB, on juke box restoration. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 2 May Trowbridge & District Amateur Radio Club is having a talk on what really happened at T32C by team member Tony Bettley, G4LDL. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 3 May Cornish Radio Amateur Club is having a main club evening. Details from Steve, G7VOH, on 01209 844 939.

On Thursday 3 May Saltash & District Amateur Radio Club is having a natter night. Contact Brian, M0BHG, on 01752 844 321., m0bhg@yahoo.co.uk

On Thursday 3 May South Bristol Amateur Radio Club is holding a briefing for Mills on the Air. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 3 May Swindon & District Amateur Radio Club is holding an activity night. Contact Den, M0ACM, on 07810 317 750.

NEWS FOR WALES On Tuesday 1 May Carmarthan Amateur Radio Society is having a talk on Microwave Modules by GW4DGU. Contact Lloyd, 2W0LLT, on 01239 711 297.

#
Highlights of Solar and Geomagnetic Activity
23 - 29 April 2012

Solar activity was moderate because one M1/1N flare occurred on 27
April at 0821Z. Region 1466 (N12, L=40, class/area=Dso/190) produced
this, six C-class x-ray flares, and 13 optical flares throughout the
week. The remainder of the flare activity was confined to C-class
events. Region 1465 (S18, L=55, class/area=Dki/400) the most
prolific and the most magnetically complex of the 14 regions on the
disk, exhibiting beta-gamma-delta characteristics on 24 and 27
April. The largest region was Region 1460 (N16, L=109,
class/area=Dkc/490) which reached its maximum coverage on 21 April.
Solar activity was not confined to flares, several CMEs were
observed during the period.

On 23 April, A C2/Sf flare was observed from Region 1461 (N10, L=75,
plage) at 1747Z, accompanied by a Type II radio burst (1605 km/s). A
Halo-CME was subsequently observed in SOHO/LASCO coronagraph imagery
at 1848Z (C2) and 1906Z (C3). Plane of sky measurements suggested a
speed in the 400 to 500 km/s range. The next day, a
non-earth-directed CME emerged from the east limb after a C3 flare
at 0745Z from Region 1467 (N12, L=331,class/area=Dso/50). A Type II
radio sweep (estimated shock velocity of 1029 km/s) announced the
departure of this CME. CME production continued onWednesday when
Region 1460 produced a C1 x-ray flare/CME at 25/2242Z and Region
1465 followed with a C1 x-ray flare/CME at 26/1723Z. Several
non-earth-directed CMEs were observed emerging from the SW limb on
26-27 April. They all originated from old Region 1462 (S25, L=139,
class/area=Dho/300) which rotated off the visible disk on the 24th.
A16 degree filament eruption was observed in SDO/AIA 304 imagery at
28/1045Z. During the eruption, the SE to NW oriented filament was
centered near S32W33. LASCO/C2 imagery captured a subsequent
slow-moving, non-earth-directed CME emerging from the SW limb at
28/1224Z. GONG H-alpha and SDO/AIA 304 imagery depicted a filament
eruption along a six degree long channel centered near N06E36, just
to the SE of Region 1467. This eruption occurred between 28/1800 -
```

2000Z with several CMEs observed during the period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit reached high levels on 25 April and remained at mostly high levels through the rest of the period.

Geomagnetic field activity ranged from quiet to major storm levels during the week. On 23/0200Z, data from the ACE spacecraft indicated the arrival of a CME from 19 April. Solar wind speed increased from 350 to 400 km/s and the total IMF approached 18 nT. The Boulder magnetometer recorded a 31 nT sudden impulse at 23/0325Z. Active to minor storm levels followed. IMF Bz at the ACE spacecraft lurked in the -10 to -15 nt range for 12 hours beginning around 23/16Z. By 24 April, activity reached major storm levles at mid latitudes during the 00-03Z period as effects from the CME were compounded by the arrival of a coronal hole high speed stream (CH HSS) around 0200Z. On the 25th, activity at high latitudes reached severe storm levels during the 06-09Z synoptic period. The high speed stream peaked near 777 km/s on the 25th around 19Z then began a steady decline. Geomagnetic field activity subsided to unsettled levels on 27 April and quiet levels on 28-29 April. Late on the 27th, a slight bump in the wind speed at ACE suggested the arrival of the remnants of the CME from 23 April, however the geomagnetic field response was muted.

Forecast of Solar and Geomagnetic Activity
30 April - 26 May 2012

Solar activity is expected to be low with a chance for moderate events through the forecast period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levles 30 April, 11-14 May and 23-26 May.

Geomagnetic field activity is expected to be quiet with the exception of active periods on 9-11 May and 20-23 May associated with recurrent coronal hole high speed streams.

EN39 on the air for June ARRL VHF Contest

Posted: 29 Apr 2012 08:05 PM PDT
http://forums.qrz.com/showthread.php?344354-EN39-on-the-air-for-June-ARRL-VHF-Contest&goto=newpost

I will be running the June ARRL VHF Contest (June 9-10) this year from EN39. I have operated there for several years, but it isn't too often I get to run the contest from up there. It should be a lot of fun again!

I am going to be up there for several days so if you don't catch me on during the contest there will be other opportunities.

6m is my target band. I am contemplating throwing up a beam on 2m also, but I don't know yet. I have a beam for 432 as well but I am not going to take it with me - its not worth the extra effort in set up.

Please pass along the information.

Steve, KC8QVO

//
K7AUO 7QP Gilliam county Oregon operation.

Posted: 29 Apr 2012 04:36 PM PDT
http://forums.qrz.com/showthread.php?344341-K7AUO-7QP-Gilliam-county-Oregon-operation&goto=newpost

K7AUO www.terac.org will be operating from the abandoned Condon Air Force radar site in Gilliam county Oregon again this year. Operators will include Bob W7BKN, Chuck K7BVT, Phil W7PYX, and Joe AE7LD. We plan on operating on 10 through 80 meter with a 3 element tri-bander, dipole, and 40 meter vertical.

Ham Radio Operators Set Up Booth to Remember April Tornados:

Posted: 29 Apr 2012 05:06 PM PDT
http://www.eham.net/articles/28187

HARVEST, AL (WAFF) - When power and communications were knocked out last April, local amateur HAM Radio operators stepped in to help. The Huntsville Amateur Radio club held a special event to commemorate the anniversary of the April tornados Saturday. They set up a portable station in Harvest that ran on a generator. In the aftermath of the storms, HAM Radio operators provided a go-between for emergency communications.

RFinder for Apple iPhone/iPad/iPod has been released!!!

Posted: 29 Apr 2012 09:20 AM PDT
http://forums.qrz.com/showthread.php?344294-RFinder-for-Apple-iPhone-iPad-iPod-has-been-released!!!&goto=newpost

For immediate release...

4/29/2012

From the desk of W2CYK

After many requests from our users we are pleased to announce the official release the next platform release of RFinder - The World Wide Repeater Directory (WWRD). It is available for immediate download from the Apple App Store.

RFinder already runs on Android and http://web.rfinder.net. The World Wide Repeater Directory is also accessible from RTSystems radio programmers and via CHIRP on Windows, Linux and Macintosh with the same user/password you use on handheld devices. Our goal is to have the WWRD accessible from most pervasive platforms. To that end Windows Phone and Symbian versions are in development and slated for release this summer. The web version has been tested and works on Blackberry.

We plan to have a data file download for Garmin and TomTom GPS devices from RFinder/Web sometime Fall of 2012.

ANS-120 AMSAT News Service Weekly Bulletins

Posted: 29 Apr 2012 08:06 AM PDT
http://forums.qrz.com/showthread.php?344285-ANS-120-AMSAT-News-Service-Weekly-Bulletins&goto=newpost

AMSAT NEWS SERVICE

ANS-120

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

Volunteers are needed to help at the AMSAT booth at Dayton. Gould Smith, WA4SXM, is looking for volunteers to help man the AMSAT booth during the 2012 Hamvention. People are needed all 3 days for 2 hour shifts. Please send the days and times you are available to help as well as how many shifts you are willing to work via e-mail to wa4sxm at amsat.org. Check the AMSAT at Dayton web pages for the latest news and developments.

In this edition:

* Reservations Required - 2012 AMSAT/TAPR Banquet at Dayton

* AMSAT-NA Board of Directors Nominations

* AMSAT 2012 Symposium First Call for Papers

* Japan to Launch Student High-Voltage Satellite Horyu-2 in May 2012

* Satellite Export Controls - Progress Report

* New Proposal Cycle for ARISS-US Contacts

* Satellite Shorts From All Over

SB SAT @ AMSAT $ANS-120.01

ANS-120 AMSAT News Service Weekly Bulletins

AMSAT News Service Bulletin 120.01

From AMSAT HQ SILVER SPRING, MD.

April 29, 2012

To All RADIO AMATEURS

BID: $ANS-120.01

Reservations Required - 2012 AMSAT/TAPR Banquet at Dayton

The sixth annual joint AMSAT/TAPR Banquet will be held Friday evening, May 18, 2012 during the Dayton Hamvention.

The Banquet will be at the:

Kohler Presidental Banquet Center

4572 Presidential Way

Kettering, OH 45429

(just south of Dayton).

Reservations are required and must be made by Monday, 14 May 2012. Seating is limited, so make your reservations early. The price for the Banquet is $30 per person. Reserved tickets may be picked up at the AMSAT booth at Hamvention on Friday, or at the door. You may make reservations for the 2012 AMSAT/TAPR Banquet online in

the AMSAT Store.

AMSAT Presidents Club Gold members should let Martha know if they are planning to attend the banquet. For additional information contact Martha at the AMSAT office (martha@amsat.org).

Banquet Schedule

6:30 PM: Doors open and Cash bar is available with Beer, Wine, Liquor and soft drinks.7:15 PM: Buffet Dinner service begins. The Center has a justly deserved reputation for good food and service.8:15 PM: Presentation by Howard Long, G6LVB. Howard will be talking about his FUNcube Dongle, the 64 - 1700 MHz Software Defined Receiver. This innovative USB device is the size of a thumbdrive and has an SMA antenna socket. Multiple SDR control and display software programs can be used with the FUNcube Dongle.

[ANS thanks Gould Smith, WA4SXM for the above information]

AMSAT-NA Board of Directors Nominations

It is time to submit nominations for the upcoming open seats on the AMSAT-NA Board of Directors. A valid nomination requires either one current Member Society, or five current individual members in good standing, to nominate an AMSAT-NA member for the position.

Three directors and two alternate directors have terms expiring this year. The director seats open for election are held by Tom Clark, K3IO; Lou McFadin, W5DID; and Gould Smith, WA4SXM. The alternate director seats open for election are held by Mark Hammond, N8MH and Patrick Stoddard, WD9EWK.

The three nominees receiving the highest number of votes will be seated as regular board members with two year terms. The two nominees receiving the next highest number of votes will be seated as alternate directors for one year.

Written nominations, consisting of names, calls and individual signatures, should be mailed to: AMSAT-NA, 850 Sligo Ave #600, Silver Spring, MD, 20910. They must be received no later than June 15th. No other action is required.

Nominations may also be made by electronic means including e-mail, FAX, or electronic image of a petition. Electronic petitions should be sent to MARTHA@AMSAT.ORG or faxed to 301-608-3410, and also must be received by June 15th. If using any electronic submission, there is a second, verifying step:

ELECTRONIC SUBMISSIONS WITHOUT THIS SECOND, WRITTEN VERIFICATION ARE NOT VALID UNDER THE EXISTING AMSAT-NA BYLAWS. A verifying traditional written petition MUST be received at the AMSAT-NA office at the above address within 7 days following the close of nominations.

[ANS Thanks AMSAT Secretary Alan Biddle, WA4SCA for the above information]

AMSAT 2012 Symposium First Call for Papers

This is the first call for papers for the 2012 AMSAT Annual Meeting and Space Symposium to be held in Orlando, Florida on the weekend of October 26-28, 2012 at the Holiday Inn, Orlando Airport Hotel.

Proposals for papers, symposium presentations and poster presentations are invited on any topic of interest to the amateur satellite community:

Papers for publication in the ProceedingsSymposium PresentationsPoster PresentationsEquipment and Operating Demonstrations

We request a tentative title of your presentation as soon as possible, with final copy to be submitted by October 1 for inclusion in the printed proceedings.

Abstracts and papers should be sent to Dan Schultz, N8FGV, at n8fgv@amsat.org.

The Symposium weekend will feature:

Space Symposium with Amateur Satellite PresentationsOperating Techniques, News, & Plans from the Amateur Satellite WorldBoard of Directors Meeting open to AMSAT membersMeet Board Members and OfficersAnnual General Membership MeetingAnnual Banquet-Keynote Speaker and Door Prizes

If you are interested in a Monday Trip (October 29) to the Kennedy Space Center please contact Martha via email: martha at amsat.org.

The trip will include a round trip bus from the hotel and entrance to the Space Center. The cost will be about $100. This is a wonderful experience for those that haven't been and for those that have been multiple times. We need to get an idea of how many will participate to select the correct bus.

[ANS thanks Dan Schultz, N8FGV for the above information]

Japan to Launch Student High-Voltage Satellite Horyu-2 in May 2012

HORYU-2, an amateur radio satellite built by students at the Kyushu Institute of Technology (KIT) in Japan will launch aboard a Japanese H-IIA rocket planned for May 17 at 1639-1642 UT.

This Cubesat includes several experiments:

300 volt power generation in LEOCOTS technology demonstration of surface potential measurementOrbital debris observationEarth photography

The satellite downlink will be 437.375 MHz using 1200bps FSK and CW.

300 volt power generation in LEO

Power generation in space in practice is limited to 160 volt generation with 120 volt transmission aboard the ISS due to electrostatic potential of the solar array with respect to its platform. High power generation will require heavier cables or increased loss due to resistances. Future high power generation in LEO will require 300-400 volts. The HORYU-2 mission, 300V power generation in space without any discharge, is the first space environment test of the new technology.

COTS technology demonstration of surface potential measurement

A contact surface potential meter developed by TREK, Inc. for terrestrial commercial application will be flown. This is a high impedance meter which will not affect the charge state of the object being tested. As HORYU-2 passes through the aurora zone, differential charges may develop between the insulator surface and the satellite chassis. The potential meter will measure the potential of the insulator that is the same material to be used for SCM. The two measurements are compared to validate against each other.

Orbital debris observation

This experiment will detect micro-debris impact on the surface of HORYU-2. The debris sensor consists of many conductive thin wires laid down in parallel in the area of 8×8 cm. Upon impact, some of the lines are cut and the resistance becomes infinite.

Earth photography

A small CMOS camera, developed by the University of Surrey, called the Surrey Camera Payload (SCAMP) will take pictures in JPEG format at 640 × 480 pixels. From 700km altitude, one pixel will correspond to 1.6 km.

Satellite Export Controls - Progress Report

Since the inception of The International Traffic in Arms Regulations (ITAR) in 1999, all US-built satellites have been subject to the US Munitions List, including amateur radio, education and university satellite projects. The Directorate of Defense Trade Controls (DDTC) under the Department of State (DoS) manages ITAR. ITAR has curtailed AMSAT's collaboration with foreign nationals on Amateur Radio Satellite projects, as well as with universities that have foreign students enrolled as any technical exchanges concerning satellite technology with non-US citizens brought the potential for Federal prosecution.

On November 1, 2011, Congressman Howard L. Berman (D-CA) introduced H.R. 3288: "Safeguarding United States Satellite Leadership and Security Act." In summary, this act would authorize the President to remove commercial satellites and related components from the UnitedStates Munitions List. However, while AMSAT was pleased to see this draft bill, there were concerns that "commercial satellites" could be interpreted as not including amateur radio and education satellites.

Consequently, earlier this year AMSAT President Barry Baines, WD4ASW appointed AMSAT NY Area Coordinator Peter Portanova, WB2OQQ as AMSAT's Congressional Liaison to establish relationships that would put AMSAT on the radar regarding H.R. 3288 to ensure that amateur radio and education satellites would be included in the final bill. Peter's appointment was based in part on his success in leading a delegation to meet with Congressman Peter King on H.R. 607 in 2011 that resulted in the amendment of that bill to protect the amateur and amateur satellite frequencies that were being considered for auction. Peter was clearly qualified to lead AMSAT's efforts to ensure that amateur radio and education satellites would be included in such a bill. Peter notes, "What we accomplished on 607 validates that 'grass roots' efforts can be successful". Over the past few months, AMSAT, under Peter's guidance has taken steps to meet with key personnel involved in the legislative process in Washington to make them aware of AMSAT, the importance of amateur radio satellites in the development of education outreach and potential for emergency communications. All of these meetings have been successful in building awareness of the need to have amateur radio satellites (as well as education satellites) removed from the US Munitions List and placed under the Department of Commerce Control List.

While H.R. 3288 has been referred to the House Committee on Foreign Affairs, this initiative was being held up pending a joint report from the Department of Defense (DoD) and Department of State (DoS) required by Section 1248 of the FY2010 Defense Authorization Act wherein Congress directed DoD to assess whether national security

would be negatively impacted by moving satellites from the US Munitions List (USML) to the Commerce Control List (CCL). Clearly, the politicians were awaiting this report before deciding whether to support H.R. 3288.

On April 18, 2012 the long awaited "1248" report was released by DoD and DoS: "Risk Assessment of United States Space Export Control Policy," that addresses the risks associated with removing satellites and related components from the United States Munitions List (USML).

The report identifies several satellite types, and related items, that are not purely defense-related and should not be designated as defense articles on the USML or controlled under the International Traffic in Arms Regulations (ITAR).

The Departments recommended that the following items are more appropriately designated as dual-use items on the Commerce Control List (CCL) and controlled under the Export Administration Regulations (EAR):

Satellites that do not contain technologies unique to military applications or critical for maintaining a military edge;Communications satellites (COMSATs) that do not contain classified components;Remote sensing satellites with performance parameters below certain thresholds; andSystems, subsystems, parts and components associated with those satellites.

From AMSAT's perspective, this is certainly good news for the satellite industry from both a commercial and amateur radio/education perspective. In particular, placement of amateur radio satellites under EAR would remove the most onerous impacts of ITAR, allowing for example, free exchange of technical information with foreign nationals, allowing collaboration on satellite projects. Actual export of hardware, however, would be controlled by the Department of Commerce. That said, it is too early to draw any conclusions as a 180-day review process has now begun. If the recommendations of the "1248 Report" are accepted, it could pave the way for H.R. 3288 or a bill drafted in response to the "1248 recommendations" to move forward. However, given the tendency of Congress to put off major decisions from May onward pending Fall elections, AMSAT President Barry Baines, WD4ASW believes that it is likely, based on the current Congress and other factors, very little will occur within the 112th Congress. In Barry's words, "We are pleased with our initiatives to this point; however these activities are still a work in progress." The AMSAT Board, along with AMSAT's Congressional Liaison, will stay focused on these activities and report to the membership as information becomes available.

The 44 page PDF copy is available on-line: "Department of Defense/Department of State Report to Congress Section 1248 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111 - 84): RISK ASSESSMENT OF UNITED STATES SPACE EXPORT CONTROL POLICY".

Bloomberg Business Week also posted an article on ITAR.

[ANS thanks AMSAT President Barry Baines, WD4ASW and AMSAT Congressional Liaison Peter Portanova, WB2OQQ for this report.]

New Proposal Cycle for ARISS-US Contacts

NASA Teaching From Space (TFS) office has announced a new proposal cycle for ARISS-US contacts. Proposals may be submitted in the time period between April 23 through July 2, 2012 for contacts that will be scheduled beginning in January 2013.

Informational sessions will be held to answer any questions concerning the proposal process. To attend a session or to have questions answered,

contact TFS at JSC-TFS-ARISS@mail.nasa.gov or call 281-244-1919. For more information, see the NASA TFS Web site.

If you represent an education organization, formal or informal, and you are located in the United States or its territories, you can submit a proposal.

If you are located outside of the U.S., you will need to contact the ARISS representative for your region:

Europe, Africa, and the Middle East: Francesco De Paolis, IK0WGF school.selection.manager@amsat.it.Russia: Valeriy Agabekov, N2WW/UA6HZ n2ww@arrl.net.Japan and all countries in Southeast Asia and Pacific Oceania: Keigo Komuro, JA1KAB iaru-r3@jarl.or.jp.Canada and all other countries: Maurice-André Vigneault, VE3VIG ve3vig@amsat.org.

[ANS thanks the NASA Teaching From Space Office for the above information]

Satellite Shorts From All Over

The ARISS International Team monthly teleconference was held on Tuesday, April 17. World Amateur Radio Day and the HamTV status were discussed. Minutes have been posted to the ARISS site.A video segment of the successful ARISS contact with Flabob Airport will be aired on the Bob Heil & Gordon West "Ham Nation" show on May 1, 2012 at 1800 PDT (UTC-7).ESA's mysteriously silent Envisat Earth observing satellite has been observed and imaged by another satellite in space. France's space agency (CNES) pulled off an on-orbit coup, using their high-resolution Pleiades satellite to take a picture of Envisat from about 100 km. See the satellite-to-satellite view on-line.For the last 1000 days the Infrared Array Camera (IRAC), aboard NASA's Spitzer Space Telescope, has been operating continuously to probe the universe from its most distant regions to our local solar neighborhood. To commemorate 1000 days of infrared wonders, the program is releasing a gallery of the 10 best IRAC images.In celebration of the 22nd anniversary of the NASA/ESA Hubble Space Telescope this month, episode 54 of the Hubblecast gives a slideshow of some of the best images from over two decades in orbit, set to special music.JD1/OG, OGASAWARA ISLAND, AS-031. Makoto,JI5RPT, is working from Chichijima Islands (IOTA AS-031) signing JD1BLY in CW/SSB/digital modes on 80-6m and via satellite also from April 29 until May 5. QSL via homecall. See: http://www.ji5rpt.com/jd1 and http://twitter.com/jd1bly. (via DXNL DX Newsletter 1777 - Apr 25, 2012)

[ANS thanks everyone for the above information]

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a

maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

Free iPhone/Android APP Web Based

Posted: 28 Apr 2012 09:45 PM PDT
http://forums.qrz.com/showthread.php?344248-Free-iPhone-Android-APP-Web-Based&goto=newpost

Most folks on QRZ know about this app, but I thought I'd post this for those that take news feeds off of QRZ.COM. You can access it from any smart phone browser at http://mobile.ky5u.net . The text below describes the functionality of the programs associated with the app.

General

KY5U Mobile Assets (KMA) is a collection of HTML/HTML5/Javascript Apps designed to be used by Amateur Radio operators on smart phones. It consists of a home page/desktop of icons that may be clicked or touched (on smartphones) to initiate the individual apps. KMA is brand independent for phones/tablets so it may be used regardless of what kind of device you use.

KY5U Mobile Assets Desktop

Access

Access KMA via the World Wide Web at http://mobile.ky5u.net on your device. The main screen and sub-screens are small HTML files residing on a server. These HTML files run local applications or link to applications on the WWW that radio amateurs may find useful.

Apps

The following is a brief description of ther use and functionality of the included applications. Please refer figure 1 above for the type and labeling of icons used. Feel free to email your suggestions for additional applications to the address at the end of this document.

LOOKUP- Powered by Call Info Data, this application allows an amateur radio operator to look up a call sign of another amateur. Included is Name and Address, License Class, Expiration Date and GRID information.

WEBCAM- This application is a live webcam window for KY5U.

WEATHER- Powered by Weather Underground, this application displays a live radar image of the United States. This allows a radio amateur to see weather systems that may effect safe operation. It also includes Frotal Overlay, Rainfall, Wind, and Surface Temp. This will be your one stop view

of US weather!

STRIKES- Powered by Intellicast, displays a lightning strike map of the US for use in identifying noise propagation on 40 meters and below.

CONDX- Powered by N0NBH, is a dual display of atmospheric conditions and grey line propagation including flux numbers, flare information and band openings.

ZULU- Powered by DateandTime.com, displays the correct UTC/ZULU time, and offers a list of select cities for time and weather information.

TIMER- An application for use as a ham radio 10 minute ID timer. The timer starts when the page opens and displays an ☐alert box☐ every 10 minutes. The timer continues to run whether you acknowledge the alert box or not, thereby keeping the 10 minute interval. To stop the timer, exit the application. Powered by KY5U.

CLUSTER- Powered by K5DX, this application parses the K5DX telnet cluster data and builds an HTML file every 30 seconds. The application refreshes every 30 seconds to display the updated list formatted for the smartphone screen. The underlying collection and formatting software was written by KY5U, and attempts to strip out ☐crap☐ messages/comments sent by users. This application is ☐read only☐.

NOTES- Powered by WuFoo.com, this application presents a free text entry box where you may take notes or write contact information. It has a place to enter your email address also. Once completed with your notes, you may press the button ☐Email Notes to Yourself☐ which will email your notes to you.

MANUAL- This application allows you to download and read the manuals for the most recent ICOM, Yaesu, an Kenwood amateur Radios. Select the vendor, and you will be presented with the available models. Selecting the rig model will download the PDF manual. The last link on all vendor pages is the vendor's icon, which takes you directly to their web page associated with downloading manuals. This is useful for radio models not listed in the application.

COMPASS- This application allows you to generate a bearing chart of beam headings right on your smartphone to all the DXCC entities by simply entering your zip code. This is powered by The North Jersey DX Association and a link to their website is provided for full functionlity. They have interesting articles and info for DXers.

FIRST AID- This application provides basic first aid information (powered by the Mayo Clinic) to serve as a stop gap measure until help arises. Remember to dial "911" before using this application to activate the 911 System!!

DIPOLE- This application allows you to calculate the length of a dipole. You can calculate each side, the overall length, and based on the wavelength desired. It also allows an offset for end feeding.

NEWS- The latest news headlines from around the world updated 4 times a day. Stay "in the know" about things happening in your hobby as well as breaking news stories and links to full articles.

COAX LOSS- This application is a table of coaxial loss at different frequencies above 30mHz. Loss below 30mHz is negligible in RG-8 and bove cable at or under 200 feet.

ONLINE CALCULATOR- This application is a simple online scientific calculator. If you need one it's here to use. It is written in Javascript and handles basic scientific math functions.

HURRICANE- Track the latest hurricane positions from BOATUS.COM in a single click. Clicking on the map title or the map takes you to the latest teacked storm on www.boatus.com .

Antenna Cable Calc- This is a java aplet to figure loss impedence on a cable. Please note that you must have java aplets turned on in your browser. If you don't you'll only see a picture of the dashboard associated with the page.

Virtual Tuner- Excellent virtual tuner aplet by W9CF that allows you to set or learn the valuse of L/C components needed for a pi network. You need java aplets turned on to use this or you will only see a picture of the dashboard associated swith this app.

IARU Beacons- Powered by KY5U. You can buy hardware, you can buy software, but this world map brings the IARU Beacons to your smartphone. The beacon designator lights up during that beacon's period to transmit. For more info, Google IARU Beacons.

Eliza The Therapist- In the late 70's, one of the first AI programs for the TRS80 and Apple PCs was 'Eliza' which featured a so called computer therapist. The program has been re-written in javascript and modified by KY5U to include ham radio topics.

Tone Generator- Powered by KY5U. This is an audio player for playing tones. You may select a 440Hz, 1000Hz, 2300Hz, or Two Tone Generator. In iOS and Android, touch the play button to start. The files are hyperlinked in case you want to download or your browser does not support HTML5.

Finally

As other applications are developed, they will be added to the desktop and to this document. Comments are welcomed at ky5u(at)bellsouth.net.

KY5U Mobile Assets is a FREE application over the WWW for ham radio operators. All pages are copyrighted by KY5U, Charlie Young, and may not be copied or used in whole or in part without permission. Many of the pages are under copyright protection of other organizations.

Amateur Radio Newsline Report 1811 April 27 2012

Posted: 26 Apr 2012 07:17 PM PDT
http://forums.qrz.com/showthread.php?343991-Amateur-Radio-Newsline-Report-1811--April-27-2012&goto=newpost

Amateur Radio Newsline☐ Report 1811 ☐ April 27 2012

Amateur Radio Newsline report number 1811 with a release date of April
27th, 2012 to follow in 5-4-3-2-1.

The following is a QST. Japan says it will be launching 16 educational ham-sats; NASA says now is time for educators to request I-S-S contacts for 2013; UK hams learn of ham band restrictions during the 2012 Olympics; US hams will not be affected by Part 90 narrow-banding and a new video on VHF and UHF digital audio is on-line. Find out the details are on Amateur Radio Newsline□ report number 1811 coming your way right now.

HAM RADIO IN SPACE: JAPAN TO LAUNCH 16 NEW EDUCATIONAL HAM-SATS

Japan says that it plans to launch sixteen educational satellites over the next two years. The tiny birds are currently under construction in Japan with the first launch to take place on May 17th followed by the others in as rapid succession as possible. Amateur Radio Newsline□s Heather Butera-Howell, KB3TZD, has the details:

653. Crossposting Permitted to rec.radio.amateur.moderated

Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

A. R. I.

ITALIAN AMATEUR RADIO ASSOCIATION

A.R.I. Fidenza RADIO CLUB - IQ4FE

P.O. Box 66 - 43036 Fidenza (Parma) - ITALY

http://www.arifidenza.it

NJ2BB ☐Museum Ships Weekend Event☐ 2012

☐USS Williamsburg☐ will participate from Italy

with special Amateur Radio call ☐ 2 and 3 June 2012

120905601.jpg

A.R.I. Fidenza Radio Club (A.R.I. affiliated , Italian Association of
Radio Amateurs) of Fidenza (PR), Italy (JN54BU), will realize a technical
and cultural event in the locality of La Spezia, Italy, JN44WC, in the
days of 2 and 3 June 2012.

The event is intended to highlight internationally the historical value of
the United States Presidential yacht "USS Williamsburg" which was used by
Presidents Truman and Eisenhower and currently stationed in appalling
conditions at a shipyard in La Spezia , Italy . The historical Events the
Ship witnessed and the fact that now it threatens the demolition led us to
plan an event to raise awareness about its dramatic, undeserved situation.

For this reason, in conjunction with the international contest "Museum
Ships Weekend Event", the operators of ARI Fidenza Radio Club make
operating a radio station nearby the Vessel to bring ideally "his voice"
throughout

all the world.

This will be a special, unique event : in fact, the participation to the Museum Ships Weekend Event

is granted only for 2012 edition.

A special QSL Card will be made for Qso with the special callsign (to be advised as soon as possible).

The contest "Museum Ships Weekend Event ' is an international competition organized by the ☐ Battleship New Jersey Amateur Radio Station NJ2BB ", ARRL affiliated . The event occurs every year and aims to enable worldwide radio stations on board or nearby naval military museum units (or units in state of pending musealization: in this case a special dispensation is granted, as in our case).

The particularity of the contest is therefore that, in addition to the purely competition related to the contest itself, the boats are ideally "revived", even only for a weekend, and it is so stressed the value of their

human and technological history .

A great event that will combine the technical-amateur activity with the wider "historical-cultural" aspect, in perfect harmony with the "Amateur Radio Mission" which is essentially an educational and research activity aimed to bringing this brotherhood to peoples and nations beyond the barriers of languages, races, religions.

For more information and contacts you can refer to our website : http://www.arifidenza.it

"Almost 500 people went to the International Marconi Day celebrations at Sandford Mill and saw amateur radio demonstrated by the Chelmsford Amateur Radio Society (CARS) running GB100MWT"

That should put off anyone remotely interested then!

DXNL 1778 - May 2, 2012
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

5X, UGANDA
Freddy,F5IRO, is expected to return to Uganda in early May. The exact
date is not known yet. With the help of David,5X1D (KH9AE), he hopes to
get his licence during the first week. He plans to become QRV in CW on
the highbands and on 30m in the evening, some PSK may be possible also.
QSL via F8DFP. See: http://j28ro.blogspot.com

7O, YEMEN, AS-028
After 2 years of preparation and the support of four ministries 11 OPs
plan to become active as 7O6T from Hadiboh on Socotra Island (AS-028)
from Apr 30, 2100 UTC, until May 15, 2100 UTC. They will use five
Elecraft K3 and Kenwood TS-590 in CW, SSB and RTTY on 160m-10m on
following frequencies:
CW: 1824, 3504, 7004, 10104, 14024, 18074, 21024, 24894, 28024 kHz
SSB: 1845, 3780, 7065/7180, 14145, 18145, 21295, 24945, 28495 kHz
RTTY: 7035, 10140, 14080, 18100, 21080, 24920, 28080 kHz. QSL via UA3DX
See also: http://www.yemen2012.com and https://twitter.com/#!/7o6t

9Q, DEMOCRATIC REPUBLIC OF CONGO
In DXNL 1769 we informed about the successful exam of Jan 27.
Here are the new callsigns:
9Q1AD Diluzeyi Angelique
9Q1AK Kitete Agnes
9Q1ALA Akongunuka Annie
9Q1BT Tshiela Brigite
9Q1CM Makiamfu Jean Claude
9Q1DN Ngelebeya Dieudonne
9Q1FS Sua Francoise
9Q1HM Mbenga Hermes
9Q1HN Ngilima Henry
9Q1JI Ifaso Jean Maurice
9Q1JL Lukusa Jean Willy

9Q1KM Mpinda Khal
9Q1LE Enyeka Lazare
9Q1LJ Lihau Jeanine
9Q1MM Mbuyi Marie Louise
9Q1MP Mangala Jean Pierre
9Q1NH Nsele Hortense
9Q1NW Watuala Webe Nicole
9Q1PM Pascal Mbuyi
9Q1RE Ekaya Robert
9Q1RM Muamba Richard
9Q1WM Mulumba Wamans
9Q1YM Muaka Ngimbi Yvette
ON4CFC receives the call 9Q1CFC and 9Q0AR will become active also soon.

C9, MOZAMBIQUE
Daniel,ZS6JR (C91JR), and Dior,ZS6DJD, will be active for 7 to 10 days
starting on May 3 or 4 from the small lake Shai Shai about 400 km north
of the capital Maputo using verticals on 40m-10m (maybe also 80m or 6m)
and a Hexbeam. Dior's callsign could be C91JD or C91DJ or C91DN.
Preferred frequencies are on 20m: 14210, 14200, 14195, 14190 kHz;
15m: 21280, 21275, 21270, 21265, 21250 kHz; 10m: 28450, 28470,28500 kHz
More details are not known.
QSL for C91JR only direct via GI4FUM, QSL for Dior via homecall.

DL, GERMANY
Some HAMs from the region Cologne/Bonn will activate the special event
station DL125HHZ (special DOK HHZ125) during the special exhibition
"Heinrich Hertz - From arcing to the radio wave" in the German Museum
in Bonn from Apr 26 until Jan 13, 2013.

EA8, CANARY ISLANDS, AF-004
Some members of the "Gran Canaria DX Group" and the local URE club will
sign EG8WFF from the UNESCO Biosphere Reserve in SSB, CW and RTTY on
all bands on May 5/6. QSL via EA8AKN.

G, ENGLAND, EU-005
From May 5 until June 10 British HAMs may use a special prefix to
celebrate the Queen's Diamond Jubilee. The second letter of the prefix
will be replaced by a Q, calls with a single letter prefix add a Q:
2E0aaa will be 2Q0aaa
2M0aaa will be 2Q0aaa
G3aaa will be GQ3aaa
GM3aaa will be GQ3aaa
GX3aaa will be GQ3aaa
M3aaa will be MQ3aaa

HB0, LIECHTENSTEIN
The "Tera Radio Club" (HB9OK) celebrates the 100th anniversary of the
railroad "Lugano-Ponte Tresa" between May 7 and Jun 9 by using the
special callsign HB100FLP in all modes on all bands. A special award
will be issued as well. QSL via HB9OCR. See also: http://www.hb9ok.ch
---

Nicola,HB0/IN3ADW, and Luca,HB0/IN3HUU, will be QRV in SSB and some
RTTY on 40m-10m (depending on the conds) from May 8-12. Listen for them
on: 7110-7130, 18125-18135, 14215-14225, 24945-24955 kHz.
QSLs via homecalls.

HS, THAILAND
After seven years of negotiations France and Thailand issue reciprocal
licenses now. Alain,F6HBR (ex FO8FW/FR5EM), is HS0ZKG since Apr 25. He
is working mainly in CW and some PSK and RTTY from Koh Samui (AS-101).
Gerald,F8DEG, is also living in Thailand and will be the second French
HAM with a HS0Zxx callsign.

KH0, NORTHERN MARIANA ISLANDS, OC-086
In the last DXNL we announced the QSL route of W2GJ/KH0 via homecall.
His homecall is JL1FUQ.

KP4, PUERTO RICO, NA-099
A few members of the Puerto Rico Amateur Radio League (PRARL) will
activate five islands as KP4ES on all bands (IOTA QRGs) on May 5:
Isla Palominitos (USi PR010, Fajardo county)
Cayo Icacos (USi PR008, Fajardo county)
Cayo Ratones (USi PR028, Fajardo county)
Isla Pineros (USi PR042, Ceiba county)
Cabeza de Perro (USi PR014, Ceiba county)
QSL via NP3O. See also: http://prarl.org

LZ, BULGARIA
Alex,LZ1ADF, Boyan,LZ1BJ, Valyo,LZ1DOT, Ned,LZ1DX, Slav,LZ1MC,
Gosho,LZ1ZF, Boris,LZ2JR, Krasi,LZ2UW, and Emil,LZ3HI, will use the
special callsign LZ67VZ via EME on 432.144 MHz, 2320.144 MHz and
2304.144 MHz from May 5, 0800 UTC, until May 9, 1400 UTC. LZ67VZ is
working also in digital modes on DMC# 5525 DMC and EPC# 18090 EPC.
Skeds can be arranged via e-mail to: lz1dx@lz1dx.org
The callsign is to remember General Vladimir Zaimov. QSL via bureau.

PJ2, CURACAO, SA-099
Anja,PJ2/DH2AK, and Torsten,PJ2/DL1THM, will be active in holiday style
from the PJ2A clubstation mainly in SSB on 15m-20m from May 5-18.
QSL via bureau to their homecalls, for direct QSL routes check QRZ.com.
See also: http://twitter.com/#!/dl1thm

UA1, EUROPEAN RUSSIA
The special event station R1945HS active during May remembers the end
of WW2 67 years ago. QSL via RW6HS, unfortunately only direct.

UR, UKRAINE
A few members of the Crimean Radio Club are also celebrating the end of
WW2 by using the special call EM67J from May 1-15.
QSL via K2PF, unfortunately only direct, later also via LoTW.

The special event station EM80L marks the 80th annivesary of the region
Kharkov until Aug 26. They will activate all 42 districts. A special

award will be issued as well, for further details see QRZ.com.
QSL via US0LW.

VP9, BERMUDA ISLANDS, NA-005
Seppo,OH1VR/VP9, and Egbert,OH1ZAA/VP9, will be QRV in CW and SSB on HF and 6m from May 7-13. QSLs via homecalls, OH1VR/VP9 only direct.

W, USA
26 special 1x1 calls will be activated during the 20th anniversary of the "CTRI Contest Group" from Connecticut (K1C, K1Q, K1R, K1T, N1M, N1Q, W1A), Rhode Island (K1B, K1D, K1G, K1J, K1K, K1L, K1O, K1U, K1W, N1H, N1R, W1M, W1R, W1W, W1Y), Massachusetts (K1N, K1V, W1B) and Vermont (K1M) from May 1-15. QSL via NG1G.

The special event station K1A is working from the McAuliffe-Shepard Discovery Center in Concord/New Hampshire (KA1SKY) from May 1-15 to mark the 51st jubilee of the first American in space. QSL via KK1KW.
See also: http://www.k1bke.org/planetarium/ka1sky.htm and http://www.starhop.com

XE, MEXICO
The special event station 6J5M will be QRV during the "Cinco de Mayo" festivities celebrating the 150th anniversary of the battle of Puebla from May 1-6. QSL via XE1AMF. See also: http://150.puebladx.org

XZ, MYANMAR
Simon, HS0ZIB, is working as a volunteer teacher (English, Thai, computers) in primary schools alternately in Thailand and Myanmar for one week each. He has now received a license as XZ1K. This will not be Big Gun station. In the beginning he will work only in SSB on 10m or in on 20m and maybe also 40m in SSB and PSK. He has no radio for 6m and hast to build wire antennas for the lowbands. Expect CW a little later when he has more practice. Since this is not a DXpedition and he wants to stay as long as possible there is no need for hurrying.
Bureau QSLs can be requested via OQRS and a donation of 5$. The log will be uploaded also to the LoTW and eQSL.
See also: http://www.xz1k.org and http://www.myanmarteachers.org

ZB, GIBRALTAR
The two brothers Mike,ZB3M, and Ed,ZB2ER, are using the special calls ZQ3M and ZQ2ER to celebrate the Queen's Diamond Jubilee between May 5 and Jun 10. QSLs via ZB3M, unfortunately only direct.

ZS8, MARION ISLAND, AF-021
Rory Meyer,ZS6RGV, is the new radio operator on the Marion Island base but expect him to be very busy with his job during the first weeks. His equipment includes aN IC-736 and FL-7000. ZS1HF (ex ZS8M) is going to help him with applying for a ZS8 call and will be his QSL manager.

DXPEDITION OF THE YEAR
The ST0R team was awarded the "DXpedition of the Year" at the DX Convention in Visalia.

V55V video
Suad,DK6XZ, uploaded a slide show of the V55V DXpedition to YouTube:
http://www.youtube.com/watch?v_Bic19ko4

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

May 5/6 ARI International DX Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-138, BY5, Fujian Province group: A team led by Dale,BA4TB, will activate
Gulangyu Island (South China, coast of Xiamen) as BY1WXD/5 in all modes
on all bands from May 4-7. QSL via BA4TB (bureau/direct/LoTW).

EU-028, I*5, Toscana Region group: Fabio,IW1DFU/IA5, is working in holiday
style from Elba Island until May 6. Listen for him mainly during the
afternoon and the night running a K2 with 15 watts (mostly in CW).
QSL via homecall (bureau/direct).

EU-042, DL, Schleswig-Holstein State North West group: Siggi,DL3HBZ,
Lothar,DL8HAL, Helge,DF6LPC, Uli,DJ9IE, and Benjamin,DB2LS, will be
QRV from Hallig Hooge/Ockenswarft in the national park and Biosphere
reserve Schleswig-Holstein Wadden Sea (DLFF-013). Listen for DL0DFF
and DK0RZ (in PSK) on all HF bands from May 2-5. QSL via bureau.
Direct QSLs for DL0DFF via DL3HBZ and for DK0RZ via DL5HAQ.

EU-146, PA, Zuid Holland/Zeeland Province group: PI4WBR is working in SSB
on the IOTA frequencies on 80m-10m from Schouwen-Duiveland (WLOTA 3089)
until May 6. QSL via PA3FTX (bureau/direct).

NA-143, W5, Texas State East group: Joe,K5KUA/5, will be QRV again only in
CW from Galveston Island from May 4-7. QSL via homecall.

Lighthouse activities

W2AZ/KH2 LH 0064 May 5-6

Kites Fly On Cold Day In Wellsburg:

Posted: 30 Apr 2012 05:04 PM PDT
http://www.eham.net/articles/28189

WELLSBURG - Vanessa Clark and her grandson Christopher Sommerville got the chance to experience something together for the first time on Saturday - flying a kite. Both Bellaire residents, Clark and her grandson were among the dozens of people who traveled to Brooke Hills Park, Wellsburg, to fly kites during the seventh annual West Virginia Kite Festival. Organizer Libby Strong said at one point there were about 70 people flying kites, making for a spectacular display in the sky. This year the event also featured ham, or amateur, radio operators who used their equipment to speak to other operators in Florida, Arizona and even Switzerland.

Celebrating the War of 1812

Posted: 02 May 2012 08:01 AM PDT
http://forums.qrz.com/showthread.php?344635-Celebrating-the-War-of-1812&goto=newpost

The Baltimore Amateur Radio Club Presents

Opening Special Event for the War of 1812

June 16 2pm - 9pm

June 17 3pm -9pmChair: Henry Katz KB3NYW

QSL Manager: Neil Gustafson - W3ZQI

Control Ops for Event:

Bill Dobson N3WD

Keon Hayes KE3HAY

This event is in preparation for the 2014 celebration we are planning for
the Battle of Baltimore. We are starting off by celebrating the
Bi-Centennial of the WAR of 1812 The Blue Angels will be flying over the
Baltimore Harbor and the Tall Ships have started to come into ports here.
We will run as many bands as we safely can depending on the conditions. As
you work us we will announce if we are on 10M, 6M, & 2M. Hope to work you
on the air. We will focus on 15M 21.360, 20M 14.285, 40M 7.181, and 75M
3.850 (+/- 20Hz).

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** Sporadic E season 2012 **

Based on data from recent years it is possible to expect the first
Sporadic E on 144 MHz in 3 weeks. Due to the fact that several
countries got acces to 70 MHz in the last months, we have another
detection tool for Sporadic E on 144 MHz.

In fact, last week we have seen Sporadic E on 50 MHz and also
on 70 MHz already.

As in earlier years, MMMonVHF will only report QSO's on 144 MHz,
no 50 MHZ, no 70 MHz, no BC broadcast.

To report QSO's you can use the form that is available in the ES-
section by ticking the SEND YOUR REPORT button. Users of VQ-log
can use a small app that is able to send daily ES QSO data from
your VQlog database to MMMonVHF.

We will try to publish reports and maps as fast as possible. Please
do not forget that your report WILL NOT SHOW UP INMIDIATLY but only
after each report is seen and processed by Frank, PA4EME.
There are so many types of logbook that it is almost impossible to
have a full automatic process. Please read this:

http://www.mmmonvhf.de/minibb/index.php?action=vthread&forum=11&topic=28

Each year I receive reports with wrong dates; please be carefull when
you are sending your report the day after an opening. A good log

only contains:

HH:MM CALL SQUARE

Mind the : in the timeframe
Look for the 0 (zero) and the O (oscar) in locators
The date is in top of the report so no need to write it again

Following this, you would help me a lot and with good reports I will
be able to create logs and maps within minutes and almostv realtime.

Spoken of realtime Sporadic E:

there are still many who have not heard of LiveMUF from G7RAU.
This is a musthave for serious ES hunters.
You can find it here:

http://g7rau.demon.co.uk/default.aspx?menu=5000&LOGINID=a&LOGINKEY=a

No program can work without correct input: a good formated spot
will trigger the right bells when needed so spot your ES-QSO on
the DX-cluster like this

12:00 144.300 PA4EME LZ2GM JO20WX ES KN32RL

the formated part JO20WX ES KN32RL is important!

The propagationtype is between brackets as kan be seen here:
http://www.mmmonvhf.de/minibb/index.php?action=vthread&forum=11&topic=88

(the line will not shown correct in many mails as the used bracked are
also used to run HTML-code)

It is important to spot short skip 50 MHz and 70 MHz as these will
be good indicators for 144 MHz ES. Be aware that when 50 MHz looks like
to fade out, it can also be an indicator for short skip. It is possible
that a certain country or area does not allow 50 MHz (or 70 Mhz) or very
rural
uninhabited regions and in that case the band looks dead and suddenly
144 MHz
ES is there. For instance this happens in central Australia every season..
there are no premilary signs of Sporadic E before the MUF reaches wel over
100 MHz.

Good Hunting!

Source: Frank, PA4EME, editor Sporadic E section MMMonVHF

** Meteors in May **

The most prominent shower this month is n ï¿½ Aquariids, peaking May 05,
19h UT.
This shower, related to the rich stream associated with comet 1P/Halley,
is characterized by a broad maximum, sometimes with a variable number of

submaxima. Recent IMO analyses, based on data collected between 1984 and
2001, indicate that ZHR is generally above 30 hr-1 between about may 3-10.
The peak rates appear to be variable on a roughly 12-years timescale,
due to influence of Jupiter. According to this model, the most recent
highest rates should have happended around 2008-2010. Peak ZHR around
65 hr-1 is predicted for 2012. Please note that n ï¿½ Aquariids radiant is
above horizon (thus making the shower usable for MS) in Europe only
(approximatively) in very late night and morning hours. While southern
Europe stations will be able to ï¿½seeï¿½ the radiant till early afternoon,
in northern Europe skies the radiant culminates at reletively low
elevation so an observer is able to see the radiant for much less time.
Some daytime showers (? ï¿½ Cetids, peaking May 20th being the most
significant) will be also active this month; in addition to increasing
Sporadic Meteors background, they will provide good conditions for MS DXing.

Theoretical peaktimes for May meteorshowers can be found here:

http://mmmonvhf.de/ms.php

SOURCE: Massimo, IV3NDC, team MMMonVHF

Hi. Just to let you know, I've now stopped collecting meteor data until I can
find another reliable signal source.

Regards, Andy Smith, G7IZU.

Andy hope you find soon another signal source to keep this great service alive!
Thanks for all your effort.

MMMonVHF Team

** DL8YHR needs some help **

Frank, DL8YHR, needs some help with the manuals and schematics of a
144 MHz amplifier from Coens. This ampplifier is using a 3CX800 and
the advantage is that it is small which can be handy during some
expedition.

A picture can be seen here:
http://tomzurk.files.wordpress.com/2012/01/coens-3cx800-front.gif
Many thanks in advance!

** DXCC ZP: Paraguay; square: GG22; start 2012-05-05 **

Greetings from Paraguay,

If I feel okay after returning home from Asuncion on Thursday, I am tentatively planning to operate 2m EME on Saturday May 5 from my moonrise at 2045z through May 6 (Sunday) 0100z.

If I still feel good, I will come back on Monday May 7 at 0900z for 3 hours until 01200z. This opening should work for the U.S. west coast and perhaps a little bit to Japan.

Frequency will be probably 144.114 and I will call first. I will be on the N0UK logger.

If my plans change I will notify this reflector. I hope to work many of you.

73 de Steve ZP9EH (GG22BQ)

SOURCE: Stev

Greetings from Paraguay,

I apologize for being out of touch for the last 10 days or so. I have been in the hospital since Sunday April 15 with pneumonia and heart problems. I am better, out of the hospital now, but must remain in Asuncion until May 2. We will need to look at EME conditions from May 5 on. I will probably not be able to operate for long sessions, so we may need to plan for EU openings, W/VE east coast, and W/VE west coast openings on separate days.

Thanks to all of you for your patience. As I have time I will answer your personal messages.

73 de Steve ZP9EH

SOURCE: Steve, ZP9EH, to MoonNet 2012-04-25

** DXCC: TF: Iceland; square HP94; start 2012-04-20 **

TF3ML Portable operation from south coast of Iceland (HP94AC)

I will be on my specially built truck with large antennas,
high power on VHF and UHF and also on 50mhz, 70mhz and 28mhz.
Please look at my facebook site, there I will post my locator,
frequency and mode, which I will be operating.
If you have any requests on a special locator, I am completely
mobile. Send me a text or e-mail if you have any requests or
want to set up a sced. E-mail address: tf3ml@hotmail.com,
and mobile phone: 00354-8418311.

OH8K/0 will be qrv from JP90SF during the Nordic VUSHF-Meeting 2012

The plan from Jussi, OH6ZZ and Sami, OH9GDT will be to join the
Nordic VUSHF-Meeting at Island Aland during 24-27 Mai 2012
(http://vushf.rats.fi/)
They try to be qrv as OH8K/0 on 2m FSK/EME on 25-27 May.
QRG and more details will be spread later...

SOURCE: tnx to Jussi, OH6ZZ direct to MMMonVHF

**DXCC: 5X: Oeganda; square KJ60; start 2012-05-25

Moonbounce from Uganda, 5X1EME, KJ60GH

After some very successfull DXpeditions to the Gambia past year
(C56EME with 361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz),
Bonaire (PJ4X) and Curacao (PJ2/PE1L), Rene, PE1L will now try again to
make
Moonbounce QSO's from Uganda on 144 MHz and 432 MHz. Uganda the pearl of
Africa.
This time Eltje PA3CEE will join the party again. He was also joining in
Kenya (5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit
is requested.
If all ok we will have a small 70cm setup with us.

From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near
Kampala on the equator.

The plan is to leave May 21st and build up the station before the
weekend. It's just
the two of us but we know what we are doing. It's a hard job to get the
license there.
Callsign is still a bit insecure but we have good faith in obtaining
5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a
update via MoonNet,
MMMonVHF and our mailinglist.
If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood.
We have to come back as often as possible. We can't resist....

SOURCE: Rene PE1L and Eltje PA3CEE direct to MMMonVHF

ME-DXpedition 2012 de DL1YMK

The M&M-team is preparing the next EME-DXpedition, taking place in
May 2012. We will set out for our destination just after having
returned from the Swedish EME Meeting, organised by Lars, SM4IVE,
on the weekend 12./13th of May in Oerebro. We hope to reach our
destination in time and to get QRV on Thursday, 17th of May
(bank holiday in Europe) on 23 cm, followed by 70 cm on 18.05.
On Saturday, 19.05., we will be on 13 cm and on Sunday again on
23 cm. 13 cm will be run with a significant increase in power and
full 2424 MHz coverage. For the first time during an EME- DXpedition,
we intend to get also operational on 6 cm with our old, but proven
stressed dish and a new superb feed made by our friend Tommy,
WD5AGO. 6 cm will have an experimental character despite some 100 W
out, as we could not test so far, if the under-illuminated dish will
work up that high in frequency, so keep your fingers crossed!! Our
plan is to give it a try on Monday, 21th May. Also, we intend to
get active on 3 cm with a separate solid dish, which of course is
a lot smaller. Last weekend we made the first test with LX1DB, having
installed the dish in our garden place. The tests were not yet
satisfying, so our friend Willi right now is trying to help us out
with some substantial development aid!
During the DUBUS contest 26./27th of May, we will of course be
active on 23 cm in order to boost activity in the moonbounce contest

of contests. Our last day of operation will be Thursday, 31st of May.
A detailed schedule for the days from 21th May onwards predominantly
will depend on the progress with 10GHz in the meantime. Further details
to be published soon!! This years DXpedition will be the 9th
EME-DXpedition in a sequence for us. We hope to have fun all together
as experienced during past years DXpeditions.but this largely depends
on you.
Needless to say that it will be again a CW random event, although
doodle mode technically is possible (with a new laptop computer)
on request. We have no idea yet to what extent (if at all) i-net
access is feasable, though.

Vy 73, Michael and Monika

**DXCC: 4X: Israel; square KM72; start 2012-05-17

2012 sees the first DXpedition by the group of Dutch radio amateurs
listed below to Israel, who, apart from making QSO's, look forward
to meeting local hams and visiting places of cultural and historical
interest.
We will be active from May 17th until May 30th
The first 6 days we will stay in Nes Ammim in the Northwest between
Nahariya
and Akko in KM72nx. From there we will travel to Rishon LeZion in KM71jw.

The members of the team during May 2012 are Jaap PA7DA, Loek PA9LUC and
XYL,
Hans PA0JBB and SWL Aad van den Nieuwendijk.
At this moment we don't have a 4X callsign and will be QRV according
CEPT-regulations with
4X/PA7DA and 4X/PA9LUC. We will operate mainly on 10, 6 and 2m.

More information on the PA7DA website!

Teens Tune in to Joys of 'Ham' Radio:

Posted: 01 May 2012 05:51 PM PDT
http://www.eham.net/articles/28192

TEENAGERS are making waves at a new Hebburn-based radio club. The North East Amateur Radio Club meets at Wardles Bar in Albert Street, Hebburn, between 7pm and 9pm each Monday. Now its two youngest members have successfully passed their Foundation Radio licence examination. Ashleigh Cockburn, 17, from Hebburn, who is a petty officer in the Merchant Navy Volunteer Cadets, and 13-year-old Ben Sewell, from South Shields, who attends Harton Technology College, were recently presented with their pass certificates from Hebburn South councillors Nancy Maxwell and Eddie McAtominey. A club spokesman said: "We broke away from another club and are now operating very successfully from Wardles Bar. "People who join learn about elements such as radio equipment, broadcasting and radio communications. We can even get involved in tracing satellites. "Really, we are involved in what used to be called 'ham' radio, and we would invite anyone interested to come along any Monday night." The North East Amateur Radio Club has 18 members, drawn from Jarrow and Hebburn, South Shields, Boldon, Gateshead and Newcastle.

Yuma to Get Latest Weather Radar Technology:

Posted: 01 May 2012 05:51 PM PDT
http://www.eham.net/articles/28191

The newest in radar technology is coming to Yuma, bringing with it the ability to more accurately assess weather events and warn of potentially dangerous storms, the National Weather Service announced Monday. The new radar technology is being installed to upgrade Yuma's Doppler weather radar and is expected to be operational in about 1-1/2 weeks. Media, ham radio operators and emergency responders turned out for a meeting at the Yuma County Supervisors Auditorium to learn more about the technology and how it would benefit the local area. Yuma County Administrator Robert Pickels, who described himself as an amateur weather buff, said the new radar "will be significant for Yuma County." Ken Waters, warning coordination meteorologist with the NWS in Phoenix, agreed. "It should help us all be better prepared for storm activity."

//
Raymond Steliga, KA2HQK (SK):

Posted: 01 May 2012 05:50 PM PDT
http://www.eham.net/articles/28190

RINGWOOD - Services were held for Raymond Steliga, 91, of Oakland, who died on Saturday, April 21, 2012. He was the father of Laurie Steliga of this community. Born in Elizabeth, Mr. Steliga lived in Oakland for more than 50 years. He was a co-owner and co-operator of Imperial Home Builders. Also, he was a U.S. Navy veteran of World War II. A ham radio operator known as KA2HQK, he was a member of the Ramapo Mountain Amateur Radio Club as well. And, he was a soccer and baseball Little League coach.

Is 7O6T operation legitimate?

Posted: 02 May 2012 05:58 AM PDT
http://forums.qrz.com/showthread.php?344624-Is-7O6T-operation-legitimate&goto=newpost

As these lines are being written HF Radio Amateurs worldwide are going berserk trying to work the 7O6T operation from an Island off the shores of Yemen.

Apparently, the 7O6T team has received strict orders not to work 4X/4Z stations from Israel.

Now, when I studied for my amateur radio license I learnt you mustn't mix politics and ham radio.

I was under the impression that in this hobby we are leaving politics aside and striving for a world of harmony and peace amongst us Amateurs.

When I operated special event stations as well as DX-peditions in the past, I never, but never, ignored anyone calling me.

Not knowingly, I attempted to call the 7O6T stations only for them to snub me time and time again or pretend they copied a station from Luxemburg LX1UN thinking they are doing me a favor so I can get a QSL card later on.

Let me tell you this, my country has its share of problems, but Israeli Radio Amateurs have been respectable members of IARU and the global amateur community since the establishment of our state back in 1948. We have assisted countries in need during earthquakes and other natural disasters (including Muslim countries) and have never discriminated anyone - At least not in the past 20 years or so.

Hence, I think the ARRL should take a stand once and for all on these issues and approve DX operations which enable the entire global amateur community to contact them. Otherwise, all this DX chasing is nothing but Politics - and I for one, don't want to be a politician.

==> + ON THE AIR: ANNUAL ARMED FORCES DAY CROSSBAND TEST SCHEDULED FOR
MAY 12
```

The Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military/Amateur Radio Crossband Communications Test in celebration of the 62nd anniversary of Armed Forces Day. Although the actual Armed Forces Day is celebrated on the third Saturday in May -- May 19 in 2012 -- the AFD Military/Amateur Crossband Communications Test will be conducted on May 12 to prevent a conflict with the Dayton Hamvention®, scheduled for May 18-20. Read more here

<http://www.arrl.org/news/annual-armed-forces-day-crossband-test-scheduled-for-may-12>.

==> + ON THE AIR: 7O6T YEMEN DXPEDITION NOW UNDERWAY

The Daily DX is reporting that the 7O6T Yemen DXpedition began at 2100 UTC Monday, April 30 and will continue through 2100 UTC May 15. Yemen currently sits at #5 on DX Magazine's most wanted list, behind North Korea, Navassa, Bouvet and Heard Island. The ARRL DXCC Desk will review the 7O6T DXpedition's documentation before granting approval for the operation to count for DXCC credit.

The DXpedition will be on Socotra Island -- the largest island in the four-island Socotra archipelago located in the Indian Ocean -- about 353 kilometers south of the Yemen mainland. Socotra Island (AF-028) is also ranked #1 on the RSGB's Islands on the Air (IOTA) list, with only .3 percent of IOTA participants claiming it. Socotra also counts for one of the three Diamond DXCC Entities that make up today's Yemen (including Aden City and Yemen itself) from the 1937 DXCC List. Read more here <http://www.arrl.org/news/7o6t-yemen-dxpedition-to-get-underway-today>.

==> + ON THE AIR: LOGBOOK OF THE WORLD MARKS 50,000 USERS

On May 1, Dragan Pavlovic, YT3PDT, completed his registration process for Logbook of The World (LoTW <http://www.arrl.org/logbook-of-the-world>), becoming the 50,000th person to take advantage of the ARRL's online QSL confirmation system. According to ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, there are more than 3500 individuals from outside the US in the process of obtaining a digital certificate, and more than 1800 individuals inside the US who have started the certificate process, but not yet finished.

Earlier this year, the ARRL and CQ Communications announced <http://www.arrl.org/news/logbook-of-the-world-to-now-support-cq-awards> that the ARRL will provide support for CQ-sponsored operating awards by LoTW, beginning with the WPX Award. This project has entered the beta testing phase <http://www.arrl.org/news/wpx-awards-via-lotw-enters-beta-testing> with a select group of hams and, barring any unforeseen circumstances, is on track to be launched to the Amateur Radio community this month.

"Radio amateurs around the world consider LoTW to be the 'must have' awards and electronic confirmation system," Patton said. "We look forward to planned improvements and upgrades, and we are gratified that so many people have helped the system grow and become more and more useful."

==> + ARDF UPDATE: REGISTER NOW FOR THE USA ARDF CHAMPIONSHIPS IN SOUTHERN CALIFORNIA

The biggest event of the year is coming soon for fans of on-foot hidden transmitter hunting, also called foxtailing, radio-orienteering and Amateur Radio Direction Finding (ARDF). Beginners and experts will gather in the mountains east of San Diego for the 12th Annual USA ARDF championships during the week and the weekend after Memorial Day. There they will test their abilities, refine their equipment and learn the best techniques from one another. Some will take home medals.

Activities will get under way on Wednesday and Thursday, May 30-31, when an optional two-day "training camp" will take place. This is a wonderful opportunity for immersion in bearing-taking and course strategy, with experts to help. Orienteering maps with elevation contours and color-coded terrain markings are new to many on-foot foxhunters, but the camp will instill confidence in using them to navigate in unfamiliar forests.

The official championships opening will take place on Friday, June 1. Friday's schedule also includes additional practice and equipment testing sessions, followed by a meeting for orientation and rules review. The 2 meter contest will take place in the woods on Saturday, and a banquet and awards ceremony will follow that evening. Sunday's schedule includes the 80 meter contest and another awards ceremony. Read more here <http://www.arrl.org/news/ardf-update-register-now-for-the-usa-ardf-championships-in-southern-california>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of April -- takes a look at an FCC request for comments in a Congressional study, new radar systems in the 1240-1300 MHz (23 cm) band, updated rules for ARRL volunteer card checkers, forthcoming ARRL publications, happenings at W1AW, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-45>.

==> + SECTION NEWS: NEW SECTION MANAGER APPOINTED IN VIRGIN ISLANDS

Fred Kleber, K9VV, has been appointed as Section Manager of the Virgin Islands Section as of May 1, 2012. Kleber, of Christiansted, St Croix, is taking the reins from John Ellis, NP2B, who is planning a move out of the Section soon. Ellis has been Section Manager of the Virgin Islands since 1996. Kleber has served as the Section Emergency Coordinator of the Virgin Islands this past year. Ellis recommended that Kleber fulfill his current term of office that continues until September 30, 2012. In response, Dave Patton, NN1N, Membership and Volunteer Programs Manager, consulted with ARRL Southeastern Division Director Greg Sarratt, W4OZK, and made the appointment effective on May 1.

Nomination petitions are now being accepted at ARRL Headquarters for any qualified ARRL member who would like to run for the next term of

office as the US Virgin Islands Section Manger. See the notice in the April 2012 (page 80) or May 2012 (page 76) issues of QST for details on how to nominate someone for this post.

==> SOLAR UPDATE

Tad "Our days run as fast away as does the Sun <http://www.poetryfoundation.org/poem/176696>" Cook, K7RA, reports: The average daily sunspot numbers declined 38 points to 106.7 this week, while the average daily solar flux declined nearly 18 points to 116.2. The data reporting week runs from Thursday through the following Wednesday, so this comparison is between April 26-May 2, contrasted against April 19-25. The predicted solar flux is 115 for May 3-6, 110 on May 7-8, 115 on May 9, 130 on May 10-12, 135 on May 13, 140 on May 14-17, 135 on May 18-21, and 130, 125, 120, 115, and 110 on May 22-26. The predicted planetary A index is 5 on May 3-8, then 10, 15 and 8 on May 9-11, 5 on May 12-13, 8 on May 14-15, then 5, 8, 5, 8 and 10 on May 16-20, 15 on May 21-23, 8 on May 24, and then 5 on May 25-June 4. The NASA solar cycle prediction <http://solarscience.msfc.nasa.gov/predict.shtml> from the Marshall Space Flight Center has changed over the past month: The predicted maximum smoothed international sunspot number changed from 61 to 60, but still predicted for next spring 2013. The date of the new prediction is May 1, 2012 and last month's was on April 2, 2012. International sunspot numbers have much lower values than the sunspot numbers we use in this bulletin. The prediction is still for Solar Cycle 24 to be the lowest sunspot cycle in the past century. Look for more on the ARRL website on Friday, May 4. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Robert Herrick's Corinna's Gone A-Maying <http://www.poetryfoundation.org/bio/robert-herrick>.

==> + ARRL RECOGNIZES: RICHARD PATON WINS APRIL QST COVER PLAQUE AWARD

The winner of the April QST Cover Plaque award is retired USCG Commander Richard Paton for his article "Radio's Role in the Titanic Disaster." Congratulations Richard! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the May issue today.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- How do you participate in Field Day?
- Where do you store your QSL cards?
- How were you introduced to Amateur Radio?
- Do you suffer interference from your vehicle's electronics when you operate mobile?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the August 2012 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK IN RADIOSPORT

This week:

- May 4 -- NCCC Sprint Ladder
- May 5 -- Microwave Spring Sprint (local time)
- May 5-6 -- New England QSO Party; Indiana QSO Party; 7th Call Area QSO Party; 10-10 International Spring Contest (CW); ARI International DX Contest; Araucaria VHF Contest
- May 8 -- ARS Spartan Sprint
- May 9-10 -- CWops Mini-CWT Test

Next week:

- May 11 -- NCCC Sprint Ladder
- May 12 -- FISTS Spring Sprint
- May 12-13 -- Nevada Mustang Roundup; EUCW Fraternizing CW QSO Party; VOLTA WW RTTY Contest; CQ-M International DX Contest; 50 MHz Spring Sprint
- May 13 -- SKCC Weekend Sprintathon; WAB LF Phone Contest
- May 14 -- NAQCC-EU Monthly Sprint
- May 17 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- May 4-6 -- EMCOMMWEST <http://www.arrl.org/hamfests/emcommwest-convention-1>, Reno, Nevada
- May 18-20 -- Dayton Hamvention <http://www.arrl.org/hamfests/dayton-hamvention-3>, Dayton, Ohio
- June 1-3 -- ARRL Northwestern Division Convention <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-3>, Seaside, Oregon
- June 2 -- ARRL Georgia Section Convention

<http://www.arrl.org/hamfests/georgia-section-convention-atlanta-hamfest-1>,
Marietta, Georgia
- June 8-9 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-ham-com-1>,
Plano, Texas
- June 9 -- ARRL Arkansas State Convention
<http://www.arrl.org/hamfests/arkansas-state-convention>, Rogers,
Arkansas; ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-2>, Knoxville,
Tennessee
- June 30 -- ARRL Eastern Pennsylvania Section Convention
<http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-electro
nics-expo-firecracker-hamfest>,
Harrisburg, Pennsylvania
- July 20-22 -- ARRL Montana State Convention
<http://www.arrl.org/hamfests/montana-state-convention-78th-glacier-waterton-
international-hamfest>,
East Glacier, Montana
- July 26-28 -- Central States VHF Society Conference
<http://www.arrl.org/hamfests/central-states-vhf-society-conference-1>,
Cedar Rapids, Iowa
- July 27-28 -- ARRL Oklahoma Section Convention
<http://www.arrl.org/hamfests/oklahoma-section-convention-ham-holiday-2012>,
Oklahoma City, Oklahoma
- July 27-29 -- ARRL Rocky Mountain Division Convention
<http://www.arrl.org/hamfests/rocky-mountain-division-convention-2>,
Bryce Canyon, Utah
- August 3-4 -- ARRL Texas State Convention
<http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-2>,
Austin, Texas
- August 3-5 -- Pacific Northwest DX Convention
<http://www.arrl.org/hamfests/pacific-northwest-dx-convention-1>,
Portland, Oregon
- August 4 -- ARRL Ohio State Convention
<http://www.arrl.org/hamfests/ohio-state-convention>, Columbus, Ohio
- August 10-12 -- RAC National Convention 2012
<http://www.arrl.org/hamfests/rac-convention-2012>, Edmonton, Alberta,
Canada
- August 18 -- ARRL West Virginia State Convention
<http://www.arrl.org/hamfests/west-virginia-state-convention-2>,
Weston, West Virginia
- August 18-19 -- ARRL Southeastern Division Convention
<http://www.arrl.org/hamfests/southeastern-division-convention-huntsville-ham
fest>,
Huntsville, Alabama
- August 19 -- ARRL Kansas State Convention
<http://www.arrl.org/hamfests/kansas-state-convention-2>, Salina,
Kansas
- August 24-26 -- ARRL New England Division Convention
<http://www.arrl.org/hamfests/new-england-division-convention-1>,

Boxboro, Massachusetts
- August 26 -- ARRL Western Pennsylvania Section Convention
<http://www.arrl.org/hamfests/western-pennsylvania-section-convention-2>,
New Kensington, Pennsylvania

IT'S A BEAT UP

IT'S A BALLOON UP

Whistle-like signal in Amateur Radio 40m band

FLOWER POWER WITH GB0BFM

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING MAY 6 2012.

IT'S A BEAT UP

Paul vk5fpau sent us an interesting item from adelaidenow.com.au titled

"RECYCLED and decommissioned SA Police radios are being sold at public
auction and illegally tuned into private frequencies by radio hams."

In February, the Australian Communications and Media Authority seized nine
radios and issued warning notices for the "unlawful possession of radio
communications devices" to unlicensed radio hams in Adelaide after a
complaint of substantial interference from a licensed operator.

Now we won't go on here as so much of the story is full of inaccuracies, unfortunately the emphasis has been shifted onto we hams being "in the wrong".

Terminology and just what the on line reporter has in his or her mind we hams get up to is just way out of left field!

adelaidenow.com.au/police-radios-used-illegally/story-e6frea6u-1226342058370

WIA's Peter Young VK3MV said that theACMA confirmed that a major compliance action was undertaken in Adelaide in the past week.

Reports suggesting that Ham Operators were involved have been denied by the ACMA.

Monitoring of the radio spectrum from ACMA infrastructure in Adelaide confirmed that a number of users (Pirates) were active on frequencies licensed to other parties. Intelligence gathered through this monitoring indicated that these individuals possessed equipment programmed with numerous frequencies. Enquiries made by the ACMA found that these users did not hold ACMA licences for these frequencies.

The radios operated by the individuals involved in this matter had been programmed with a number of frequencies which were licensed to various organisations. The ACMA received a report of substantial interference from a licensee although the extent of the disruption to their communications is not known.

The ACMA did not receive any information indicating that there was a danger to public safety. Notices issued were in relation to the radio transceivers in the possession of the individuals and nine of these transceivers were subsequently surrendered to theACMA. The ACMA is still considering whether to take prosecution action.

HAMS ACROSS AUSTRALIA.

Email Address : r_demkiw@yahoo.com.au

The Oxley Region Amateur Radio Club's 37th annual field day takes place at Port Macquarie on Saturday the 9th and Sunday the 10th of June 2012.

The venue is the Tacking Point Surf Life Saving Club hall in Matthew Flinders Drive, Lighthouse Beach, Port Macquarie NSW.

There will be all the usual attractions and events over the two days of the Field Day. The Field Day dinner will be held at the Port Macquarie Golf Club at 6pm on the Saturday night. Foxhunts will be conducted on both days. Sunday is the day for the traders and the trash and treasure tables. There is no charge to sellers so bring your treasure.

The famous barbeque lunch will be available on both Saturday and Sunday.

Mark your calendar now for Port Macquarie on the June Long Weekend.

Visit the Oxley Region Amateur Radio Club Inc. website at
http://www.orarc.org for more information or write to the club at
PO Box 712 Port Macquarie NSW 2444.

(Henry Lundell VK2ZHE President, Oxley Region Amateur Radio Club Inc.)

The next one day Foundation course being conducted by ARNSW will be Sunday 20 May at the VK2WI Dural site. Assessments for both the course and all license grades will be conducted on Sunday the 27th May. This is also the next bi-monthly Trash & Treasure day.

MDRC Hamfest 2012

The Moorabbin and District Amateur Radio club are pleased to announce, this year's Hamfest will be held in at a BRAND NEW LOCATION with improved access and parking.

This year's event will be at the Southern Community Centre, Rupert Drive, Mulgrave (Melways map ref 80 F4) on Saturday 26th May - doors opening at 10am.

The Moorabbin Radio Club's annual Hamfest is proud to be Victoria's biggest with displays and sales of new and preloved equipment. A must come must see event for anyone interested in Radio Communications and Electronics.

Major door prizes, free tea and coffee, light refreshments and a sausage sizzle will also be on offer.

Trader table bookings and general enquires can be made by emailing
Graeme Lewis VK3GL (vk3gl@bigpond.com) or by phoning mobile 0418 171601.

A Must see, must come event!!

GippsTech 2012

Do you own one of the more recent amateur transceivers that include six metres, two metres and/or 70 centimetres in addition to the HF bands?

Have you explored any of the bands above HF?

Or do you simply use the two metre and 70 centimetre capability on FM for chatting with the locals or to access the local repeater?

If this sounds familiar, you might be surprised at what you can actually work on these higher bands, especially if you tune to the SSB segments or explore some of the digital modes. But how do you discover more information about such operation?

One way is to read one of the radio handbooks or explore some of the many websites. Perhaps it would be easier to attend the annual GippsTech conference.

GippsTech has a reputation as a premier amateur radio technical conference. It focusses primarily on techniques applicable in the VHF, UHF and microwave bands, especially for weak-signal contacts.

It is almost that time again: GippsTech 2012 will be happening on the weekend of the 7th and 8th of July, at Monash University Gippsland Campus in Churchill, Victoria, about 170 km east of Melbourne.

A Partner's Tour will be conducted, together with an informal social gathering for dinner on Friday and a Conference Dinner on Saturday. Those of you who have more experience and have information to share with others are invited to submit titles of presentations to the Conference Chair as soon as possible.

We look forward to seeing you at GippsTech in early July.

Further details are available from the Eastern Zone Amateur Radio Club website:

http://www.vk3bez.org/

(Peter VK3PF Conference Chair)

RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

Hallo everyone, this is Clive VK6CSW with a reminder that tomorrow Monday May 7th the Radio Amateurs Old Timers Club of Australia's monthly News and Information Bulletin will be broadcast on a number of HF and VHF frequencies.

The principal HF transmissions will be on 20 metres on 14.150 MHz USB at 0100 UTC beamed north from Melbourne for the eastern states, and at 0200 UTC beamed westward for Western Australia.

Numerous local relays will take place on both VHF and lower HF frequencies, To find the times and frequencies for your area please visit the RAOTC website at www.raotc.org.au

Once again, that's www.raotc.org.au

Everyone, RAOTC Members and non-members alike, is invited to listen to this interesting half hour of Old Timer news, information and anecdotes and to participate in the call backs afterwards.

Once again, the RAOTC monthly bulletin is scheduled for tomorrow, Monday May 7th.

73 from Clive VK6CSW

Are you coming to the WIA AGM in Mildura ?

Last week on the WIA Annual Conference promo spot we interviewed Terry Baume VK5VZI from the Project Horus team. As we heard, the Horus team will not only be giving us the full technical lowdown on their Balloon launches during the Saturday afternoon technical Symposium sessions, but will also be launching a real Horus, yes Horus 25 on Sunday morning from the old aero ovals a publicly accessible council property in Mildura. Over the last week there has been a great deal of discussion and enthusiasm shown for this launch, with some groups now actively planning to arrive in Mildura for the Annual Conference weekend so they can take part in tracking and following the balloon and its payload and as we heard on last weeks news being in the running for the Yaesu FT-1900 transceiver. A number of questions have been received during the week from those who enjoyed Terry's interview, questions such as, How far will the balloon travel and do we know which direction it is likely to go ?

Well I have followed these questions up with Terry and I have some answers, he informs me that Horus team believe the balloon will remain in the air for about two and half hours possibly longer, during that time and depending on atmosperic conditions it can typically travel between 50 and 200 kilometers before it bursts and the payload parachutes back to the ground. Now the questions which way will it travel, well the answer to that mystery will of course be revealed on the day !

The Horus 25 launch is planned to take place at 8:00 am from the old areo ovals, this council park has planty of parking for cars. In addition for people attending the Annual Conference without their own vehicle, a minibus operated by the Sunraysia radio club will be running to ferry people from the Hotel to the ovals for the launch and to the Paddleboat Mundoo for the lunchtime cruise.

As was mentioned on last weeks news, actively following and tracking the ballon on its possible 1 or 200 kilometer journey is a separate activity to the Paddleboat Mundoo boat cruise and the scenic journey up and down the Murray river. We have been asked by the WIA office to make sure that everyone who is booking in for the weekend is fully aware that following the balloon and the Mundoo boat trip are separate activities, so here it is again to make completely sure there is no mistake, following and tracking the Horus Balloon on its possible 1 or 200 kilometer journey will be a separate Sunday activity to that of the Paddleboat Mundoo lunch and river cruise.

See you in Mildura, register today to be part of this great weekend.

Follow the link on wia.org.au to the Annual Conference in Mildura.

DISCUSSION POINT

I'm Geoff Emery, VK4ZPP, and I've been thinking.

Earlier this year, I raised the idea that it may be more efficient to dispense with charging for amateur radio licences on the basis that the figures for cost recovery have not been compared with the possible savings with the dispensation.

To finish the month of April, the Communications Minister Conroy released a small book called the Convergence Review.

www.dbcde.gov.au/digital economy/convergence review

This report addresses the issues raised by multiple platforms for what is currently called the media. However, in a move that would undo the integration of the old Broadcasting Control Board into the ACMA, it is recommended that the ACMA be replaced by another regulator attuned to the world of "broadcasting".

Because of the difficulties involved in structuring licences for multiple platforms and to quote the Executive Summary,

"The Review recommends that the licensing of broadcasting services should cease. As a consequence, the current costs for government and business associated with planning and issuing licences and administering categories of broadcasting services will disappear entirely".

If the government adopts these recommendations, Amateur Radio has a strong precedent for the abolition of licence fees.

I'm Geoff Emery and that's what I think.....how about you?

(4ZPP/QNEWS)

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

Recently I celebrated my birthday, my Amateur Radio Birthday that is. I've now had my license for 12 months and each time I go on air I find myself surrounded by people who know more than I do.

It's great to be in a position where you're not the "expert". In my day-job, I'm a 30 year veteran in the field. Fortunately in Amateur Radio, there are others around with that same level of black magic voo-doo that makes a conversation go along a little like this:

"How do I do this?" - "well, plug that into there and then flick that switch and it'll work." - "Cool, how did you know?" - "Well, when I was camped on the side of the road near Karratha in the 50's I had the same problem and this is how I fixed it."

I find it difficult to express what it means to be able to talk to people who are able and willing to share their knowledge and experience. There is a level of awe - I've been on the receiving end of it in my own field, I recognize it, but it doesn't seem real - and a level of gratitude that the expert spent the time to explain.

In my day job, more and more I find that the level of expertise and comprehension is declining. I suspect that there are Amateurs who believe that the Foundation License is an extension of that same phenomenon. Of course having such a license myself, I'm a little biased, but I'd like to observe that I actually paid for and attended a training course, read training materials, did a practical and theoretical test, paid for a license and had to go out, source my equipment, build some of it and make it all work.

Although I think it's true that in a technical sense the world appears to be getting dumber, I'd like to challenge the notion that this is also the case in Amateur Radio. I think the only point you could make is that a Foundation License makes it possible for more people to participate, but that participation in itself is evidence that there is a certain level of thirst for learning and improvement. I've seen Foundation Licensees around me build antennas, investigate new technologies and ideas, research and publish - all fuelled by their initial Foundation License.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Wellington Radio ZLW

Wellington Radio ZLW closed in 1993 after operating from Tinakori Hill for about eighty years.

A group of former ZLW operators is planning a commemoration for all those who contributed to maritime safety all those years and the radio operators who were executed in the Gilbert Islands (Kiribati) in 1942.

The commemoration is planned to provide a memorial plaque. The unveiling ceremony is planned for 16 September 2013, the 20th anniversary of the station's closure.

Fists club downunder say former ZLW and ships' operators who wish to be involved and kept informed of how the plans for the event are progressing are invited to communicate with Barry Allison

bazbarbzingizzie@xtra.co.nz

UK REGULATOR OFCOM ANNOUNCES HAM BAND RESTRICTIONS DURING 2012 OLYMPICS

Details of amateur band frequency restrictions during the London 2012 Olympic and Paralympic Games have now been released by U-K Telecommunications regulator Ofcom. The greatest impact to ham radio appears to be satellite and other operations in the 436 to 437 MHz segment of 70 centimetres.
Amateur Radio Newsline's Norm Seeley, KI7UP, explained why:

Parts of the 70, 13 and 9 centimetre amateur bands in the United Kingdom will face restrictions between June 28th and September 23rd. This, due to need for spectrum during the 2012 Olympic and Paralympic Games.

The restrictions only apply in geographically limited areas, with 70cm being particularly affected around London and Weymouth. Also hard hit by the restrictions will be ham radio satellite operations.

According to a notice on the AMSAT-UK web site the Amateur-satellite Service allocation in the 435 to 438 MHz range

will be restricted to 436.25 to 437.25 MHz This is based on an understanding that the equipment being used for Olympics communications in the 430 MHz band will include handheld FM rigs at the hotels, the routes to the venues and at the venues themselves.

The U-K communications regulator Ofcom say the use of radio by amateurs in the designated areas could cause interference to various communications at the games. Also, it is possible that higher power transmissions from outside these areas could cause interference as well. Consequently, to avoid the risk of interference, Ofcom has requested that United Kingdom amateurs do not operate within the frequency ranges it has outlined. This says AMSAT-UK means that the spectrum identified by Ofcom should be avoided for a considerable distance outside the designated Olympic communications zones.

AMSAT-UK notes that a well-equipped station on a good site 75 km or more from the edge of an Olympics communications zone could still put a fairly decent signal into that area.

Newsline did a bit of research and found that the closest heavily populated mainland European city to London appears to be Calais, France. This is mainly over water path only about 93 airline miles or 149 kilometres away from the closest Olympic venue.

That said, Ofcom has so far not asked the French or any other European telecommunications administrations to restrict their nations Amateur Service allocations during the Olympic and Paralympic games.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, far from the U-K in Scottsdale, Arizona.

More on this is on-line at www.uk.amsat.org/6574 and RSGB.org/olympics. (GB2RS, AMSAT-UK, ARNewslineT)

==========

NEWS FROM ARNEWSLINE USA

DIGITAL MOBILE RADIO ON HAM RADIO NOW

The future of digital audio in VHF and UHF amateur radio is the subject of a video conversation between video producer Gary Pearce, KN4AQ, and expert Jeff Parker, WA1WXL, who works for Motorola Solutions. The video presents a discussion of alternative digital audio systems available today and what may be coming to the ham radio market in the very near future. You can see it on line as Episode 7 of Pearce's Ham Radio New series. The URL is hamradionow.tv.

ULTRA THIN FLEXIBLE BATTERIES EXPECTED IN 2013

In news from around the world, an ultra-thin flexible
battery is on its way from Japan electronic giant NEC.
According to reports, the company has worked for over a
decade to design an organic battery is just one one-
hundredth of an inch thick, can refresh a teeny screen 2,000
times and can be recharged in less than a minute.

In 2013, the battery is expected to be included in such
items as enhanced credit and debit cards that display
balances, electronic hotel keys, subway and train passes and
in much slimmer and lighter smart phones. The organic battery
is also expected to pave the way for slender flat-screen displays
and e-readers with a texture that feels like paper.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

First activation of Botley Flour Mills for Mills on the Air weekend
withe callsign GB 0 BFM for Mills on the Air weekend on the 12/13th of May

Itchen Valley Radio Club: http://www.ivarc.org.uk/

Southampton University Wireless society: http://www.suws.susu.org

Botley Flour Mills: http://www.botleymills.co.uk/heritage.htm

EA3OW is now active through May 12th as EA 3 0W/HH8 from Southern Haiti.

Listen out for him on 40 through 10 meters using SSB, RTTY and digital modes.

QSL via his home callsign, EA 3 OW

DJ 9 RR will be on the air as S 79 RR from Mahe Island between May 15th and the 23rd. Activity on 40 through 10 meters using CW and RTTY.

QSL via his home callsign, JJ 9 RR.

Some special event call signs will be activated to celebrate the London 2012 Olympic and Paralympic Games:

2O12L from London, England and 2O12W from Barry, Wales.

The London 2012 Inspire program has granted the Radio Society of Great Britain (RSGB) -- Great Britain's IARU Member-Society -- use of the "Inspire mark" for these stations.

Both stations will be on-the-air for the duration of the Games, July 27-August 12.

More Special callsigns for UK radio amateurs during 2012

The Radio Society of Great Britain and Ofcom have reached agreement on the optional use of special callsigns for two significant events during 2012.

For the Queen's Diamond Jubilee, all UK amateur stations will have the option of applying for a variation to their licence if they wish, to use a special prefix for a five week period. This will add or substitute the letter "Q" in the place of the Regional identifier in the callsign.

Period: 00.00 BST 5th May 2012 to 23.59 BST 10th June 2012.

For the period of the Olympic Games and Paralympic Games, a similar facility will exist for a seven week period, using the letter "O".

Period: 00.00 BST 21st July 2012 to 23.59 BST 9th September 2012

Whistle-like signal in Amateur Radio 40m band

OZ9AEC has found a strange signal in the 7 MHz band using his AMSAT-UK FUNcube Dongle with an HF up-converter.

A strange whistle-like signal received on the 40 meter band using Gqrx software defined radio receiver and a FUNcube Dongle equipped with a shortwave converter. The signal appears to be amplitude modulated with suppressed lower side band (just like UVB-76 ;-)) Is it an ionosonde or a numbers station?

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

Ecuadorian CubeSat will monitor near-earth objects

Ecuador's first satellite NEE-01 Pegasus is slated to launch this October from Yasny on the same DNEPR rocket as the AMSAT-UK FUNcube-1.

Pegasus is a 1U CubeSat with two large deployable solar panels and the Ecuadorian Civilian Space Agency (EXA) indicates 28.8 amps can be generated.

There is an on-board camera to send live video from space from a 3 watt TV transmitter in the 902 MHz band along with a beacon that will send an ID and Ecuador's national anthem.

On April 25, EXA announced that it will be adding a mission to NEE-01 Pegasus: It will help monitoring near-earth objects from orbit using its

on-board 720p HD video camera and will also help in the catalogue and control of orbital debris (space junk), this new mission will turn the NEE-01 in to the first online, real time orbital video sentry for the planet, as the satellite has the capability to stream its video signal directly to the Internet.

The satellite will send two signals that will be received and decoded by the EXA's HERMES-A ground station and then uploaded live to the Internet using Twitter and Facebook.

The first signal will contain text book questions and the second will contain an image related to the question. If the students are able to answer the question correctly they will be granted access to the video camera on-board the spacecraft and will be able to see earth from space as the astronauts see it in their space missions.

More advanced students will have access to the pure radio signal so they can try decoding it by themselves. The EXA will provide them with the appropriate support software free of charge.

JOTA/JOTI

It's admittedly still a fair way off and as yet VK1WIA has not been given dates but in VK7 JOTA co-ordinator Peter VK7KPC advises that the NTARC JOTA effort will take place at the Carnacoo camp site at Paper Beach, as part of a Northern Districts camp.

Operation will be from marquees with mains power available.

us Hams in the Jacksonville area had been helping Scouts in the
North Florida Council earn their Radio merit badges over the years.

But they were looking to do more for the Scouts and for ham radio.

Scott Roberts, KK4ECR, says a group of those hams finally decided
to make a move.

"We approached one of the local Scout camps here in the area
and talked to them about it and they said, 'Yes, we're all
for it, let's do it,' Roberts says.

"And, basically, at that point, amateur radio club KB4SA was
born."

The station is being set up at Camp Echockotee in Orange
Park, Florida. It also has backing from Clay County Amateur
Radio Emergency Service operators.

Roberts says KB4SA will be staffed by Scouters and Scouts
looking to share the fun of the amateur radio hobby.

On Saturday, May 12, Roberts says the station will launch
operations with a special event station from the camp. And
he's looking to make contacts with.
"Other Scout clubs, with other DX stations that are around
that can be available that day to talk to the Scouts and
kind of make it a big hit for some of these Scouts that have
been on the radio before and then some of those that have
never been on the radio before," Roberts says.

You can find more about the KB4SA operation by going online
to our website, arnewsline.org for a link (http://kb4sa.org)
to information about the station and the frequencies.

A very major WICEN activity will take place at St Helens VK7 over the
June long weekend - the Tom Quilty Equine Endurance Event.

For those not in the know about matters equine, this is the National
Championship endurance event for both riders and horses. Once again, NTARC
will be contributing operators to the communications effort supporting this
prestigious event.

NTARC WICEN co-ordinator Norm VK7KTN would love to hear from any member who
would like to join a small team, . However, the more the merrier, so why
not give this event a go. It will be many years before the Tom Quilty returns
to VK7!

WIA Annual Conference Mildura

This is Mal VK3FDSL with the latest information on the WIA Annual Conference weekend in Mildura.

Well we are just a couple of weeks away from the big event - if you haven't registered yet, I urge you to do so immediately, please. We have in excess of one hundred and fifty people booked in so far, so come along and join in the fun.

Our block booking of reserved accommodation at the Grand Hotel will expire next Wednesday, so if you intend staying at the Grand, you must book by then. Just quote the WIA Conference to get yourself our special rates, which includes a cooked breakfast each day you stay.

I'm looking forward to meeting you all in Mildura May 25th, 26th and 27th 2012.

Details for the WIA 2012 Annual Conference being held in Mildura are on wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a range of fascinating and memorable activities.

FINAL FINAL

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

NZART Headquarters Infoline Issue 250

4 May 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· Notice of Intent to place Branch 82 into recess

· VK/Trans-Tasman Contest

· FROM THE VHF-UHF-SHF CONTEST MANAGER

· FMTAG NOTES FOR HQ INFO LINE 250

· 12th USA ARDF Championships

Debby Says…For some reason I have received a number of calls from members who have not received their Break In. It appears the NZ Post gremlin has stuck again, therefore please advise me ASAP if you have not and I will send another one to you.

As we are getting closer to conference it's time to consider if your branch will be represented at the AGM. If not and you wish your votes on remits to be included, please forward to me and I will arrange for a proxy to represent you. If however you have some-one in particular that is willing to do so from another branch, please forward the results to that person.

Finally my apologies for no Info-Line last week. I somehow got out of sync with the dates that Jamie Pye and Jim Meachen had prepared and are advertised on our web page… Hopefully as time goes on, we will be able to find a more suitable Editor for HQ Info-line

Talk soon…Debby ZL2DL

Notice of Intention to place the Southern Wairarapa Branch 82 into Recess

Council has received a request from the one remaining member of the Southern Wairarapa Branch 82, to place the Branch into recess. Repeated attempts by that member over the last 10 years to interest amateurs living in the Southern Wairarapa area to join the Branch have not met with any success. This notice is being placed in HQ InfoLine and also in May/June Break-In to advise members of the intention to place Branch

82 into recess. If any amateurs in the Southern Wairarapa area are interested in re-forming the Branch, please advise Debby ZL2DL at NZART Headquarters either by email or in writing. Closing date for expressions of interest is Friday 22 June 2012.

Vaughan Henderson ZL1TGC

NZART President

VK/Trans-Tasman Contest

The 80m Phone VK/Trans-Tasman contest will be run this year on Saturday 12 May 2012, from 8 UTC to 14 UTC (8pm-2am NZST), with the best 5 of the 6 hours counting toward the final score.

Rob, ZL3AKM, who has been assisting the previous contest manager for a number of years, has now become the new contest manager following Bruce's resignation after more than 10 years service.

There have been a number of changes for 2012, most significantly, the old web site is no longer active. The main website for the contest is now the Trans-Tasman contest page on the WIA website: http://www.wia.org.au/members/contests/transtasman/

There have been a few other changes to the scoring system, including the removal of the "participation factor" and changes to the way group points are score. These changes, and the full rules, can be found on the WIA Trans-Tasman contest page.

The 160m Phone and both 80m and 160m CW and digital trans-Tasman contests have been combined on a single evening to include single band and mode categories, through to dual band multi-multi categories, and to increase activity and provide more operating fun for everyone!

The combined 160m Phone and 160m/80m CW and Digital contest will be help on Saturday 21 July 2012, 8 UTC to 14 UTC.

Details on the WIA trans-Tasman contest page.

73

Rob, ZL3AKM
Contest Manager

FROM THE VHF-UHF-SHF CONTEST MANAGER

LOW BAND CONTEST

The preliminary results are:

The overall winner was ZL4AA, in second place ZL2FAE, and in third place ZL3ED.

ZL4AA had the highest score on each band.

The best DX was 643 km on 2 metres, between ZL2FAE and ZL4AA.

The full results will be posted on: www.vhf.org.nz, once the Contest Committee has finished cross-checking the logs.

THE NEXT CONTESTS

The next contest is the Hibernation Contest, all bands 50 MHz and up, on Saturday the 9th and Sunday the 10th of June 2012. This is the weekend after Queen's Birthday weekend. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The contest after that is the Brass Monkey Contest, all bands 50 MHz and up, on Saturday the 4th and Sunday the 5th of August 2012. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The Contest Rules are available at:

www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to: zl2wa@clear.net.nz

with Contest Log in the subject line, or by post to:

Contest Manager

Wellington VHF Group

P.O. Box 12-259

Thorndon

Wellington

Please include your email address if you wish to receive the results as soon as they are available.

FMTAG NOTES FOR HQ INFO LINE 250

NZART COUNCIL REVISES ITS LICENCE FEE POLICY

As mentioned in “From the President” (page 3 March/April Break-In), NZART Council has revised its Beacon, Link and Repeater Licence Fee Policy. Here are more details.

Council resolved to encourage the transfer of Repeater, Beacon and Link Licences from NZART to the equipment-owning Branches, and to impose a surcharge of $5.11 per licence, to offset NZART HQ costs, on those licences that remain with NZART.

The MED's Annual Administration Fee, for an Amateur Beacon, Link, or Repeater Licence, is $46.00, if paid by credit card via the MED's SMART website, or $51.11, if paid by cheque to the MED's Business Service Centre. The $5.11 surcharge recognises the cost to the MED of processing a manual payment.

Previously, NZART HQ requested payment of $46.00 from Branches and forwarded the full amount to the MED.

The NZART HQ cost of processing a manual payment are similar to those of the MED and, therefore, NZART Council decided to introduce the same $5.11 surcharge per licence for all Licence Fee payments made via NZART HQ.

The following Branches (and Affiliates) will benefit from the licence transfer:

03 Western Suburbs

05 Christchurch

08 Eastern Southland

22 Marlborough

23 Marton

24 Motueka

26 Nelson

28 Whangarei

33 Rotorua

34 South Canterbury

35 South Otago

37 Southland

38 Taumarunui

42 Titahi Bay

46 Wairarapa

48 Wanganui

49 Westland

51 Eastern Bay of Plenty

55 Waitomo

56 Christchurch West

60 Taupo

61 Central Otago

64 North Otago

66 Auckland VHF

67 Kawerau

68 North Canterbury

78 Far North

82 Southern Wairarapa

84 Bay of Islands

85 Mercury Bay

86 Suburban

87 South Taranaki

Auckland AREC

CARDS

Branches wishing to avoid paying the $5.11 surcharge for each licence need to arrange transfer of their licences from NZART to the Branch. To start the licence transfer process, please send an email to FMTAG to receive an information pack: fmtag@nzart.org.nz

NZART Council has confirmed that the revised policy does not apply to National System or International Beacon Licences.

PROPOSALS

None this time

FINAL RECOMMENDATION TO NZART COUNCIL

NZART Council, at its 1st of May meeting, approved the following Final Recommendation, which can now proceed to licensing.

Branch 74 Wellington VHF has applied for an APRS Digipeater at Kaiwharawhara Hill, located at TOPO50 BQ31 494.93 316.03. The transmit and receive frequency will be 144.575 MHz in accordance with the band plan. An engineering investigation, in accordance with MED PIB38, confirms that there will be no interference to other stations.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

The current status of Applications can be viewed on the NZART website:

http://www.nzart.org.nz/nzart/fmtag/fmtag-apps-being-processed/

European Football Championship 2012 on the AIR"

…. is an on-the-air activity which promises to be a great deal of fun, organized by Polish and Ukrainian amateurs affiliated with PZK and UARL.
>From June 1 to July 5 2012, there will be numerous special event stations active on the air. They will be operating concurrently with the 2012 European Football Championship, which this year is organized jointly by Poland and Ukraine.

More detailed information about our activity can be found on our website http://efc2012.pzk.org..pl

We welcome you and look forward to seeing you on all the amateur bands from June 1 to July 5, 2012. There are two awards which can be earned during this period, as well as many interesting QSL cards and prizes.

12th USA ARDF Championships

Registrations are now being accepted for the Twelfth USA ARDF Championships, which will take place in the forests near Mt. Laguna Village, about 45 miles east of San Diego, California.

Activities will get under way on Wednesday and Thursday, May 30 - 31, when an optional two-day "training camp" will take place. The official championships opening will take place on Friday, June 1 with practice and equipment testing sessions. The two-meter contest will take place on Saturday, June 2, after which all will gather for a banquet in the evening. Sunday's schedule includes the 80-meter contest and an awards ceremony, timed to end in mid-afternoon to accommodate those who must hurry home.

The official event Web page at www.homingin.com has the registration form. It is important for participants to register right away. The organizers need an accurate head count and assurances that there will be sufficient attendees. It's also important to make reservations now if you want to stay at the event headquarters, which is Laguna Mountain Lodge. (Nearby camping is also available.)

Transportation and lodging information is on the event Web page, as well as the daily schedule, competition rules, transmitter and map information. For questions and regular updates, you can subscribe to a group mailing list for participants and others interested in these championships.

We look forward to seeing you at the USA Championships!

Joe Moell K0OV
USA ARDF Coordinator

Amateur Radio Newsline(tm) Report 1812 - May 4 2012

Amateur Radio Newsline report number 1812 with a release date of May 4th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Antenna restrictions get worse in Belgium; A new whistling intruder is heard on 40 meters; U-K telecommunications regulator Ofcom issues new rules to prevent radio interference to the 2012 Olympics and Nebraska hams are lauded for their severe weather watch operations. Find out the details are on Amateur Radio Newsline(tm) report number 1812 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: ANTENNA RESTRICTIONS IN BELGIUM GET TIGHTER

If you think it's hard to put up an antenna in some locations here in the USA its nothing in comparison to what's happening in Belgium. That's where antenna restrictions have gotten even tighter than before and its happening with the government blessings. In fact, the rules are so stringent that it could force some hams off the air. Amateur Radio Newsline's Skeeter Nash, N5ASH, reports:

--

The Belgian national amateur radio society's website has posted an update on the restrictive antenna requirements recently imposed by the Flemish Government. The registration seems to apply to antennas that operate between 10 MHz through 10 Gigahertz, the amount of time a ham is actually transmitting and the power output of his or her station.

Going by the latest information, it would appear that Flemish amateurs who transmit less than 175 hours a year at 20 watts Effective Radiated Power or less, are required to submit forms to the government for each antenna they have. Multi-band antennas require multiple submissions of forms.

For instance, a tri-band Yagi antenna for 20, 15 and 10 meters requires three separate submissions. And if any changes to an antenna is made, all of the paperwork must be resubmitted.

But wait. It gets worse. If transmission are made from an antenna for more than 175 hours a year or with an Effective Radiated Power greater than 20 watts then it appears the bureaucracy involved is even more complex. You can find out just how bad it is at

tinyurl.com/NoticeForTxAntennas.

For the Amateur Radio Newsline, I'm Skeeter Nash, N5ASH, reporting from Jonesboro, Arkansas,

--

According to what we are hearing, the Belgian national amateur radio society's known as the UBA has been attempting to get these strict antenna rules modified, but to date with little to no success. (Southgate, UBA Website)

**

RADIO LAW: FCC ACCUSES REPEATER THAT'S BEEN OFF THE AIR OVER A DECADE OF INTERFERENCE TO NEW RADAR SYSTEM

How can a repeater that's been off the air more than a decade and a half be creating interference to an aircraft radar tracking system that may not even be on the air yet? That's what a lot of hams want to know after educator Gordon West, WB6NOA, showed and partially read a warning letter on the Tuesday, May 1st edition of the netcast Ham Nation. A letter that he received from the FCC and one that appears to accuse him of operating a repeater on the 23 centimeter band that's causing interference to a radar system that the FCC won't even talk about. Here's what West had to say as he presented his warning letter to the thousands worldwide that were watching Ham Nation:

--

WB6NOA on Ham Nation: "...I always enjoy it when it say Certified Mail. Federal Communications Commission, Enforcement Bureau. And here it's a Warning Notice from the Commission that went to a slew of Southern California Repeater operators who own 1.2 GHz repeaters and I haven't had my 1200 MHz repeater on the air for fifteen years, yet they say that I operate on the air on 1.2 GHz and I'm interfering with the FAA radar.
--

We asked West why he thinks he received this letter regarding a repeater that's been off the air for years:

--

WB6NOA To Newsline: "The Warning Notice Federal Communications Commission Enforcement Bureau, Western Region, L.A. District Office, out of Cerritos (California) begins: `Warning Notice. You are receiving this warning notice because you operate an Amateur Radio Service repeater in the 23 centimeter band in the Los Angeles California county area. This office has received information that amateur radio repeaters have been causing harmful interference to Federal Aviation Administration operations in the 23 centimeter band at San Pedro, California.'

"The remaining paragraphs go on to scare the living daylights out of you that any further operation could create some real problems for both the FAA as well as the offending operator.

"Interesting though is that this letter went to many of us who at one time may have had a repeater, but the coordination is closed and the repeater has been off the air for me up to fifteen years yet we are still getting this notice an a pretty strong letter to come right out of nowhere indicating that we have been potentially interfering with the radar."

--

So what is it that the FCC says hams are interfering with? In reality, nobody but the government really knows for sure.

According to one report attributed to the ARRL, the Federal Aviation Administration is deploying a new generation of Common Air Route Surveillance Radar that operates in the 1240 to 1300 MHz of the 23 centimeter band. The Amateur Service allocation in this band is on a secondary basis, with aeronautical radionavigation and several other services primary in the United States Table of Frequency Allocations.

The FCC rules require that amateur stations operating in the 23 cm band may not cause harmful interference to stations in the Radionavigation-Satellite Service, the Aeronautical Radionavigation Service, the Earth Exploration Satellite Service or the space research service. Nobody is arguing with that. What is questionable are letters being sent to hams telling them that they are the source of interference to this new radar system even if they or their repeaters have not been on 23 centimeters in years.

If you are a repeater owner or 23 centimeter operator anywhere in the United States and have received a letter similar to that described by Gordon West, then we ask you to send us a copy along with any reply that you sent to the FCC. Our mailing address and e-mail will be presented at the end of this week's newscast. We promise to bring you a follow-up in a future Amateur Radio Newsline report.

Note: You can see and hear WB6NOA describe the FCC Warning Notice he received on Ham Nation episode #46 which can be viewed or downloaded at twit.tv/hn (ARNewsline(tm))

**

INTRUDER WATCH: WHISTLING SIGNAL FOUND ON 40 METER BAND

Alex Cete, OZ9AEC, in Ribe, Denmark, says that has found a strange whistling signal in the 40 meter band. It sounds like this:

--

Audio of whistling signal.

--

The strange whistle-like signal was received on 7.013 MHz using GQRX software defined radio receiver and a Funcube Dongle equipped with a shortwave converter. The signal appears to be amplitude modulated with suppressed lower side band.

Amateurs who have heard it are uncertain of its origin, but some suspect it might be from an ionosonde. Others speculate that it could be a new form of digital numbers station. (Southgate)

**

2012 OLYMPICS: UK REGULATOR OFCOM ISSUES PROPOSED ANTI-INTERFERENCE RULES FOR 2012 OLYMPIC GAME VENUES

UK Telecommunications regulator Ofcom have issued a notice dealing with proposed regulations that will enable prompt enforcement action for interference cases that affect the 2012 Olympics. One that affects every citizen that operates two way radio gear or even unintentional radiators.

The Proposed Regulations set out a requirement that applies to apparatus in relation to a Games' "event zone." Where the use of a given apparatus does not meet requirements of causing zero interference to communications within an Olympic venue Ofcom may serve on the person in possession of the apparatus a notice prohibiting its use. Breach of such a notice would be considered to be a criminal offence. The draft regulations designate 25 to 35 km radius around all major venues across the UK, including football stadiums, where enhanced enforcement could apply.

The announcement follows last week's Ofcom announcement of restrictions to the 70cm, 2.3 and 3.4GHz amateur bands. The new proposal would apply to anyone, ham or non-ham, within the range of the Olympic venues. (RSGB, others)

**

2012 OLYMPICS: RSGB SAYS GAMES A GOOD WAY TO PUBLICIZE HAM RADIO

Meantime, the Radio Society of Great Britain calls the upcoming Olympics a great chance for ham radio to show its colors. Jeremy Boot, G4NJH, has that part of the story from Nottingham in the U-K:

--

The London 2012 Olympic and Paralympic Games provide an outstanding opportunity to publicize amateur radio. To that end, the RSGB negotiated a very limited number of special prefixes starting with 2 Oscar One Two followed by a single letter suffix.

The idea is for these calls are given an extensive airing over the Olympic period this summer. Special stations are already planned for London, 2O12L, and Wales, 2O12W, and there will be a special callsign for the National Radio Centre.

Groups in Scotland and Northern Ireland are encouraged to take advantage of the special callsign secured for their region.

I'm Jeramy Boot, G4NJH.

--

If you are a ham radio group in Scotland or Northern Ireland and are hearing this newscast, you can apply for use of one of the special Olympic call signs by contacting Bob Whelen by e-mail to G3PJT (at) btinternet (dot) com. (GB2RS)

RADIO POLITICS: SEN. GRASSLEY LIFTS HOLD ON FCC COMMISSION LICENSEES

The FCC may soon get two new commissioners and be back up to its full complement of five members. This following an announcement by Senator Chuck Grassley of Iowa, that he is lifting his hold on the two nominees, Jessica Rosenworcel and Ajit Pai.

Grassley has been seeking documentation from the commission on an issue unrelated to the nominees. He specifically wanted to know about about interference concerns to the Global Positioning System from the proposed LightSquared wireless broadband project.

While the documents he's obtained so far raise more questions for him, Grassley said in a statement he intends to lift the hold on the two FCC nominees, but also continue his investigation into both the FCC and Lightsquared.

If confirmed, Rosenworcel would take the seat of former Commissioner Michael Copps who resigned in December, while Ajit would replace former Commissioner Meredith Baker. Baker left the agency in May 2011 to join Comcast. (RW)

**

RESCUE RADIO: NEBRASKA HAMS LAUDED FOR SKYWARN SEVERE WEATHER WATCH

When normal communications systems in Nebraska were taken off line by a recent spate severe storms and tornadoes, local officials had no way of calling of getting damage assessment. That's where ham radio operators came to the rescue as we hear from Amateur Radio Newsline's Norm Seeley, KI7UP.

--

Tom Reis is a Skywarn coordinator for the National Weather Service. He says that radio amateurs in Nebraska are a valuable asset who can get out messages that help save lives.

In a interview with the Atlantic, Reis said that the National Weather Service recognizes the importance of accurate ground information. He says that there are a variety of methods to get that information to them and that one of those is via amateur radio.

According to the NWS, ham radio operators can confirm sightings of severe weather as it approaches and offer damage assessment after the storm passes. This while at the same time providing communications support to local officials.

Reis says that this shows how amateur radio operators provide a service for their community in a variety of different ways. He also notes that it doesn't take much to become an amateur radio operator and people of all ages enjoy the hobby.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, where we have mostly dust storms in Scottsdale, Arizona.

--

It should be noted that there is a big difference between trained radio amateurs in the SKYWARN program and the so-called storm chasers that we have been hearing so much about in newscasts and reality TV shows these days. Unlike storm chasers who make a living photographing severe weather incidents or are members of the general public who are simply out for a thrill, SKYWARN associated hams are educated weather observers. Their job is not to go racing after tornadoes as do storm chasers. Rather they are unpaid volunteer radio amateurs who keep their eyes and ears open for severe weather outbreaks. They then report what they see and hear via ham radio to the National Weather Service. The NWS takes this information and includes it into forecasts that invariably save lives. (Atlantic, ARNewsline)

**

RESCUE RADIO: DOCUMENTARY TELLS STORY OF BROADCASTERS ROLE IN MISSOURI TORNADOES

A University of Alabama instructor has produced an award-winning, eight-minute documentary on the role of local television broadcasters in saving lives during the massive tornadoes that hit Tuscaloosa and Joplin, Missouri last year.

Chandra Clark, an instructor in the department of telecommunications and film, worked with director Scott Hodgson of the University of Oklahoma to make "Tornado Emergency: Saving Lives."

Clark said the inspiration for the documentary came as a response the Federal Communications Commission's proposal to sell off a large portion of the broadcast spectrum. Clark said the sales could limit some of the resources broadcasters have to reach the public.

The mini-documentary has already garnered a prestigious Telly Award. The film was also awarded a Best of Competition Award by the Broadcast Education Association's Festival of Media Arts. (TVB)

**

RESCUE RADIO: UK RAYNET AND APCO-UK SIGN MOU

The United Kingdom's RAYNET group and British APCO have signed a Memorandum of Understanding. One that recognizes the common objectives of both organizations in the promotion and influencing of public safety, civil contingency, information management and communications

In the Memorandum of Understanding RAYNET and APCO set out a Schedule of Agreements which sets out some of the ways in which both organizations will work together. This includes networking opportunities and invitations to attend management meetings; website content sharing; joint working and sharing of publications; and engaging RAYNET in regional and national events.

RAYNET which is an acronym for the U-K based Radio Amateurs' Emergency Network is a national voluntary communications service provided for the community by licensed radio amateurs. It was formed in 1953 following Great Britain's East Coast floods, when radio amateurs provided much of the emergency communications. (RAYNET)

**

ENFORCEMENT: ANOTHER UNLICENSED FLORIDA BROADCASTER FINED $20000

Another unlicensed broadcaster in Florida has been dinged $20,000 by the FCC. In a Forfeiture Order, the FCC has told Robens Cheriza to pay the fine for operation of an unlicensed radio transmitter on the frequency 107.3 MHz in the city of West Palm Beach.

Back on February 1st, the Enforcement Bureau's Miami Office issued a Notice of Apparent Liability for Forfeiture in the amount of $20,000 to Cheriza. Cheriza never filed a response to the proposed fine. So based on the information before it the forfeiture was affirmed with Cheriza given the customary 30 days to pay up or to file an appeal. (FCC)

ELECTRONIC THEFT: CALIFORNIA COPPER THIEVES EXPAND TO FIBER OPTICS

Copper thieves in California have expanded to stealing glass as well. In this case we are talking about glass as in fiber optic cable. In one case some AT&T customers in the city of Alpine experienced disruptions in phone and Internet service after thieves stole copper and fiber optic wiring from underground lines.

According to Sgt. Joseph Passalacqua, the thieves took about 75 feet of 600 strand fiber optic cable along with the copper wiring. To accomplish this the robbers climbed into a manhole and cut into the underground pipes. An AT&T spokesperson said that three conduits carrying fiber optic or copper cables were damaged and that the vandalism affected some cellphone users as well.

Sergant Passalacqua said that Internet service was down at both the sheriff's Alpine and Pine Valley substations, but that public safety was not affected.

The theft of copper wiring and other metals like bronze and aluminum has proliferated over the years. Thieves commonly steal the precious metals in order to sell it to recyclers. However the theft of fiber optic lines is something new and could signal a developing market for this kind of product. (Published news reports)

**

EMERGING TECHNOLOGY: 5 MHZ PROPAGATION STUDY RELEASED IN UK

A paper entitled Comparison of Propagation Predictions and Measurements for Mid-Latitude HF Near-Vertical Incidence Sky Wave Links at 5 MHz has just been published in the peer-reviewed, academic journal, Radio Science. Authored by Dr. Marcus Walden, G0IJZ, the paper compares near-vertical incidence skywave or NVIS measurements from the U-K 5 MHz

beacon network with High Frequency propagation predictions using VOACAP and ASAPS software. Further information, including a link to the paper, can be found at tinyurl.com/7ahx8vt. (GB2RS)

**

HAM RADIO IN SPACE: AMSAT PUTS OUT FIRST CALL FOR SYMPOSIUM PAPERS

AMSAT has put out a first call for papers to be presented at the 2012 AMSAT Annual Meeting and Space Symposium to be held in Orlando, Florida.

Proposals for papers, presentations and poster presentations are invited on any topic of interest to the amateur satellite community. Abstracts and papers including a tentative title should be sent to Dan Schultz, N8FGV, by e-mail n8fgv (at) amsat (dot) org.

The 2012 AMSAT Annual Meeting and Space Symposium takes place the weekend of October 26th to the 28th at the Holiday Inn, Orlando Airport Hotel. (AMSAT, N8FGV)

**

HAM RADIO IN SPACE: DELFI C3 DO-64 CELEBRATES 4 YEARS IN SPACE

The Delfi-C3, DO-64 satellite has celebrated 4 years on-orbit. The 3-unit CubeSat, developed by the Technical University of Delft in the Netherlands was launched on April 28, 2008. The nanosatellite has since performed technology demonstration experiments for the space industry in the Netherlands. It still transmits its telemetry and measurement data which can be received using simple amateur radio equipment and using the RASCAL software. An in-depth article on the tiny bird is on-line in Google translated English at tinyurl.com/Delfi-C3-4th-Anniversary. (Southgate)

**

HAM RADIO IN SPACE NEW CUBESAT LAUNCHER DEVELOPED AT NAVAL POSTGRADUATE SCHOOL

The Space Systems Academic Group at the US Naval Postgraduate School has developed the NPSCubeSat Launcher or NPSCuL.

NPSCuL is described as an auxiliary payload platform. It is designed to allow multiple CubeSats to be launched aboard rockets as secondary payloads. This means that the launch rocket would be able to carry satellites in onboard space that would otherwise be unused.

NPSCuL can accommodate up to 24 CubeSats in a single Secondary Payload Adapter. On reaching the desired orbit spring-loaded doors will release the satellites one-by-one.

A first flight is planned for August 2012 which will carry 11 CubeSats. (ANS)

**

RADIO SPORTS: ARRL CREATES NEW VHF - UHF CONTESTS

In radiosports news, the ARRL Programs and Services Committee have approved a rule change for ARRL VHF+ contests effective beginning in 2013.

One of the most controversial changes is the creation of a Single-Op FM-only category. Here, operators will be limited to 100 Watts maximum output in the FM mode on the 50, 144, 222 and 440 MHz bands. Exact rules have not been announced so it's not yet known if the contest will have restricted frequencies or if it will be a free, anything goes competition.

Also created by the committee is a new Single-Operator category for stations permitted up to 100 Watts PEP on 50 and 144 MHz, 50 Watts PEP on 432 MHz. This for the more traditional contesting modes.

These changes will apply to the January, June, and September contests -again, beginning with the 2013 January VHF Sweepstakes. It should be noted that past attempts to create FM only contests have not succeeded. This is believed primarily because both the use of repeaters and of national calling channels where all the FM action is, have been declared off-limits. (VHF Reflector, ARRL)

**

DX

In DX, ZS6JR and ZS6DJD should be operating from Mozambique for seven to ten days starting on the 3th or 4th of May. Operations will take place next to a small lake 400 km north of the capital using vertical antennas and a Hex Beam on 40 through 10 meters. Callsigns have not been announced. QSL as directed on the air.

An international team of operators will be active as 7-Oh-6-T from Socotra Island through May 17th. They plan to have six stations on the air at any given time. Activity will be on 160 through 10 meters using CW, SSB and RTTY. QSL via UA3DX.

A group of operators from Japan will be operational from the Maldives between May 11th and the 16th. Activity will be on 160 through 6 meters using CW, SSB, RTTY and PSK. QSL via their home callsigns, either direct or via the bureau.

E51WL in the North Cook Islands has been heard on 6 meters. Keep an ear open for him just before 2300 UTC on or around 50.120 MHz. QSL as directed on the air

Members of the Crimean Contest Radio Club will be active from the Ukrane as EM67J through May 15th. Their operation is to commemorate the 67th anniversary of the "Victory in the Great Patriotic War." QSL's via K2PF. And less we forget, electronic logbooks will be upload to Logbook To The World in late May or early June.

Lastly, DL4HG and DL5XAT will be on the air as 9H3OG and 9H3TX, respectively, from Malta's Gozo Island between November 21st and the 26th. Their operation will include the CQ WW DX CW Contest on November 24th and 25th using the callsign 9H3TX. QSL 9H3OG via DL4HG and 9H3TX via DL5XAT.

(Above from various DX news sources)

**

THAT FINAL ITEM: FAA MAY LOOK AGAIN AT BANNED RF DEVICES ON PLANES

And finally this week, using your laptop, iPad or Kindle during a commercial U-S flight might become a reality in the not to distant future. This with word that the Federal Aviation Administration may be willing to take a second look at it's policy on electronics usage aboard airplanes. Amateur Radio Newsline's Fred Vobbe, W8HDU, reports:

--

While some airlines permit very limited use of wireless devices one an aircraft is at altitude, actual availability is quite limited. But according to a recent report credited to columnist Nick Bilton and the New York times, the FAA has decided to take a updated look at the use of personal electronics on planes.

The report continues by quoting FAA spokesperson Laura Brown. She told the press that with the advent of new and evolving electronic technology, and because the airlines have not conducted the testing necessary to approve the use of new devices, the FAA may be taking a fresh look at the use of personal electronic devices, other than cell phones, on aircraft.

Currently, airline passengers must turn off any electronic device that can transmit or receive a radio signal that cannot be disabled. While, the FAA indicates that it is open to testing new devices, it will more than likely be a long road before any substantive changes take place. This is because every airline giving thought to allow such operations would first have to test one of each version of a device on each of model of every aircraft in its fleet.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU.

--

Whatever happens, the FAA has already been quoted as saying that it will not budge on its policy of not permitting use of mobile phones during a flight. And don't even consider trying to use a ham radio H-T on a commercial airliner. Even if that one were lifted by the FAA the domestic U-S airlines would likely keep a ban in place on the use of ham gear and other two way radios on board their flights. (Tech Trends)

K7AGE goes to Las Vegas

Randy, K7AGE, attended the National Association of Broadcasters convention in Las Vegas during the third week in April.

While there Randy produced three new videos.

The first video is Randy interviewed by Kirk Harnack of This Week in Radio Tech, as seen on TWiT.tv. Kirk and Randy talk about their first meeting, ham radio and computer networking.

The second video is from the Ham Radio Reception hosted by Heil Sound. The reception draws 700-800 hams from the convention for a time to relax, have a drink, and hope to win one of the $18,000 worth of raffle prizes.

The last video, Randy explains his day job and looks at the Miranda booth at NAB

These videos, and more, are located at

http://www.youtube.com/user/K7AGE

A milestone for the ILLW scored in the USA

The West Side Amateur Radio Club of Los Angeles W6A is the 200th registration for this year's International Lighthouse & Lightship Weekend with its members to set up at the Port Fermin Lighthouse.

The Stick Style lighthouse is an early Victorian architectural method characterised by its gabled roofs, horizontal siding, decorative cross beams and hand carved porch railings. A decade ago the lighthouse was restored.

The entry by the West Side Amateur Radio Club put the USA on 28 registrations, behind Australia with 38 and Germany 33, followed by England 16, and The Netherlands on 13 with the total countries so far involved nearing 30.

International Lighthouse & Lightship Weekend in a fun event. It will be held for the 15th time on August the 18th and 19th. Check it out and register for the weekend by visiting the website ILLW.NET

Results Announced For The John Moyle Memorial National Field Day 2012:

Posted: 03 May 2012 05:21 PM PDT
http://www.eham.net/articles/28209

This year's entries came from every Australian mainland call areas, as well as from Tasmania and New Zealand. The total number of logs submitted was 140. This was an increase from the 129 logs received last year. It was good to see several ZL stations take part this year, and three stations submitted their log. Well done to all who took part. I have included in the results all of the logs that I received and if any are missing, they are completely lost. I can only offer my apologies to anyone so affected. I am sorry if your log is missing, but it did not get it to me despite my most careful procedures and cross checking.

//
ACMA Undertakes Major Regulatory Action in Adelaide:

Posted: 03 May 2012 05:18 PM PDT
http://www.eham.net/articles/28208

The ACMA confirmed today that a major compliance action was undertaken in Adelaide in the past week. Reports in the Adelaide Advertiser suggesting that Ham Operators were involved have been denied by the ACMA. Monitoring of the radio spectrum from ACMA infrastructure in Adelaide confirmed that a number of users (Pirates) were active on frequencies licensed to other parties. Intelligence gathered through this monitoring indicated that these individuals possessed equipment programmed with numerous frequencies. Enquiries made by the ACMA found that these users did not hold ACMA licences for these frequencies. The radios operated by the individuals involved in this matter had been programmed with a number of frequencies which were licensed to various organisations. The ACMA received a report of substantial interference from a licensee although the extent of the disruption to their communications is not known.

//
Amateur Radio Operators Play Big Role in Tracking Storms, Tornadoes:

Posted: 03 May 2012 05:13 PM PDT
http://www.eham.net/articles/28207

When the tornadoes in April 2011 were ripping across the landscape of Northeast Tennessee, real-time information was being relayed to the

National Weather Service, which then gave emergency warnings to residents in the storm's path. Much of that real-time information came from amateur radio operators, said Charlie Stuchell, a professional radio reporter as well as an amateur radio operator. On Saturday, there's an opportunity for anyone interested in the hobby to obtain their entry-level FCC amateur radio license. Stuchell, a member of the Carter County Amateur Radio Club, said the organization will host an eight-hour class and participants will take a 35-question test to become certified. "So many people are concerned about emergency communications and being prepared if we have a tornado like we did last year," Stuchell said. "We were talking to people in Greene County" who gave real-time information pinpointing what areas were getting hit, he said. Stuchell said there are two amateur radio organizations -- SKYWARN, a storm spotter program through the National Weather Service, and the Amateur Radio Emergency Service, a statewide program operated by the Amateur Radio Relay League. "SKYWARN plots the storm that's coming and they get that information from amateur radio operators called spotters," he said.

High-Performance HF Transceiver Design:

Posted: 03 May 2012 05:10 PM PDT
http://www.eham.net/articles/28206

High-end ham equipment reaches new levels of performance using state-of-the-art technology and design tricks: The article that appeared in this magazine and in EDN last year about ham radio in the 21st century generated a lot of interest and a lot of questions about various aspects of the hobby. This article grew out of that interest, but is not strictly about ham radio. It is about the design tradeoffs that engineers make every day in designing all kinds of electronic equipment. HF transceivers are used as an illustrative example.

7O6T Yemen DXpedition Now Underway:

Posted: 03 May 2012 04:58 PM PDT
http://www.eham.net/articles/28202

The Daily DX is reporting that the 7O6T Yemen DXpedition began at 2100 UTC Monday, April 30 and will continue through 2100 UTC May 15. Yemen currently sits at #5 on DX Magazine's most wanted list, behind North Korea, Navassa, Bouvet and Heard Island. The ARRL DXCC Desk will review the 7O6T DXpedition's documentation before granting approval for the operation to count for DXCC credit.

BSA Morse Code Interpreter Strip

Posted: 04 May 2012 09:23 AM PDT
http://forums.qrz.com/showthread.php?344896-BSA-Morse-Code-Interpreter-Strip&goto=newpost

The Boy Scouts of America just announced a new "Interpreter Strip" for
Morse Code. An "Interpreter Strip" on the uniform means that the Scout or
adult leader is able to communicate in a particular language. The
requirements for the Morse Code strip closely follow the requirements for
other languages, such as francais, espanol, and Klingon. (Well, the
Klingon one is actually unofficial, but Morse Code is official.)

http://blog.scoutingmagazine.org/201...-past-in-code/

This will be a good incentive for my Cub Scout to learn the code, since his
Cubmaster (me) will be wearing one!

Amateur Radio Newsline report number 1812 with a release date of May 4th,
2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Antenna restrictions get worse in Belgium; A new whistling intruder is heard on 40 meters; U-K telecommunications regulator Ofcom issues new rules to prevent radio interference to the 2012 Olympics and Nebraska hams are lauded for their severe weather watch operations. Find out the details are on Amateur Radio Newsline☐ report number 1812 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: ANTENNA RESTRICTIONS IN BELGIUM GET TIGHTER

If you think it☐s hard to put up an antenna in some locations here in the USA its nothing in comparison to what☐s happening in Belgium. That☐s where

antenna restrictions have gotten even tighter than before and its happening with the government blessings. In fact, the rules are so stringent that it could force some hams off the air. Amateur Radio Newsline□s Skeeter Nash, N5ASH, reports:

Display Day in Kyabram

Posted: 05 May 2012 05:05 AM PDT
http://forums.qrz.com/showthread.php?344985-Display-Day-in-Kyabram&goto=newpost

Display day in Kyabram

Layout

Date : 03/06/2012

Location : Kyabram community Church

corner of Crichton Road and McEwin Road Kyabram

Time : Setup from 10:30 - 12:00 am

Public : 12:30 am - 3:00 pm (12:30 hrs - 15:00 hrs)

Frequency HF 7.110 mhz

Frequency VHF 146.650 Mhz (-) offset

Mount Wombat (VK3RGV Node number 6992

The plan is to setup a dipole of 15 meter and 40 meter

on a centre feed for a on air radio also a 2 meter arial as well to
demonstrate

the 2 meter with repeater and IRLP capability I am hoping to get

stations to join us on the IRLP as well as on the 40 Meter

We will be showing the use of radio to the community at large and hoping
they embrace our hobby

I will also like to demonstrate the ease of making a 2 meter arial and a

40 Meter arial as well as giving people the chance to see some types of

transmitters that we use and if we can bring some of the locals who

wish to be involved on as a second operator

I would also like it if we could demonstrate that the use of cw is still
alive today

We will also be able to show how to get involved in radio

and give some information to the public to improve our visibility

in the public and also shocase our club to the area

Lets not miss a chance to keep radio alive and get more people to be able
to enjoy our

hobby of radio and let new and younger members enjoy communications

I would thank you for your support for our common interest and goal

MARS Crossband Operations May 12, 2012

Posted: 04 May 2012 12:44 PM PDT
http://forums.qrz.com/showthread.php?344919-MARS-Crossband-Operations-May-12-2012&goto=newpost

ANNUAL CROSSBAND MILITARY/AMATEUR RADIO

COMMUNICATIONS TEST

The Army, Air Force, Navy, Marines and Coast Guard will conduct crossband
tests on May 12, 2012. This will give military and amateur radio operators
the ability to communicate with each other. Military stations will transmit
on military frequencies, and listen on amateur frequencies. During their
transmission, the military station will state what amateur radio frequency
it is receiving messages. The amateur radio operator will transmit replies
on that amateur radio frequency and listen for replies on the appropriate

military frequency.

The ex USS Yorktown (CV-!0) will be be on the air from 8 AM to 12PM EDT and will use the ship☐s callsign NWKJ. The dial frequencies USS Yorktown will be transmitting on are:

4010.0 khz LSB

7348.0 khz LSB

14467.0 khz USB

21758.5 khz USB

A complete listing of military stations participating, together with details on how to get QSL cards and certificates for copying the Secretary of Defense message can be obtain by going to the following website:

http//www.navymars.org/ and clicking on ☐broadcasts☐ then ☐Chief MARS Broadcasts☐ and reading reading the CHNAVMARCORMARS BCST AF DAY CROSSBAND TEST

Malta DXpedition seeks members / tourists

Posted: 04 May 2012 07:28 AM PDT
http://forums.qrz.com/showthread.php?344876-Malta-DXpedition-seeks-members-tourists&goto=newpost

Hello,

Last year I went on DXpedition to Malta with VRZA Dutch Holidays for 2 weeks, Its an experience

you don't want to miss. We had the permission of the hotelowner to install monoband antenna's up

on the roof for 80m to 10m band. Adrenaline kicks in when u just installed an antenna and you

push the powerbutton on the transceiver and you call CQ CQ this is 9H3JN and you get pileups

that just wont stop hi! Yes you can have your own 9H3 callsign!

Its not only hamradio. You also have the possibility to enjoy the island of Malta and his rich

culture's, beautifull churches, nice beaches, nice people and fun at karaoke bars hi.

And if you want to do something alone or go somewhere together is no problem at all, you're not

stuck together like a group.

For the Malta DXpedition for this year (the last year!) we are looking for participants /

tourists. Estimates for June 1st!

source: VRZA website.

For the last time we VRZA Holiday's will go to MALTA. Warm weather and a fully equipped shack

and nice excursions. VRZA Holiday's will make it happen. Do you also want to come along? Already

for the 25th time you can go to MALTA from 14 until 28 sept. or 24-Sept. until 8 oct. or the

entire period. We stay on half board in EURO CLUB hotel in Qawra. Request the registration form

and you'll be amazed at the price. Information only through malta@vrza.nl and everything is

arranged for you. But .... now for the first time this year we have an overlap of 4 days between

Sept. 24 and 28, for which we want to organize a fantastic party with all participants and

because of this the 25th anniversary. It is also intended that in addition to your own 9H3 call,

the requested special anniversary call 9H925 throughout the period can be used.

SARL NEWS - SUNDAY 6 MAY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 17570 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

SA AMSAT SPACE SYMPOSIUM IN DURBAN ON SATURDAY

PROPAGATION STUDY ON 5 MHz PUBLISHED

NATIONAL AMATEUR RADIO DAY

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SA AMSAT SPACE SYMPOSIUM IN DURBAN ON SATURDAY

If you have not yet booked for the SA AMSAT Space Symposium to be held at the University of KwaZulu Natal this Saturday, 12 May, do it now. The programme is packed with presentations and demonstrations covering a wide range of subjects of interest to radio amateurs and persons who have an interest in science and technology.

Telkom is the lead sponsor making it possible to have speakers from all over South Africa. The SA National Space Agency is sponsoring the attendance of students and learners and a number of companies have come on board with attendance prizes. From RF Design there are four Tiny track APRS boards to be won, Comtest and RS are donating multi meters. Visit www.amsatsa.org.za for the programme, list of attendance prizes which is growing everyday and registration form. The early bird registration fee for SARL and SA AMSAT members has been extend till Monday evening.

PROPAGATION STUDY ON 5 MHz PUBLISHED

A paper entitled Comparison of propagation predictions and measurements for mid-latitude HF near-vertical incidence sky wave links at 5MHz has just been published in the peer-reviewed, academic journal, Radio Science. The paper, by Dr Marcus Walden, G0IJZ, compares near-vertical incidence sky wave, or NVIS, measurements from the UK 5 MHz beacon network with HF propagation predictions using VOACAP and ASAPS software. A link to the manuscript can be found on www.rsgb.org.uk.

The SARL has submitted a proposal to ICASA to allocate spectrum in the 5 MHz band for radio amateurs in South Africa to do propagation research on this band. An amateur allocation in the 5 MHz band is on the ITU WRC-015 agenda.

One of the problems with Amateur allocations at 40 and 80 metres is that the two bands are an octave apart in frequency. At stages when the MUF (Maximum Usable Frequency) falls below 7 MHz in the 300 to 500 km distance range, the LUF (Lowest Usable Frequency) is still above 4 MHz. This is especially true in the late afternoon/early evening. This leaves Radio Amateurs without a direct workable HF frequency over these moderate distances. When the MUF falls below 7 MHz, the lower portion of 5 MHz is perfectly in the OTF (Optimum Traffic Frequency) range that then stretch from about 4,9 to 5,6 MHz range. Ean Retief, ZS1PR, found that in studies carried out in a commercial application, that during times of low Solar Flux, 5 MHz could be used right through the day in preference to frequencies just below 7 MHz. He also observed that in winter the band is very quiet during the day and excellent for Packet radio as well phone. In times of high Solar Flux 5 MHz can be used from sundown

right trough the night till well after dawn when there is no daytime "skip zone" on 5 MHz.

The SARL is following up with ICASA and has asked the agency to fast track the application.

NATIONAL AMATEUR RADIO DAY

At the recent strategic indaba, the Council of the SARL decided to set a day aside to be called National Amateur Radio Day, celebrating Amateur Radio as a National Resource and its diversity as the most exciting of all scientific hobbies.

This year National Amateur Radio Day will be held on Saturday 16 June which is also youth day. Council selected the date as the youth is the future of amateur radio. The day will however not detract from older and senior amateurs. It will be all inclusive.

The objective is to take amateur radio to the public by exhibiting and doing live demonstrations of the various aspects that make amateur radio great and a fun thing to be part of. It is planned that the activity be run from 09:00 - 16:00.

Council will finalise the programme at it meeting this week. Be sure to tune in to SARLNEWS next Sunday to get all the details and watch out

for a SARL letter in your email inbox after that and on the web.

RADIO AMATEUR EXAMINATION NUMBERS ON THE WEB

Candidates who have registered to write the Radio Amateur Examination on Thursday 24 May can look up their examination number and venue where the examination will be written on the web. Visit www.amateurradio.org.za/RAE.htm or link from the news item on the SARL home page on www.sarl.org.za.

168 Candidates have registered for the May examination. The exam starts at 19:00 and candidates have three hours to complete the two sections of the examination. Candidates should report to the examination centre by 18:30 and bring their ID book or other suitable identification. We wish candidates success in the exam.

EME WORKED ALL CONTINENTS

On Tuesday evening 1 May, Andre van Deventer, ZS2BK, worked PY2GN via EME and this was the sixth QSO required for the Worked all Continents Award. Andre has now made an EME contact with a station in Africa, Europe, Asia, Oceania, North and South America.

Congratulations to Andre.

CONTEST NEWS

SARL VHF/UHF Contest results.

Only 8 logs were received which consisted of 6 Home stations and 2 Club stations. Where were all the other club stations? Geoff Levey, ZS6GRL, SARL Contest Manager, would like to issue a challenge to all the clubs countrywide to take part in the next leg in September 2012. It is up to the clubs to generate interest amongst their members to the wonders of VHF/UHF.

Analog results.

Rover station. ZS6MHH 1 448 points

Single operator Home stations. 1st - ZS1NAZ 112 890 Points 2nd - ZS6A 31 455 Poins 3rd - ZS6PX 12 746 Points

Multi Operator Club Station. 1st - ZS6WR 43 932 Points 2nd - ZS6MRK 40 733 points

Digital results.

Single operator home station. 1st - ZS5Y 106452 Points 2nd - ZS6A 102438 Points 3rd - ZS2ACP 100775 Points

Multi Operator Club Station. 1st - ZS6MRK 20 556 Points 2nd - ZS6WR 5 346 Points

Congratulations to all the winners. Thanks go to the stations who sent in a log. A special word of thanks to Tienie Herbst, ZS6MHH, who went

the extra mile.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity remains at moderate levels. The sun's surface is peppered with smaller, fairly quiet sunspots.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 51.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 10 m not far behind.

Please visit www.spaceweather.co.za for further information.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 10 m not far behind.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 6 May - This afternoon, ZS3 Sprint, 14:00 to 15:00 UTC. 12 May - SA AMSAT space symposium; visit www.amsatsa.org.za for details and registration. 12/13 May the AWA Valve QSO party, 15:00 to 19:00 CAT. 13 May - Log sheets for ZS3 Sprint to to be in to ZS3 Sprint, PO Box 1049, Kathu, 8446 or by e-mail to zs3nc@qsl.net. 19 May - 14:00 PEARS AGM at the Italian Club, Charlo, Port Elizabeth with a boot sale prior to the AGM with a bring and braai afterwards. 28 May - Logs for AWA Valve QSO party to be in to andyzs6ady@vodamail.co.za or AWA of Southern Africa, P O Box 12320; Benoryn 1504.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 175,70 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Johan Marais, ZU1JM.

Thank you for listening, 73.

/EX

//
Students Touch Space with Balloon Experiment:

Posted: 04 May 2012 06:07 PM PDT
http://www.eham.net/articles/28212

RIDGELAND, MS (WLBT) - A group of Ridgeland middle schoolers are taking learning to new heights. Recently they conducted an experiment that is quickly gaining them attention, and almost a world record. On March 3, students in the science and the radio and technology club, and their teachers launched a giant weather balloon, with experiments and a digital camera, into the air in Gluckstadt. The goal of the students was to get the balloon as high as they could into the stratosphere. "We had 14 different experiments we sent to near space," said Science Department chair Bobby Robinson. "It has communications gear, tracking gear from amateur radio that allows us to chase it down and recover everything," says History teacher Bill Richardson. Students tracked the balloon, and followed it through re-entry, landing in Asheville, Alabama, 300 miles away. When they looked at the camera, they were amazed. "We took about 1300 pictures, some of them were absolutely amazing, literally out of this world." The images showed the edges of space, a middle school science project that soared 18 miles into the air. "We talked to pilots and so forth that have been that high and they say yeah that's the real thing and you can see the very thin blue atmosphere and you're out of the oxygen, there's no oxygen up there," said Richardson. The experimental camera even caught a glimpse of a high speed light particle, never captured before. "I even showed this to a guy that works at NASA; I sent it to him and he called me back, he's and astrophysicist. He goes, I've never seen this, never seen anything like it," said Robinson. The students also came close to breaking a world record, while tracking their balloon by radio, becoming number two in the world for VHF telemetry distance reception. (HAM radio operators could hear the beacon in their balloon that far away!)

//
Morristown and Technology, Then and Now:

Posted: 04 May 2012 06:06 PM PDT
http://www.eham.net/articles/28211

Are you lost without your cell phone? Do you have the latest model? Can you imagine surviving even one day without it? Today, you can talk to others around the world within mere seconds. There was a time, however, when communication was no faster than horses' hooves. Think of Samuel

Morse, in 1825, painting a portrait of Lafayette in Washington not hearing of his first wife's death in New Haven until four days later, after she was already buried. Morse, known as the father of the American telegraph is immortalized through the Morse Code and the telegraph which made long-distance communication as fast as the electricity passing though a single wire. Perhaps you've played the "telephone game," sending a message through a line of people only to find the original meaning has been completely altered. In large part, that is how history has recorded the true story of the telegraph. Important details have been left out of many history books along the way. Did you know that Morristown, New Jersey was the actual birthplace of the telegraph? Did you know that without Alfred Vail, a Morristown native, Samuel Morse would likely have failed in his attempts at perfecting the telegraph? Did you know that it was Alfred Vail who invented most of the telegraph's recognizable components? It was only through Vail's persistent and inventive nature, and his family's financing of the project, that Samuel Morse was able to achieve his great fame, and wealth. The details of this important story in American history are accurately told at Historic Speedwell, the birthplace of the technology and its inventor. The significance of this village doesn't end there. Speedwell has other claims to fame which can be also be discovered by visiting.

//
Propagation Forecast Bulletin #18 de K7RA:

Posted: 04 May 2012 01:56 PM PDT
http://www.eham.net/articles/28210

Average daily sunspot numbers declined 38 points to 106.7 this week, and average daily solar flux declined nearly 18 points to 116.2. Predicted solar flux is 115 for May 4-6, 110 on May 7-10, 120 on May 11, 130 on May 12, 135 on May 13, 140 on May 14-17, 135 on May 18-21, and 130, 125, 120, 115, 110 on May 22-26 and 105 on May 27-31.

NZ4O MF/HF/6M (600-6 Meters) Radiowave Propagation Forecast #2012-18

Posted: 26 Apr 2012 03:15 PM PDT
http://forums.qrz.com/showthread.php?343968-NZ4O-MF-HF-6M-(600-6-Meters)-Radiowave-Propagation-Forecast-2012-18&goto=newpost

For all of my amateur radio and SWL friends around the globe:

The NZ4O MF/HF/6M (600-6 Meters) Radiowave Propagation Forecast #2012-18
has been published at 0000 UTC on Friday April 27, 2012, valid 0000 UTC
Saturday April 28, 2012 through... 2359 UTC Friday May 04, 2012.

This condensed forecast can also be found on Facebook at

http://www.facebook.com/pages/SolarC...39198369462931

The complete MF/HF/6M forecast can be found at http://www.solarcycle24.org
and http://www.wcflunatall.com/propagation.htm .

Note! This forecast is based upon quiet solar, space and geomagnetic
weather conditions. Geomagnetic storming Kp-5> and energetic proton storms
>10 MeV (10+0) can at times render the forecast temporarily inaccurate.

FORECASTED NORTHERN HEMISPHERE GLOBAL HF CONDITIONS-

Low Latitude- Normal

Mid Latitude- Normal

High Latitude- Normal

FORECASTED SOUTHERN HEMISPHERE GLOBAL HF CONDITIONS-

Low Latitude- Normal

Mid Latitude- Normal

High Latitude- Normal

NORTHERN HEMISPHERE 80, 60, 40, 30 METERS-

East -> West To 2000 Mi/3200 km- Fair To Good

West -> East To 2000 Mi/3200 km- Fair To Good

North -> South To 2000 Mi/3200 km- Fair To Good

South -> North To 2000 Mi/3200 km- Fair To Good

SOUTHERN HEMISPHERE 80, 60, 40, 30 METERS-

East -> West To 2000 Mi/3200 km- Good

West -> East To 2000 Mi/3200 km- Good

South -> North To 2000 Mi/3200 km- Good

N1MM ESM- how to create an alternate "TU + LogIt" to the Enter key?

Posted: 05 May 2012 05:27 PM PDT
http://forums.qrz.com/showthread.php?345049-N1MM-ESM-how-to-create-an-alternate-quot-TU-LogIt-quot-to-the-Enter-key&goto=newpost

Hello All,

I love the N1MM ESM mode. Using CW in the CQ mode, after the contacts Call
and Exchange are entered, then hitting ENTER again does the equivalent of
logging the QSO and sending the F3 message.

I would like to create a similar function key using the key, so that by
hitting this key it does the equivalent of logging the QSO and sending a
different "TU QRZ?" type of message (which is stored, for example, in the
F8 key).

Is this possible? I would think any key could be programmed for (logging
+ "TU"), correct?

Even if I can do that, will it interfere with the ESM mode operation?

I'm only a basic user of N1MM and I have not found what I want to do in the
manual so here I am- any guidance appreciated.

tnx es vy 73,

Chris, NX4N

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th-April, through Sunday, 6th-May there were 222 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5X, 5Z, 6Y, 7O, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VP2V, VP8, VP9, VR, VU, XE, XU, XW, XX9, XZ, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2C, CONWAY REEF (Update). An international team of operators will be active as 3D2C from Conway Reef (OC-112) between September 24th and October 5th. The current list of operators are Hrane/YT1AD (Team leader), David/K3LP (Technical Co-leader), Aleksey/UA4HOX (Organization Co-leader),

Paul/N6PSE (PR), David/WD5COV, Vasily/RW4NW, David/AH6HY, Alan/AD6E,
Alan/K6SRZ (Medical Doctor), Craig/K9CT, Sergej/RZ3FW, George/N6NKT,
Stanislav/LZ1GC, Al/K3VN, Alexander/RW3RN and Peter/PY5CC/PT5XX. Most
of these operators were active from Rotuma as 3D2R last year. Activity
will be on 160-2 meters using CW, SSB, RTTY, SSTV and PSK31. Suggested
frequencies were published in OPDX.1045. QSL via YT1AD, direct (w/SAE
or SASE + 1 USD for normal postage, 2 USDs for Airmail) or by the Bureau.
For more details and updates, visit the 3D2C Web page at:
http://www.yt1ad.info/3d2c/index.html

6O, SOMALIA. A team of Italian operators will be active this week from
from Galkayo, Somalia, as 6O0CW between May 7-18th. Operators mentioned
are Silvano/I2YSB (6O0CW), Vinicio/IK2CIO (6O0IO), Angelo/IK2CKR (6O0KR),
Marcello/IK2DIA (6O0IA), Stefano/IK2HKT (6O0KT) and Gino/IK2RZP (9O0ZP).
Also mentioned are Software developer Giacomo/IH9GPI and Pilot station
Art/IK7JWY. Activity will be on 160-6 meters using CW, SSB and RTTY.
Suggested frequencies are:
CW - 1823, 3530, 7025, 10113, 14050, 18069, 21050, 24891 and 28050 kHz
SSB - 3790, 7056/7125, 14270, 18130, 21275, 24980 and 28450 kHz
RTTY - 7041, 10142, 14080, 18103, 21080, 24915 and 28080 kHz
6m - 50105/CW and 50105/SSB

QSL Manager is I2YSB, direct or by the OQRS. They state on their Web
page [edited]: "The members of Italian Dxpedition Team, after the donation
of an ambulance to the Galkayo Medical Center and an absence of six years
from Galkayo, return to the country to help again the Somali Red Crescent
Society. The same team has operated from Somalia in 2005 with the callsign
6O0CW and 2006 with the callsign 6O0N, putting in the log about 25,000 QSOs
in the first case and about 35.000 QSOs in the second one. We ask those
who have already worked us during one of these DXpeditions to not work us
again in the same bands/modes, thus giving more opportunities for those
who have not previously worked Somalia. Thanks for your cooperations."
For more details, visit their Web page at: http://www.i2ysb.com/joomla5
A forum for the 6O0CW operation is available at: http://www.hamradioweb.net

6V, SENEGAL. Vladimir, RK4FF, will once again be active as 6V7S from Le
Calao in Ngaparou between May 16-28th. Activity will be on 80/40/20/15/10
meters using CW, SSB and RTTY. QSL via RK4FF.

7O6, YEMEN. An international team of operators are now active as 7O6T
from Socotra Island (AS-028) as of 2100z, April 30th through 2100z May
15th. Activity will be on 160-10 meters using CW, SSB and RTTY. Suggested
frequencies are:
CW - 1824, 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024 kHz
SSB - 1845, 3780, 7065/7180, 14145, 18145, 21295, 24945 and 28495 kHz
RTTY - 7035, 10140, 14080, 18100, 21080, 24920 and 28080 kHz

The 7O6T log shows (per ClubLOG dated May 5th, at 2106z): 74613 Total
QSOs and 20859 with Unique Calls. Mode breakdown: 38537/CW, 35329/SSB and
747/RTTY. Continent breakdown: 562/AF, 0/ANT, 8312/AS, 48761/EU, 15906/NA,
558/OC and 514/SA.
QSL via UA3DX. More details about OQRS/Direct/Bureau/ LoTW will be

available during the course of DXpedition. Operators mentioned are Dmitri/RA9USU (Team Leader), Harry/RA3AUU (Co-Leader), David/K3LP (Co-Leader), Andrew/UA3AB, Oleg/R3FA, Vlad/R7LV, Alex/RM2M, Yuri/RL3FT, Aleksey/UA4HOX, Choigonjav/JT1CO, Paul/N6PSE, David/WD5COV, and Hrane/YT1AD. The 7O6T operation is supported by: Ministry of Interior Republic of Yemen, Ministry of Information Republic of Yemen, Ministry of Radio Republic of Yemen and the Ministry of Telecommunications and Information Technology Republic of Yemen. The 7O6T operation does have a Web page and Twitter page: http://www.yemen2012.com/index.php https://twitter.com/#!/7o6t

DAYTON HAMVENTION NEWS (Press Release - SWODXA DX DINNER ANNOUNCEMENT). Joe Pater, W8GEX, <W8GEX@aol.com>, dated April 30, 2012: "FOR IMMEDIATE RELEASE -- The SOUTHWEST OHIO DX Association (SWODXA) wants to remind everyone that the DX Dinner® is less than three weeks away. The dinner will again be at the Dayton Marriott, 1414 S. Patterson Blvd., Dayton, OH 45409 on Friday, May 18th. The cash bar opens at 5:30 p.m., with dinner served at 7:00 p.m. Following the meal, there will be a separate room and cash bar available for more fellowship. Ticket sales have been brisk, and the reservation deadline is only two weeks away. Dinner details, a list of door prizes, and the reservation order form can be found on the SWODXA event website, <www.swodxaevents.org>. Dinner reservations must be received no later than midnight, Saturday, May 12, 2012."

DIGIFEST 2012. The annual "Digifest" will be held as usual on the 1st full weekend of June (2012 dates are June 2nd and 3rd). This is going to be Digifest's 5th year, and its popularity is growing with last year's received LOGs number of more than 200. Peculiarity of this Contest is the great variety of different categories of the participants in 5 digital modes: RTTY 75, BPSK 63, MFSK 16, HELLSCHREIBER, OLIVIA and the most fair points calculation based on the distance between the stations. The Contest consists of 3 convenient periods (8 hours each) during the weekend. To add more adrenalin into this competition a special feature will be offered to those who like competing in real time ® online results will be presented on a server. And, of course, a lot of real nice prizes, mostly RigExpert AA-230 and AA-30 Antenna Analyzers and RigExpert USB Interfaces. All prizes sponsored by RigExpert Ukraine Ltd. Since the number of the participants is relatively small and the most populated competing area is Europe, the "far away" stations from NA, SA, Africa, Asia and Australia are at great advantage. From the last year's experience those stations were the most prize winners. Considering this and also to support growing participation from Europe, the sponsors "double" the prizes ® i.e. separate main prizes are now available both for Europe and for the "rest of the World". But wait, that's not all! For those of you who won't be able to win "main prize" in respected category, there will be a lot of small gifts, like T-shirts and paper awards. All the prizes will be mailed to participant's home addresses. The results are usually available just 2 weeks after the end of the Contest, So, let's just meet on the 1st weekend of June and have fun! Complete rules can be found at: http://www.mixw.net/misc/DigiFest/index.html

http://www.rigexpert.com/index?s&#65533;in&f&#65533;gifest
http://ut7fp.kiev.ua

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that
the following operations are approved for DXCC credit:
7O6T - Yemen; Current Operations
6O3A - Somalia; 2012 Operation

DXCC ONLINE APPLICATION TURN-AROUND. Steve, WB6RSE, informs OPDX:
"I submitted an Online DXCC application just prior to the Visalia DX
convention where I had the cards checked and the paperwork accepted for
forwarding to the DXCC desk for processing. Now just two weeks later,
the credits have appeared in my LOTW DXCC Account Status. Congratulations
to all at the ARRL and all at DXCC for a highly successful and fast new
process. Online DXCC Application. Recommended."

E51, SOUTH COOK ISLANDS. Andy, AB7FS, is once again planning to be active
as E51AND from Rarotonga Island (OC-013) between July 2nd and August 25th.
Activity will be holiday style. As a member of the Straight Key Century
Club (SKCC #7723), he plans to operate straight key CW at or around 14050
kHz, and he will be looking especially for SKCC members. He also checks
into the ANZA net (which meets at 0515z daily on 14183 kHz). QSL via his
home callsign.

GD, ISLE OF MAN. Stewart, G3RXQ, will be active as GD3RXQ from the Isle
of Man (EU-116) during the CQWW DX SSB Contest (October 27-28th) as a
Single-Op/All-Band/High-Power entry. QSL via G3RXQ.

GU, GUERNSEY. Ed, GW3SQX, will be active as GU7O from Guernsey (EU-114)
during the RSGB IOTA Contest (July 28-29th) as a CW entry. QSL via GW3SQX.

HS85, THAILAND (Special Event). Members of the Rotarians Of Amateur
Radio (ROAR) are currently active as HS85RI; the special event station
for 2012 Rotary International Convention in Bangkok. The team leader
is Tim, JH1NVZ, and the operation is supported by Radio Amateur Society
of Thailand (RAST). They will active until May 9th. QSL via E21EIC.

IOTA NEWS.....
AS-067. Operators Mitsuo/JF6TEU and Tsuyoshi/JA6VDB will be active as
homecall/6 from Uji Island between May 11-13th. Activity will
be on 80-12 meters using CW and SSB. There is a possibility
of some 160m, 10m, RTTY and PSK31 operations. QSL via their
home callsigns, direct or by the Bureau. Look for updates to
be posted to Twitter @JA6VDB.

EU-008. Glyn, GW0ANA, will be operating as GW0ANA during a "Micro
DX-Pedition" from Gigha Island, Inner Hebrides, Scotland,
between May 21-27th. Activity will be on SSB, RTTY, PSK and
SSTV. QSL via GW0ANA, direct QTHR or by the Bureau.

EU-127. Michael, DL4ABO, will be active as homecall/p from Neuwerk
Island (GIA N-012) and lighthouse (DLTD #38, ARLHS FED-165,
TWLHD WLH DL-019, WLOTA 2311) between May 10-11th. Activity

will be focused on 80-17 meters CW. Also, this operation counts for the National Park and Nature Reserve award (Hamburg Wadden Sea WFF DLFF-005). QSL via his home callsign, direct or by the Bureau. For more details, see: http://www.qrz.com/db/DL4ABO

EU-174. Boyko, LZ1QN, has been issued the special contest callsign SW8A and plans to visit Samothraki Island, Greece, to partic-ipate in the upcoming CQWW WPX CW Contest May 26-27th. His intention is to organize and support a group of experienced hams to join this holiday adventure. QSL card via LZ1QN.

OC-199. Wally, VK6YS, will be active as VK6YS/p from West Lewis Island between May 19-21st. Activity will be on 40-10 meters using mainly SSB with some CW. He suggests, "Local nighttime will be best for lower frequency CW and mornings and evenings best for SSB." QSL via his home callsign direct or e-QSL.

J7, DOMINICA. Operators Ken/JN1THL (J79KT), Yoshikatsu/JK1KHT (J79YK), Yoshiko/JQ1LCW (J79YL) and Misae/JF1UOX (J79JF) will be active this week from Dominica (NA-101) between May 10-17th. Activity will be on 40-10 meters, possibly 6m, and using CW, SSB and RTTY. Equipment will be a TS-590 and IC-706MKII with amps. QSL all callsigns via JN1NDY.

JW, SVALBARD. Operators Karl/LA8DW (JW8DW) and Kjell/LA9HH will be active from the JW5E club station in Longyearbyen on Spitsbergen Island (EU-026) between September 12-19th. Their activity will include the Scandinavian Activity Contest (SAC) CW Contest (September 15-16th) using the callsign JW5E. Operations outside of the contest will be on CW and SSB. QSL JW8DW via LA8DW. QSL JW5E direct. Visit the JW8DW Web page at: http://la8dw.com/Svalbard%202011
Visit the JW5E Web page at: http://www.jw5e.com

JY, JORDAN. Once again world traveller, Vladimir, UA4WHX, is active, but this time from Jordan as JY8VB. Currently his length of stay is unknown, and his activity has been on 40/20/17/15/12/10 meter using SSB and RTTY. QSL via his home callsign.

KK5, UNITED STATES (Special Event/IOTA Op). Look for members of the Brazos Valley ARC (KK5W) to be active during the Museum Ships Weekend (0000z, June 2nd to 2359z, June 3rd) operating from radio rooms of WWII Submarine USS Cavalla and Destroyer Escort USS Stewart from Seawolf Park on Pelican Island (NA-143) in Galveston, Texas. Activity will be on 40-10 meters using CW and SSB. Be a part of living history as they commemorate the actions of these ships and crews. Receive a special event QSL by sending a SASE to KK5W (QRZ.com). More information is available at: http://www.bvarc.org/index.php?page&#65533;

KH8, AMERICAN SAMOA. Operators Yuri/N3QQ and Dick/N7RO will be making a quick trip down to American Samoa between June 27th and July 3rd, to just have talks with the U.S. Fish & Wildlife Service (FWS) about a potential expedition in the future to Rose Atoll (OC-190). However, they may be active during their spare time as KH8/KL7RRC from Pago Pago. QSL via N7RO or UA9OBA.

PG6, NETHERLANDS (Special Event/Windmill). Members of the Veron Woerden Radio Club (Division A66) will be active as PG6MILL between May 12-13th. Activity will take place from the Dutch Windmill 'de Windhond' during the WOTA (Windmills On The Air) Event. Operations will be on 80m-70cm. The PI4WNO members are also celebrating the club's 25th anniversary. QSL via PA4J. During the WOTA Event, it is possible to earn an award, for details see: http://www.pd6mill.com

PJ2, CURACAO. Once again operators YL Anja/DH2AK and Torsten/DL1THM will be active as PJ2/DH2AK and PJ2/DL1THM from Curacao (SA-099, WLOTA LH-0942) between now and May 18th. Activity will be holiday style using this time the PJ2T Signal Point club station. Activity will be on 20-15 meters and mainly on SSB. QSL via their home callsign, by the Bureau or direct. See details QRZ.com.

LY16W QSL STATUS. Sam, LY5W, reports that he just received a few days ago the special LY16W QSLs from print. The special callsign was used to celebrate the independence of Lithuania signed on February 16th, 1918.

QSLs are good towards a beautiful LY WPX Plaque. All info is available on QRZ.com under LY5W. First QSLs will go out this week to those who send direct; Bureau QSL cards will go a little later. Sam states, "Look for me with another new prefix."

QSL 4J0LH and 4J0SF via 4J5T. Activity was by the "Safari DX Club" from the Shuvalan Lighthouse (AZE 007) on May 6th. This was a new activation. Operators were Boris/4K4K and Natig/4J5T.

NEW QSL MANAGER. As of April 30th, 2012, Buzz, NI5DX, has become the QSL Manager for Volker, ZS3Y. Buzz will be able to confirm all contacts made with ZS3Y after October 11, 2008. Cards will need to be printed so replies will not be sent out for about six weeks. Patience is appreciated during this transition period.

OLD QSL COLLECTION (Update). Jean Michel, F6AJA, wants to remind everyone to visit the Les Nouvelles DX (LNDX) Web page to see more than 9900 old QSL cards in several different albums/galleries. This site contains:
- The ten most wanted DXCC entities (2004 to 2011) with more than 300 QSLs
- At least one card for each 60 deleted DXCC countries (more than 1300+ QSLs)
- Nearest the totality of current prefixes, disappeared now (more than 3500+ QSLs)
- Album for stations from North Africa 1945-1962 (300+ QSLs)
- More than 850 QSLs from the Antarctic bases.
- Nearly 270 QSLs from the TAAF (Terres Australes and Antarctiques Francaises).
- More than 300 QSLs for the rare French Pacific Islands such as FK, FK/C, FO/C, FO/A, FO/M, FO/C and FW
- Nearly 100 cards from Eparses Islands such as FR/B/E/G/J/T
- The FG, FM, FP, FS, FY stations from 1945 to 1970
- More than 1400 cards for the old timer with more than 130 countries before 1945.
- Cards from the French Department before 1945.
- At least one card from each of the states in the U.S. before 1945.

The URL address for the Web site is: http://LesNouvellesDX.free.fr Some cards are still needed for the collection, and your particip-ation is welcome. Please visit their site and give them your comments by sending an E-mail to: LesNouvellesDX@free.fr

QSL RECEIVED VIA LoTW: 4Z4DX, 6H6IARU, 9N7MD, CD3DZ, CE4SFG, CE9/PA3EXX, CT3DZ, CT9/CT1FFU, EA3IN, FM5CD, FY8PE, GM3YOR, GR100MGY, HK1MW, HP1WW, JA7IC, JV5A, KH6ZM, ON4AXU, PJ2/K8ND, RG9A, UN1L, WP4U and VE6STP

QSLS RECEIVED VIA MAIL: 5Z4EE, 7P8GF, 9M6/OH2YY, E51M, E51Z, HC2/W7SE, HI8A, JC91NW, SU9VB, SV2ASP/A, SV5BYR, T2T, TG8/W0OR, TO3A, TU2T, VK0TH, VP8SGP, VR2XMT, XV2RZ and ZX2S

QSLS RECEIVED VIA THE BUREAU: 3A/N9NS, 3W6C, 5WOU, 5W0YA, 5Z4/RW1AU, 6W/UA0SE, 9M6DXX/P, 9M6XRO/P, 9M8Z, 9U1RSI, A6/UA9B, A65BP, B3C, BV9G, BV0G, BV0SSB, C21DL, C6AUM, CY9A, CT3/DK7YY, DU3/KL7IWC, E51NOU, FM5WE,

T6, AFGHANISTAN. Eric, K9GY, who is active as T6MO from the Helmand Province (Grid MM21), will be on during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band/Low-Power entry. Operations will only be on 40/20/15/10 meters using 100 watts into a OCF dipole at 40 feet. QSL via LoTW or to K9GY (see QRZ.com) direct or by the Bureau.

V4, ST. KITTS AND NEVIS (Update). John, W5JON, will once again be operating as V47JA from his Calypso Bay, St. Kitts, W.I., hillside vacation home (CQZ 8, IOTA NA-104, Grid FK87pg) between July 12th and August 2nd. Activity will be on 80-6 meters, including 60m and using SSB. His activity will also include RSGB IOTA (SSB) Contest as a Single-Op/All-Band entry and also, the CQWW VHF Contest (July 21-22nd). Equipment will be: Kenwood TS-590S and a SB200 Amplifier and a 80-10m Multiband Dipole and S9 Vertical (18' and 31'); 6m will be a 3 element yagi. His XYL Cathy, W5HAM, will occasionally operate as V47HAM. ALL QSLs go to his home callsign W5JON. Also via LoTW.

W9DXCC DX CONVENTION ANNOUNCES (Press Release - dated May 5th). "DX'ing from the Black Hole - A multi-session course to be presented in conjunction with the 60th W9DXCC DX Convention (Schaumburg, Illinois) -- The W9DXCC convention committee has announced it will offer a 4 session class on Friday, September 14th, 2012, to introduce ham operators to the excitement and fun of 'DXing', or contacting hams in other countries around the world. The class will be held the day before the W9DXCC convention on September 15th, and has been designed for new and inexperienced DX'ers. Each will cover a different aspect of DX'ing including operating practices, station design, chasing awards, QSL'ing and propagation from the Black Hole. All presenters are accomplished DXers from the NIDXA (Northern Illinois DX Association) and include K9AJ, K9EL, WA9YYY and W9MU. Between them they have over 100 years of experience that includes participation in DXpedition operations to rare locations around the world and numerous awards. Registration for the class may be done online at the W9DXCC web site <www.w9dxcc.com> when Convention registration is active. Discounts will be available for persons signing up for both the class and the convention. Please contact W9MU <jhudson@wishcom.net> for further details and information."

Radio News Bulletin
Sunday 6th May 2012

Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 28th June at 2 p.m. in the ComReg Offices in Dublin. The examination may be held on that day at other centres where warranted by the number of candidates. Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis. Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form. Please note over half the available places have already been allocated.

HAMCON

The Northern Ireland Amateur Radio Conference - brought to you by West Tyrone Amateur Radio Club, Technology Education Centre, 2 Spillers Place, Omagh. Lectures/Seminars, Demonstrations, Special Interest Groups, Trade Stands, National Societies, Disabled Facilities, Door Prizes, Raffle, Catering. The event this year takes place 16th June 2012.

South Eastern Amateur Radio Group

SEARG kicked-off it's theory classes at the last meeting on Monday 30 April last. The meeting was well attended by those wishing to sit the theory exam. If anyone else would like to participate, please get in touch with Mark Wall on 087 630 2026 or by e-mail to markwall /at/ vodafone /dot/ ie.

The Geoparks communications weekend this year takes place on Saturday 26 and Sunday 27 May. South Eastern Amateur Radio Group will again operate from Tankardstown on the Copper Coast Geopark in Co. Waterford. The callsign is EI2GEO (pending approval). Activity will mainly be on

HF. Anyone wishing to get involved should contact the club on info/ at/searg.com or phone Mark Wall on 087 630 2026 . For more information about the Geopark, visit www.coppercoastgeopark.com

---

Limerick Radio Club

The final meeting of the season for Limerick Radio Club will take place on Wednesday May 9th at 7.30pm Limerick Institute of Technology. Preparations for summer activities will be discussed on the night, including field days, Lighthouse weekend etc. There will also be a talk on Astronomy.

Shannon Basin Radio Club

The Shannon Basin Radio Club will once again be operating from Elphin Windmill, Co. Roscommon as part of the Mills on the air weekend, next weekend the 12th and 13th May. The call will be EI2EWM and will be active on all bands, SSB and CW. All are welcome to attend and refreshments will be available. For more info, contact Brian EI8IU (brianei8iu/ at/ eircom /dot/ net) or see www.shannonbasinredioclub.com.

GB0BON

In June 16th/17th 2012 the Welland Valley Amateur Radio Society (UK) will again be putting the Amateur Radio Special Event Station GB0BON on air. It will be the 367th anniversary of the Battle of Naseby and the third anniversary of GB0BON.

GB3LV repeater back on the air

GB3LV - the north London 70cm, IRLP and Echolink enabled repeater, is back on the air again after having been off air for a day or so with an intermittent fault. GB3NL and GB3EN were unaffected. The fault has been rectified by the rapid actions of Roger G8IUC.

Roger indicated that an upgrade/maintenance action was due on GB3EN (the Amateur TV repeater in Enfield) and that a new antenna, feeder and other sundries would be installed. The time scale for the installation is not known.

DX News

One of the most wanted DXCC entities turned up unexpectedly last Monday evening. An expedition to Yemen using the callsign 7O6T will be on the air until mid-May. While the trip has been up to 2 years in the planning news only broke a couple of days before the operation started. The location is on Socotra Island and this is also most-wanted by the IOTA fraternity with the only previous activity from there back in

1964/5 when G3UCQ operated as VS9SJF. The IOTA reference is AF-028. Look at the website www.yemen2012.com for details of the frequencies.

Barry 9V1FJ will be operating from a number of Caribbean countries in the coming weeks. From 9 - 11 May he will be active as PJ7/G4MFW from Sint Maarten and also FS/G4MFW from Saint Martin. This is followed by a trip to Saba Island on 12 - 14 May signing PJ5/G4MFW. He then plans to appear as FJ/G4MFW from St Barthelemy from 15 - 16 May. Next on the list is Curacao as PJ2/G4MFW and finally Bonaire as PJ4/G4MFW during 17 - 20 May.

A group of Japanese operators will be QRV from the Maldives from 11 - 16 May. Callsigns to look out for are 8Q7NK, 8Q7IC, 8Q7TE, 8Q7CJ and 8Q7ZS. Activity will be on all bands 160 - 6m using CW, SSB, RTTY and PSK.

One for the prefix hunters to look out for this month is R1945HS which is celebrating the 67th Anniversary of the end of World War 2. The call will be in use until 31 May and QSL info is via RW6HS.

Special UK callsigns for Queen's Diamond Jubilee

>From May 5 until June 10, British amateur radio operators may use a special prefix to celebrate the Queen's Diamond Jubilee. The second letter of the prefix will be replaced by a Q, calls with a single letter prefix add a Q:

2E0aaa will be 2Q0aaa 2M0aaa will be 2Q0aaa G3aaa will be GQ3aaa GM3aaa will be GQ3aaa GX3aaa will be GQ3aaa M3aaa will be MQ3aaa

---

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Anacapa School Club to Launch its Second Probe:

Posted: 05 May 2012 05:50 PM PDT
http://www.eham.net/articles/28217

The Anacapa Near Space Exploration Club (ANSEC) at Anacapa School will reach for the stars once again with its second near space probe, Anacapa Amateur High-Altitude Balloon 2 (AAHAB-2). Last year, the high school club sent a payload of sensors and a camera to 91,122 feet above California's Central Coast and recovered it successfully. This year, the team has set even more ambitious goals including a live video downlink, high-definition recording, radiation sensors and live radio telemetry. Carlson, along with Hatfield, a 15-year-old sophomore, studied for and passed the Federal Communications Commission exam for their amateur radio licenses. This certification allows the group access to special wireless spectrum allocations reserved for radio experimentation and scientific purposes. By building off ANSEC's inaugural AAHAB-1 probe, the AAHAB-2 team is hoping to downlink live video and atmospheric data from the probe throughout its two- to three-hour flight through the stratosphere and into the freezing, dark daytime skies of near space.

//
Sounding Off as True Listeners Ham It Up and Tune In to a Wave Of Nostalgia

Posted: 05 May 2012 05:48 PM PDT
http://www.eham.net/articles/28216

MY dad (god rest his soul) had three obsessions: rock 'n' roll, The Prisoner television series and amateur radio. Consequently, the soundtrack to my childhood was a heady mix of "C'mon Everybody" (Eddie Cochran) "I am not a number, I am a free man" (Patrick McGoohan/Number Six and "Dit dit dah dah" (Morse code), all reverberating throughout the house. The first two still feature in my day-to-day life; amateur radio, however, just hovers about on a distant wavelength, I still have a soft spot for it though and it pops up all over the place. Worldwide, there's about two million "radio hams" (as they like to be known) and a thriving local network centred on the Sherwood Amateur Radio Society. Just in case you don't know what amateur radio is, here's a brief overview: people the world over use their "rig" to communicate with other hams through a variety of means (text, voice, Skype) via private, recreational, non-commercial radio. They contact each other regardless of time and geography, even in space, where the reception is not half bad, so beat that smart phones.

GB2RS NEWS

Sunday 6th May 2012

The news headlines:

Still time to apply for a Jubilee NoV

More paperwork for Belgian amateurs

Club, repeater and beacon insurance news

It's not too late to apply for a Notice of Variation for the Queen's Diamond Jubilee. Amateurs in the UK were able to start using the special callsigns with the letter Q added from 4 May. This will continue until 10 June. The Queen's Diamond Jubilee QSO Party has also started, where participants are attempting to work a minimum of 100 special Jubilee callsigns. If you haven't already applied for your NoV, you can do so at www.rsgb.org/operating/novapp/jubilee. Details of the QSO Party were in the May RadCom or can be found at www.rsgb.org/consultations/docs/pdf/queens-jubilee-qso-party-final-version.pdf. You may also hear some stations in Gibraltar using the prefix ZQ instead of the normal ZB.

The Belgian national amateur radio society's website has posted an update on the restrictive antenna requirements recently imposed by the Flemish Government. The latest registration seems to apply to antennas that operate between 10MHz and 10GHz. It would appear that Flemish amateurs who transmit less than 175 hours a year at 20 watts ERP or less are now required to submit forms to the government for each antenna they have. Multi-band antennas require multiple submissions of forms. And if any change is made to an antenna, all of the paperwork must be resubmitted. You can find out more at tinyurl.com/NoticeForTxAntennas.

As a result of the recent insurance review the Society has placed the insurance cover for Clubs, Repeaters, Beacons & Packet Nodes with NIG. This took effect from 30 April and will run until 29 April 2013. A new certificate and 'To whom it concerns' letter for Clubs can be obtained from www.rsgb.org/membersonly/clubinsurance. Repeater, Beacon & Packet Node operators who require Public Liability Insurance should contact Carlos Eavis, by e-mail to carlos.eavisrsgb.org.uk or call him on 01234 832 715 to obtain a price and insurance documentation.

The UK RAYNET group and British Association of Public Safety Communications Officials have signed a Memorandum of Understanding. It recognises the common objectives of both organisations in the promotion

and influencing of public safety, civil contingency, information management and communications. In the Memorandum of Understanding, RAYNET and APCO set out a Schedule of Agreements that sets out some of the ways in which both organisations will work together. This includes networking opportunities and invitations to attend management meetings; website content sharing; joint working and sharing of publications; and engaging RAYNET in regional and national events.

Now that terrestrial TV has been switched off in Portugal, the National Communications Authority of Portugal has agreed to extend the 6m band for radio amateurs. Category 1, A and B amateurs can now use 50 to 52MHz on a secondary basis with a maximum power of 25 watts.

The AMSAT/TAPR Banquet on Friday night, 18 May, is one of the main AMSAT activities during the 2012 Hamvention at Dayton. Howard Long, G6LVB will be the featured speaker for the evening event. Howard will be talking about his FUNcube Dongle, his 64-1700MHz Software Defined Receiver.

And now for the details of rallies and events for the coming week

The Dambusters Hamfest will take place today, 6 May, at Thorpe Camp Visitor Centre, Coningsby, Lincs LN4 4PE. Admission is ?3 and there is free parking. Pitches are free but size is limited if not pre-booked. There is a RAF heritage centre on site. Gates open at 10am.

The Dartmoor Radio Club Rally takes place on Bank Holiday Monday, 7 May, at Tavistock College, Crowndale Rd, Tavistock, Devon PL19 8DD. Doors open at 10.30am and admission is ?2. There will be trade stands, a Bring & Buy and special interest groups. Details from Viv on 01752 823 427.

The Rochdale & District ARS Flea Market and Junk Sale takes place on 12 May at St Vincent's Church Hall, Caldershaw Rd, Rochdale OL12 7QL. The doors open at 10am. There will be trade stands, car boot sale area and a Bring & Buy. Pitches cost ?7.50. Unfortunately, the contact details that appeared in RadCom were incorrect, so to book your place, contact G0PUD on 01706 346 517 or e-mail dave.shaw1@sky.com.

Now for the news of special events

A school in the village of Gresham will be holding an amateur radio special event station using the D-Star digital network for children age 6 to 11 on May 23rd. The callsign will be GB2GVS which stands for Gresham Village School. Andy Johnston, 2E0AIV is the event coordinator. He says that they have already arranged link-ups with schools in Northern Ireland, the USA and England, but are looking for more countries and schools to participate. If anyone is interested, they can contact Andy via e-mail to 2e0avi@2e0aiv.co.uk.

There will be a Vulcan Special Event radio station at Finningley Robin Hood International Airport, with the callsign GB60VUL, from 5 to 12 May. This will be in conjunction with Newbury Amateur Radio Society. The Finningley Amateur Radio Society will be there with their communications van and the radio station will be open from 8am to 9pm. Special QSL

cards will be available for all contacts.

Botley Flour Mills near Southampton is one of the UK's oldest known milling sites. It is listed in the Doomsday book and is believed to have been a mill site in pre Roman times. The Mill will be activated with the callsign GB0BFM for Mills on the Air weekend on 12 and 13 May from 10am to 4pm. Using 80m, 40m, 2m & 70cm, the station will be run by M0IED and G6FRT and other members of Itchen Valley Radio Club, with added assistance from Southampton University Wireless Society.

And now the DX news compiled from 425 DX News and other sources

The Russian Robinsons are planning the activation of IOTA new one, the Bethel County Group, NA-240 between 10 and 14 May. See www.na-234.com for the latest information.

An international team of operators will be active as 7O6T, that's 7 Oh 6 tee, from Socotra Island until 17 May. They plan to have six stations on the air at any given time. Activity will be on 10 to 160m using CW, SSB and RTTY. QSL via UA3DX.

A group of operators from Japan will be operational from the Maldives between 11 and 16 May. Activity will be on 6 to 160m using CW, SSB, RTTY and PSK. QSL via their home callsigns, either direct or via the bureau.

Between 19 and 19 May, the Wessex Contest Group will be operating from the Isle of Skye, which is EU-008. This year they will be operating a variety of equipment including some homebrew radio, a selection of QRP set ups and, for the quiet times, they also have a high power HF station. Their antennas include a W3DZZ, a 3 element HF Yagi, and a variety of wire dipoles. Listen out for MS0WCB or MQ0WCB.

Members of the A DX Group are planning a ten man DXperience to Macau, which is XX9. Plans are to be active with at least three complete stations on all bands CW, SSB and digital from 17 to 23 May. They will be operating from Coloane Island, AS-075. QSL via EB7DX either direct, via the EA bureau or via Logbook of The World.

Now the contest news

The 432MHz to 248GHz trophy finishes its 24 hour session at 1400UTC today, 6 May. Using all modes on the bands between 432MHz and 248GHz, the exchange is signal report, serial number and locator.

The 80m Club Championships SSB leg takes place on 7 May from 1900 to 2030UTC. The exchange is signal report and serial number.

The 432MHz UK Activity Contest takes place on 8 May from 1900 to 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

The 70MHz CW Contest takes place from 0900 to 1200UTC on 13 May. The exchange is signal report, serial number, locator and postcode.

The Worked All Britain LF phone contest takes place on Sunday 13 May from 1000 to 1400UTC. The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website www.worked-all-britain.co.uk or from the Contest Manager, G3XKT via e-mail ataebbooks@ntlworld.com.

And now the solar factual data for the period from Friday the 27th to Thursday the 3rd of May, compiled by Neil Clarke, G0CAS on Friday the 4th of May.

Several sunspot groups were visible every day. Six new groups appeared during the period. Solar activity on the 27th was moderate when an impulsive M1 solar flare took place. On the remaining days activity was low when several C class solar flares took place. Solar flux levels declined from 121 units on the 28th to 110 by the 1st. The average was 116 units. The 90 day solar flux average on the 3rd was 112, that's the same level as last week. X-ray flux levels declined slightly from B5.8 units on the 27th to B2.8 by the 2nd. The average was B4.1 units. Geomagnetic activity was quiet every day. The most disturbed day was the 27th with an Ap index of 8 units. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 520 kilometres per second on the 27th to a slow 260 by the 2nd. Particle densities were very low every day, on some days not even one particle per cubic centimetre was recorded. Bz never varied more than minus 5 and plus 4 nanoTeslas until the 3rd and then between minus 8 and plus 7 nanoTeslas. Sporadic-E took place some days on 28MHz with smaller openings on 50MHz.

And finally the solar forecast. This week the active side of the Sun is expected to rotate into view. Solar activity is expected to be low but could increase to moderate levels on the occasional days. Solar flux levels should increase and by next weekend be in the 130's. Geomagnetic activity is expected to be quiet till around midweek when a disturbance from a recurring coronal hole is expected to arrive. This should last till the start of the weekend. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 11MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 21 MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. Levels could decline slightly during the anticipated coronal hole disturbance. The best time to try this path will be between 1600 and 2100 hours. Sporadic-E is expected to take place some days on 28MHz and to a lesser extent on 50MHz.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

Now we return to the traditional listing in date order.

On Monday 7 May Weston Super Mare Radio Society is having a natter night. Contact Paul, G3SDH, on 01761 221 206.

On Tuesday 8 May Blackmoor Vale Amateur Radio Society is having part 2 of the talk on Japan by Chas, G7ESE. Details from Keith on 01747 851 260.

On Tuesday 8 May Mid Somerset Amateur Radio Club is holding a natter and on the air night. Contact Nick, M6NJB, on 01749 346 320.

On Tuesday 8 May Plymouth Radio Club is having a talk by Kurt Langfeld, M0KPL on the Hentenna, a theoretical investigation of a miracle. Details from Rob James, 2E0ONO, via email to Robert-james@virginmedia.com.

On Wednesday 9 May Poldhu Amateur Radio Club is having a talk by Roger, G4ROJ, on using kites as aerials. Details are online at www.gb2gm.org.

On Wednesday 9 May Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 10 May Cornish Radio Amateur Club is having a talk on aerials and kite flying. Details from Steve, G7VOH, on 01209 844 939.

On Thursday 10 May Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

NEWS FOR WALES

On Monday 7 May Dragon Amateur Radio Club is having a portable operating night. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Thursday 10 May Aberystwyth & District Amateur Radio Society is visiting the Internal Fire Museum and amateur radio station at Sarnau, near Cardigan. Details from Ray, GW7AGG, on 01970 611 853.

On Thursday 10 May Marches Amateur Radio Society is having a talk by guest speaker Martyn Vincent, G3UKV, entitled "Solar cycle 24: it's arrived!" Contact the club secretary by email to marchesars@hotmail.co.uk.

699. Weekly Highlights of Solar and Geomagnetic Activity, 30 April - 06 May 2012

#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
30 April - 06 May 2012

Solar activity was moderate. The week was dominated by low level
C-class x-ray activity from Regions 1469 (S23, L=335, class/area
Eso/140 on 02 May) and 1471 (S21, L=276, class/area=Eho/320 on 02
May) until 05 May. Then, Region 1476 (N10, L=188, class/are=Fhi/760
on 06 May) rotated onto the visible disk and produced three
impulsive M-class flares in approximately 12 hours. The largest of
these was an M1/Sn at 05/1323Z. Only one M1/1n flare was observed
the following day, also from Region 1476, at 06/1747Z.

Several coronal mass ejections (CMEs) were observed during the
period, although only three were deemed to be potentially
earth-directed. The first of the three occurred on 04 May and was
observed in STEREO-Ahead COR2 coronagraph imagery around 0309Z. The
second was associated with a C1 flare from Region 1469 at 04/2356Z.
The third was associated with a long duration C2/Sf flare from
Region 1470 (S15, L=286, class/area=Cro/30 on 05 May) at 05/0639Z
and evidence of the eruption was observed in SDO AIA imagery at
05/0600 UTC. No significant radio emissions were observed with any
of the CMEs.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels (&gt;1000 pfu) for the first three days (30 April-02
May). After a return to normal background levels on 03-04 May, flux
reached moderate levels on 05 and 06 May.

Geomagnetic field activity was at predominantly quiet levels all
week. Unsettled levels occurred late on 02 May into early 03 May
associated with a prolonged period of negative Bz and again late on
03 May in response to a solar sector boundary change. Solar wind
speed measured at the ACE spacecraft ranged from 300-400 km/s
throughout the week.
```

Forecast of Solar and Geomagnetic Activity
07 May - 02 June 2012

Solar activity is expected to be low to moderate as Region 1476 makes its way across the visible solar disk.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to reach high levels on 11-14 May and again on 23-29 May in response to recurrent coronal hole high speed wind streams.

Geomagnetic field activity is expected to begin at unsettled levels for 07-08 May in response to a solar sector boundary crossing and CME arrival. The arrival of a recurrent coronal hole high speed stream will bring active levels on 09-11 May. After a brief return to quiet levels, unsettled conditions are expected in response to another coronal hole high speed stream on 14-15 May. Mostly quiet levels are then forecast until 19 May when unsettled to active conditions are expected to accompany the arrival of a coronal hole high speed stream. Active levels will persisit through 23 May followed by a return to quiet conditions through the end of the period.

St. Paul Students to Connect With Astronaut Monday:

Posted: 06 May 2012 05:05 PM PDT
http://www.eham.net/articles/28228

Some middle school students in St. Paul will have a unique opportunity to connect with an astronaut in space on Monday. Students at Farnsworth Aerospace Magnet will have a live conversation with American astronaut Don Pettit who's on board the International Space Station. Students in grades six through eight will talk to Pettit through a HAM radio connection. The students have been studying and researching the space station, as well as learning about the astronauts on board. The opportunity was offered by NASA and facilitated through the Polk County, Wis., HAM radio club, which offered use of its equipment. Members of the radio club have set up antennas and will be on hand Monday for the live chat.

Valley Group Honors Young CERT Member:

Posted: 06 May 2012 05:05 PM PDT
http://www.eham.net/articles/28227

MAT-SU -- KL3KC Andrew Rose -- with the assistance of AL9A Gary Senesac -- made his first HF contact on March 31 during the Women in Science event with the Girl Scouts and Matanuska Amateur Radio Association. KL7MD Mike O'Keefe awarded him a certificate April 15 to commemorate the event. His QSO -- or on air conversation -- was with VA7TF Tony Fonseca at 1330 hours UTC at frequency 14.259MHz SSB. And that's not all. A few days prior on March 24, Rose took part in his first emergency drill in Talkeetna with the American Red Cross Alaska Chapter and the Upper Susitna Emergency Net, the Mat-Su Valley and Community Emergency Response Team. Rose is now the youngest certified Community Emergency Response Team member in the state.

//
Ham Radio Operators Appreciated As A 'Treasure Of Oswego County':

Posted: 06 May 2012 05:04 PM PDT
http://www.eham.net/articles/28226

Fulton -- The members of the Oswego Emergency Communicators/RACES (Radio Amateur Civil Emergency Service) provide much more than emergency communications on amateur radio bands to the local community, Patricia Egan, Director of the Oswego County Emergency Management Office, told the

group recently. "Your members have stepped up to the plate on a number of occasions," Egan said during an Appreciation Night hosted by the Emergency Management Office. "This is a nice opportunity to say 'thank you' to one of the treasures of Oswego County," said Egan. "I am envied by emergency management directors across the state for the caliber of the volunteers here." The 30-plus members of the all-volunteer service provide site-to-site amateur radio communications during drills, exercises, and emergencies for the Emergency Management Office, the Oswego County Local Emergency Planning Committee, and the Oswego County Local Human Needs Committee -- and are ready to provide them during a widespread disaster.

Spartanburg Ham Radio Pioneer Wins National Thank-You:

Posted: 06 May 2012 05:03 PM PDT
http://www.eham.net/articles/28225

Nitsch wins service award for his efforts: Reynold L. "Fritz" Nitsch of Spartanburg was presented with the national George Hart Distinguished Service Award Saturday for a lifetime of service to amateur radio. The award is given annually by the Amateur Radio Relay League (ARRL) to an amateur radio licensee who best exemplifies the principles of amateur radio. Presenting the award during a ceremony at the Spartanburg Fairgrounds were James Boehner, N2ZZ, vice director of the ARRL Roanoke division, and Marc Tarplee, N4UFP, South Carolina section manager. Nitsch, 92, is the only living charter member of the Spartanburg Amateur Radio Club that was founded in 1952. He has held every leadership position within the club and has held a permanent seat on the board of directors since the club's founding. He is still an active member and has participated in every Field Day event. Affectionately known as the "Godfather of Hams in Spartanburg County," he has tutored and mentored, as well as given numerous radio tests, to most local Ham radio operators. He is an avid Morse code enthusiast.

Wireless Internet and the Alaska Connection:

Posted: 06 May 2012 05:03 PM PDT
http://www.eham.net/articles/28224

FAIRBANKS - Alaskans, like pretty much everyone these days, love their wireless devices. Drop into any coffee shop, bookstore or library and you'll see numerous people glued to laptops and tablets. Log into your Facebook account and you'll likely find a mobile update from some friend who's enduring an airport layover. And, if you're truly brave, go for a jog alongside a highway and start dodging cars and trucks driven by people paying more attention to their smartphones than to their surroundings. What most Alaskans might not realize is that their state has a historic connection to the connectivity that now follows us everywhere. Alex Hills, a retired Carnegie Mellon University professor who played a key role in the development of wireless Internet during the 1990s, and who is now retired and living in Palmer, helped bring radio and telephone service to rural

Alaska in the 1970s. The technical problems he faced there, and the solutions he devised for them, gave him some of the background knowledge he needed to resolve the challenges he faced two decades later in bringing one of the country's first large, wireless networks online. In his breezy and enjoyable memoir, "Wi-Fi and the Bad Boys of Radio," Hills tells the story of how his teenage obsession with radio in the 1950s ultimately led him down a career path that put him in the center of one of the most significant technological advances in recent memory. As a high school student in New Jersey he was already a technology fanatic, spending more time tinkering with his ham radio and communicating by Morse code with people halfway around the planet than with his classmates. It was at this early point that Hills first encountered what he refers to as "The Bad Boys of Radio."

BA's New Police Radio System Blocks Public Scanner Access:

Posted: 07 May 2012 05:17 PM PDT
http://www.eham.net/articles/28235

BROKEN ARROW - A new digital radio system using "OpenSky" technology has cleared the way for a greatly improved ability for police and fire departments to communicate with other jurisdictions. But the public is excluded from hearing any dispatch scanner feeds because of its digital encryptions. "It's a little disappointing," said James Taggart, president of the Broken Arrow Amateur Radio Club. "I can't hear anything either anymore. Especially when storms are out, it's nice to be able to listen to it, and it's a nice oversight to have for regular citizens to be able to listen in on them." Police Capt. Mark Irwin said the city is still debating the issue. "The system is so new, we want to make sure we get all the kinks out," he said. "We'll reach a decision on whether we provide media outlets radios."

//

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

May 9, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Ten-Ten HUT! Armed Forces Communications Test
- Magic Banding - 50 MHz Spring Sprint
- Over Hill and Dale - US ARDF Championships
- You Say Bit, I Say Baud
- Hamvention How-To by K3LR
- Murphy Bites Solicited by N4YDU
- High-Performance Receivers by K1DG
- A Mix of Moxon Moxie
- They've a Name

NEW HF OPERATORS - THINGS TO DO

Listen just outside the US ham bands and you'll find military stations
calling and listening on some frequency inside the ham bands. This is
good practice for operating split and you'll receive unique QSL cards,
too. There are lots of short sprint contests to squeeze in around the
spring chores, too!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

The traveling Jim Maxwell W6CF Memorial Trophy is awarded annually to
the highest scoring single operator, operating unassisted within the
state of California in the ARRL CW DX Contest and is not related to
Sweepstakes operating. (Thanks, John K6MM)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

May 12-13

- Armed Forces Communications Test
- CQ-M International DX Contest
- Portuguese Navy Day - Phone, CW
- Nevada Mustang Roundup
- FISTS Spring Sprint--CW
- 50 MHz Spring Sprint
- Worked All Britain - LF Phone
- NAQCC Monthly QRP Sprint (May 17)

May 19-20

- Portuguese Navy Day--Digital
- EU PSK DX Contest
- His Majesty King of Spain Contest--CW
- Feld-Hell Hamvention Sprint
- Baltic Contest
- Run For the Bacon--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

This year's 12th annual US Amateur Radio Direction-Finding (ARDF)
Championships
<http://www.arrl.org/news/ardf-update-register-now-for-the-usa-ardf-championships-in-southern-california>
will be held in Southern California in the mountains east of San Diego
beginning on May 30-31. These well-attended outdoor exercises attract
many spectators and are the qualifying run for the world ARDF
championships to be held in Serbia in September. ARDF is very popular
around the world and a great way to mix ham radio with outdoor sports.

Not only can you support WRTC2014 but you can show your support as
well. The new WRTC2014 store <http://shop.wrtc2014.org/> offers long
and short sleeve t-shirts, polo shirts, sweatshirts, and a cap.
Additional products will be added over time. The store also includes a
'donation' item for those who want to give a little extra to WRTC2014
when they make their purchase. Look for WRTC2014 at booth 354 in the
Dayton Hamvention's Silver Arena. (Thanks, WRTC2014 co-chair, Randy
K5ZD)

A recent QRZ.com feature described a new "interpreter badge
<http://blog.scoutingmagazine.org/2012/05/04/a-blast-from-the-past-in-code/>"
from the Boy Scouts of America - for Morse code! Scouts that learn to
send and receive at 5 wpm (sound familiar?) earn the right to display
an interpreter badge with code that spells out Morse.

With the number of mobile devices increasing every day, it's surprising
that there aren't more "mobile apps for mobile ops!" Nick N3WG has been
busy creating tools and software as Pignology <http://pignology.net> -

check out his collection of ham apps and growing set of interfaces to some popular portable radios. Using his new Pigtail kit and an iPad, this video <http://www.youtube.com/watch?v=GYm4g4kuBco&feature=youtu.be> shows him using the CW Terminal sending CW on a KX3 rig using a Bluetooth keyboard and logging contacts on his Ham Logger app.

Speaking of keyboards, do you miss the full-size keyboards that used to be the norm for computers and electric typewriters? Bob N7RDP recalls, "...they had bounce-free mechanical switches, were heavy enough to stay put and you could type real fast and not have to watch what appeared on the screen. I was surprised to learn such keyboards are still available for PCs from Elite Keyboards <http://elitekeyboards.com>. Typing on one, my fingers just seem to go faster. Or maybe its the clacky sound that makes it seem that way." Charles KG2V found USB equivalents <http://pckeyboard.com/>, too.

The best prescription for ethics is always peer pressure, applied locally, as the PW7T team shows in this short statement <http://www.pw7t.net/2012/02/ethics-drivers-pw7t-team/>. Ethics and fair play keep amateur radiosport fun. (Thanks, Randy K5ZD)

Web Site of the Week - Electronic Design's Lou Frenzel, known by hams as W5LEF, has been busy generating great articles such as "What's The Difference Between Bit Rate And Baud Rate? <http://electronicdesign.com/article/communications/whats-difference-bit-rate-baud-rate-73824?cid=ed_newsletter&NL=1&YM_RID=hwardsil@gmail.com>". If your answer is, "There's a difference?" then you need to read Lou's article.

WORD TO THE WISE

Soapbox - after-the-contest comments are called "Soapbox" because of the somewhat antiquated reference to "standing on one's soapbox" to make a opinion known. Soapboxes haven't been heavy enough to hold a person's weight in about a century but why mess up a good word? Reading the soapbox comments after a contest is part of the fun - check out the ARRL's online Soapbox <http://www.arrl.org/soapbox> for all ARRL contests and be sure to drop in your comment and photos!

==> SIGHTS AND SOUNDS

What to do at the Hamvention? A short video <http://www.pvrc.org/webinar/webinars.htm> hosted by Tim K3LR that outlines contest activities at the 2012 Dayton Hamvention has been posted by the Potomac Valley Radio Club (PVRC) - look under the Recorded Webinars link for May 6. (Thanks, Ken K4ZW)

PBS's program series NOVA recently ran "Secrets of the Sun <http://video.pbs.org/video/2226474716>" about what makes our favorite star run and you can watch the show online, too. (Thanks, Ken K0PP)

Jim K1TN writes, "I really enjoyed TV Bob's (N6TV) photos from Visalia. A lot of work to take them. Really appreciated, Bob. I swear, someday I will make it to Visalia for the convention." As one Visalia-goer commented, "Very high calls-known to calls-seen ratio!"

How does a KX3 kit get assembled? You can watch <http://www.ae5x.com/blog/2012/05/06/kx3-assembly-photos-de-wg0at/> Steve WG0AT do the job through the photos of John AE5X and the slide show ends with a video of the finished product in QSO with Dave AA7EE.

Here's a Lego Mindstorm Sodoku-solving robot <http://youtu.be/Mp8Y2yjV4fU>. This is cool, but can it keep a dupe sheet? (Thanks, Ken W0KAH)

Alright! How can you resist watching a video about a 10000-rpm ping-pong ball and liquid nitrogen? You can't! Here it is <http://www.instructables.com/id/10000-rpm-ping-pong-ball/>!

==> RESULTS AND RECORDS

Writeup author Nate N4YDU <n4ydu@yahoo.com> writes, "I'm currently working on the results article for the 2012 ARRL DX CW contest. I'm looking for any bad luck or "Murphy" incidents that took place while you were operating or preparing to operate. If I get enough of a response, I'll summarize it in the story...maybe even do a Top Ten!" Wow - an opportunity to tell your tale of woe to the world? Go for it!

Results for the February 2012 NAQP RTTY contest are now online <http://ncjweb.com/naqprttyprelim.php>. "Many new records were set and the final published results will be in the July/August 2012 Issue of the National Contest Journal. See you again in NAQP RTTY on July 21." (Thanks, NAQP RTTY Contest Manager, Mark K6UFO)

Results for the 2011 edition of the CQ Manchester Mineira DX Contest <http://www.cqmmdx.com/results/results-2011/> are now online. (Thanks, Luc PY8AZT)

Results of the European Sprint CW Contest <http://rk3awl.ru/eusprint/> held on April 14th are now available online, too, three days after the log deadline! (Thanks, EU Sprint Referee, Dmitri RW3FO)

OPERATING TIP

Have two or three different models of headphones available for long contests. A single set can create sore spots on your ears or temples that gets maddening by Sunday afternoon. Having a couple of different sets helps prevent that distraction. The same goes for chair cushions!

==> TECHNICAL TOPICS AND INFORMATION

EDN magazine recently published "High-performance HF transceiver design: A ham's perspective <http://www.edn.com/article/521690-High_performance_HF_transceiver_design_A_ham_s_perspective.php>"
by contester and WRTC2014 co-chair, Doug K1DG. The article goes into

detail about the environment in which contest-grade receivers must not only operate but excel. There are several graphics of the spectrum during the 2012 CQ Worldwide 160 Meter CW contest including a waterfall display that will keep you busy trying to read it for a while.

Magazine Roundup

- Electronic Design (5 April) - "Understanding Solutions for the Crowded Electromagnetic Spectrum <http://electronicdesign.com/article/communications/understanding-solutions-crowded-electromagnetic-frequency-spectrum-73611>" by Lou Frenzel W5LEF, covering VHF through microwave, FCC regulation, and upcoming technology solutions to the problem.
- IEEE Spectrum (April) - "Poor Man's Solder Reflow Oven <http://spectrum.ieee.org/geek-life/hands-on/the-poor-mans-solder-reflow-oven>" for adding reflow soldering to your homebrew electronics capability.
- IEEE Spectrum (March) - "Pocket Scope Roundup <http://spectrum.ieee.org/geek-life/hands-on/pocket-oscilloscope-review-roundup>" reviews four different mini-scopes that fit in your hand, "DIY Manufacturing <http://spectrum.ieee.org/geek-life/hands-on/turning-a-diy-project-into-a-product>" about turning your one-off project into a real product, and a "Reflections" editorial by Robert Lucky asking, "Is Math Still Relevant? <http://spectrum.ieee.org/at-work/education/is-math-still-relevant>"

Jack K6JEB posted this video showing his technique for winding toroids <http://www.youtube.com/watch?v=GT44U10WqRA&hd=1> by using a "stitching pony" made from a lacquered or plastic chopstick.

Portable operators who hike or camp will enjoy Charlie W6JJZ describing his design for a TFD(Trail Friendly Doublet <http://adventure-radio.org/ars/pages/back_issues/1998_text/0698_text/ffd.html>) in this old Adventure Radio Society Sojourner article. (Thanks, Ted AA5CK)

Two notes on everybody's favorite building material - here's an article from Instructables on how to bend PVC pipe <http://www.instructables.com/id/Bending-PVC-pipe-Just-because-you-can/> and there are lots more ideas in the comments. And those plastic plumbing fittings you were looking for that join three pipes in a right-angled corner? They're called "90° side outlet elbows (slip)" "Slip" means for unthreaded connections. Enjoy.

The Spitfire Array <http://www.yccc.org/Articles/Spitfire/spitfire.htm> designed by Fred K1VR uses a conventional grounded quarter-wave tower as the driven element and adds a parasitic reflector and director. What is unique about this array is that the parasitic elements are sized to be half-wave elements which are not grounded and are bent into a triangle shape. In addition, Rudy N6LF covers a number of single-support low-band arrays <http://rudys.typepad.com/ant/files/antenna_array_single_support.pdf>

in his March/April 2003 National Contest Journal article with a list of good references, as well. (Thanks, Tree N6TR and Jon AA1K)

Linear Technology's Design Note 1027 "Optimizing the Performance of Very Wideband Direct <http://cds.linear.com/docs/Design%20Note/dn1027f.pdf> Conversion Receivers <http://cds.linear.com/docs/Design%20Note/dn1027f.pdf>" is an interesting read. DC receivers are grabbing a lot of "market share" in the commercial wireless world.

While browsing through a technical book list, I came upon the classic, "Inductance Calculations" by Frederick Grover seen at right. Reprinted by Dover from the 1946 and 1973 editions, this inexpensive volume has just about every possible formula for inductance. It's fun to just open the book randomly and try to figure out what prompted the need for "Mutual Inductance of Inclined Circular Filaments Whose Axes Intersect, but Not at the Center of Either" (page 204).

On Marconi's birthday, John AE5X, "...decided to build a coherer <http://www.ae5x.com/blog/2012/04/25/my-video-tribute-to-marconi-and-branly/> since all the parts were already on hand. I don't understand the physics of it but it is a neat little device...seems to have a range of about a foot w/o an "antenna". After making the video I found that dipole-like leads attached to the coherer and QRP spark transmitter increased the range to 8 feet."

Two IEEE Antennas and Propagation Magazine articles by Steve Best VE9SRB answer a lot of questions about how antennas interact with electromagnetic fields.

- S.R. Best, "A Tutorial on the Scattering and Receiving Properties of Antennas" (Oct 2009)
- S.R. Best, "The Receiving and Scattering Properties of a Finite Dipole Array" (Dec 2011)

Both are available through your local library or possible a university or technical department library.

If you're in the market for new antenna work ropes, check out Martin OL5Y's company, Mastrant <http://www.mastrant.com/>, maker of synthetic rope for guying applications. There are two types: "P", which is a polyester Dacron-equivalent and "D" which is Dyneema, a high-weight poly rope. The rope stretches a bit more than Phillystran over time but is great for temporary guys and permanent use for supporting wire antennas. (Thanks, Doug K1DG)

Technical Web Site of the Week - Tim K3LR reports that, "W6NL has sent me an update to his original work. It is labeled as - Updated Moxon document 2012 and W8WWV has contributed a wonderful paper on various NEC model results of the W6NL 2 element 40 meter Moxon. It is labeled as - W8WWV investigates W6NL Moxon 40 meter models. You can find all four posted documents relating to the W6NL Moxon in the Station Engineering folder of k3lr.com <http://www.k3lr.com/>.

==> CONVERSATION

They've a Name

With the Dayton Hamvention and many local and regional hamfests coming up, it's time to review the zoology that makes each and every hamfest a unique and interesting experience for buyers and sellers alike!

Venerable Sages - Like spirits on Christmas Eve, these hamfest haunts appear from nowhere, wizened and wrinkled, call sign badge bearing the markings of extreme age. You will be told A Story that you will have never heard before about hams you may have never heard of. Yet it will be fascinating! Some day in the future, when you least expect it, that story will supply a crucial detail, amazing your friends and enemies alike. Learn to listen to the sage!

Disorder Demons - There is a special position down there in the hot place where the guy with the red cape and pointy stick lives for the people who handle your carefully-sorted parts and put them back in the wrong boxes or trays. An unsuspecting buyer gets home and begins work on a project only to find that the ninth part out of ten is mismatched. At next year's hamfest, you get blamed for it.

Benevelonians - Particularly fond of new hams and kids in general, these fine folks take the hamfest role of doting uncles and aunts. No matter how shy the child or unsure the novice, a Benevelonian will always come up with some trinket or extra part to give away or add to the sale. "I've got just the thing for YOU!" they say, eyes twinkling, producing a perfectly chosen gift or gadget for which they won't accept a cent.

Burrowers - As we all know, the best bargains are often on the floor under the tables so a Burrower gets down on hands and knees, no matter how crowded the aisle, proceeding to root through every single box and bag, spreading and sorting the collection, creating chaos and convincing your real customers to cross the aisle to "come back later". They will then offer one-tenth the asking price on a single coil of wire and leave it on the table when you don't sell it to them.

Explainers - An inquisitive buyer inevitably asks the one question about an item to which you don't know the answer. "Will this work with my 1983 Festalon Maglerator?" Unbidden, a hitherto unnoticed Explainer standing nearby will turn and deliver an authoritative and often exhaustive reply to the question, leaving both buyer and seller speechless and astounded. The Explainer will then purchase an obscure item from your table costing less than a dollar and disappear, never to be seen again.

Hamfest Cowbirds - The cowbird lays eggs in the nest of other birds for its chicks to be raised by the hapless parents. Similarly, the hamfest cowbird leaves its junk on your table so you get to dispose of it. While you're engaged with another customer, they put their item on one end of the table and feign great interest in some other doo-dads, slowly migrating along the table until at the opposite end from their

"egg" which they leave behind. You discover the ruse when somebody asks, "How much you want for this?" while holding up the surprise you now own.

Biographers - No matter what you pick up from their table, they know its entire history beginning with the digging of the ore and the smelting of the copper. They know the call signs of every owner (before and after vanity calls) and whether they smoked and what got worked with that particular radio. They always have the manual. The only thing they're not sure of is whether a particular item is actually functional but you've had so much fun learning about it you buy it anyway.

Gravity Testers - I'm sure they spend the morning greasing up their fingers with special non-stick coatings. Once at your table, they'll lift up a fragile item and then..."Oops!" Or they'll hold that power transformer over a flawless radio cabinet and..."Oops!" A variation on this theme is to reach for something in the back or down the table and..."Oops!"...knock over a stack of books or gear. Yes, gravity has been found to be fully operational at your table.

Cats In the Hat - I like these colorful hamfest denizens, usually adorned with bright clothes, patches, enough enameled pins to distort the local magnetic field, friendly and loud and they know your name (or think they do), and have a handshake for everybody! They often leave your table messed up and buyers forget what they were interested in but everybody has a smile on their face afterward. You just have to watch out for Thing One and Thing Two.

And so our hamfest memories are made - of characters old and young, rich and poor, scallywag and Samaritan alike. It wouldn't be the same without the slightly daffy denizens of our tribe, would it? Look at the time, they'll be opening the gates in an hour - happy shopping!

73, Ward N0AX

==> CONTESTS

9 May through 22 May

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CWops Monthly Mini-CWT Test--CW, from May 9, 1300Z -- multiple operating periods, twice monthly on 2nd and 4th Wed. Bands (MHz): 1.8-28, 18 to 28 kHz above band edge. Exchange: Name, member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

SNS and NS Weekly Sprints--CW, from May 11, 0200Z to May 11, 0300Z. Weekly on Thursday evenings local time. Bands (MHz): 1.8-14. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules

<http://www.ncccsprint.com/rules.html>

FOC QSO Party--CW, from May 12, 0000Z to May 12, 2359Z. Bands (MHz): 1.8-28. Exchange: Name, FOC member number. Logs due: 7 days. Rules <http://www.g4foc.org/>

EUCW Fraternizing CW QSO Party--CW, from May 12, 1000Z - multiple operating periods. Bands (MHz): 3.5-28. Frequencies: Exchange: RST, name, club, member number. Logs due: Jun 30. Rules <http://www.eucw.org/>

Alessandro Volta RTTY DX Contest--Digital, from May 12, 1200Z to May 13, 1200Z. Bands (MHz): 3.5-28. Exchange: RST, serial, CQ zone. Logs due: Jun 30. Rules <http://www.contestvolta.com/>

Armed Forces Communications Test--Phone,Digital, from May 12, 1200Z to May 13, 2400Z. Bands (MHz): 1.8-28. Frequencies: See website for specific station schedules. Exchange: RS(T). Logs due: no logs. Rules <http://www.netcom.army.mil/mars>

CQ-M International DX Contest--Phone,CW, from May 12, 1200Z to May 13, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and serial. Logs due: 30 days. Rules <http://www.cq-m.andys.ru/>

Portuguese Navy Day--Phone,CW, from May 12, 1500Z to May 13, 1500Z. Bands (MHz): 3.5-28. Exchange: RS(T), serial, CQ zone. Logs due: 20 days. Rules <http://www.nra.pt/>

Nevada Mustang Roundup--Phone,CW,Digital, from May 12, 1700Z to May 13, 1700Z. Bands (MHz): 1.8-28, 50. Exchange: RS(T) and S/P/C or NV county. Logs due: Jun 15. Rules <http://www.nvqsoparty.info/>

FISTS Spring Sprint--CW, from May 12, 1700Z to May 13, 2100Z. Bands (MHz): 3.5-28. Exchange: RS(T), S/P/C, name, FISTS nr or power. Logs due: 30 days. Rules <http://www.fists.org/sprints.html>

Worked All Britain - LF Phone--Phone, from May 13, 1000Z to May 13, 1400Z. Bands (MHz): 1.8-7. Exchange: RS, serial, and WAB nr or DXCC entity. Logs due: 21 days. Rules <http://www.worked-all-britain.co.uk/>

NAQCC Monthly QRP Sprint--CW, from May 17, 0030Z to May 17, 0230Z. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Bands (MHz): 3.5-14. Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

Portuguese Navy Day--Digital, from May 19, 0800Z to May 19, 1500Z. Bands (MHz): 3.5-28. Exchange: RST, serial, CQ zone. Logs due: 20 days. Rules <http://www.nra.pt/>

EU PSK DX Contest--Digital, from May 19, 1200Z to May 20, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and EU area code or serial. Logs due: 30 days. Rules <http://www.eu.srars.org/>

His Majesty King of Spain Contest--CW, from May 19, 1200Z to May 20, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and serial or EA province. Logs due: Jun 10. Rules <http://www.ure.es/>

Feld-Hell Hamvention Sprint--Digital, from May 19, 1500Z - multiple operating periods, monthly on 3rd Saturday. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

Baltic Contest--Phone,CW, from May 19, 2100Z to May 20, 0200Z. Bands (MHz): 3.5. Exchange: RS(T) and serial. Logs due: Jul 1. Rules <http://www.lrsf.lt/bcontest/english/rules_html.htm>

Run For the Bacon--CW, from May 20, 0200Z to May 20, 0400Z. Monthly on 3rd Sunday night (local). Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

VHF+ CONTESTS

Nevada Mustang Roundup--Phone,CW,Digital, from May 12, 1700Z to May 13, 1700Z. Bands (MHz): 1.8-28, 50. Exchange: RS(T) and S/P/C or NV county. Logs due: Jun 15. Rules <http://www.nvqsoparty.info/>

50 MHz Spring Sprint--Phone,CW,Digital, from May 12, 2300Z to May 13, 0300Z. Bands (MHz): 50. Exchange: Grid square (6-character preferred). Logs due: 14 days. Rules <http://sites.google.com/site/springvhfupsprints/2012-announcement-rules>

Emergency Communications Are

Tested During Amateur Radio Field Day

☐Multi-Club Field Day☐

:cool:

FieldDay@CambriaRadio.com

Media Contact

John N. Geiser AB3OV

379 Sam Street

Johnstown, PA 15902

Cambria County ARES AEC

The Cambria Radio Club and the Horseshoe Amateur Radio Club will be testing emergency communications from 2 PM EST June 23rd to 5 PM EST June 24th, 2012.

Every year, amateur radio operators (also known as ☐hams☐) around the country come together to conduct what is known as ☐Field Day☐. The objective is to test and become more familiar with our radio systems as well as the radio systems of other operators. During this time, we operate our radios, and work to contact operators around the country and the world. We then use this information to know where we are able to contact in the case of an emergency. This also proves the reliability of amateur radio operations.

For 2012, the newly formed Cambria Radio Club in Johnstown, has joined forces with the Horseshoe Amateur Radio Club in Altoona to create a ☐Multi-Club Field Day☐.

The CRC and HARC members believe this would be a great opportunity for the community to come see how amateur radio works. Individuals will be able to

learn some important skills for emergency situations and have the opportunity to earn their amateur radio license. (FREE VE TEST SESSION*)

We are also planning other activities besides amateur radio such as crafts for children and other general activities to interest everyone. Under the supervision of a licensed operator, everyone will also have the opportunity to operate the radio equipment.

Often people do not know what role amateur radio operators play, but with local media□s help, the community can be informed and further prepared for emergency situations. You do not have to be an amateur radio operator to benefit from amateur radio. In a disaster, when power is out, and when storms are ravaging your area, hams will be operating and communicating with emergency services.

Field Day is a great opportunity for everyone to learn how to utilize amateur radio without actually being licensed or owning any equipment. We hope to see you there. Visit CambriaRadio.com for full detail and special giveaways.

LOCATION:

New Germany Grove Hall

1635 New Germany Road

Summerhill, PA 15958

*Interested individuals must sign up for FREE VE Test Session by clicking this Test Session Link or copy and past this URL into your Internet browser http://www.cambriaradio.com/VE_Test_Session.html

Please sign up before June 15, 2012. Remeber you must bring two valid forms of ID. Please email any questions you have on the test session to VETEAM@CambriaRadio.com

WE HOPE TO SEE YOU THERE.

Beijing cites Ham Radio in Scarborough Reef dispute

Posted: 09 May 2012 01:50 AM PDT
http://forums.qrz.com/showthread.php?345463-Beijing-cites-Ham-Radio-in-Scarborough-Reef-dispute&goto=newpost

Beijing cites Ham Radio in Scarborough Reef dispute

A website claims correspondance between the Philippine Amateur Radio Association and the ARRL supports Beijing's territorial ambitions in Scarborough Reef.

Scarborough Reef, also known as Panatag Shoal or Bajo de Masinloc is located between the Macclesfield Bank and Luzon Island of the Philippines. It has seen several major DXpeditions over the years.

The report on the Sina website relating to amateur radio says

"Then Philippine ambassador to Germany indicated clearly in his letter to a German radio amateur on February 5, 1990 that, Huangyan Island [Scarborough Shoal/Bajo de Masinloc] was not within the Philippine territory and sovereignty according to the National Mapping and Resource Information Authority of the Philippines.

"The documents issued by the National Mapping and Resource Information Authority of the Philippines and the Philippine amateur radio organization to the American Radio Relay League on October 18 and November 18, 1994 had also confirmed respectively that the Philippine territorial limits and sovereignty was stipulated by the Article 3 of the Treaty of Paris (1889)."

Update of the popular SDR (RX and TX) software now available

Posted: 08 May 2012 10:25 AM PDT
http://forums.qrz.com/showthread.php?345394-Update-of-the-popular-SDR-(RX-and-TX)-software-now-available&goto=newpost

Hi Everybody;

We have finally finished the V2.4 and it is now available though the MDSR Yahoo user group. It will also be available through our official MDSR webpage. It can be found in the MDSR V2.4 folder in the files sections.

Everybody should update to version 2.4. to get the latest benefits of the MDSR development. Before installing close the MDSR application if you already using MDSR. Installation will take a few minutes. All the calibration and setup data will stay in place.

http://groups.yahoo.com/group/mdsradio/ (Please sign up as a user to get the software)

http://users.skynet.be/myspace/mdsr/

What is new?

Will install on WinXP, Vista and Win7 (32 and 64bit)Support for the Arduino Frequency counter (instructions and firmware are included in this release). Improved GUI Improved filteringUpdated help filesSome bug fixes □ reported by users

We want to thank everybody that was giving us input to make this software happen.

Special thanks to Guy (ON6MU) for his hard work to program the MDSR SA and the implementation of OmniRIG.

Thanks to Alex Shovkoplyas for the use of the OmniRIG interface

Also special thanks to Adam (VA7OJ) for the use of his test lab and the advice, that let us pass the FCC requirement for TX spurious emissions.

All the best and thanks for supporting the MDSR development. Please tell al your friend about this development.

All the software and source code is free as long as it is used for HAM radio.

Thanks;

Alex

AMSAT NEWS SERVICE

ANS-127

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor at amsat.org

Volunteers are needed to help at the AMSAT booth at Dayton. Gould Smith, WA4SXM, is looking for volunteers to help man the AMSAT booth during the 2012 Hamvention. People are needed all 3 days for 2 hour shifts. Please send the days and times you are available to help as well as how many shifts you are willing to work via e-mail to wa4sxm at amsat.org. Monitor the AMSAT at Dayton web pages for latest news and developments.

In this edition:

* 2012 AMSAT Forum at Dayton - Saturday May 19

* Fox-1 Satellite Project Team Completes Preliminary Design Review

* AMSAT Awards

* Satellite Operations Planned for Worldwide Museum Ships Weekend

* Changes to the IARU Satellite Advisor Region 1

* New Frequencies for AMSAT-UK FUNcube-1

* Delfi-C3 (DO-64) Celebrates 4 Years On-Orbit

* Ecuador NEE-01 Pegasus Cubesat Plans Classroom Access to Satellite

* Satellite Shorts From All Over

SB SAT @ AMSAT $ANS-127.01

ANS-127 AMSAT News Service Weekly Bulletins

AMSAT News Service Bulletin 127.01

From AMSAT HQ SILVER SPRING, MD.

May 6, 2012

BID: $ANS-127.01

2012 AMSAT Forum at Dayton - Saturday May 19

The AMSAT Forum at the 2012 Dayton Hamvention will be on Saturday morning May 19 from 11:15 to 13:30 in Forum Room 5. The moderator will be Alan Biddle, WA4SCA

The speakers will be:

Barry Baines, WD4ASW; AMSAT Status Report

Barry, AMSAT President, will highlight recent activities within AMSAT, and discuss some of the challenges and accomplishments of the organization.

Mark Hammond, N8MH; AMSAT Educational Relationships

Mark, AMSAT VP of Educational Relationships, will discuss his education activities.

Gould Smith, WA4SXM; ARISSat-1 Operation in Space

Gould, AMSAT Project Manager for ARISSat-1, will talk about its operation aboard the ISS, the deployment and operations this past fall and winter.

Tony Monteiro, AA2TX; Project Fox - AMSAT's First CubeSat

Tony, AMSAT Engineering VP, will discuss the design and status of Project-FOX.

Howard Long, G6LVB; "FUN in Space for All!"

Howard, AMSAT-UK Committee, will discuss the FUNcube project which will enable amateurs and students to have FUN in space. For amateurs, the spacecraft will carry conventional UHF to VHF linear transponders. For students of all ages, the same spacecraft will provide strong telemetry transmissions which they can easily receive at schools in support of science, technology, engineering, and math subjects (STEM).

[ANS thanks Gould Smith, WA4SXM and Alan Biddle, WA4SCA for the above information]

Fox-1 Satellite Project Team Completes Preliminary Design Review

The Fox Project completed its Preliminary Design Review (PDR) over three nights, 24-26 April 2012. Mechanical, RF, control, power, and related issues were reviewed. The current status was evaluated, and the needed development for various systems was refined. AMSAT Engineering Vice President Tony Monteiro, AA2TX, characterized the review as very productive.

Help Wanted Fox-1 Satellite

AMSAT is in need of an experienced RF designer for our Fox-1 satellite. Due to ITAR restrictions, you must be a US citizen or permanent resident. If interested please send an email with your phone number to Tony Monteiro - AA2TX@amsat.org

Fox-1 Targets Launch in 2013

Project ELaNa, NASA's "Educational Launch of NanoSat" managed by the Launch Services Program at the Kennedy Space Center, announced on February 10 that the AMSAT Fox-1 cubesat has been selected to join the program. AMSAT is working with NASA in a collaborative agreement where NASA will cover the integration and launch costs. Fox-1 was selected to join the NASA ELaNa program on merit in support of NASA strategic and educational goals.

AMSAT's Fox-1 project timeline is based on targeting a launch in the second half of 2013. NASA will determine on which flight each of the Project ELaNa CubeSats are launched.

Highlights of the Fox-1 design include:

Fox-1 is designed as the immediate replacement for AO-51. Its U/V FM transponder with a VHF downlink will be easier to hear with small antennas.The same radio equipment used for AO-51 (HT + handheld beam) can be used for Fox-1.Fox-1 sends telemetry in a sub-audible band on the downlink allowing simultaneous voice contacts with telemetry decode. AMSAT will provide free sound-card PC software.Includes science experiment using MEMS gyros being developed by Penn State students.

Find more details of AMSAT Fox-1 Project on-line.

Donate to the Fox-1 Project Fund on-line at http://www.amsat.org; scroll down halfway to the PayPal donation widget - or at the AMSAT Store.

NASA's Cubesat Launch Initiative web page is online.

[ANS thanks AMSAT Engineering Vice-President Tony Monteiro, AA2TX and Alan Biddle, WA4SCA for the above information]

AMSAT Awards

AMSAT Director Contests and Awards, Bruce Paige, KK5DO says congratulations are in order for our latest AMSAT Awards recipients.

The following have entered into the Satellite Communicators Club for making their first satellite QSO.

Brent Ocken, KJ6MRGElizabeth Royer, KB3WSW

The following have earned the AMSAT Communications Achievement Award.

Hector Luis Martinez Sis, CO6CBF, #547Marcelo Teruel, IK0USO #549

The following have earned the South Africa Satellite Communications Achievement Award.

Hector Luis Martinez Sis, CO6CBF, #US178

The following have earned their Robert W. Barbee, Jr. W4AMI Award.

Tom Deeble, KA6SIP #77Clayton Coleman, W5PFG #78

To see all the awards visit http://www.amsat.org.

[ANS thanks Bruce Paige, KK5DO for the above information]

Satellite Operations Planned for Worldwide Museum Ships Weekend

Museum Ships Weekend Coming Up June 2-3, 2012

by Allen F. Mattis, N5AFV, n5afv@amsat.org

The worldwide Museum Ships Weekend Event (MSWE) will be held for two days, June 2-3, 2012. Last year 83 ships in 13 countries around the world participated in the event. Amateur radio operators make special event contacts from these museum ships on all amateur radio bands with most of the contacts taking place on the HF bands. In the past

several years only two or three museum ships in North America have made satellite contacts during the event.

This year a number of Houston area AMSAT members, W5ACM, N5AFV and WC5WM, will participate with the Brazos Valley Amateur Radio Club (BVARC) operating club station KK5W from Seawolf Park on Pelican Island in Galveston, Texas. Seawolf Park is home to two Second World War vintage museum ships - the destroyer escort USS Stewart (DE-238) and the submarine USS Cavalla (SS-244). As a result, a contact with KK5W counts for two ships. Amateur radio operators who make contacts with 15 or more ships qualify for a handsome certificate.

The BVARC KK5W station plans to operate the afternoon passes of AO-27 and FO-29 on Saturday June 2nd and hope other AMSAT members will be operating from other ships. This will be their fifth year participating in the MSWE and hope to make their first MSWE satellite contact with another museum ship this year.

If any AMSAT members are interested in this event they may visit the MSWE website to find out if

any museum ships near them are participating.

[ANS thanks Allen Mattis, N5AFV for the above information]

Changes to the IARU Satellite Advisor Region 1

The International Amateur Radio Union (IARU) Satellite Advisor's Advisory Panel assists builders and prospective builders of satellites that will operate on frequencies allocated by the ITU to the Amateur Service. This panel provides frequency coordination, a comprehensive set of standards guidelines, and international forums.

The IARU Satellite Adviser is Hans van de Groenendaal, ZS6AKV. This week AMSAT-DL President Peter Gülzow, DB2OS recommended to the IARU Satellite

Adviser that Mike Rupprecht takes over membership of the advisory panel from Norbert Nothoff. Hans agreed to appoint Mike, DK3WN as a panel member. He thanked Norbert, DF5DP for his support as a member of the Advisory panel for many years and is looking forward to working with Mike.

Mike Rupprecht, DK3WN will help with the IARU Satellite Frequency Coordination process in Region 1 and in particular in Germany. Mike is very active and well known on the satellite bands and Internet boards, and he has particularly profound knowledge of all cubesat operations. He is also very well known in the community of cubesat operators, including excellent communication connections with those groups.

Mike Rupprecht, DK3WN will support Norbert Nothoff, DF5DP and take over the coordination process of satellite projects from him, which includes correspondence with the coordination group and the satellite operators.

Norbert Nothoff, DF5DP will continue to stay in charge of anything which is related to government issues (government and office liaison, laws, bylaws, and regulations of satellite operations) in Germany.

The following serve on the IARU Satellite Advisor's Advisory Panel:

IARU Satellite Advisor

Hans van de Groenendaal, ZS6AKV

Region 1

Graham Shirville, G3VZV

Mike Rupprecht, DK3WN

Region 2

Lee McLamb, KU4OS

Art Feller, W4ART

Region 3

Shizuo Endo, JE1MUI

Special Advisors

Ray Soifer, W2RS

Jan King, VK4GEY/W3GEY

The IARU Satellite page has more information.

The status of all satellites requesting coordination and those which have already received coordination can be found online.

[ANS thanks AMSAT-DL President Peter Gülzow, DB2OS for the above information]

New Frequencies for AMSAT-UK FUNcube-1

The DNEPR-1 launch in October 2012 could carry around 10 amateur radio satellites including FUNcube-1 into space. As a result the International Amateur Radio Union (IARU) satellite advisory panel have had to carefully coordinate the planned operating frequencies in order to minimize the risk of interference between FUNcube-1 and other payloads on the same launch.

The IARU Amateur Satellite Frequency Coordination Panel have now confirmed the following frequencies for FUNcube-1 (these frequencies replace those previously announced)

FUNcube-1 New Frequencies

Inverting linear transponder

Uplink 435.150 ☐ 435.130 MHz (replacing 435.080 - 435.060 MHz)

Downlink 145.950 ☐ 145.970 MHz (replacing 145.960 - 145.980 MHz)

Telemetry: 145.935 MHz BPSK (replacing 145.955 MHz)

UKube-1

Uplink 435.060 - 435.040 MHz

Downlink 145.940 - 145.960 MHz

Telemetry 145.840 MHz

FUNcube sub system beacon 145.925 MHz

S Band downlink 2401.500 MHz

myPocketQub 437.425 - 437.525 MHz

Delfi-n3Xt

Inverting linear transponder:

Uplink 435.530 - 435.570 MHz

Downlink 145.880 - 145.920 MHz

Telemetry 145.870 MHz and 145.930 MHz

High Speed 2405.00 MHz

Also on this launch two additional satellites Triton-1 and Triton-2 will include two similar secondary amateur radio payloads, being two single channel mode U/V (435-145MHz) FM to DSB transponders. After their three month science mission is complete plans are to have the satellite continue in the Amateur Satellite Service for as long as possible.

Triton-1

Main Downlink 145.815 MHz (FM to DSB transponders similar to AO-16)

Backup Downlink 145.860 MHz

The UHF uplink frequencies will be announced by the project team

once the satellite becomes available for amateur operations.

Triton-2

Main Downlink 145.860 MHz FM to DSB transponder

Backup Downlink 145.815 MHz

S-band downlink 2408.00 MHz FM to FM transponder

The UHF uplink frequencies will be announced by the project team

once the satellite becomes available for amateur operations.

The IARU Satellite Coordination data for all of the satellites can be found online.

Gunter's Space Page (September 2012) lists the proposed manifest for the DNEPR-1 launch.

[ANS thanks AMSAT-UK and the IARU Satellite Advisory Panel for the above information]

Delfi-C3 (DO-64) Celebrates 4 Years On-Orbit

The Technical University of Delft in the Netherlands celebrated the fourth anniversary on-orbit of their student-developed, and -built Delfi-C3 3U Cubesat. Launched on April 28, 2008 aboard PSLV-C9 it was also designated DO-64 by AMSAT.

Delfi-C3 the first nano-satellite project from the Delfi program of TU Delft. The program gives students the opportunity to gain practical experience, but the university would also develop with new technology. A small satellite is a relatively inexpensive test platform for new technology of Dutch aerospace companies including thin-film solar cells of Dutch Space solar and autonomous wireless sensors.

This satellite also invited amateur radio participation to receive its telemetry downlink using ordinary equipment used by amateur satellite operators. The Delfi-C3 team provides the RASCAL software to decode and forward the data to TU Delft. The software can be downloaded at: http://tinyurl.com/DelfiC3-RASCAL (www.delfispace.nl).

The satellite continues to transmit telemetry for stations who wish to experiment using the BPSK decoder:

Primary telemetry downlink: 145.870 MHz 1200 Baud BPSK AX.25 400mWBackup telemetry downlink: 145.930 MHz 1200 Baud BPSK AX.25 400mWThe 435 MHz up/145 MHz down linear transponder is out of service.

Delfi-C3 pioneer Jeroen Rotteveel said "It is great to see that our satellite is still performing, especially when you consider that it is an experimental satellite built by students. From this one small satellite project a complete nanosatellite program has been set up. A spin-off company, ISIS, focusing on providing components for small satellites was created."

Future satellite development at TU Delft includes:

Delfi-n3Xt

Delfi-n3Xt will fly an active attitude control system controlling the satellite's orientation of Delfi-n3Xt with a system of sensors so that the solar panels maintain optimum sun pointing. It will test a new type of engine for small satellites.

Delfi-n3Xt, equipped with a linear transponder will be launched in October, 2012 aboard a Russian Dnepr rocket along with dozens of other small satellites which include UKube 1, FUNcube 1, which all will carry an amateur radio linear transponder. Triton 1, and Triton 2 satellites on this launch will feature FM-to-DSB and FM-to-FM transponders.

QB50

After Delfi-n3Xt, TU Delft will work on two nano satellites to fly as part of the 50 Cubesat constellation in the QB50 project. QB50 is a European collaborative mission with fifty scattered satellites in orbit around the Earth performing measurements on the upper layer of the atmosphere.

OLFAR

This project will develop a radio-telescope based on a swarm of nano satellites in orbit around the moon measuring signals from deep space. OLFAR (Orbiting Low Frequency Antenna for Radioastronomy) is an important milestone from which Delfi-C3 was the first step.

Find more information about the TU Delft satellites at:

http://www.delfispace.nl

http://www.isispace.nl

[ANS thanks TU Delft, the Delfi-C3 Team, and AMSAT-UK for the above information]

Ecuador NEE-01 Pegasus Cubesat Plans Classroom Access to Satellite

Ecuador's first satellite NEE-01 Pegasus is slated to launch in October 2012 on the same DNEPR rocket as the AMSAT-UK FUNcube-1, UKube-1, Delfi-n3Xt, Triton-1, and Triton-2, along with several additional cubesats.

One of the satellite's objectives is to serve as a space platform for elementary education. The satellite will send two signals that will be received and decoded by the EXA□s HERMES-A ground station in Guayaquil and then uploaded live to the Internet using Twitter and Facebook.

The first signal will contain text book questions and the second will contain an image related to the question. If the students are able to answer the question correctly they will be granted access to the video camera onboard the spacecraft and will be able to see earth from space as the astronauts see it in their space missions.

More advanced students will have access to the pure radio signal so they can try decoding it by themselves. The EXA will provide them with the appropriate support software free of charge.

There is an onboard camera to send live video from space from a 3 watt TV transmitter in the 902 MHz band along with a beacon that will send an ID and Ecuador□s national anthem.

The cubesat will help monitoring near-earth objects from orbit using its onboard 720p HD video camera and will also help in the catalog and control of orbital debris (space junk), this new mission will turn the NEE-01 in to the first online, real time orbital video sentry for the planet, as the satellite has the capability to stream its video signal directly to the Internet.

Additional NEE-01 Pegasus Cubesat mission goals include:

Technological demonstration/EducationTest of real time video transmissionTest of Thermal/Radiation shieldTest of multiphase solar arrayTest of passive antenna deploymentTest of carbon nanotubes thermal control system

AMSAT-UK posted news and photos of NEE-01 Pegasus.

[ANS thanks AMSAT-UK for the above information]

Satellite Shorts From All Over

It is time to submit nominations for the upcoming open seats on the AMSAT-NA Board of Directors. Three directors and two alternate directors have terms expiring this year. The director seats open for election are held by Tom Clark, K3IO; Lou McFadin, W5DID; and Gould Smith, WA4SXM. The alternate director seats open for election are held by Mark Hammond, N8MH and Patrick Stoddard, WD9EWK. The AMSAT front page news at http://www.amsat.org has the instructionsto submit your nominations. The 2012 AMSAT Annual Meeting and Symposium will be held at the Holiday Inn, Orlando (Florida) Airport on October 26-28, 2012. The First Call for Papers has been issued. The Symposium Team requests a tentative title of your presentation as soon as possible, with final copy to be submitted by October 1 for inclusion in the printed proceedings. Abstracts and papers should be sent to Dan Schultz, N8FGV, at n8fgv@amsat.org. Watch for the latest 2012 Symposium information to be posted on the AMSAT web.The CQ Magazine News Room has posted stories covering amateur satellite developments:

Manager of the Satchat net on the AMSAT EchoLink server invites all radio
amateurs to check-in when the net meets on the 1st and 3rd Saturday of the
month 1900-2030 CDT (UTC-5). Vince says the new format of the net will be a
roundtable format.Congratulations to Al, W5LUA for working into state
number 34 on 2304 MHz via a good tropo opening. Al worked North Carolina on
April 28. That's really an amazing accomplishment. (via NP4Z on the
moon-net list)Check out Markarian's Chain. There are well over 100 galaxies
in this image. (UniverseToday.com)

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the
President's Club. Members of the President's Club, as sustaining donors to
AMSAT Project Funds, will be eligible to receive additional benefits.
Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at
one-half the standard yearly rate. Post-secondary school students enrolled
in at least half time status shall be eligible for the student rate for a
maximum of 6 post-secondary years in this status. Contact Martha at the
AMSAT Office for additional student membership information. And with that
please keep in mind that this implicit curve equation produces the heart
shape: (x^2 + y^2 - 1)^3 - x^2 * y^3 = 0 This web computation engine
(wolframalpha.com) will plot it for you. You may need to click the
orange 'compute' button to the right of the equation.

National Mill Event 12 and 13 may 2012

Posted: 09 May 2012 07:12 AM PDT
http://forums.qrz.com/showthread.php?345492-National-Mill-Event-12-and-13-may-2012&goto=newpost

Comming weekend, saturday 12 and sunday 13 may 2012

there is for the 5th time a National mill event.

Several watermills and windmills are ocupiede by amateur stations .

I am active from PA6ADZ, an old flourmill build in 1844 in a small
village "Zuidland",

located 15KM ZW of Rotterdam and 25KM east of the North-sea.

We are active at 10-20-40-80M and at 2M and 70CM

you can find more info about the windmill at:

www.qrz.com/db/pa6adz

Below you can find a list of joining Mills:

EU PSK DX Contest 2012

Posted: 09 May 2012 01:34 AM PDT
http://forums.qrz.com/showthread.php?345461-EU-PSK-DX-Contest-2012&goto=newpost

HI Guys,

Remember the date & time: 12:00 UTC on 19.05.2012 to 12:00 UTC on
20.05.2012. The only permissible mode is BPSK63 only so be sure you are in

the right mode before you begin and maximum power is 100 watts. As it was with last year's contest, be sure to pay close attention to your Cabrillo log so that it matches exactly the format required.

All the very best and see you all in the EU PSK DX Contest 2012!

Bands: We recommend the following frequencies - 80 meters (3.580 - 3.590 MHz), 40 meters (7.040 - 7.050 MHz), 20 meters (14.070 - 14.080 MHz), 15 meters (21.070 - 21.080 MHz), and 10 meters (28.070 - 28.080 MHz).

Number Exchange: All EU stations should send signal report plus EU Area Code: http://www.eupsk.com/documents/euareas.xls (example for the County of Sisak and Moslavina, Croatia: 599 EUHRSM). Please note that "dots" should not be sent! 599 EU.HR.SM or 599 EU HR SM - are not correct reports. There should be no "dots", no "spaces" between the letters, all 6 letters should be sent together. Those who don't follow this rule will be disqualified immediately! DX stations should send signal report plus QSO number, starting 001. MOMT DX stations should use a separate serial number sequence for each band.

Log Instructions: All times must be in UTC. All sent and received exchanges are to be logged. PSK mode in Cabrillo file must be identified as follows: BPSK63 - PM. The Contest Committee accepts logs in the Cabrillo format ONLY. Name your Cabrillo file as your call sign (for example - mm0epc.cbr, mm0epc.txt or mm0epc.log). You should send your log via e-mail to contest@epc-ru.ru

All entrants must clearly indicate the output power (watts) in the Cabrillo log. If no power is mentioned in the log the participant's score will be moved to High Power category automatically.

Europe Day on the Air

Posted: 08 May 2012 07:22 AM PDT
http://forums.qrz.com/showthread.php?345355-Europe-Day-on-the-Air&goto=newpost

Nine special stations will be active on May 9th, 2012 from Spain commemorating 52 years since Robert Schumann presented his proposal of an organized Europe. This proposal, known as the "Schuman declaration", is considered to be the beginning of the creation of what is now the European Union.

Special QSL cards and an electronic diploma are available for those who will contact at least three of the nine stations.

Emergency Communications Are

Tested During Amateur Radio Field Day

:cool:

FieldDay@CambriaRadio.com

Media Contact

John N. Geiser AB3OV

379 Sam Street

Johnstown, PA 15902

Cambria County ARES AEC

The Cambria Radio Club and the Horseshoe Amateur Radio Club will be testing emergency communications from 2 PM EST June 23rd to 5 PM EST June 24th, 2012.

Every year, amateur radio operators (also known as □hams□) around the country come together to conduct what is known as □Field Day□. The objective is to test and become more familiar with our radio systems as well as the radio systems of other operators. During this time, we operate our radios, and work to contact operators around the country and the world. We then use this information to know where we are able to contact in the case of an emergency. This also proves the reliability of amateur radio operations.

For 2012, the newly formed Cambria Radio Club in Johnstown, has joined forces with the Horseshoe Amateur Radio Club in Altoona to create a □Multi-Club Field Day□.

The CRC and HARC members believe this would be a great opportunity for the community to come see how amateur radio works. Individuals will be able to learn some important skills for emergency situations and have the opportunity to earn their amateur radio license. (FREE VE TEST SESSION*)

We are also planning other activities besides amateur radio such as crafts for children and other general activities to interest everyone. Under the supervision of a licensed operator, everyone will also have the opportunity to operate the radio equipment.

Often people do not know what role amateur radio operators play, but with local media□s help, the community can be informed and further prepared for

emergency situations. You do not have to be an amateur radio operator to benefit from amateur radio. In a disaster, when power is out, and when storms are ravaging your area, hams will be operating and communicating with emergency services.

Field Day is a great opportunity for everyone to learn how to utilize amateur radio without actually being licensed or owning any equipment. We hope to see you there. Visit CambriaRadio.com for full detail and special giveaways.

LOCATION:

New Germany Grove Hall

1635 New Germany Road

Summerhill, PA 15958

*Interested individuals must sign up for FREE VE Test Session by clicking this Test Session Link or copy and past this URL into your Internet browser http://www.cambriaradio.com/VE_Test_Session.html

Please sign up before June 15, 2012. Remeber you must bring two valid forms of ID. Please email any questions you have on the test session to VETEAM@CambriaRadio.com

WE HOPE TO SEE YOU THERE.

//
7O6T - Yemen Approved For DXCC Credit

Posted: 05 May 2012 05:49 PM PDT
http://forums.qrz.com/showthread.php?345050-7O6T-Yemen-Approved-For-DXCC-Credit&goto=newpost

For those questioning the legitimacy of the 7O6T operation from Yemen, the answer is that it is approved for DXCC credit. See note below received a few moments ago from the ARRL DXCC Desk.

Subject: Operations approved for DXCC

From: "Moore, Bill, NC1L (ARRL Awards Branch)"

The following operations are approved for DXCC credit:

****

** Sporadic E season 2012 **

The Sporadic E season 2012 has started. On May 8th at 13.08 UTC the first
ES QSO of 2012 was reported between YO3FOU (KN34) and IW1BCV (JN44).
The opening was short and hardly noticed as most will have been at work.
A bit later at 13:23 UTC another short opening starting with a QSO
between F5XU (JN15) and LZ3GM (KN32).

For the statistics; first openings reported in:
2008 May 11
2009 May 17
2010 May 11
2011 May 15

So 2012 looks like an early starter... let's see what is going to happen!

Good Hunting!

Source: Frank, PA4EME, editor Sporadic E section MMMonVHF

** n-Aquariids (ETA), MS shower with unexpected surprise ? **

The most pominent shower for May is (was) the n-Aquariids. The predicted
maximum was for May 5th around 19.00 UTC. When looking to the
visual activity graphics and observations from IMO-members the shower
did reach almost the predicted ZHR of 65 hr-1 but it did not peak

on May 5th but earlier.

http://www.imo.net/live/eta-aquariids2012/

More interesting is something that happened on
Sunday May 6th between 07.30 UTC - 09.30 UTC. During the ongoing May
contest a significant increase of meteorreflections were reported
and these resulted is SSB MS contacts between participants in the
contest. Most reflections centered in an area stretching from eastern
France to Northern Italy. At some moment certain stations believed to
have worked Sporadic E and reported their QSO's as ES. Looking at the
geographical distribution it was obvious it was MS related and the
signals sounded like MS too. Long onderdense reflections provided
possibilities for one burst SSB MS QSO's. Based on information on
the DX-cluster and comments on ON4KST chat it appears that the ZHR
reached 100 hr-1 which is quit unexpected.

MMMonVHF has reported this event to IMO (International Meteor Organisation)
and they are very interested as the event might be an possible outburst
of the ETA shower caused by the influance of Jupiter on the stream of debris
from earlier passages of the parent comet 1P/Halley. As it happened during
daylight hours there is no visual confirmation and no IMO member has
reported large numbers of meteors on May 5th or 6th.

OH5IY confirms the increase in MS activity and is investigating too and would
like to have aditional data too.

If possible MMMonVHF would like to collect information from stations that
were active during the timeframe of May 6th 07.30 UTC and 09.30 UTC and is
asking to report their QSO's and info about estimated number of reflections.
Any soundrecordings are welcome as from these a number of reflections in
a certain timeframe can be calculated. Please send them to Frank, PA4EME,
who will collect the data and forward them to IMO and OH5IY.

Please send those reports to pa4eme@pa4eme.nl

**DXCC: OH0: Aland; square JP90; start 2012-05-24

OH8K/0 will be qrv from JP90SF during the Nordic VUSHF-Meeting 2012

The plan from Jussi, OH6ZZ and Sami, OH9GDT will be to join the
Nordic VUSHF-Meeting at Island Aland during 24-27 Mai 2012
(http://vushf.rats.fi/)
They try to be qrv as OH8K/0 on 2m FSK/EME on 25-27 May.

QRG and more details will be spread later...

SOURCE: tnx to Jussi, OH6ZZ direct to MMMonVHF

**DXCC: 5X: Oeganda; square KJ60; start 2012-05-25

Moonbounce from Uganda, 5X1EME, KJ60GH

After some very successfull DXpeditions to the Gambia past year
(C56EME with 361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz),
Bonaire (PJ4X) and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make
Moonbounce QSO's from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in
Kenya (5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is requested.
If all ok we will have a small 70cm setup with us.

>From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near Kampala on the equator.

The plan is to leave May 21st and build up the station before the weekend. It's just
the two of us but we know what we are doing. It's a hard job to get the license there.
Callsign is still a bit insecure but we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a update via MoonNet,
MMMonVHF and our mailinglist.
If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood.
We have to come back as often as possible. We can't resist....

SOURCE: Rene PE1L and Eltje PA3CEE direct to MMMonVHF

** DXCC: F: France ; square JN14; start 2012-06-02 **

F/PA2CHR/p qev from JN14BU begin of June

During my summer holiday I will be QRV on Saturday 2
June and (if good activity) Sunday 3 June from a
hilltop in Southern France.
This is not a real DX-pedition, just some hours fun.
If you need JN14 locator pse let me know, maybe we
can arrange a sked.

Station 144 MHz: FT857, 150W. PA and 10el.
Station 432 Mhz: FT857, 100W. PA and 21el.

Best 73's

ME-DXpedition 2012 de DL1YMK

The M&M-team is preparing the next EME-DXpedition, taking place in
May 2012. We will set out for our destination just after having
returned from the Swedish EME Meeting, organised by Lars, SM4IVE,
on the weekend 12./13th of May in Oerebro. We hope to reach our
destination in time and to get QRV on Thursday, 17th of May
(bank holiday in Europe) on 23 cm, followed by 70 cm on 18.05.
On Saturday, 19.05., we will be on 13 cm and on Sunday again on
23 cm. 13 cm will be run with a significant increase in power and
full 2424 MHz coverage. For the first time during an EME- DXpedition,
we intend to get also operational on 6 cm with our old, but proven

stressed dish and a new superb feed made by our friend Tommy,
WD5AGO. 6 cm will have an experimental character despite some 100 W
out, as we could not test so far, if the under-illuminated dish will
work up that high in frequency, so keep your fingers crossed!! Our
plan is to give it a try on Monday, 21th May. Also, we intend to
get active on 3 cm with a separate solid dish, which of course is
a lot smaller. Last weekend we made the first test with LX1DB, having
installed the dish in our garden place. The tests were not yet
satisfying, so our friend Willi right now is trying to help us out
with some substantial development aid!
During the DUBUS contest 26./27th of May, we will of course be
active on 23 cm in order to boost activity in the moonbounce contest
of contests. Our last day of operation will be Thursday, 31st of May.
A detailed schedule for the days from 21th May onwards predominantly
will depend on the progress with 10GHz in the meantime. Further details
to be published soon!! This years DXpedition will be the 9th
EME-DXpedition in a sequence for us. We hope to have fun all together
as experienced during past years DXpeditions.but this largely depends
on you.
Needless to say that it will be again a CW random event, although
doodle mode technically is possible (with a new laptop computer)
on request. We have no idea yet to what extent (if at all) i-net
access is feasable, though.

Vy 73, Michael and Monika

SOURCE: Moon mailing list ; Moon@moonbounce.info

** DXCC: 4X: Israel; square KM72; start 2012-05-17 **

2012 sees the first DXpedition by the group of Dutch radio amateurs
listed below to Israel, who, apart from making QSO's, look forward
to meeting local hams and visiting places of cultural and historical interest.
We will be active from May 17th until May 30th
The first 6 days we will stay in Nes Ammim in the Northwest between Nahariya
and Akko in KM72nx. From there we will travel to Rishon LeZion in KM71jw.

The members of the team during May 2012 are Jaap PA7DA, Loek PA9LUC and XYL,
Hans PA0JBB and SWL Aad van den Nieuwendijk.
At this moment we don't have a 4X callsign and will be QRV according CEPT-regulations with
4X/PA7DA and 4X/PA9LUC. We will operate mainly on 10, 6 and 2m.

More information on the PA7DA website!

Amateur Radio Operators and Weather Spotting:

Posted: 08 May 2012 05:02 PM PDT
http://www.eham.net/articles/28250

He hadn't planned on being the club's guest speaker Monday, but then George Shields hadn't planned on being an amateur radio operator until his high school physics teacher suggested it. Sometimes, things just happen. And when the unexpected happens -- like a flood, tornado, severe storm that disrupts normal communication venues -- amateur radio operators, like Shields, step in and hit the airwaves. After his planned speaker was called out of town, Shields, who was responsible for planning Monday's program at the weekly Kiwanis program, took the podium and explained his longtime hobby as an amateur radio operator.

//
Amateur Radio Operators Train For Emergencies:

Posted: 08 May 2012 05:02 PM PDT
http://www.eham.net/articles/28249

Local amateur radio operators participated Friday and Saturday in a simulated emergency drill involving emergency management offices and state emergency operations centers in Texas and five other states. The exercise was conducted to test backup communications needed after a large solar storm had resulted in widespread power outages and failure of the Internet and cellular networks. "It went well," said Joe Thompson, ARES (Amateur Radio Emergency Service) emergency coordinator for Guadalupe County. "It was very successful both from the standpoint of what we achieved and what we need to work on." Members of ARES are licensed amateur radio operators who volunteer their time and equipment to help when normal communications fail or become inadequate, Thompson explained. Besides ARES members, the exercise involved MARS, the Military Auxiliary Radio System and RACES, the Radio Amateur Civil Emergency Service.

//
Monster Sunspot Threatens To Unleash Powerful Solar Flares:

Posted: 08 May 2012 05:01 PM PDT
http://www.eham.net/articles/28248

An enormous sunspot group has taken shape on the surface of the sun, hinting that our star may soon start spouting off some powerful storms. The

huge sunspot complex, known as AR 1476, rotated into Earth's view over the weekend. It measures more than 60,000 miles (100,000 kilometers) across, researchers said. Scientists with NASA's Solar Dynamics Observatory mission, a space-based telescope watching the sun, dubbed the solar structure a "monster sunspot" in a Twitter announcement.

//
13 Colonies Special Event July 1-5 2012:

Posted: 08 May 2012 04:52 PM PDT
http://www.eham.net/articles/28247

The 2012, 13 Colonies stations will operate from 12:01 AM Eastern (0401Z),on July 1st, (That's one minute after midnight, early Sunday morning, July 1st) to 11:59 PM Eastern (0359Z July 6) ending on July 5th (One minute to midnight, late Thursday night, July 5th).

//
New Kenwood TS-990S:

Posted: 08 May 2012 04:58 PM PDT
http://www.eham.net/articles/28236

The Kenwood TS-990S featuring a dual TFT display and dual receiver will cover the HF amateur bands plus 6 meters. This radio will be the top-of-the-range flagship model in the Kenwood Amateur radio line-up. A prototype is expected to be on display at the 2012 Dayton Hamvention. RF power is adjustable from 2 to 200 watts. This radio features a built in automatic antenna tuner and built in AC power supply. It has a serial port, USB ports and Ethernet port.

DXNL 1779 - May 9, 2012
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CORRECTION of DXNL 1778:
7O6T is on AF-028 and not on AS-028.
HB100FLP is in HB9 and not in HB0.

6O, SOMALIA
After donation of ambulances to the "Galkayo Medical Center" and
following 6 years of absence several members of the "Italian DXpedition
Team" (Silvano,I2YSB, Vinicio,IK2CIO, Angelo,IK2CKR, Marcello,IK2DIA,
Stefano,IK2HKT and Gino,IK2RZP) return to Somalia to support the Somali
Red Cross. They want to work with four stations signing 6O0CW in CW,
SSB and RTTY on 160m-6m from May 7-18. If you already had a QSO with
6O0CW or 6O0N back in 2005 or 2006 you should not make dupe QSOs on the
same band/mode to give other HAMs a chance as well.
QSL via I2YSB (direct) or IK2CIO (bureau), LoTW within six months.
OQRS and other information can be found at: http://www.i2ysb.com

8Q, MALDIVES, AS-013
Iwao,JA2LSS (8Q7CJ), Yoshi,JA2AIC (8Q7IC), Nob,JA2AAU (8Q7NK),
Iku,JA2ATE (8Q7TE), and Mori,JA2ZS (8Q7ZS), announced to be active
from the North Male Atoll (AS-013, WLOTA 3911) in CW, SSB, RTTY and PSK
on 160m-6m from May 11-16. QSLs via homecalls.

DL, GERMANY
On the occasion of the completion of coal mining in Saarland a special
event station signs DL250COAL (special DOK: 250Kohle) in all modes on
all bands until Dec 31. QSL via bureau to DK8VR.

EU, BELARUS
The specialevent station EV1150P celebrates the 1150th anniversary of
the city of Polotsk. QSL via EW6DX.

F, FRANCE
The special event station TM3FFI commemorates the agents with their

secret transmitters in the Resistance of the Second World War from
May 11-13, May 26, July 8-13 and from Jul 19-22. QSL via F8JZR.
See also: http://www.memorialjeanmoulin.fr/articles.php?lng&#65533;&pg229

G, ENGLAND, EU-005
The "Pontefract & District Amateur Radio Society" introduce our hobby
to the public with the clubstation GB1AVR at two events, a Scammell
Gathering in May and a Steam Rally in July. QSL via G0BPK.
See also: http://www.pdars.com

"Botley Flour Mills" near Southampton is one of the most famous old
mills in the United Kingdom and is listed in the "Domesday Book".
It will be activated at the "Mills on the Air" weekend (May 12/13) by
M0IED, his father G6FRT and other members of the "Itchen Valley Radio
Club". With the support of the Southampton University Wireless Society
they will use the special call GB0BFM on 80/40/2m/70cm. QSL via M0IED.
See also: http://www.mills-on-the-air.net/?PAGE&#65533;rrent

Several members of the ISWL are celebrating the Queen's Diamond Jubilee
by using G4BJC and M1SWL on the air from May-June.

GQ4BJC/A and MQ1SWL/A will be activated also from different WABs and
WLOTAs. QSLs via G6XOU. See: http://www.iswl.org.uk

Mike,M0SMJ (ISWL G11331, FISTS 8398), celebrates the Diamond Jubilee of
Queen Elizabeth 2 as MQ0SMJ from Cornwall (EU-005/WLOTA 1841/WAB SS20)
until Jun 10. QSL via RSGB bureau.

The special event station GB60VUL will be QRV from different QTHs until
May 30. QSL via bureau or direct to M0JEC.

HS, THAILAND
The special event station HS85RI is active until May 9 from the "Rotary
International. QSL via E21EIC.

J7, DOMINICA, NA-101
Ihre fuehrt
Toshi,JA8RUZ (J79RZ), Yoshikatsu,JK1KHT (J79YK), Ken,JN1THL (J79KT),
Yoshiko,JQ1LCW (J79YL), and Misae,JF1UOX (J79JF), are planning a
DXpedition to Dominica (NA-101) from May 10-17. They will be QRV with
TS-590/IC-706MKII plus amps in CW/SSB/RTTY on 40m-10m (maybe also 6m).
QSL for J79RZ via JA8RUZ, all other QSLs only direct via JN1NDY.

JA, JAPAN
The special event call 8J3XVI is active from the "Kansai Ham Festival"
until Jul 15. QSL via bureau or JA3UJR.

The special event station 8J1MST celebrates the 40th anniversary of the
city of Misato until Dec 31.

JY, JORDAN
JY9ET is the new callsign of Paolo,IK0BOU, in Amman. He is looking for
QSOs in CW and SSB on 80m-10m during weekdays from 1400 UTC-2100 UTC
and also the whole weekends. QSL via M0OXO.

UA4WHX is running pile-ups on HF as JY8VB. He has been spotted in SSB
and RTTY on 40/20/17/15/12/10m. QSL via homecall.

P4, ARUBA, SA-036
Masumi,JA3AVO (P40X), XYL Hiroko,JH3PBL (P40U), and Yoshinori,JA3DFM
(P4/JA3DFM), with XYL Hideko,JA3OPB (P4/JA3OPB), announced to show up
from "Cook's Radio Retreat" on Aruba (SA-036/WLOTA 0033) from May 9-14.
QSLs via homecalls. See also: http://www.p49v.com

PA, THE NETHERLANDS
The VERON Section 54 (Etten-Leur) will be active as PI4ETL/p during
the National Windmill Weekend 2012 working on HF+2m from the windmill
"De Oude Molen" near Fijnaart (Loc JO21FP) on May 12/13.
Every QSO will be confirmed with a special QSL via buro automatically.
See also: http://a54.veron.nl

PG6MILL is another special event station during the National Windmill
Weekend working on 80m-70cm from the windmill "de Windhond". They are
also celebrating the 25th jubilee of the PI4WNO clubstation.
QSL via PA4J. See also: http://www.pd6mill.com

Frans,PC2F, activates the special callsign PC25HR from the pump station
Hertog Reijnout from May 6-28. QSL via homecall.

S7, SEYCHELLES, AS-013
Heye,DJ9RR, will be QRV as S79RR in holiday style from Mahe (AS-013).
Listen for him in CW and RTTY on 40m-10m from May 15-23.
QSL via homecall, LoTW.

V3, BELIZE, NA-073
Mike,VE2XB, will show up as V31XB from Caye Caulker (NA-073) running
a K3 with Hexbeam on all bands from May 11-31. QSL via homecall.

http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

May 12 EUCW Fraternizing CW QSO Party
May 12 FISTS Sprint Contest
May 12/13 CQ-M International DX Contest
May 12/13 Alessandro Volta RTTY Contest
May 13 EUCW Fraternizing CW QSO Party

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-067, JA6, Uji and Kusagaki Islands: Tsuyoshi,JA6VDB, and Mitsuo,JF6TEU,
plan to become active as JA6VDB from Uji Island from May 11-13. They
hope that weather conditions will be good enough to land on the island.
You can follow them on Twitter (ID: Tsuyoshi Omae, JA6VDB).
Logs will be uploaded to LoTW after their return. QSL via JA6VDB.

EU-001, SV5, Dodecanese: John,SV5/N5ER, will be QRV in holiday style from
Rhodos from May 15-20. He works only in CW mainly on the lowbands
during his evening and morning. QSLs only direct or via LoTW to N5ER.

EU-008, GM/MM, Inner Hebrides: Once again the Wessex Contest Group will
activate the Isle of Sky (IOSA NH07, SCOTIA CN14, WLOTA 1626, WAB NG47,
Loc IO67uq) from May 12-19. Steve,G0FUW, Simon,M0TTE, Dan,M0TGN, and
Dave,M0SFT, will be QRV as MS0WCB mainly in SSB on 80m, 40m, 20m, 17m
and 15m with a few CW and digital QSOs as well. QSL route see QRZ.com.
QSL via bureau or direct to M0WAY or via eQSL.
See also: http://www.mx0wcb.com

EU-028, I*5, Toscana (Tuscany) Region group: Guenter,IA5/DL3NBI, is going to spend his holidays on Giglio Island (EU-028, IIA GR-002, MIA MI-036, WLOTA 0564) from May 15-23. QSL via homecall (bureau/direct).

EU-042, DL, Schleswig-Holstein State North West group: DF6BL/p (OP Harry) is working from Hallig Langeness (DID N-19, DLFF-013, Loc JO44HP) in CW and SSB until May 11. QSL via DF6BL. See also: http://www.df6bl.eu

EU-043, SM6, Goteborg och Bohus/Halland County group: Ric,DL2VFR, and Norbert,DL2RNS, are planning another trip through Sweden and Norway. Their first destination will be Orust Island from May 11-14 and they will be active in SSB/CW as SD7V/6 and SD7N/6.
QSLs for SD7V via DL2VFR and for SD7N via DL2RNS.

EU-049, SV, North Aegean Islands: Vom 11. bis 15.May ist Fred,PA1FJ, von der Island Samos ((EU-049, GIOTA SAS-006, MIA MG-099, WLOTA 4163, Loc KM37) als SV8/PA1FJ/p QRV. Er arbeitet nur in SSB von 40m-10m. Bei Moeglich-keit wird auch versucht auf 6m aktiv zu werden. QSL via PA1FJ.

EU-070, F, Provence-Cote D'Azur (Var) Region group: Holger,DL1COP, Alex,DL1KD, Juergen,DJ2VO, Martin,DL3KMS, und Helmut,DL3KBQ, aktivieren die Island Porquerolles (DIFM ME010, WLOTA 1107). Als F/homecall sind sie vom 12.-25.May auf 80m-10m in allen Betriebsarten QRV.
QSLs via homecalls (bureau/direct).

EU-049, SV, North Aegean Islands: Fred,SV8/PA1FJ/p, is going to hit the air-waves from Samos (EU-049, GIOTA SAS-006/MIA MG-099/WLOTA 4163/Loc KM37) from May 11-15. He works in SSB only on 40m-10m and if possible also on 6m. QSL via PA1FJ.

EU-070, F, Provence-Cote D'Azur (Var) Region group: Holger,F/DL1COP, Alex,F/DL1KD, Juergen,F/DJ2VO, Martin,F/DL3KMS, and Helmut,F/DL3KBQ, will be QRV from Porquerolles Island (DIFM ME010, WLOTA 1107) working in all modes on 80m-10m from May 12-25. QSLs via homecalls.

EU-114, GU/MU, Guernsey group: Hans,MU/PA0VHA, Steef,MU/PA2A, Wim,MU/PA2AM, and Jack,MU/PA3BAG, will show up from Guernsey (EU-017, IIA ME-001, MIA MI-053, WLOTA 1144) from May 12-19. Listen for them in CW, SSB, RTTY and PSK on 80m-6mm, with emphasis put on 30m/17m/12m.
QSLs via homecalls (bureau/direct). See also: http://www.pi4cc.nl

EU-127, DL, Schleswig-Holstein State South West group: Michael,DL4ABO/p, is working from Neuwerk Island (GIA N-012, DLFF-005) and plans to activate the lighthouse (DLTD #38, ARLHS FED-165, TWLHD WLH DL-019, WLOTA 2311) with FT-857D and FD-4 on the HF bands on May 10/11. QSL via DL4ABO.

EU-141, LA&#65533; Finnmark County East: Helmut,LA/DL5DSM, and Bernhard,LA/DL9UB
F,
will be QRV from Vardo Island (WLOTA 0106) from May 15-23. They also
plan a short trip to Hornoya Island (WLOTA 2751). QSLs via homecalls.

NA-240 (IOTA-NEW), KL7, Bethel County group: The Russian Robinson Club (RRC) members Yuri,N3QQ, and Tim,NL8F, will try again to activate the last new IOTA group in Alaska. They plan to become active as KL7RRC/p from

May 11-14. See also: http://www.na-234.com
QSLs for Europe/Russia via UA9OBA, all others via N7RO.

SA-080, PY6, Bahia State Centre group: Renner,PY7RP/6, will be QRV from Tinhare Island (DIB BA-05, WLOTA 1624) from May 10-13. He wants to hand out some IOTA points in CW and SSB working holiday style with 100 watts and wire antennas. QSL via homecall (bureau/direct).

QSL Manager:
N0ABA (n0aba@cox.net) is looking for a new QSL route for 4F9HXB (sk).

NI5DX is the new QSL manager of ZS3Y. He will confirm all QSOs with
Volker starting from Oct 11, 2008, when he receives the QSLs from
the printer in about six weeks.

QSLs arrived bureau: BD5BAJ, CE4UJU, FR5DZ (F6CXV), HF0BJP (SQ1RMM),
J5NAR (HA0NAR), JW8DW (LA8DW), R10RTRS (R7AA), SU9VB,
TJ3AY (F5LGE), TK4DS (ON4PJA), TX6A (F6AML, 6 years),
ZL8X (DJ2MX)ZY0T (PY1NB)

QSLs arrived LoTW: PJ2/AA9A

6m band extended in Portugal

The National Communications Authority of Portugal (ANACOM) extended the
6m band for Portuguese HAMs and the frequency range 50-52 MHz is now
allocated to amateur radio on a secondary basis after the analogue
TV broadcasting transmissions were completely switched off.

37th HAM RADIO fair in Friedrichshafen

"Amateur radio digital" is the motto of the 37th HAM RADIO fair, which takes
place in Friedrichshafen/Germany from Jun 22-24, 2012. An important part of
the largest amateur radio fair in Europe is the 63rd Lake Constance meeting
with an extensive program of lectures and the flea market.

schedule that day.

==> + DAYTON HAMVENTION: ARRL EXPO OFFERS ACTIVITIES FOR THE DIYER
```

When the ARRL EXPO comes to the Dayton Hamvention® May 18-20, it will bring activities for almost every Amateur Radio activity under the Sun. From radiosport to card checking to scouting to the Youth Lounge, every radio amateur will definitely find something to suit his or her interests. This year -- in addition to our popular kit building station -- watch how "makers" and "hackers" are using Amateur Radio in "Do It Yourself" projects on the DIY Stage in the ARRL EXPO, and hear from hams who are doing-it-themselves. Today's Amateur Radio innovators will demonstrate a variety of creative projects and cool technology right

before your eyes! Read more here
<http://www.arrl.org/news/arrl-expo-offers-activities-for-the-diyer>.

==> + FCC NEWS: FCC SEEKS HIGHER VANITY CALL SIGN FEE

The FCC released a Notice of Proposed Rulemaking on May 4, seeking to raise the fee for Amateur Radio vanity call signs. Currently, a vanity call sign costs $14.20 and is good for 10 years; the new fee, if the FCC plan goes through, will go up to $15 for 10 years, an increase of 80 cents. The FCC is authorized by the Communications Act of 1934 (as amended) to collect vanity call sign fees to recover the costs associated with that program. Read more here <http://www.arrl.org/news/fcc-seeks-higher-vanity-call-sign-fee>.

==> + FCC NEWS: SENATE APPROVES TWO NEW FCC COMMISSIONERS, COMMISSION TO BE AT FULL STRENGTH

Six months after President Barack Obama nominated Jessica Rosenworcel and Ajit Varadaraj Pai to the Federal Communications Commission, the Senate confirmed their appointments on Monday, May 7. Rosenworcel, a Democrat, fills the seat vacated by Michael Copps who retired from the Commission earlier this year; her term runs through June 30, 2015. Pai, a Republican, replaces Meredith Attwell Baker, who left the FCC in June 2010; his term runs through June 30, 2016. Once Rosenworcel and Pai are sworn in, the FCC will be at its full complement of five Commissioners.

According to various reports, the two will be sworn in by the end of this week. Their nominations had been held up since December in an unrelated dispute between the FCC and Senator Chuck Grassley (R-Iowa) over agency approval of LightSquared's wireless application. When Grassley received the sought-after documents two weeks ago, he lifted a hold on the nominations. Read more here <http://www.arrl.org/news/senate-approves-two-new-fcc-commissioners-commission-to-be-at-full-strength>.

==> + END OF AN ERA: HEATHKIT EDUCATIONAL SYSTEMS CLOSES UP SHOP

For the second time since 1992, Heathkit Educational Services has shuttered its doors. Rumors of the legendary kit-building company's demise were posted on QRZ.com, with several readers bringing the news to the attention of the ARRL. In August 2011, Heathkit announced it was returning to the kit building business, and in September, that it would once again be manufacturing Amateur Radio kits. The ARRL tried to reach Heathkit to confirm that the company is still in business, but their phone and fax numbers have a continuous busy signal, and e-mails to the company have gone unanswered. Read more here <http://www.arrl.org/news/heathkit-educational-systems-closes-up-shop>.

==> + AMATEUR RADIO IN SPACE: THREE HAMS VENTURE TO ISS NEXT WEEK

NASA will televise <http://www.nasa.gov/ntv> the launch and docking of the next mission to the International Space Station (ISS

<http://www.nasa.gov/station>), scheduled for May 14. NASA Flight Engineer Joseph Acaba, KE5DAR, and his two Russian crewmates, Soyuz Commander Gennady Padalka, RN3DT, and Flight Engineer Sergei Revin, RN3BS, are completing their training as they undergo Soyuz spacecraft fit. Live NASA TV coverage <http://www.nasa.gov/ntv> of the Soyuz TMA-04M spacecraft launch from the Baikonur Cosmodrome in Kazakhstan begins at 9 PM CDT on Monday, May 14 (0200 UTC May 15), with the launch scheduled for 10:01 PM CDT (0301 UTC).

The trio will arrive at the station May 16, joining Expedition 31 Commander Oleg Kononenko, RN3DX, of the Russian Federal Space Agency, Flight Engineer Don Pettit, KD5MDT, of NASA and Flight Engineer Andrei Kuipers, PI9ISS, of the European Space Agency, who have been aboard the ISS since December 2011. Padalka, Acaba and Revin will transition to the Expedition 32 crew in July and return to Earth in mid-September. You can watch live online <http://www.nasa.gov/multimedia/nasatv/index.html> on the NASA TV Public and Media channels, or on your television set. Contact your local provider for the NASA TV channel in your area. Click here <http://www.arrl.org/news/three-hams-venture-to-iss-next-week> for a complete schedule of televised events.

==> + BSA TO OFFER MORSE CODE INTERPRETER STRIP

For many years, Boy Scouts and Scouters have been able to earn an interpreter strip to wear on their uniforms. This strip -- worn on the uniform above the right pocket -- denotes proficiency in a foreign language or sign language. Each language has its own strip (with the name of the language embroidered in that language), and some Scouts and Scouters wear more than one strip. Now those hams involved with the Boy Scouts can show their proficiency in Morse code with a Morse code interpreter strip (with M-O-R-S-E spelled out in Morse code). Read more here <http://www.arrl.org/news/bsa-to-offer-morse-code-interpreter-strip>.

==> ON THE AIR: COAST GUARD TO JOIN ARMED FORCES CROSSBAND COMMUNICATIONS TEST

The US Coast Guard will be joining the Army, Air Force, Navy and Marines in the 2012 Armed Forces Crossband Test, scheduled for May 12. In addition to the Coast Guard station, five Army stations, three Air Force stations and six Navy/Marine Corps stations will be on the air to celebrate the 62nd anniversary of Armed Forces Day. Read more here <http://www.arrl.org/news/coast-guard-to-join-armed-forces-crossband-communications-test>.

==> SOLAR UPDATE

Tad "Flashing and frolicsome under the Sun <http://www.youtube.com/watch?v=Jzf_yDVbKlA>" Cook, K7RA, reports: The average daily solar flux for the past week rose slightly, 116.2 to 119, but the average daily sunspot numbers declined more than 14 points --

about 13 percent -- to 92.6. The predicted solar flux for the near term is quite a bit higher than the average for the past week: Solar flux on May 10-13 is 130, then 135 on May 14-17, and then it drops sharply to 110 on May 18-22, 115 on May 23-25, 110 on May 26, and then down to 105 on May 27-31. The predicted planetary A index is 22, 15, 10, 8 and 5 on May 10-14, 8 on May 15-16, 5 on May 17-18, 8 and 10 on May 19-20, 15 on May 21-23, 8 on May 24, and 5 on May 25-June 4. The predicted planetary A index of 22 on May 10 looks like a continuation of activity from May 9, which resulted in a planetary A index of 24 and a mid-latitude A index of 19. This was triggered by a pair of coronal mass ejections and solar wind stream, all from sunspot group 1476, which is now swinging into prime geo-effective position. This means it is very close to the center of the visible solar disk, pointing emissions straight toward Earth. It could be the source for more geomagnetic upset. Look for more on the ARRL website on Friday, May 11. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Ralph Vaughan Williams' Sea Symphony <http://en.wikipedia.org/wiki/Sea_Symphony> (III Scherzo The Waves), taken from Walt Whitman's Leaves of Grass <http://en.wikipedia.org/wiki/Leaves_of_Grass> (Book XIX <http://en.wikisource.org/wiki/Leaves_of_Grass/Book_XIX>, After the Sea-Ship <http://en.wikisource.org/wiki/Leaves_of_Grass/Book_XIX#After_the_Sea-Ship>).

==> DXCC NEWS: DXCC DESK APPROVES DXPEDITIONS TO YEMEN AND SOMALIA

ARRL DXCC Manager Bill Moore, NC1L, reports that the current 7O6T DXpedition to Yemen and the February 2012 6O3A DXpedition to Somalia have been approved for DXCC credit. "If you had cards that were recently rejected for the 6O3A operation, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk," Moore said. "Please note that due to extremely heavy e-mail, DXCC staff may not respond to your message. Once your record is updated, results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts or in the live, daily DX standings <http://www.arrl.org/dxcc/>. Due to a backup on DXCC e-mail, DXCC staff will make the corrections to accounts, but may not respond directly to messages about this."

==> THIS WEEK IN RADIOSPORT

This week:

- May 11 -- NCCC Sprint Ladder
- May 12 -- FISTS Spring Sprint
- May 12-13 -- Nevada Mustang Roundup; EUCW Fraternizing CW QSO Party; VOLTA WW RTTY Contest; CQ-M International DX Contest; 50 MHz Spring Sprint
- May 13 -- SKCC Weekend Sprintathon; WAB LF Phone Contest
- May 14 -- NAQCC-EU Monthly Sprint
- May 17 -- NAQCC Straight Key/Bug Sprint

Next week:

- May 19 -- Feld Hell Sprint
- May 19-20 -- His Majesty King of Spain Contest (CW); EU PSK DX
Contest; Baltic Contest
- May 21 -- Run for the Bacon QRP Contest
- May 21-22 -- Aegean RTTY Contest
- May 23-24 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- May 18-20 -- Dayton Hamvention
<http://www.arrl.org/hamfests/dayton-hamvention-3>, Dayton, Ohio
- June 1-3 -- ARRL Northwestern Division Convention
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-3>,
Seaside, Oregon
- June 2 -- ARRL Georgia Section Convention
<http://www.arrl.org/hamfests/georgia-section-convention-atlanta-hamfest-1>,
Marietta, Georgia
- June 8-9 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-ham-com-1>,
Plano, Texas
- June 9 -- ARRL Arkansas State Convention

"Heart of Georgia" Hamfest, Saturday, May 12

Posted: 10 May 2012 07:44 AM PDT
http://forums.qrz.com/showthread.php?345634-quot-Heart-of-Georgia-quot-Hamfest-Saturday-May-12&goto=newpost

I would like to invite everyone to attend the "Heart of

Georgia" hamfest in Byron GA this coming Saturday, May 12.

I will be presenting an 80 year certificate to Harvey Chase,

W4TG. Unfortunately, this presentation will be done

posthumously. Even when Harvey was in the hospital, he

was aware of the presentation. We told him that if we

could not do it in time, we would make the presentation

as a memorial to him. And that is what we will be doing.

My understanding is that this will be done at a special

time in front of the entire hamfest. Harvey was a very

well respected ham and it will be a fitting tribute to him.

If you are in the area, please try to attend. More details

about the hamfest can be found at

http://www.heartofgeorgiahamfest.com/

Of course we will also have our normal QCWA table, and I

invite you to stop by, sign in, and say hello.

Thanks.

73,

Ken, W8EK

Ken Simpson

QCWA National Director

Amateur Radio Newsline(tm) Report 1813 - May 11 2012

Amateur Radio Newsline report number 1813 with a release date of May 11th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. High schoolers in California send a ham radio balloon to the edge of space; Israeli hams protest on-line against DXCC credit for the 7O6T operation from Yemen; W5KUB to again netcast live from the Dayton Hamvention and the latest on the Amateur Radio Direction Finding Championship coming to San Diego. Find out the details are on Amateur Radio Newsline(tm) report number 1813 coming your way right now.

HAM RADIO NEAR SPACE: ANACAPA HIGH ALTITUDE BALLOON SOARS TO NEAR 112000 FEET

We're not sure if it's a new world altitude record for a ham radio equipped high altitude balloon, but members of the Anacapa Near Space Exploration Club at California's Anacapa School are celebrating the recent success of their second near space probe. One that reached an altitude of almost 112,000 feet. Amateur Radio Newsline's Don Carlson, KQ6FM, has the rest of the story:

--

Balloon launch team: "5 - 4 - 3 - 2 - 1 - Go!!"

--

That's the sound of a group of teenage near-space adventurers lofting a high altitude balloon that would soon soar above California's central coast and then eastward toward the states central valley.

Called Anacapa Amateur High-Altitude Balloon 2, a student team from the Anacapa School launched two payload capsules tethered to a weather balloon on Saturday, May 5th. Equipped with GPS, atmospheric sensors, high-definition video and still cameras, a television transmitter and a Geiger counter, the payload downlinked live data, video and images during its ascent.

Anacapa Amateur High-Altitude Balloon 2 was designed and built entirely by students that included Alex Carlson, KJ6UGF and Genevieve Hatfield, KJ6UGH. They along with non-hams Grayson Baggiolini, Julio Bernal and

Christian Eckert made up the construction and launch team that was under the supervision of faculty advisor Levi Maaia, K6LCM.

--

K6LCM: "Two years ago in September of 2010, one of my students, Connor Proctor and I got together and were talking about some of the headlines we had seen on-line about high altitude balloons and decided that it would be a neat project to bring to the Anacapa School in Santa Barbara. So we brought it to the Head Master of the school and said we want to do this. He said what an awesome idea and was behind us 110% as we sought funding for the project and put together a small team of students to spearhead the first launch."

--

As the balloon climbed through the thinning air, the decreasing atmospheric pressure caused it to expand nearly ten times in diameter. On reaching its apex above California's Central Valley, the balloon burst, sending the payload back to mother Earth under the canopy of a small parachute. By reaching an altitude of 111,814 feet, this flight shattered the record of the group's own first balloon flight by more than 20,000 feet.

Over the coming weeks the students expect to thoroughly document the flight and analyze the collected data. More information, including photos and a condensed version of the in-flight video can be found online at www.anacapaschool.org/ansec

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

And less we forget to mention, the student group has been working on this high altitude ham radio balloon project since September of 2011. (ARNewsline(tm))

**

SCHOOL HAM HAPPENINGS: UK SCHOOL TO HOLD D-STAR SPECIAL EVENT WANTS CONTACTS

A United Kingdom school in the village of Gresham will be hosting a special event station on May 23rd using the D-STAR digital network. The event is specifically for children age 6 to 11 and will use the callsign GB2GVS which stands for Gresham Village School.

Andy Johnston, 2E0AIV, is the event coordinator. He says that they have already arranged link-ups with schools in Northern Ireland, the United States and England, but are looking for more countries and schools to participate. If anyone is interested, they can contact Andy via e-mail to 2e0avi (at) 2e0aiv (dot) co (dot) uk.

**

ENFORCEMENT NEEDED: RADIO MYANMAR INTERFERENCE ON 40 METERS

The South African Radio League reports that Radio Myanmar has been found to be broadcasting illegally on 7.110 MHz. The station is transmitting using full carrier AM from 15:30 UTC every day and is causing interference on South Africa's publicized region wide emergency communications frequency.

According to the South African Radio League, steps are being taken to issue a formal objection but this takes time and the correct procedures need to be followed. Meantime, South Africa's Hamnet emergency communications response group has sent an official complaint directly to Radio Myanmar and requested that it move frequency. (SARL)

**

DX NEWS: 7O6T YEMEN OPERATION APPROVED FOR DXCC OVER PROTESTS OF ISRAELI HAMS

Over complaints that were voiced on QRZ.com and other public websites by some Israeli hams, the ARRL DXCC Awards Desk has approved the current 7O6T operation from Yemen for DXCC credit. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with more:

--

A small but vocal number of Israeli hams have been arguing on-line that the 7O6T from Yemen should not be allowed for DXCC because the operators refused to make contact with 4X and 4Z prefix hams. They note that Israel has no banned countries list and as such refusal of the 7O6T operators to contact them was at least a violation of the principals and the spirit of the DXCC program.

While its true that Israel has no banned countries list, many of its neighbors consider themselves technically in a state of war with the Jewish state and have been since its creation through partitioning following World War 2. As such these nations ban hams operating under their jurisdiction from making contact with their counterparts in Israel.

The 7O6T operation reportedly has the support of Yemen's Ministry of the Interior, the Ministry of Information, the Ministry of Radio and the Ministry of Telecommunications and Information Technology. As such it is a pretty good guess that not recognizing Israeli stations was a decree imposed by Yemen on the 7O6T operating team and not one of their own choosing.

At airtime, it's not known if any of the protesting Israeli hams contacted the ARRL DXCC Desk regarding this issue of if it was just another of those cyberspace only arguments. Either way it came to an abrupt end on Saturday, May 5th. That's when ARRL Awards Branch Manager Bill Moore, NC1L, issued a news release stating that the current 7O6T operation from Yemen along with the earlier 6O3A DXpedition to Somalia have been granted DXCC approval. As such, both will be counted for

DXCC credit.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The 7O6T adventure began at 2100 UTC Monday, April 30th and has been causing massive pile-ups wherever the operators show up. It will continue through 2100 UTC on May 15th.

Up until this operation began, Yemen was ranked as number 5 in the DX Magazine's list of most wanted entities behind North Korea, plus Navassa, Bouvet and Heard Islands.

We will have more DX news later on in this week's Amateur Radio Newsline report. (ARNewsline, QRZ.com, ARRL DXCC Desk)

**

RESTRUCTURING: 6 METER EXTENSION GRANTED IN PORTUGAL

Now that terrestrial analog TV has been switched off in Portugal, the National Communications Authority has agreed to extend the 6 meter band for radio amateurs. As a result, Portuguese Category 1, A and B amateurs can now use 50 to 52 MHz on a secondary basis with a maximum power output of 25 watts. (GB2RS)

**

RADIO RULES: VANITY CALLSIGN FEE MAY GO UP 80 CENTS

The FCC has released a Notice of Proposed Rulemaking that, among other things, would raise the cost of obtaining a vanity callsign to $15.00 for a ten year license term. The current cost is $14.20 which in essence means an increase of only 80 cents if the rule making is approved. (FCC)

**

RADIO AND SCOUTING: BSA ANNOUNCES NEW MORSE CODE INTERPRETER STRIP

The Boy Scouts of America have just announced a new "Interpreter Strip" for Morse Code. An "Interpreter Strip" on the uniform means that the Scout or adult leader is able to communicate in a particular language. Amateur Radio Newsline's Mark Abramovich, NT3V, explains:

--

Those older Scouts and former Scouts among you may remember the Boy Scout requirements that said a Scout had to learn Morse Code or signal flags to send and receive a message. And, even though that requirement has disappeared and Morse Code is no longer mandatory to get any amateur radio license in the United States, the BSA is reviving Morse Code as a "language" worth learning.

You can probably credit Jim Wilson, K5ND, for getting this one from concept to reality.

He's the BSA's "Jamboree on the Air" organizer and the volunteer chairman for the next K2BSA operation at the 2013 National Boy Scouts Jamboree at the Summit in West Virigina.

Wilson works at BSA headquarters in Texas and is a big promoter of amateur radio in Scouting. So much so, Wilson says he organized a national Radio Scouting advisory committee last year to get stronger support in the amateur and Scouting community for JOTA.

Earlier this year, Wilson says a member of that committee made a suggestion about getting some additional Scouting recognition for amateur radio.

Wilson says there were some ideas that eventually evolved into exploring the "interpreter" strip worn on the Scout uniform to show a Scout has some ability to speak a certain language.

Wilson admits he came up with the idea for "Morse" on the strip - but in the letters of the language - dah-dah, dah-dah-dah, di-dah-dit, dit-dit-dit, dit."

Wilson says he quickly moved the idea over to the BSA's national awards committee where it got a favorable reception and approval within months.

So how does a boy earn it?

Wilson says there are three requirements, the first....

"It's carrying on a 5-minute conversation in Morse Code at a speed of at least 5 words per minute," Wilson explains. "And, then the second one, copying correctly a 2-minute message sent in Morse Code at a minimum of 5-words-per-minute.

"And, copying of course means writing the message down as it's received. And, then, three, sending a 25-word written document in Morse Code at a minimum of 5 words per minute."

Wilson says Scouts can be certified by their Scoutmaster or maybe even a ham who's an adult Scout leader.

Wilson says the idea is to further cement the bonds of brotherhood between Scouting and ham radio operators. And, of course, Wilson is....

"Eager to increase participation in amateur radio to provide an opportunity for Scouts to get involved in a fun hobby, a hobby that promotes communicating with lots of Scouts and others around the country and around the world," Wilson says. "And, it's science, it's technology, it's engineering, it's math - the stem items that are of enormous interest right now and frankly have been in Boy Scouting for quite some time."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

For more on the new Boy Scouts of America Interpreter Strip for Morse Code please visit tinyurl.com/scouting-morse-code on the World-Wide-Web. (NT3V, ARNewsline(tm))

ENFORCEMENT: FCC AFFIRMS $10000 FINE AGAINST OHIO AM STATION

The FCC has affirmed a $10,000 Monetary Forfeiture Order it issued to Taylor Broadcasting Company which is the licensee of AM Station WJTB in Elyria, Ohio . This for the station willfully and repeatedly violating Section 73.1125(a) of the Commission's rules by failing to maintain a management and staff presence at the station's main studio.

As previously reported, back on February 13th the Enforcement Bureau's Detroit Office issued a Notice of Apparent Liability in the amount of $10,000 to Taylor Broadcasting. Since then, Taylor Broadcasting has not filed a response to the NAL.

Now, based on the information before it, on May 2nd the FCC has affirmed the monetary forfeiture. Its also given Taylor Broadcasting the customary 30 days to pay the fine or to file an appeal. (FCC)

**

MEDIA STATS: CABLE LOOSES AND OVER THE AIR VIEWERSHIP REMAINS DOMINANT

Some fascinating home viewing media statistics. According to Multichannel News, United States cable system operators lost about 2 point 9 million video subscribers in 2011. That's a drop of 1 point 5 percent in the overall pay-TV market.

Meanwhile, households with broadband and only free, over-the-air broadcast TV increased by 631,000 over the course of last year, climbing 14% to 5.1 million. Broadcast-only homes dropped 1%, to about 11 million households versus 11.15 million a year earlier.

Whether or not the broadband-plus-free-TV increase reflects a gathering cord-cutting trend, the survey found that 98% of video viewing remained on traditional TV in the 4th quarter of 2011. (Multichannel News)

**

HAM HAPPENINGS: ILLW REGISTRATION HITS THE 200 MARK

Registration for the 2012 International Lighthouse and Lightship Weekend has topped the double century mark. This with word that the West Side Amateur Radio Club of Los Angeles is the 200th registratant for this years event with its members operating station W6A at the Port Fermin Lighthouse located near the San Pedro port area of the city.

The entry by the West Side Amateur Radio Club puts the USA on 28 registrations/ Australia is so far number one with 38 followed by Germany 33, England with 16, and The Netherlands sporting 13. The total of nations committed to the event so far is nearing 30.

International Lighthouse and Lightship Weekend will be held on August the 18th and 19th. Find out more or register your lighthouse by visiting the ILLW (dot) net. (VK3PC)

**

HAM HAPPENINGS: NORTHERN IRELAND AMATEUR RADIO CONFERENCE JUNE 16

>From the ham radio social page, if you plan to be in Ireland on June 16th, you might want to stop by the Northern Ireland Amateur Radio Conference. Sponsored by the West Tyrone Amateur Radio Club the venue this year is the Technology Education Centre in the town of Omagh. Featured will be lectures, seminars and demonstrations along with commercial vendors and booth representing special interest groups and various national amateur radio societies. Again the date for the 2012 Northern Ireland Amateur Radio Conference at the Technology Education Centre in Omagh. (IRTS)

**

HAM HAPPENINGS: W5KUB TO NETCAST LIVE FROM HAMVENTION 2012

Closer to home, Tom Medlin, W5KUB, will once again be streaming live television from the 2012 Dayton Hamvention.

Tom will begin his live webcast on Wednesday morning May 16th at 0800 Central, broadcasting his 550 mile drive. He will then set up shop in the Hamvention Flea Market and will spend the next three days bringing you the sights and sounds of Hamvention 2012 before live-casting his drive home.

While on the web from Hamvention Tom and his crew will be interviewing some of ham radios best known celebrities. This includes television producer John Amodeo, NN6JA, of the hit television comedy Last Man Standing.

So if you cannot be at Hamvention in person, you can enjoy part of the festivities vicariously by tuning in via the Internet to w5kub dot com. Again that's w5kub dot com for this years live netcast from Hamvention 2012. (W5KUB)

HAM HAPPENINGS: NEWSLINE FORUM AT HAMVENTION - "HAM RADIO IN THE YEAR 2112"

Also a reminder that we at Amateur Radio Newsline will once again be hosting the annual Ham Radio Town Meeting at Hamvention 2012. This years topic is titled "Imagining the Future: Ham Radio in the Year 2112" and takes an optimistic look at the way we may be operating as a hobby and a service 100 years from now.

This years presenters include CQ Magazine Editor Rich Moseson, W2VU; IARU Secretary Rod Staffdord, W6ROD and teenage ham radio high altitude balloon enthusiast Erin King, AK4JG, to name only three. They will be joined by several other notables from the world of amateur radio on a journey through time into what may be our future.

Look for us on Saturday, May 20th in Meeting Room 2 at the Hara Arena. Our session runs from 11:45 a.m. to 2:00 p.m. and we promise you a fun and imaginative time. We hope to see many of you there. (ARNewsline(tm))

OFF THE AIR: RADIO CANADA INTERNATIONAL TO END SHORTWAVE AND SATELLITE BROADCASTS

The shortwave bands will soon be a little less entertaining. This after it was announced that an 80% budget cut is forcing Radio Canada International to abandon shortwave and satellite radio broadcasting, leaving the World-Wide-Web as RCI's only delivery method.

The latest cut of $10 million takes place on June 26th. Once in effect, a date will be set to end the broadcasts from Radio Canada International's Sackville, New Brunwick, transmission site which will then be abandoned. Besides ending shortwave and satellite broadcasting, Radio Canada International will also lose its news operation and cease producing its own programming. (RW)

**

NAMES IN THE NEWS: K9VV APPOINTED NEW SECTION MANAGER FOR THE US VIRGIN ISLANDS

Some names in the news. First up is Fred Kleber, K9VV, who has been appointed as Section Manager of the Virgin Islands Section beginning May 1, 2012. Kleber, of Christainsted, is taking the reins from John

Ellis, NP2B, who is planning to move out of the section. Ellis has been Section Manager of the Virgin Islands since 1996. Kleber has served as the Section Emergency Coordinator of the Virgin Islands this past year. (ARRL)

**

NAMES IN THE NEWS: THREE SHUTTLE VETERANS INDUCTED INTO THE ASTRONAUT HALL OF FAME

The U.S. Astronaut Hall of Fame has inducted three new space travelers into its ranks. On Saturday, May 5th, Kevin Chilton, Franklin Chang Diaz, and Charles Precourt, became the Hall of Fame's 11th class of space shuttle astronauts and the first to be inducted after the 30 year program had come to its end.

The three were enshrined during a public ceremony held at NASA's Kennedy Space Center Visitor Complex in Florida, which includes the Hall of Fame. To have been eligible for induction in 2012, the astronauts needed to have made their first space mission in 1994 or earlier. They also had to be retired from flight status as a NASA commander, pilot or mission specialist for at least five years, be a U.S. citizen; and have orbited the Earth at least once.

Induction of the shuttle veterans raised the number of honorees in the Hall of Fame to 81. This includes all of the Mercury, Gemini and Apollo pioneers. (NASA via N6ZXJ)

HAM RADIO IN SPACE: FOX PROJECT REVIEW SAYS BIRD DEVELOPMENT ON TRACK

AMSAT's Fox Satellite Project has completed its preliminary design review and is looking good. Mechanical, RF, control, power, and related issues were evaluated at the three night session in late April with the needed development for various systems refined.

One thing that became evident is that AMSAT is in need of an experienced RF designer for the Fox-1 satellite. Due to international trade restrictions the person must be a US citizen or permanent resident. If you interested please send an e-mail with your phone number to Tony Monteiro to AA2TX (at) amsat (dot) org.

Currently, Fox-1 is slated for launch in the second half of 2013. (AMSAT-NA)

**

AWARDS NEWS: DXCC ONLINE APPLICATION TURN-AROUND.

The ARRL's new on-line DXCC application system appears to be up and running quite smoothly. This according to Steve Lawrence, WB6RSE, of Los Angeles California.

WB6RSE tells the Ohio Penn DX Newsletter that he submitted an Online DXCC application just prior to the recent International DX Convention in Visalia, California. At the convention he had his cards checked and the paperwork accepted for forwarding to the DXCC desk for processing. Just two weeks later, the credits appeared in Steve's Logbook of the World DXCC Account Status. (OPDX)

**

ON THE AIR: KK5W FROM GALVESTON TEXAS ON MUSEUM SHIPS WEEKEND

On the air, listen out for members of the Brazos Valley Amateur Radio Club activating the call KK5W to be active during the Museum Ships Weekend on June 2nd and 3rd. Operations will be from radio rooms of WWII Submarine USS Cavalla and Destroyer Escort USS Stewart at Seawolf Park on Pelican Island in Galveston, Texas. They plan to operate on 40 through 10 meters using CW and SSB. QSL with a self addressed stamped envelope to KK5W as listed on QRZ.com. More information is available on-line at www.bvarc.org (BVARC)

**

DX

In DX, the Wessex Contest Group will be operating from the Isle of Skye through the 19th of May. They will be using a variety of equipment including some homebrew gear, a number of QRP stations along with the normal high power modern contest gear. QSL via EB7DX either direct, via the bureau or via Logbook of The World.

F5IRO is expected to return to Uganda in early May. With the help of 5X1D he hopes to get his license during the first week and plans to become QRV on CW on the high frequency bands in the evenings. Some PSK may be possible also. QSL via F8DFP.

DH2AK and DL1THM, will be active portable PJ2 from Curacao on a holiday style operation through May 18th. They will be on the air using the PJ2A club station mainly on SSB on 20 and 15 meters. QSL via bureau to their home calls.

Brothers ZB3M and ZB2ER are using the special calls ZQ3M and ZQ2ER from Gibralter through June 10th. This, to celebrate the Queen's Diamond Jubilee. QSL direct only to ZB3M.

ZS6RGV is the new radio operator on the Marion Island base. His equipment includes an Icom IC-736 transceiver and FL-7000 amplifier. ZS1HF is going to help him with applying for a ZS8 call and will act as his QSL manager.

Lastly, an international team of operators will be on the air as 3D2C from Conway Reef between September 24th and October 5th. Activity will be on 160 through 2 meters using CW, SSB, RTTY, SSTV and PSK31. QSL via YT1AD, direct or by the bureau.

(Above from various DX news sources)

THAT FINAL ITEM: ARDF CHAMPIONSHIPS COMING TO SAN DIEGO CA

And finally this week, they call themselves foxtailers, but they're not really after those bushy-tailed creatures. Here's the straight scoop from Newsline's Joe Moell, K0OV, who is also ARRL's Direction Finding Coordinator.

--

They range in age from the teens to the 70's, and they're coming from all over the USA to compete in the most physical of all ham radio sports. I'm talking about on-foot hidden transmitter hunters, also called foxtailers and radio-orienteers. Their sport is called Amateur Radio Direction Finding, or ARDF.

It's all done on foot in a BIG outdoor space. Thanks to a set of standard international rules, it's pretty much the same all over the world, so we can have international competitions. Your mission is to try to find up to five hidden ham radio transmitters without assistance while on the run, or trotting, or just walking. You'll carry a map and compass so you don't get lost.

You can mix in with the USA's best radio-orienteers at the twelfth national ARDF championships in the mountains east of San Diego during the week and weekend after Memorial Day. It starts off with two days of intense training, followed by three days of competition, all near Mount Laguna. You can stay in the lodge there or camp out among the tall pines.

Learn from the experts, then see how you do for yourself out on the courses. You don't have to be a marathoner to be successful, but it helps to be in good shape. There are nine separate categories with medals for the best three in each, so you'll only be competing against people of your own age range and gender. If you're in the top three of your category, you'll get a medal, and maybe you'll be invited to join ARDF Team USA as it travels to Serbia for the World ARDF Championships this September.

Registration for the championships is now open, so start making plans. You can read all the details and get the registration form on the web at www.homingin.com. That's homingin -- as one word -- homingin.com.

I hope to see YOU at the championships. For Amateur Radio Newsline, this is Joe Moell K-Zero-Oscar-Victor.

--

Again, for more information on this and other ham radio direction finding events, please take your web browser to www dot homingin dot com. (K0OV)

CubeSat workshop in Canberra

Philip VK3JNI on the WIA National Field Day.

St. Anthony's parish school Canberra ISS contact thanks to VK1IRC Peter.

Summits on the Air activity growing in VK

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING MAY 13 2012.

Public appeal, Central VK4 Region - Aircraft distress call

Police are appealing for public information in relation to an emergency
radio message received from an aircraft around 5.45pm yesterday in central
Queensland.

Around that time, another pilot in the air near Alpha reported hearing a
distress call to the relevant authorities.

Anyone that may have information relating to an overdue aircraft in the area,
including recreational aircraft such as ultralights, are urged to contact
Rockhampton Police on 4932 3500.

It is believed the distress call may have been made from within an area encompassing Quilpie, Alpha, Winton and Hughenden.

Anyone with information which could assist police with their investigations should contact Crime Stoppers anonymously via 1800 333 000 or crimestoppers.com.au

CubeSat workshop in Canberra

Australia is to hold a low cost space missions workshop in July that will explore the NASA CubeSat initiative to include an 8kg 6U satellite, designed to perform some of the Earth observation missions of larger 100 kg microsatellites.

The 6U CubeSat has a range of possible missions related to astronomy, atmospheric and other planetary science, space physics, observation and biology.

The workshop is particularly aimed at scientists and engineers interested in payload and mission concepts that take advantage of the greater payload capacity of the 6U CubeSat.

The Technology Keynote speaker is John W. Hines, Chief Technologist, NASA-Ames Research Centre.

Science Keynote is Professor Harvey Butcher, Director Research School of Astronomy and Astrophysics, and the Chair, Dr Steven Tsitas, Senior Research Associate, Australian Centre for Space Engineering Research, University of New South Wales.

Registration details of the July 17 and 18 workshop in Canberra, the world's first on the 6U CubeSat, are now available.

The URL is http://www.acser.unsw.edu.au/events/cubesat.html#register

(Jim Linton VK3PC)

Summits on the Air activity growing in VK

SOTA activity has continued to increase in April with new summits activators, operators activating for the first time and more operators joining the SOTA chase. Summits activated include Mt Cope in the Victorian high country; Mt Langi Ghiran, Mt Abrupt and Mt Sturgeon in and near the Grampians and no less than 5 summits within 2 metre range of Melbourne. Chasers have come from most call areas of VK and a good number from Europe. Life may be too short for QRP, but QRP is making it to Europe on 20 metres.

Efforts are continuing to bring SOTA activations to summits in VK1, 2 and 5. If you would like to help out or simply just find out more, check out the Yahoo Groups: SOTA Australia on the web at groups.yahoo.com/group/SOTA_Australia

If you would like to know more about SOTA, and are in Melbourne, the EMDRC are having a SOTA presentation by Wayne Merry VK3WAM next Friday, the 18th of May. All are welcome to attend this meeting, starting at 8pm

in the EMDRC club rooms at Milpara Scout Hall, 13A McCubbin St. Burwood.

(Wayne VK3WAM)

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

This is Philip VK3JNI with a brief update on the WIA National Field Day.

The support by radio clubs in all states of Australia over the weekend of the 14th and 15th of April continued to promote the hobby of amateur radio. Many private stations where heard on air assisting stations with contacts and reports during the weekend.

The clubs and individual operators who made the effort to demonstrate the hobby of amateur radio to the public should receive the congratulations of not only the WIA membership, but the amateur radio community as a whole.

Hundreds of people encountered our field day stations during this major Public Relations activity. The challenge now for the participating teams, is to convert some of the interest generated into new amateur radio operators and enthusiasts.

Personally I thank the participating teams in VK3 for the welcome I received over the two days. I was impressed with the effort and enthusiasm displayed by the operators and all those present at the stations.

Please remember to submit your reports and logs to the WIA before Friday 18th May. The WIA wish to acknowledge your work in promoting the hobby

HAMS ACROSS AUSTRALIA.

VK1

As all amateur radio operators are continually trying for that long distance QSO, one outer space contact was made in VK1 earlier this month. On Tuesday 3rd April 2012 at 20:13 UTC (18:13 Local Canberra time), a succuss full contact was made between St. Anthony's parish school, Wanniassa Canberra, where VK1IRC Peter's two sons attend, and Earth telebridge ground station Tony Hutchinson VK5ZAI in Kingston, South Australia with Keith Pugh, W5IU in Fort Worth Texas as Master of Ceremonies.

A full school hall was present to witness this amazing once in a life time event. All students at the school were asked to write a question to the Astronauts, of which Ten lucky students were selected to ask the Commander of the International Space station, Dan Burbank their questions, of which he provided excellent responses to the students. Commander Dan Burbank is the current commander of expedition 30.

Application for inclusion to participate in the ARISS programme (or Amateur radio on board the International space station) is a lengthy process, taking

up to 18 months for a school or educational institution to be selected and setup with the space station crew. From the moment Peter VK1IRC told the school about this opportunity, St Anthony's school truly embraced the idea and entered the queue. The opportunity came around faster than expected, being selected within twelve months, and the race to get everything in order was on.

As the contact is made using a phone patch device to an analogue line that is connected back to Tony VK5ZAI's base station, a lengthy run of phone cable was required to patch the device into the school's fax line located at the front of the school to the school hall which was at the other end of the school. Once this cable run was achieved, Tony mails the phone patch to you and you then set it up with the line and auditorium speakers. To make the contact even more enjoyable, a laptop with an internet connection was setup and after a brief presentation and introduction, a live view of the space station's position was projected so the audience could see that it was tracking over South Australia, VK5ZAI's ground station as the students talked live to Dan Burbank with the space station travelling in an orbit of around 27,000 Km an hour. This allowed for around a 10 minute window to talk from acquisition of signal to loss of signal, when the space stations dips over the horizon.

Leading up to the contact, St. Anthony's got into the space theme, with all the students preparing drawings of space and the solar system. These pictures were all on display in the hall on the evening resulting in a great educational event for everyone.

After the contact, the ten students that talked to Dan were awarded a certificate signed by Michael Owen, President WIA and Tony Hutchinson VK5ZAI.

Organising an event such as this does take time and Peter VK1IRC worked closely with Tony in South Australia to make sure that it was a night for everyone to remember. This contact, as is every ARISS scheduled contact to the ISS is also relayed live over EchoLink conference node *AMSAT*.
Each contact is also recorded and stored for playback at a later stage. The contact with St.Anthonys , along with others can be heard here by connecting to this conference node and entering the command .play 8.

Peter VK1IRC hopes to work with Tony again in the future and provide more schools and students in VK1 the opportunity to talk with an astronaut all in the name of education and what can be achieved in the world of Amateur radio.

(Peter VK 1 IRC)

FNNQARG 2012 Cancelled

At the May Management Meeting of theTARCinc it was reluctantly decided to cancel participation in the Far North and North Queensland Amateur Radio Gathering - due mainly to lack of support from Far Northern clubs who will be otherwise engaged in other activities during the Queens Jubilee Long Weekend in June.

There will be discussions amongst TARC club members during the next few Management Meetings to put together a more sustainable program of opportunities for hams in the north to attend gatherings in the field designed to enhance social contact and provide a chance for relaxation and radio operating in well supported yet economical camp sites.

HOWEVER! The Clairview Gathering weekend WAS a great success during the May Long Weekend.

Hams from as far as Charters Towers and Gladstone made a beeline to the Clairview Beach Holiday Park to enjoy a weekend of catching up, idea swapping, relaxing, outdoor cooking, portable radio operations and participation in a foxhunting session, a lovely evening banquet and the famous Mega Auction.

A view of the Super Moon across the bay and the procurement of such treasured items as morse keys, vintage radio equipment, computer and antenna gear, HANDBAGS, and other quality goods highlighted by the creative auctioning by Roy VK4RM assisted by Clive VK4ACC, Tony VK4HOG and Neil VK4MKY made the trip even more worthwhile.

Clive VK4ACC , Secretary RADAR CLUB in Rockhampton did a 40 minute presentation on radio and F Licencing at a local primary school recently.

All grade 6 and 7 pupils attended.

A small display and demo showing smallest ham radios to a large base stn HF went down well.

The kids loved it and were interested enough to stay behind and ask questions.

Looks like a weekend in training and a day doing assessments for a couple of teachers and a few students.

Looks promising for new recruits.

Looking Out for Your Mates

Greetings from the WIA, this is Ewan VK4ERM, considering Looking Out for Your Mates.

Within the Amateur Radio community we should be looking Out for Our Mates in many direct and indirect ways.

Operating our equipment in a comfortable shack at home, mobile through innumerable places in this broad land or setting up a field or portable station for a contest or to escape urban RF noise provide ample opportunities for Looking Out for Your Mates.

Unfortunately it is a truism that familiarity does breed contempt or at least avoidable carelessness or the taking of unnecessary risks. Sometimes the first we become aware of the error of judgement is when a situation goes wrong resulting in damage to what we have been working on, a minor physical inconvenience or personal injury.

What would you reasonably expect a mate to do in such circumstances? What would you do if you were witness to the potential for such a situation occurring?

In the first case a friendly word of caution from your mate may be all that was needed to jolt you out of complacency to reconsider your course of action. In the second case wouldn't you believe it was your responsibility to caution your mate on the likely outcome of his or her actions?

Either way, both situations demonstrate Looking Out for Your Mates and unlikely to cause offence with real mates.

The foregoing physical cause and effect situations are readily observable to which we can spontaneously react without offence to those with whom we are familiar. Far worse and more insidious is the onset and manifestation of mental stress. The gradual change in the behaviour of a mate may be so subtle that in the long term we don't notice it nor become aware of the past and present circumstances causing the change.

However, it is unfortunate that the first we become aware that a mate is under stress is when he or she explodes or crashes with unpredictable behaviour and outcomes. This is when you have to be Looking Out for Your

Mates, hopefully before situations come to a head and afterward if too late.

We like to think that we know and understand those whom we have known for years or decades but the reality is there may be disturbing or traumatic events buried in their memory and eating away at their very being; events and emotions they have never communicated to others, not even their mates.

Those in the far reaching fraternity of Amateur Radio are no different and if you become aware of changes in the personality and behaviour of your Amateur Radio friends in any circumstances then it is truly time to be Looking Out for Your Mates.

The changes you see may be their cry for help.

Look Out for Your Mates

This has been Ewan VK4ERM for the WIA Board

Repeater for Android

The latest version of Repeater for Android and Playbook by ZBM2 Software now includes repeater information for Australia, VK, as well as the UK, Germany, Italy, Poland, Norway, Spain, with more countries soon.

Features

Easily find Amateur Radio Repeaters across the UK, Europe and Australia.

• Complete database of UK Analogue, IRLP, EchoLink and D-Star repeaters.

• Growing database of German, Italian, Polish, Norwegian, Spanish and Australian repeaters, with more countries soon.

• Use network, GPS or a Locator to find Repeaters.

• No network connection required.

• Displays your locator and selection distance.

• Comprehensive selection, sorting and display options.

• Displays distance, heading and full repeater details.

• Supports App2SD.

• Fast and flexible, designed to help you use the repeater network.

Repeater will remain free. There will never be any charge for people to use it.

Finding Repeater

E 51 WL in the North Cook Islands has been heard on 6 meters. Keep an ear open for him just before 2300 UTC on or around 50.120 MHz
QSL as directed on the air

One for the prefix hunters to look out for this month is R1945HS
which is celebrating the 67th Anniversary of the end of World War 2.
The call will be in use until 31 May and QSL info is via RW6HS.

LOGBOOK OF THE WORLD MARKS 50,000 USERS

On May 1, Dragan Pavlovic, YT3PDT, completed his registration process for Logbook of The World (LoTW), becoming the 50,000th person to take advantage of the ARRL's online QSL confirmation system.

According to ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N there are more than 3500 individuals from outside the US in the process of obtaining a digital certificate, and more than 1800 individuals inside the US who have started the certificate process, but not yet finished.

4KS0NG - Eurovision Song Contest Azerbaijan

Sixteen amateur radio special event stations are being run in Azerbaijan to celebrate the Eurovision Song Contest.

The 2012 Eurovision Song Contest will take place on the 22nd, 24th and 26th of May in the capital of Azerbaijan, Baku. Azerbaijan won the right to host the contest when viewers and professional juries across Europe chose their 2011 entry "Running Scared" by Ell/Nikki as winner.

The Federation of Radio Sport of Azerbaijan will be celebrating "EUROVISION SONG CONTEST 2012" and is sponsoring a commemorative Diploma for amateur radio stations that have established two-way communications with EUROVISION-2012 special event stations from Azerbaijan.

RULES:
1. Available to all Amateurs and SWLs.
2. Contact period: March 15 until June 15, 2012.
3. Make 3 (three) two way contacts with EUROVISION-2012 special event stations using HF, VHF and UHF frequencies either in SSB, CW or Digital modes. Repeater, cross band or echo link QSOs will not be acceptable.
4. To earn the award, it is obligatory to make at least one QSO with 4KS0NG

or 4JS0NG.

List of special event stations:

4KS0NG, 4JS0NG, 4K2012SONG, 4J12SONG, 4K9SONG, 4K12SONG, 4K6SONG, 4J5SONG, 4J7SONG, 4JR0SONG, 4J1SONG, 4K1SONG, 4J9SONG, 4K4SONG, 4K8SONG 4J4SONG.

The award is free of charge, but applicants should send sufficient postage to cover the mailing costs, such as:4 Euro or 5USD or 5 new valid IRCs.

Applications for the award may be submitted in both hard copy and on the E-mail: ru3sd@yandex.ru

(SouthGate)

WW SPECIAL INTEREST GROUPS --- DIGITAL

FDMDV Open Source 1400 bps HF Modem

David VK5DGR has made available open source software for a 1400 bps HF modem.

F.D.M.D.V. stands for Frequency Division Multiplexed Digital Voice.

A FDM modem is a basically a bunch of slow modems running in parallel. For example FDMDV has 14 carriers spaced 75 Hz apart, each running at 50 symbols/second.

Due to multipath problems on HF this approach works better than one carrier running at 14*50 = 700 symbols/second.

Each symbol is encoded two bits using differential QPSK, so the bit rate is 1400 bit/s.

One of the applications of the modem will be Digital Voice since it offers fast sync, no multi-second training sequences, the ability to recover quickly after a fade, and no automatic re-transmit of "bad" packets.

RFINDER FOR APPLE PORTABLE PRODUCTS RELEASED

W2CYK has announced the latest platform release of RFinder - The World Wide Repeater Directory. The new version is designed for Apple iPhone, iPad and iPod users and is available for immediate download from the Apple App Store.

Previous versions of RFinder run on Android based gear and can be found on-line with a quick google.

WW SPECIAL INTEREST GROUPS --- ILLW

A milestone for the ILLW scored in the USA

The West Side Amateur Radio Club of Los Angeles W6A is the 200th registration for this year's International Lighthouse & Lightship Weekend with its members to set up at the Port Fermin Lighthouse.

The Stick Style lighthouse is an early Victorian architectural method characterised by its gabled roofs, horizontal siding, decorative cross beams and hand carved porch railings. A decade ago the lighthouse was restored.

The entry by the West Side Amateur Radio Club put the USA on 28 registrations, behind Australia with 38 and Germany 33, followed by England 16, and The Netherlands on 13 with the total countries so far involved nearing 30.

International Lighthouse & Lightship Weekend in a fun event. It will be held for the 15th time on August the 18th and 19th. Check it out and register for the weekend by visiting the website ILLW.NET

(Jim Linton VK3PC)

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

Recently I found myself discussing satellite communications with a group of Amateurs. It dawned on me that I had been using 1 Watt to transmit to geostationary orbit, more than 35,000km away. Compared to a circumnavigation of the earth at 40,000km, that's most of the way there.

Yes, I know, there are no obstacles, it's basically focused line of sight, but you don't get ionosphere bounce or ducting either, so I figure, it all balances out in the long run. My point being that this is a QRP broadcast, less than 5 Watts and it gets into orbit, that's quite something if you think about it.

I continue to hear amateurs complaining about how little power they have. It's not limited to Foundation Calls, I hear Standard licensees hanging out for their Advanced call so they can use more power and I hear Advanced calls complain that other countries can use a Kilowatt, so why can't we? What's next, a Megawatt, what about a Gigawatt Amateur Radio transmitter?

While I completely understand the pull toward more power and I applaud those who are working to increasing our allocation, I don't really share the same need. To me it's a little like a Turbo button on an IBM PC, or souping up your car. I get that it's a challenge, I get that it can be fun and I get that it does more when it goes faster. I get that we learn from pushing the envelope and potentially breaking things.

What I don't get it that there is the equivalent of disdain for those who try to achieve their aims using less power.

To me the skill is getting the job done with as little power as possible. It's better for the bands, it's better for interference, power consumption, wear and tear, danger and all the other things that come from pushing more power.

Why is it that more power is more important that less power?

I'm Onno, VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Julian Sortland, VK2YJS / AG6LE dropped the news desk an item through the week using Wi-Fi over the North Sea!

Are you are a Norwegian living in Australia?

Did you know you can use the AX prefix to celebrate your National Day "17 May" here in Australia?

This is because the Norwegian National Day, known simply as "17 May", happens to coincide with World Communications Day, for which the ACMA allows any VK Amateur use of the AX prefix. And if you do hear an LA, LB or LC station, or a rare JW or JY, wish them Happy 17 May.

CALIFORNIA COPPER THIEVES UPGRADE TO FIBER OPTICS

Copper thieves in California have expanded to stealing glass as well.

In this case we are talking about glass as in fibre optic cable. In one case some AT&T customers in the city of Alpine experienced disruptions in phone and Internet service after thieves stole copper and fibre optic wiring from underground lines.

The thieves took about 75 feet of 600 strand fibre optic cable along with the copper wiring. To accomplish this the robbers climbed into a manhole and cut into the underground pipes. An AT&T spokesperson said that three conduits carrying fibre optic or copper cables were damaged and that the vandalism affected some cell phone users as well.

The theft of fibre optic lines is something new and could signal a developing market for this kind of product.

DELFI C3 DO-64 CELEBRATES 4 YEARS IN SPACE

The 3-unit CubeSat, developed by a University in the Netherlands was launched on April 28, 2008. The nanosatellite has since performed technology demonstration experiments for the space industry in the Netherlands.

It still transmits its telemetry and measurement data which can be received using simple amateur radio equipment and using the RASCAL software.

==========

NEWS FROM ARNEWSLINE USA

ANTENNA RESTRICTIONS IN BELGIUM GET TIGHTER

If you think it's hard to put up an antenna in some locations here in the USA its nothing in comparison to what's happening in Belgium. That's where antenna restrictions have gotten even tighter than before and it's happening with the government blessings. In fact, the rules are so stringent that it could force some hams off the air.
Amateur Radio Newsline's Skeeter Nash, N5ASH, reports:

The Belgian national amateur radio society's website has posted an update on the restrictive antenna requirements recently imposed by the Flemish Government. The registration seems to apply to antennas that operate between 10 MHz through 10 Gigahertz, the amount of time a ham is actually transmitting and the power output of his or her station.

Going by the latest information, it would appear that Flemish amateurs who transmit less than 175 hours a year at 20 watts Effective Radiated Power or less, are required to submit forms to the government for each antenna they have. Multi-band antennas require multiple submissions of forms.

For instance, a tri-band Yagi antenna for 20, 15 and 10 meters requires three separate submissions. And if any changes to an antenna is made, all of the paperwork must be resubmitted.

But wait. It gets worse. If transmission are made from an antenna for more than 175 hours a year or with an Effective Radiated Power greater than 20 watts then it appears the bureaucracy involved is even more complex. You can find out just how bad it is at tinyurl.com/NoticeForTxAntennas.

For the Amateur Radio Newsline, I'm Skeeter Nash, N5ASH, reporting from Jonesboro, Arkansas,

According to what we are hearing, the Belgian national amateur radio society's known as the UBA has been attempting to get these strict antenna rules modified, but to date with little to no success.

FAA MAY LOOK AGAIN AT BANNED RF DEVICES ON PLANES

And using your laptop, iPad or Kindle during a commercial U-S flight might become a reality in the not too distant future. This with word that the Federal Aviation Administration may be willing to take a second look at its policy on electronics usage aboard airplanes.

Amateur Radio Newsline's Fred Vobbe, W8HDU, reports:

While some airlines permit very limited use of wireless devices one an aircraft is at altitude, actual availability is quite limited. But according to a recent report credited to columnist Nick Bilton and the New York times, the FAA has decided to take a updated look at the use of personal electronics on planes.

The report continues by quoting FAA spokesperson Laura Brown. She told the press that with the advent of new and evolving electronic technology, and because the airlines have not conducted the testing necessary to approve the use of new devices, the FAA may be taking a fresh look at the use of personal electronic devices, other than cell phones, on aircraft.

Currently, airline passengers must turn off any electronic device that can transmit or receive a radio signal that cannot be disabled. While, the FAA indicates that it is open to testing new devices, it will more than likely be a long road before any substantive changes take place. This is because every airline giving thought to allow such operations would first have to test one of each version of a device on each of model of

every aircraft in its fleet.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU.

Whatever happens, the FAA has already been quoted
as saying that it will not budge on its policy of
not permitting use of mobile phones during a
flight. And don't even consider trying to use a
ham radio H-T on a commercial airliner. Even if
that one were lifted by the FAA the domestic U-S
airlines would likely keep a ban in place on the
use of ham gear and other two way radios on board
their flights.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were

submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

http://forums.qrz.com/showthread.php?345632-Tucson-Vail-American-Cancer-Society-Relay-for-Life-K7R&goto=newpost

A special event station (running a K3 and a G5RV) will be operating May 18
- 19 at the American Cancer Society Relay for Life in Vail, AZ (Tucson
area). Here are the particulars:

Callsign: K7R

Event: Vail/Tucson American Cancer Society Relay for Life

Location: Empire High School, Vail AZ

Operating start time: Friday, 18 May, 2200Z

Operating end time: Saturday, 19 May, 1400Z

Frequencies (give or take): 3.860, 7.260, 14.260, 21.260

I'm also looking for other ops to join me at this event (so far I'm the only op). If you live in the Tucson area and would like to have some fun operating a special event station, get in touch! There's room for more rigs and antennas.

73,

Steve, AI7AZ

Vail, AZ

KB4SA Inaugural Event on May 12th -- Join us on the Air

Posted: 10 May 2012 05:17 AM PDT
http://forums.qrz.com/showthread.php?345621-KB4SA-Inaugural-Event-on-May-12th-Join-us-on-the-Air&goto=newpost

Boy Scouts of America, The North Florida Council announces the charter of amateur radio station, KB4SA. KB4SA encourages, equips and prepares young people to be vibrant citizens and dynamic community leaders through the use of amateur radio and the practice of emergency communication guided by the Scout Oath and Scout Law.

The inaugural event of KB4SA is scheduled for May 12, 2012 at Camp Echockotee, 2513 Doctors Lake Drive, Orange Park, FL 32073. The event will go from approx 9:00am until 5:00pm EST. Scouts will see local amateur operators in action and also communicate, via radio, with other amateur radio operators, local and around the world.

During future events, Scouts will earn merit badges related to radio, communications and science; receive a FCC Amateur Radio license; participate in local emergency communications drills; and provide communication support for community charity events such as bike-a-thons.

We will be using the standard scout frequencies as outlined at scouting.org. A list of frequencies can be found on the KB4SA.ORG website. In the event we are going to be using different frequencies it will be posted.

QSL Card information can be found here or on the KB4SA page on QRZ.COM

Amateur Radio Club KB4SA partners with Boy Scouts of America, North Florida Council

Boy Scouts of America, The North Florida Council announces the charter of amateur radio station, KB4SA.

KB4SA encourages, equips and prepares young people to be vibrant citizens and dynamic community leaders through the use of amateur radio and the practice of emergency communication guided by the Scout Oath and Scout Law.

The inaugural event of KB4SA is scheduled for May 12, 2012 at Camp Echockotee, 2513 Doctors Lake Drive, Orange Park, FL 32073. Scouts will see local amateur operators in action and also communicate, via radio, with other amateur radio operators, local and around the world.

During future events, Scouts will earn merit badges related to radio, communications and science; receive a FCC Amateur Radio license; participate in local emergency communications drills; and provide communication support for community charity events such as bike-a-thons.

Peter Duzant, K4PAD, founder of the KB4SA said, ☐Amateur radio is a rewarding hobby that allows Scouts to learn, not only about radio and electronics, but also that it goes hand-in-hand with duty to country and community.☐

Chuck Courson, Director at Camp Echockotee adds his support, ☐The starting of Amateur Radio Club, KB4SA, will allow us to be able to help scouts be better prepared to give back to their community in a very meaningful way. We are excited about the opportunities that this will provide for the scouts.☐

Sponsors for the Amateur Radio Club KB4SA include Clay County Amateur Radio Emergency Service and Journey Church.

More information about the Amateur Radio Club KB4SA and other events scheduled with the Boy Scouts of America can be found on the club web site

at http://www.kb4sa.org.

Samuel f.b. Morse anniversary

Posted: 09 May 2012 09:18 PM PDT
http://forums.qrz.com/showthread.php?345598-Samuel-f-b-Morse-anniversary&goto=newpost

SAMUEL F.B. MORSE ANNIVERSARY

May 24 is the anniversary of Samuel F.B. Morse's first coded telegraph message.

The message was sent In 1844 between Baltimore, Maryland and Washington, DC ☐ a distance of 41 miles. While this may not seem very significant in these days of world-wide communications, it was the seed that grew in the minds of forward-thinkers that has eventually brought us to these days of seeing images from around the world being brought to us in mere seconds and, of course, seeing man's footprints on the moon.

Morse's middle initials (FB), by the way, are not the source of Ham Radio's "Fine Business." It actually stands for Finley Breeze, a strange middle-name set but certainly no more strange than some of today's name selections.

Also, it is not generally known but Morse was a very well-known artist in his time and many of his paintings are still on display in the Halls of Congress.

Reading Morse's development of the Telegraph, it is easy to see that he was an experimenter that did not give up. Mistakes were made at first but the end result, one of eventual and great success, has left us a historical figure that deserves honor and respect.

Volunteers Play Large Role in Canoe Race:

Posted: 10 May 2012 05:29 PM PDT
http://www.eham.net/articles/28271

Manchester area residents, led by Jim Mann, gathered May 5 to clean the River Raisin in preparation for the 46th Annual Canoe Race on May 20. Volunteers play a crucial role in the annual race. Radio operators from the Chelsea Ham Radio club have volunteered to act as spotters for the race. Boy Scout Troop 426 will be on hand to provide canoe rentals. Village businesses have joined together to provide sponsorship dollars to pay for the trophies for the 10-class competition. Village and township residents mow the launch and landing sites, provide race software and provide support where ever it is needed. While this annual race is a project of the Kiwanis Club of Manchester, it couldn't happen without the help of a lot of people.

//
Network of Radio Operators Will Help in Catastrophe:

Posted: 10 May 2012 05:28 PM PDT
http://www.eham.net/articles/28270

So what happens if all that fancy communications technology we depend on crashes when a major earthquake or some other catastrophe hits? Surrey's civic government, RCMP, firefighters and Emergency Health Services have that problem covered, with a cheap and relatively low-tech solution: amateur radio. It's called Surrey Emergency Program Amateur Radio, or SEPAR, a non-profit society manned by licensed amateur radio operators and other communications volunteers. This network of Ham radio enthusiasts will help authorities keep in touch with one another as they work to save lives in the event of a catastrophe, should telephone, computer and cellular phone services go down.

Senate Approves 2 New FCC Commissioners, Commission to be at Full Strength:

Posted: 10 May 2012 01:19 PM PDT
http://www.eham.net/articles/28264

Six months after President Barack Obama nominated Jessica Rosenworcel and Ajit Varadaraj Pai to the Federal Communications Commission, the Senate confirmed their appointments on Monday, May 7.

Rosenworcel, a Democrat, fills the seat vacated by Michael Copps who retired from the Commission earlier this year; her term runs through June 30, 2015. Pai, a Republican, replaces Meredith Attwell Baker, who left the FCC in June 2010; his term runs through June 30, 2016. Once Rosenworcel and Pai are sworn in, the FCC will be at its full complement of five Commissioners.

Annual Armed Forces Day Crossband Test Scheduled for May 12 (TODAY!)

Posted: 12 May 2012 03:10 AM PDT
http://forums.qrz.com/showthread.php?345871-Annual-Armed-Forces-Day-Crossband-Test-Schedul
ed-for-May-12-(TODAY!)&goto=newpost

From ARRL: http://www.arrl.org/news/annual-arme...led-for-may-12

In short: Military stations, such as Joint Base Andrews and The Pentagon
will be operating their HF MARS stations on the ham frequencies today. Some
unique calls that you may only catch one a year will be operating for short
windows of time. Check the frequencies here:
http://www.netcom.army.mil/MARS/docs/AMC_Test_2012.pdf

05/02/2012

The Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military/Amateur Radio Crossband Communications Test in celebration of the 62nd anniversary of Armed Forces Day (AFD). Although the actual Armed Forces Day is celebrated on the third Saturday in May -- May 19 in 2012 -- the AFD Military/Amateur Crossband Communications Test will be conducted on May 12 to prevent conflict with the Dayton Hamvention®, scheduled for May 18-20.

The annual celebration features traditional military-to-amateur crossband communications SSB voice and Morse code tests. These tests give Amateur Radio operators and short wave listeners an opportunity to demonstrate their individual technical skills and to receive recognition from the appropriate military radio station for their proven expertise. QSL cards will be provided to those stations making contact with the military stations.

Military-to-amateur crossband operations will take place on the dates and time in UTC on the frequencies listed for each station. Voice contacts will include operations in single sideband voice (SSB). Some stations, depending on propagation and staffing, may not operate the entire period. Participating military stations will transmit on selected military MARS frequencies and listen for Amateur Radio stations in the amateur bands. The military station operator will announce the specific amateur band frequency being monitored. Duration of each voice contact should be limited to 1-2 minutes. The Secretary of Defense message will be transmitted via digital modes, including RTTY, PACTOR, AMTOR, PSK-31, MFSK and MT63 from certain stations.

Click here for the schedules and frequencies of participating military stations, including the stations that will be transmitting the message from the Secretary of Defense. Instructions on how to copy and submit the message are also included.

SARL NEWS - SUNDAY 13 MAY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 AND 7,066 MHz from Pretoria, with a relay on 3,695 MHz SSB. (Other news readers change to suit).

To all mothers listening today, we wish you happy mother's day.

IN THE NEWS TODAY:

NATIONAL AMATEUR RADIO DAY 16 JUNE 2012

ANACAPA HIGH ALTITUDE BALLOON SOARS TO NEAR 112 000 FEET

RADIO MYANMAR INTERFERENCE ON 40 METERS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

NATIONAL AMATEUR RADIO DAY 16 JUNE 2012

The South Africa Radio League has named 16 June as National Amateur Radio Day, celebrating Amateur Radio as a National Resource and its diversity as the most exciting of all scientific hobbies.

The objective is to take amateur radio to the public by exhibiting and doing live demonstrations of the various aspects that make amateur radio great and a fun thing to be part of. It is planned that the activity be run from 09:00 - 14:00.

Individual participation.

All radio amateurs should participate. Here are some ideas what you as an individual can do:

Operate from a park near you using trees as antenna supports and operate. A simple dipole or inverted V will get you on 20 and 40 metres. You may not talk to the world but you will communicate with

stations in Southern Africa. And if the band is open who knows who you will talk to. Get family members to help you distribute brochures about amateur radio and hand out buttons with an amateur radio slogan which are all available from the SARL.

Those who are stuck at home for what ever reason, you can still participate by getting on the air and talk to the demo stations.

Club Participation.

Set up a display at a busy shopping centre or large store like Incredible Connection, a Camping store or a large super market or in a park.

ON the AIR activities on National Amateur Radio Day will include the Youtday Sprint.

Supporting activities.

09:00 - 09:55 Young people talk about amateur radio. 10:00 - 12:00 Youth Day Sprint. 12:00 - 12:45 Senior Amateurs Remember.

Young people talk about amateur radio is a pre-recorded programme with young people talking about how they came into amateur radio and what it means to them. If you are under 25 send an email with your contact details to artoday@sarl.org.za to participate.

Youth Day Sprint. This is a fun activity to Celebrate Youth Day and to promote contacts between young radio amateurs in Southern African countries.

Call "CQ Youth Day". Lots of prizes to be won by participants.

Senior Amateurs Remember is a pre-recorded programme with senior amateurs sharing their experience and unusual events in Amateur Radio. Audio files will be available to clubs to broadcast on HF and VHF. To take part send your contact details to artoday@sarl.org.za.

More details about all the National Amateur Radio activities will be mailed to members and clubs during next week and will be available on www.sarl.org.za.

ANACAPA HIGH ALTITUDE BALLOON SOARS TO NEAR 112 000 FEET

We're not sure if it's a new world altitude record for an amateur radio equipped high altitude balloon, but members of the Anacapa Near Space Exploration Club at California's Anacapa School are celebrating the recent success of their second near space probe, one that reached an altitude of almost 112 000 feet. Amateur Radio Newsline's Don Carlson, KQ6FM, has the rest of the story:

5 - 4 - 3 - 2 - 1 - Go!!" That's the sound of a group of teenage near-space adventurers lofting a high altitude balloon that would soon soar above California's central coast and then eastward toward the state's central valley.

Called Anacapa Amateur High-Altitude Balloon 2, a student team from the Anacapa School launched two payload capsules tethered to a weather balloon on Saturday, May 5th. Equipped with GPS, atmospheric sensors, high-definition video and still cameras, a television transmitter and a Geiger counter, the payload downlinked live data, video and images during its ascent.

Anacapa Amateur High-Altitude Balloon 2 was designed and built entirely by students. A great project for youth day this year.

RADIO MYANMAR INTERFERENCE ON 40 METERS

The South African Radio League HAMNET reports that Radio Myanmar has been found to be broadcasting illegally on 7,110 MHz. The station is transmitting using full carrier AM from 15:30 UTC every day and is causing interference on the emergency communications frequency.

Steps are being taken to issue a formal objection but this takes time and the correct procedures need to be followed. Meantime, South Africa's Hamnet emergency communications response group has sent an official complaint directly to Radio Myanmar and requested that it move frequency.

MUSEUMS DAY

National Museums Day is held annually in May.

To recognise this event the Zululand Amateur Radio Club will be operating as ZS5ZLB from the Nongqayi Fort in Eshowe on Sunday, 20th May 2012. Every station worked will receive the special QSL card which includes a photograph of the Fort - which now houses the Museum. If you work ZS5ZLB on this special day please send them a QSL card and enclose a SASE. Look out for them - mainly on 40 m.

ZARC will be demonstrating amateur radio to visitors to the function.

RADIO AMATEUR EXAMINATION NUMBERS ON THE WEB

We wish the 168 candidates who have registered to write the Radio Amateur Examination on Thursday 24 May well for the examination on Thursday 24 May. Candidates can look up their examination number and venue where the examination will be written on the web. Visit www.amateurradio.org.za/RAE.htm or link from the news item on the SARL home page on www.sarl.org.za.

The exam starts at 19:00 and candidates have three hours to complete the two sections of the examination. Candidates should report to the examination centre by 18:30 and bring their ID book or other suitable identification.

LOGBOOK OF THE WORLD REGISTRATION If you are battling to register on LOTW or the snail mail option does not appeal to you, then Geoff Levey, ZS6GRL, would like to assist you in registering.

All you need to do is send Geoff a scanned copy of your licence and some form of identification, e.g. front page of your ID book or drivers licence. You should be up and running within 4 days after sending in your information.

Please make use of this offer and send your information to hfmanager@sarl.org.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is at moderate levels but will increase as one of the largest sunspots in years, 1476, makes it way across the visible solar disk. There will continue to be a chance for a major solar event from this huge sunspot.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 69.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 10 m not far behind.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS Today 12th May - SA AMSAT space symposium; visit www.amsatsa.org.za for details and registration. 12/13 May- AWA Valve QSO party, 15:00 to 19:00 CAT. 13 May - Log sheets for ZS3 Sprint to to be in to ZS3 Sprint, PO Box 1049, Kathu, 8446 or by e-mail to zs3nc@qsl.net. 19 May - 14:00 PEARS AGM at the Italian Club, Charlo, Port Elizabeth with a boot sale prior to the AGM and a bring and braai afterwards. 20 May - National Museum Day: Zululand Radio Amateurs will broadcast from the Nongqayi Fort under callsign ZS5ZLB. 28 May - Logs for AWA Valve QSO party to be in to andyzs6ady@vodamail.co.za or AWA of Southern Africa, P O Box 12320; Benoryn 1504. 16 June - National Amateur Radio day between 09:00 and 16:00

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Johan Marais, ZU1JM, and George, ZS6NE, and also edited by George.

Thank you for listening, 73.

/EX

And your problem is ... ?

many years ago, I recall an AMSAT-UK member claiming that because
satellites were on 436-ish MHz first, that ATV should not be allowed
use 436-ish MHz.

If the same attitude was around today, the satellites should not be on
144.8--146.0 MHz

County Commissioners Hear Requests from EMA:

Posted: 11 May 2012 06:11 PM PDT
http://www.eham.net/articles/28277

Clay County Commissioner President Charlie Brown was unable to attend the commissioners' monthly meeting Monday due to an injury. Brown was seeing an orthopedic specialist after fracturing his ankle. Vice President Paul Sinders acted as president during the meeting. The first issue on the agenda was a request by Clay County Community Corrections Executive Director Mary Brown to approve a Community Corrections grant, which begins July 1. The commissioners approved the request for the grant. Meanwhile, Emergency Management Agency (EMA) Director Bryan Husband presented a request for Amateur Radio, a group of volunteer radio operators, to install an antenna on the tower in Center Point for communications in case of a disaster. Husband said the antenna would in no way conflict with the tower. Husband said the group plans to hire a contractor to install the antenna; however, the commissioners were concerned about the county's liability. The issue was tabled until the June meeting.

//
Monster Sunspot Fires Off Powerful Solar Flares:

Posted: 11 May 2012 06:08 PM PDT
http://www.eham.net/articles/28276

A huge sunspot that dwarfs the Earth is unleashing a series of powerful solar flares as it moves across the surface of the sun, NASA scientists say. Sunspot AR 1476 was detected by space telescopes on May 5. The huge sunspot is 60,000 miles (100,000 kilometers) across, so large that when it was first seen in views from NASA's Solar Dynamics Observatory spacecraft, mission scientists dubbed it a "monster sunspot." Earlier this week, space weather scientists predicted the sunspot would erupt with powerful solar flares, and those predictions have since come true. So far, the sunspot has fired off several flares, including a strong solar storm early Thursday, May 10. "Solar activity has been at high levels for the past 24 hours with multiple M-class solar flares observed," stated an update Thursday from the Space Weather Prediction Center, a joint service of NOAA and the National Weather Service. Sunspot region AR 1476 was responsible for nearly all of the sun's storm activity, center officials said.

//
Propagation Forecast Bulletin #19 de K7RA:

Posted: 11 May 2012 01:44 PM PDT
http://www.eham.net/articles/28275

Average daily solar flux for the past week rose slightly, 116.2 to
119, but average daily sunspot numbers declined more than 14 points
(about 13 percent) to 92.6. Predicted solar flux for the near term is quite
a bit higher than
the average for the past week. Solar flux on May 11-18 is 130, and
then it drops sharply to 110 on May 19-22, 115 on May 23-25, 110 on
May 26, 105 on May 27-31, 110 on June 1-2, and 115 on June 3-10.

In ye oldene dayse, long before amateur satellite transmissions (which
started, I believe, 1961) were ever thought of, and when 70cm was 420 to
440MHz, I'm not sure where they transmitted fastscan TV. It would have
been double sideband so, with 405-line signals, the vision signal
presumably occupied at least 5MHz - and more if the sound was carried at
vision plus (and maybe also minus) 3.5MHz.

However, after the band was chopped to 430MHz, it became increasingly
difficult to squeeze a full bandwidth DSB signal in the space 434 to
440MHz - especially when using 625-line signals. I believe that some
transmissions still did take place - albeit with curtailed resolution.
And then repeaters came along, encroaching yet further on the space
available for ATV. As a result, the ATV enthusiasts totally abandoned
70cm in favour of 23cm, so the question of interference with satellites
became academic.

>If the same attitude was around today, the satellites should not be on
>144.8--146.0 MHz
>
Bandplans are a reasonable form of self-regulation, and are devised for
the welfare of all. There is absolutely no reason why any

self-respecting radio amateur should want to transmit between 145.8 to 146MHz. To an 'FM operator' (which some might interpret as 'CB-style appliance operator'), the bottom end of 2m also probably seems pretty empty, as there doesn't seem to be a lot of CW activity these days. However, as long as even the wet-behind-the-ears FL licensees are aware of the bandplan, and know what sort of activity takes place, I can't really see the problem!

** SPECIAL NOTE FROM EDITOR (By KB8NW): There will not be an OPDX Bulletin next week and "possibly the week after". I will be attending the Dayton HamVention. "IF" I receive a major announcement, I will probably send out a special bulletin. However, PLEASE continue to send your DX information. You never know what I might do.... 73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th-May, through Sunday, 13th-May there were 222 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5X, 5Z, 6Y, 7O, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, P5, PA, PJ2, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TU, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VP2V, VP5, VP8, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

4X, ISRAEL. Dutch operators Jaap/PA7DA and Luc/PA9LUC will be active as 4X/homecall between May 16-30th. Activity will be mainly on 10, 6 and 2 meters. The WW-LOCs will be KM72nx and on May 22nd, KM71jw. Operations on the lower bands will be possible. QSL via the Dutch Bureau. For updates, check the Blog page: http://dutch-4x-team.blogspot.com

5X, UGANDA (Update). Freddy, F5IRO/J28RO, who is here on a work assignment through June, has applied for the callsign 5X5RO, with the help of David, 5X1D (KH9AE), and is now active. Freddy states, "The station is quite ready to be set up; just some work on the vertical antenna to finish it." His station is a Elecraft K3 using verticals or dipoles. Activity will be on CW on the upper HF bands, especially on 10 MHz in the evening (5X ?MT + 3) and possibly some PSK operations. Watch the DXClusters for spots. He was spotted on 30 and 15 meters this past week (21013 and 10131 kHz). QSL is via Michel, F8DFP, by the French Cureau or direct (w/SAE and IRC). For more updates and info, watch Freddy's Blog page at: http://j28ro.blogspot.com

6O, SOMALIA. A team of Italian operators, active as 6O0CW from Galkayo will go QRT on May 18th. As of 2035z, May 12th, their log show that they have made a total of 33013 QSOs with 12808 unique callsigns (14135/SSB, 14824/CW and 4054/RTTY). QSL via I2YSB, direct or by the OQRS. For more details, visit their Web page at: http://www.i2ysb.com/joomla5
A forum for the 6O0CW operation is available at: http://www.hamradioweb.net

6O, SOMALIA (Update to OPDX.1059). Darko, J28AA/E70A, will once again be active as 6O3A from Hargeisa between May 25-31st. Activity will be on SSB, RTTY and 50 MHz. He also plans to be in the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band entry. QSL via K2PF or E77E. For possible updates (under news), online log, and pictures, check out the Bosnia and Herzegovina Contest Club's Web page [BHCC] at: http://bhcc.ba
Also look on QRZ.com under 6O3A.

6O, SOMALIA (6O3A Press Release #2, dated May 12th). Paul Ewing/N6PSE, from "The Intrepid-DX Group", reports: "Due to the recent activation of Somalia by the 6O0CW group, the Intrepid-DX Group has decided to cancel our previously announced plans to conduct a DXpedition in November 2012, as 6O3A. We feel that the need for 6O contacts has been sufficiently diminished to make it worth-while to continue with our plans. In the coming days we will refund 100% of all donations made to us. We hope to make other rare activations for 2013. Our friend, Darko Rusman-E70A continues to hold the 6O3A license and will be active from time to time from Somaliland.... Thank you, Paul N6PSE, The Intrepid-DX Group"

7O6, YEMEN. The international team of operators active as 7O6T from Socotra Island (AF-028) will go QRT at 2100z, May 15th. New team members arrived on May 9th. They are Dave/K3LP, Jeff/K1ZM and Andrey/LZ2HM. On the same flight, operators Vlad/R7LV, Andrew/UA3AB, Paul/N6PSE and Harry/RA3AUU returned back home. It was mentioned that the team does NOT have 6 meter privileges, so all 50 MHz operations are the work of a PIRATE.

Also, on Sunday, May 13th, the 7O6T requests, "We would like to ask Europeans not to make 3rd or 4th QSO on RTTY just to fill another Club Log band/mode spot. Give a chance to others!"
The 7O6T log shows (per ClubLOG dated May 13th, at 0236z): 136373 Total QSOs and 33401 with Unique Calls. Mode breakdown: 71151/CW, 61541/SSB and 3708/RTTY. Continent breakdown: 960/AF, 0/ANT, 18249/AS, 87701/EU, 27144/NA, 1127/OC and 1192/SA.
QSL via UA3DX. More details about OQRS/Direct/Bureau/LoTW will be available during the course of DXpedition. The 7O6T Web page and Twitter page are available at: http://www.yemen2012.com/index.php https://twitter.com/#!/7o6t

BS7, SCARBOROUGH REEF (Disputed). BBC reports, "Several hundred protesters waved flags and placards at the Chinese embassy in Manila, calling for China to withdraw its ships from a South China Sea shoal..... The two countries have been locked in a stand-off in disputed waters at the Scarborough Shoal since 8th April." Read the whole article at: http://www.bbc.co.uk/news/world-asia-18030805

CQ PRESS RELEASE (From Richard, W2VU). "CQ INTRODUCES FULL-COLOR 'DX WORLD GUIDE' IN PRINT AND ON CD -- (Hicksville, NY - May 8, 2012) -- CQ Communi-cations, Inc., today announced the publication of the third edition of the DX World Guide, by Franz Langner, DJ9ZB. This 384-page DXer's guidebook is the first edition using color throughout and the first to be entirely in English. The book includes entries for well over 300 DX 'entities'. Information includes geographical information about each country, WAZ and ITU zones, ITU callsign allocations and amateur prefixes. Each listing also includes a map and flag, plus information on the country's licensing agency and national amateur radio society. In addition, as appropriate, listings include call areas, IOTA (Islands on the Air) information and representative QSL cards. The DX World Guide, 3rd edition, will be available in both print and digital (CD) formats. It will retail for 42.95 USDs in print and 22.95 USDs on CD. A limited number of print editions are expected to be available from the CQ booth at the 2012 Dayton Hamvention® (Main arena, booths 74 & 75), with general availability after Memorial Day. Advance orders are being accepted via the CQ Online Bookstore < http://store.cq-amateur-radio.com/StoreFront.bok> or by phone at (800) 853-9797."

CY0, SABLE ISLAND. Al, VE1AWW, who has been active as CY0/VE1AWW as of April 17th, and will be there for about the next two months, reports on May 11th: "The 40-80-160 antenna is dead. I won't be replacing it anytime soon. I can work 30m (PSK 31) 20, 17, 15, 12 and 10m. I will soon have a 6m beam as well." Remember, his activity will be limited to his spare time as he is there to work. QSL via his home callsign, direct or by the Bureau.

D2, ANGOLA. Craig, MM0SSG, is now active as D2SG from Luanda and will be there until around October 31st. Activity will be limited because he is there on a work assignment on an off-shore oil platform. Operations will only take place when he is on land. Reported QSNs show activity has been

on 10 meters CW. QSL via GM4FDM, direct or by the Bureau.

DAYTON HAMVENTION DX HOSPITALITY SUITE. The Northern Ohio DX Association (along with Janeen Hire, W8ZET) will once again sponsor a Hospitality Suite (16th year) at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th floor of the Crowne Plaza Hotel on Thursday, Friday and Saturday evenings (Look for signs!). All DXers/Contesters are welcome. Munchies and refreshments will be available. Come and meet the members and friends of NODXA.

DXCC NEWS (Card Checker and 160 Meters). Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "In order to facilitate retrieval of DXCC card checkers for the DXCC, WAS, VUCC and WAC programs besides the individual search feature on the DXCC web site, I have also posted a link to a file called DXCC Card Checker Master. This link will take you to the complete list of card checkers worldwide. In addition, an added purpose for this file is to help you locate a card checker near you that is authorized to check 160 Meters.
Remember, all checkers can now check deleted entities but certain restrictions still apply to 160 meters, as follows:
In the attached file you'll see entries that are in 'BOLD/RED'.
These checkers are authorized to check 160 Meter cards. As per the new rule only card checkers with an active 160 Meter DXCC award account are authorized to verify 160 Meters. If your card checker is not noted in 'bold/red' please do not take 160 Meter cards for them to check.
In addition to the 'bold/red' a notation of '160M' is noted next to their callsign in superscript which also notes this permission.

Please see this link which will take you to the master list:
http://www.arrl.org/dxcc-card-checker-master-1
The search feature to do a search by your state or country for your local card checker is still available, but at this time there is no note that indicates they are eligible to check 160 Meters:
http://www.arrl.org/dxcc-card-checker-search "

E4, PALESTINE. As your editor was preparing this week's bulletin, well-known world traveller Vladimir, UA4WHX, who was recently in Jordan as JY8VB, surprised everyone Sunday morning showing up as E40VB from Palestine on 12 meters. As always, his length of stay is unknown. QSL via his home callsign.

EUFF GREEN PARTY 2012 (Field Day Operations). The YOFF team of the SRR (Romanian Society of Radioamateurs) and the ARER (Romanian Association of Environmentalists Radioamateurs) invite all the radio amateurs to join them in the EUFF Green Party 2012. Purpose: To stimulate the ham operators to leave their house and be involved in portable/outdoor operations related to the nature and ecology, and to familiarize the world-wide radio amateurs with protected natural areas. Dates: 0600-1759z, June 9th. For complete details, see: http://wff-yo.blogspot.com

FS, FRENCH ST. MARTIN. John, K9EL, will once again be active from French St. Martin (NA-105, DIFO FS-001, WLOTA 0383, Grid Loc. FK88) between

June 8-24th. Activity will be holiday style (on a family vacation) and he will be operating as FS/K9EL whenever possible. He will be using an IC7000 and verticals for 80-10 meters, a 3 element yagi for 6 meters and will be operating on CW, SSB, and he plans to put an emphasis on RTTY this trip. He will also bring an amplifier with him to better his signal on 6 meters. John states, "Schedules are welcome and QSL to my home call. I will also attempt to do daily uploads to Club Log and LoTW. Part of the trip will include planning for 160 meter antennas as I plan to operate 160 in November as part of my planned CQWW CW participation."

IOTA DXPEDITION (Postponed!). Rick, K6VVA, has announced that his "IOTA DXpedition (NA-175, NA-050 and NA-004) has now been rescheduled for hopefully better propagation during 2013. The far Northern Latitude has additional propagation factor complications, so in considering the total Big Picture involved, a QRX was deemed necessary to maximize possibilities for all IOTA Chasers to make QSOs." His new target date is in July 2013. Stay tuned for more details on his "KL7 North Slope IOTA EXTRAVAGANZA!!", by watching the Web page at: http://www.k6vva.com/iota/na172
Also, check TWITTER at: http://www.twitter.com/k6vva

IOTA DXPEDITIONS TOUR. Operators Peter OT9Z/ON8ZZ, Dominiek/ON3JA and Frederik/ON3NT will be active as MU/OT9Z from Guernsey (EU-114, WLOTA 0013) between July 16-20th. During their stay on Guernsey, they plan to activate the following islands (all EU-114): July 17th - Herm Island; July 18th - Sark Island (WLOTA 0944) and July 19th - Alderney Island (WLOTA 0198). The group will then head south to France and be active as F/OT9Z from Chausey Island (EU-039, DIFM MA004, WLOTA 0424) between July 27-29th. They plan to be an entry in the RSGB IOTA Contest (July 28-29th) using the special callsign TM7T. QSL all operations via OT9Z.

IOTA NEWS.....
EU-008. Members of the Wessex Contest Group will be active as MS0WCB, MQ0WCB and possibly their own callsigns, from the Isle of Skye (IOSA NH07, SCOTIA CN14, WLOTA 1626, WAB NG47, WW Loc. IO67UQ) between now and May 19th. Operators mentioned are Steve/G0FUW, Simon/M0TTE, Dave/M0SFT and Dan/M0TGN. Activity will be on 80-15 meters SSB. QSL direct (see QRZ.com), eQSL or via M0WAY. More information is available at their Web site at: http://www.mx0wcb.com

EU-008. [Correction] Glyn, GW0ANA, will be operating as GM0ANA (not GW0ANA) during a "Micro DX-Pedition" from Gigha Island, Inner Hebrides, Scotland, between May 21-27th. Activity will be on SSB, RTTY, PSK and SSTV. QSL via GW0ANA, direct QTHR or by the Bureau.

EU-020. Tetsu, JH8SGR, will be active as SM1/JH8SGR from Gotland Island between June 11-13th. He will use 500 watts into wirebeam antennas. QSL via his home callsign.

EU-032. Members of the Beniteam DX Group will be on the air from Oleron Island using the special callsign TM12O (Tango Mike

Twelve Oscar) between May 18-20th. Operators mentioned are Javier/EA2DXR, Javier/EA2JB, Julio/EA2KK, Juan/EA2RC, YL Merche/EA2TT and Antonio/EA2VE. Activity will be on 80-10 meters with three stations using SSB and RTTY. They will be ready to work also on 6 meters if the band is open. QSL via EA2TT.

EU-039. (Update) Members of the Charente DX Group (CDXG) will be active as TM0CI from Chausey Island (DIFM MA 004) between May 19-25th. Operators mentioned are F5MNK, F5LOW, F6HKA and ON4ZD (OS0S). Activity will be on 80-10 meters using CW, SSB and the Digital modes. They will have three stations on the air. QSL via F5EOT, by the Bureau and direct (Postage or Mail with Paypal). For updates, watch the CDXG Web page at: http://www.frag33.org/www.cdxg.org

EU-043. Operators Sten/SM6MIS, Rick/SM6U, Bengt/SM6UQL, Tomas/SM6XMY, Pierre/SB6A, Christer/SM6V and Janne/SM6YOF will be active as 7S6W from Vinga Island (WLOTA 1517, SMFF-3495, SWA-163) between May 17-20th. Activity will begin during the afternoon of May 17th, through their departure at 1200z on Sunday, May 20th. They plan to have 3 stations, each with 1 kW amplifiers, using mostly SSB, with some CW and RTTY. QSL via info on QRZ.com. For information and updates, visit: http://sm6.se/7s6w

EU-049. Fred, PA1FJ, is now active as SV8/PA1FJ/P from the Samos Island, Greece, until May 17th. Activity will be on 40-10 meters SSB. QSL via his home callsign.

EU-112. Members of the GMDX Group (Scotland's DX Association) plan to be active as GB5SI from Shiant Isles [House Island)(between Isles of Lewis and Skye on Scotland's NW Coast) between June 15-22nd. Operators mentioned are Jim/MM0BQI, Gordon/MM0GPZ, Doug/GM0ELP, Philip/GM0LIR, Iain/GM0OQV, Brian/GM0EGI, William/ GM4ZNC and possibly others. Activity will be on 80-6 meters using CW, SSB and RTTY. QSL via MM0BQI.

EU-120. Operators Kev/M0TNX and Martin/M3POG will once again be active as GB2HI from Hilbre Island between May 17-20th. Kev states that they are there to celebrate his 45th birthday (May 18th), and to give out QSOs for the Island to anyone who needs it. Activity will be on 40-10 meters using CW, SSB and RTTY. If 80 meters is possible, it will be a full size kite supported vertical over 1.2 km of radials! This year's Digital activity will take place thanks to Alan, M0AQC, who donated one of his super, low cost interfaces. QSL via M0OXO. They will upload the log to LoTW and E-QSL. For more details and updates, watch: http://www.gb2hi.co.uk
Also, watch a short video on QRZ.com of their operation last year.

EU-141. Operators Helmut/DL5DSM and Bernhard/DL9UBF will be active as LA/homecall from Vardo Island (WLOTA 0106) between May 15-23rd. They also plan a side trip to Hornoya Island (EU-141, WLOTA 2751) using the callsigns LA/homecall/p. Activity will be on the HF bands using all modes and 100 watts and GP antennas. QSL via their home callsigns, by the Bureau or direct.

EU-157. Operators Gil/F4FET Gil, Vincent/F4BKV, Eric/F4FJH and Diego/ F4HAU Di&#65533;go will be active as TM0CEZ from islands in the Bretagne Region IOTA Group sometime between June 24th and July 7th. The dates will depend on the weather conditions. Islands mentioned are Cezembre Island (DIFM MA008), Harbour Island (DIFM MA025) and Agot Island (DIFM MA009). They will have antennas for 20/17/15/10 meters. They request that you only make one QSO. NO MULTIPLE BAND QSOs because they will only be on for 12-22 hours. QSL via F5CWU. For more details, see the TM0CEZ Web site at: http://tm0cez.webs.com

NA-092. Dave, AC0QG, will once again be active as AC0QG/5 from South Padre Island (USI TX007S, Cameron County, TX) between June 18th and July 13th. Activity will be on the HF bands, on or near the usual island and IOTA frequencies. QSL via his home callsign, direct, LoTW or eQSL.

NA-128. Members of the "NA-128 Contest Group" will activate the special callsign VX2I from Ile Verte (CISA QC-015, Grid FN58, ARLHS CAN-244, WLOTA 1404) between July 26-29th. The group will be a Multi-Single entry in the RSGB IOTA Contest (July 28-29th), and will have many stations on from the lighthouse keeper's quarters. Activity will be on all bands using CW, SSB, RTTY and PSK63 before and after the contest. A station will be dedicated on 6m. The group will operate ONLY on SSB and CW, and on 80/40/20/15/10 meters DURING the contest. QSL via VE2CQ. For more details, see: http://www.qsl.net/na128cg

NA-144. Operators Jeff/W6UX, Rich/AE6RS, Steven/K6SGH, Kenan/KR6J, John/KQ6ES and Tim/N6GP will be active as W6UX/p from Anacapa Island during the RSGB IOTA Contest (July 28-29th). QSL via W6UX.

J48/SV8, GREECE (IOTA Op). Laci, HA0HW, will once again be active as J48HW and SV8/HA0HW from Thassos Island (IOTA: EU-174, GIOTA: NAS-037, MIA: MG-124, WLOTA: LH-4186, QRA: KN20HS) between May 24th and June 3rd. He will operate mainly CW, with some SSB, RTTY and PSK31 as well, on the HF bands (mainly on 40/30/20/17 meters) and on 6 meters. He will enter the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band/High-Power using the callsign J48HW. His rigs are a FT-840 with a MOS-FET amplifier (300-400 watts) and an IC-706 (for 6m only). Antennas are a monoband Gps and dipoles on fishing poles. QSL via his home callsign, direct or by the HA Bureau.

NEW QSL MANAGER. As of May 9th, Buzz, NI5DX, is the new QSL Manager for Wayne, ZL2WL. Once the log file is transferred, Buzz will be able to confirm past contacts with ZL2WL, as well as any future QSOs. QSL cards will need to be printed, so please be patient and allow 6 weeks for the cards to be delivered. Wayne is very happy that his contacts will now

be able to be confirmed with a QSL card. He has not sent out cards since his wife, ZL2MAB, became a SK last November, as she handled the QSL duties.

PR2I (SA-024 and SA-071) QSL STATUS. Fred, IK7JWX, informs that there are many problems and he hopes to send all QSLs out soon. He is sorry for the delay.

SU9VB AND LoTW. Vladimir, UA4WHX, announced on May 9th: "Important! LoTW -- I have currently indefinitely totally discontinued uploading any newer latest QSOs until the system is slightly more manageable and more user logical and friendly." For QSLs, see QRZ.com under SU9VB.

QSL RECEIVED VIA LoTW: 7Q7PRO, EA3NE, GS3PYE/P, LU5FF, PJ4/OK7M, PZ5RA, TO3X, VA7PX, VK5BC/P, VP2V/NY6X and YJ0VK

QSLS RECEIVED VIA MAIL: 3B8/SP2FUD, 3DA0NW, 4L0A, 9L0W, C6AKQ, C91NW, CE9VPM, DP0GVN, DP0GVN/A, E51BKV, E51M, EA9AI, FK/I2GPT, GR100MGY, HC2/W7SE, HL1IWD, LU1ZI, PJ2T, T88ZO, TO4M, TT8ES, V25AA, VK0TH, VP9/W6PH, XV1X, YN2NW, ZF2OE and ZK2C

QSLS RECEIVED VIA THE BUREAU: 5R8FT, 8Q7ZZ, DT8A and VP8SDX

SILENT KEY. It is sad to report that Larry Gandy, AH8LG, became a Silent Key (SK) on May 8th. Tets, AH7C, reports, "He was one of the most active DXer and contester on the island. He also took care of very many DXers that were not only just visiting there but also going to other Pacific islands for DXpeditions. We lost a big star in the Pacific." OPDX and its readers would like to send out our deepest sympathy to his wife Uti/KS6FO, and the family and friends of AH6LG.

SV5, DODECANESE. Operators Roberto/I2RNJ and Piero/IK2IHY will be active as SV5/homecall from Rhodes Island (EU-001) between August 4-11th. Activity will be holiday style but on SSB only. Bands of operations were not mentioned, but they will use an IC-706 w/100w into a Multi-band dipole. QSL via their home callsigns and by the Bureau.

TF, ICELAND. Operators Bill/W4TAA and Pete/VE3IKV will be active as TF/VX3T from the south coast of Iceland between June 17-30th. Activity will be 6 meters CW and SSB from Grid HP83SU (and possibly some other grids) with 100 watts into a 8 element yagi. They will be looking for SSSP propagation to JA in the mornings and for Es or AuEs to North America at other times. The VX3T special callsign and prefix commemorates the 100th anniversary of the world-famous Calgary Stampede. QSL via VE3IKV direct.

TX5, CLIPPERTON ISLAND (Operation Back On). The Cordell Expeditions is pleased to announce a DXpedition to Clipperton Island in early 2013. The team of 24 will sail from San Diego on February 19th (2013), and will be active from Clipperton for 10 days starting around March 1st. They will be active on all bands and all modes, and will use DXA, the satellite-linked system that displays near-real-time log data on any Web browser. They state, "We invite your participation in this project, as a team

member, supporter, or callsign in our log!" The Clipperton Island Web page is at: http://www.cordell.org/CI/index.html

V8, BRUNEI. Members of the Mediterraneo DX Club will sponsor/plan another DXpedition, this time to Brunei (OC-088). The multi-national team (90% of the team operated during the 9N7MD DXpedition) will be active as V84SMD between November 13-22nd. Activity will be on 160-10 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. They plan to have 15 to 18 operators with 4 to 5 stations on the air 24 hours. Their equipment will be Icom 7000s and Elecraft K2s. Antennas will be 3 Spiderbeam (5 bands), 80m vertical full size, inverted L for 160m, vertical for 40m, vertical dipole for 30m and beverages for receiving. The operators mentioned are Henri/F1HRE, Michel/F5EOT, Jean-Luc/F6BIV, Gabriele/I2VGW, Pino/I8YGZ, Fabio/IK2LTR, Marco/IZ2GNQ, Antonio/IZ8CCW, Eric/ON7RN, UZ2HKC, Roslan/V85AVE, Nizam/V85AX, Mohammad/V85TX and Bimbo/YB3MM. QSL via IK2VUC, direct, by the Bureau or the OQRS. Logs will be uploaded to LoTW 4-5 months after the activity. A Web page is under construction and will be online soon at: http://www.mdxc.org/v84smd

VP5, TURKS AND CAICOS ISLANDS. Operators Rich/KE1B and YL Anna/W6NN are now active as VP5/homecall from Providenciales (NA-002) unitl May 17th. Activity will be holiday style on 40-10 meters using CW, SSB and RTTY. There will be 6 meter operations if the band is open. They are running 100 watts to a Buddipole. QSL via their home callsigns, direct or by the Bureau. All logs are uploaded to LoTW and eQSL.

XZ, MYANMAR (Update to OPDX.1037/1060). Simon, HS0ZIB/G6JFY, announced that he will be in Myanmar this Monday. Activity will be on SSB, and possibly PSK. Simon states, "My current transmissions are very sporadic because I am still commuting back and forth between Thailand and Myanmar. I understand that free accommodation is being arranged for me in Kawthaung (better be atop the big hill), and once I have an established QTH I'll be able to bring in more radio gear and build some better antennas. QSL cards are almost at the printer (meaning that Gennady has my initial image files, but I haven't yet given him the go-ahead to print)." For more details, updates, an online log search and QSL info, please visit his Web and Twitter pages at: http://www.xz1k.org
https://twitter.com/#!/xz1k

ZA, ALBANIA. Tevfik, TA1HZ, will once again be active as ZA1TC from Durres between August 1-7th. Activity will be on 80-10 meters using a Kenwood TS570D, FD-4 Multi-Band Windom antenna and 80m dipole. Operations also include an entry in the European HF Championship. During his spare time from the contest, he will may try to work some PSK31, especially on 30 meters. More details and QSL info are available on QRZ.com and the TCSWAT Web page.
